News From Galien and Vicinity

GALIEN TO ENTERTAIN AT HALLOWEEN

Spoolyghosts will Head the Ghost and Goblin Parade.

PRIZES TO BE AWARDED

Public Dance at the Harford Hall to Wind up the Evening.

Of chief interest among the local observance of Halloween is to be the annual Spook's Convention at Galien on the evening of Tuesday, Oct. 23, when the entire countryside will be guests of the town at a costume parade, award of prizes and public dance.

In the neighborhood of 100 appeared in costume last year, and it is expected that that number will be exceeded next Tuesday evening if the weather is favorable. A first prize of \$10 and a second prize of \$5 will be awarded for the most appropriate costumes worn. A number of other prizes ranging from \$1 to \$5 will be awarded for the most beautiful, the most ugly, the oldest costumed and youngest costumed persons.

The parade which starts the entertainment of the evening is scheduled to begin at 7:30 p. m. when the famous Spoolyghoster band will lead a root of revellers along Main street. Following will be the award of prizes and after that the dance at Harford hall with music by Bob Armstrong's orchestra of Michigan City.

The usual accompaniment of fortune tellers, ghost riders, stands and the like will be provided. A cordial welcome is extended to residents of Buchanan and elsewhere in the community.

93 Yrs. Old; Reads Without Specs and Keeps up with Style

L. A. Parker of Chicago, was a guest recently of Mr. and Mrs. Frank Lawson and called on Grandma Stacks at the Haven Hibbard Memorial at New Car-

listie, to congratulate her on her 93th birthday. Grandma spends most of her time reading, keeping herself informed on all late news developments and is able to read without glasses. Her hair is not bobbed but she keeps it curled in the latest style and is able to care for herself in every way.

Arthur Richmond Weds Sadie Wyant at S. B. Friday

The marriage of Miss Sadie Wyant to Arthur Richmond, both of Buchanan, was solemnized in the parsonage of the First Methodist Church of South Bend at 3 p. m. Friday, Oct. 18, Rev. Dunn of that city performing the ceremony.

Both are very well and favorably known here, the bride having made her home in Buchanan for the past several years and Mr. Richmond having been employed as freight clerk for the past several years at the local M. C. station. They will be at home to their friends at 811 W. Smith St. next week.

Printing—Prompt—Record

Clark Stock is On "Big Board"

(Continued from Page 1)

The Tractor department includes the manufacture of several types of gasoline propelled industrial vehicles adapted for transporting and hauling purposes in manufacturing plants and in railroad terminals, freight houses and yards. The department is located in the plant of the Company at Battle Creek and is managed and operated by the Clark Tractor Company, a wholly owned subsidiary of the Clark Equipment Company. The vehicles have been developed over a period of ten years. They are durable, efficient and economical in operation.

The Company has recently acquired a controlling interest of over 98 per cent of the Common Stock of the Frost Gear and Forge Company. The total Common Stock of that company amounts to 125,000 shares of no par value. The company has outstanding its offer to exchange its no par stock for the balance of the stock of the Frost Company on the terms stated above. The business of the Frost Company was established in 1907, and includes commercial forgings of gear blanks and cutting of gears. The Company for a number of years purchased a part of its gear requirements from the Frost Company and the control of that company was acquired to insure under all conditions satisfactory supply of gears as well as to accomplish manufacturing and selling economies.

All buildings housing the manufacturing equipment of the company are of brick construction with cement floors and all are equipped with sprinkler systems.

FORMER BUCHANAN MAN FIGURES IN ACCIDENT

Martin Schoenberg, former Buchanan music store owner, was involved in a disastrous car collision Wednesday when the truck which he was driving clashed with a car at the entrance of the Martin Hills golf course on U. S. 31. Two boys, Richard Sweeney of Water-vliet, and Arthur Sampson of Benton Harbor, who were hitching a ride on the running board of the car, were seriously injured.

FARMER ASSESSED \$5 FOR NONPAYMENT DOG TAX

August Schultz, farmer living near St. Joseph, was fined \$25.00 in a Twin City court last week for failure to pay his dog tax. This is the third arrest for such delinquency in Berrien County this fall.

Gift of Printing Press Influences Life History Of Two Generations

Over half a century ago in 1876, to be exact, William Roe returned from the Centennial Exposition at Philadelphia bringing with him as a present for his small son, a toy printing press and some type.

As a result of that gift the destinies of two generations of two different families were directed into the profession of journalism. For young Roe soon acquired some little proficiency and conceived the idea while he was yet in his early teens of printing a community newspaper. He accordingly issued a small 4x8 inch size, two leaf paper, dubbed "The Fireside Visitor," which contained neighborhood news and for which he secured second class mailing privileges through the Buchanan post office. In a short time he enlisted the aid of his cousin, Carleton Roe.

Now, nearly half a century after, the two men are still in journalism, each publishing a paper of his own, and the children of each are following in his footsteps.

When the two boys entered into partnership they enlarged their plans and issued a weekly magazine given over to essays and verse and dubbed ambitiously "The Literary Mateo." The first issue began with a Latin quotation from Ovid—"Sive favore huius—sive tibi grates candido lector ago." It ended with a sonnet written by Carleton Roe, the aged writer beginning "Oh that I could the beautiful days recall Of youthful pleasures."

Rolla wrote under the name of Hilario Frosticos and Carleton under the name of Munchausen. Much of the material the youthful editors wrote was clever and well phrased. In addition to their publication, they collaborated in writing for \$10 prizes offered by a Chicago paper and won several.

As they grew to manhood, they separated and Carleton took up the study of law, but before he had started in practice, he glimpsed an opportunity in the offer of the Bryan (Ohio) Press for sale. He bought it, although he had had no other experience than that he secured on the two papers of his juvenile days. Nevertheless, he made a success of his undertaking and is still publishing the same paper in partnership with his son.

Rolla also selected journalism as a definite career and is still publishing a paper, "The Weidman Messenger" at Weidman, Mich. The most remarkable sequel to the story is the fact that three of his children, Constance, Alice and Paul, ranging in age from 22 to 27 years, are publishing a weekly paper at Mt. Pleasant, Mich. The

young people were publishing a paper in southeastern Michigan, when they heard of the opportunity nearer home and shipped their entire plant to Mt. Pleasant. In less than a year's time they have built up a flourishing business, sharing in the expansion that followed the recent oil strike there. They live at the home of their parents at Weidman and drive 15 miles daily to and from work. Rolla Roe raised nine children, all of whom save one received training in country newspaper work.

NO TIDINGS YET RECEIVED FROM MISSING YOUTHS

ARNOLD ROTHFUCHS AND CARL LINSENMIER SUCCESSORS TO WANDERLUST

No word had been received this morning from the two missing Buchanan high school students, Arnold Rothfuchs and Carl Linsenmier, who left town a week ago Tuesday on foot after dropping postulatory notes in local mail boxes informing their parents that they were leaving for some destination unstated.

Both boys are members of the Senior class in the local high school and both played on the reserve football team. Young Rothfuchs is the son of Mr. and Mrs. Louis Rothfuchs, 205 Chipper street. His companion is the son of Clarence Linsenmier, Dayton farmer.

When last seen they were walking north on Portage street carrying tincoats, which were mistaken for tents, leading to the report that the boys were camping on the St. Joseph river. No word has been received since, according to Rothfuchs, the report that a card had been received from South Bend being a mistake.

The boys were practically without funds. The action of the boys was apparently the substitution of a runaway plot which included a number of their schoolmates, the others apparently changing their minds.

Descriptions of the two youths were sent to police of nearby cities and were broadcasted Saturday night from Chicago Station, WLS.

Mrs. Louis Rothfuchs, mother of Arnold, was prostrated for several days after his disappearance, but is reported to be better today.

The milk industry in Switzer, land supports more than one-third of the country's 300,000 families.

Another Old Timer Tells a Few Yarns About the Old Boys

The Old Timer that has been writing about things that happened years ago, said that he wanted someone else to write to freshen our memories of years ago when we were young and full of sport. I saw in your Record of last week an article about Ed Willard pitching a curve ball. That is true because I played ball with him way back in the 80's. Ed sure was some curve pitcher, at least we thought so. Well this comes under the head of sports.

Now we will say something about Daunt Morris, better known as "Jim" Morris. I think he lives in Elkhardt. He runs a billiard and pool room here back in the 80's upstairs over his brother's store. We boys called it the "burning stump." Daunt was some billiard and pool player. He could play most of the boys one hand and in one and two pockets. It was lots of sport for me to watch him play. Better than going to a circus or show.

BUILDING & LOAN BUYS SPARKS BLDG. FOR OFFICE ROOM

ACCUMULATED ASSETS NOW PERMIT OWNING OWN QUARTERS.

The Industrial Building & Loan Company, local home investment concern, set an example to its patrons during the past week by investing in a permanent home for its business purchasing for that purpose the Sparks building from Mrs. Nora Sparks. The Michigan state law permits a building and loan company to

sets pass the half million dollar mark. The assets of the Industrial Building & Loan Company were \$675,240.91 on Aug. 1, 1929. The company has occupied its present quarters over on the second floor of the First National Bank Building for the past 8 1/2 years. The move is made in order to provide it with an office on the ground floor, more accessible to customers. Secretary William Leiter stated that it was not likely that the company would move before the first of the year.

Rebekah Party Inspects the Scenic Glories of Mich.

The Buchanan delegation to the state convention of the Rebekah lodge at Escanaba returned home Saturday with glowing accounts of the beauty of the trip through central and northern Michigan and back through Wisconsin. The party comprising Mesdames Mae Best, Gladys Remington, Edith Willard and Sylvia Ellis, drove to the Strait of Mackinac on the first day out, spent the night there and drove to Sault Ste Marie and into lower Ontario the next day. They then drove along the shore of Lake Superior to a point north of Escanaba and thence down through the Upper Peninsula by way of Iron Mountain and Witch Lake, arriving in the convention city Sunday evening in time for the church services which opened the program. The convention closed Thursday evening, after voting to meet next year at Battle Creek. The party then returned through Milwaukee and Chicago, staying over night Friday at the home of Mrs. Ellis' sister-in-law, Mrs. Maude Lee.

Buchanan Party at 60th Anniversary Woman's Society

A number of members of the lo-

cal Methodist Women's Foreign Missionary Society plan to attend the celebration of the 60th anniversary of that organization which is to be held at Columbus, O., beginning this evening and continuing a week. Mrs. A. H. Miller left yesterday by train to attend the first program of the week, which will be held at the King's Avenue Methodist church and will last from Thursday evening until Sunday afternoon. An auto party made up of Mesdames William Leiter, Mrs. Ruth Roe, Mrs. Edna Reist, and Miss Laura Hunter, will arrive Sunday to attend the second section of the program which will be held at Royal Hall, starting Sunday evening and lasting until Thursday evening.

Miss Mayme Allen Former Buchanan Resident Expires

Miss Mayme Allen, former resident of Buchanan, died Monday at the home of her father, Byron Allen, at Benton Harbor, after many years of invalidism. Miss Allen was born and grew to womanhood in Buchanan, leaving here when her parents moved to Benton Harbor, when the furniture factory operated by Spencer & Barnes was moved to that place. Byron Allen was an employee of the firm. She is survived by her father, the remainder of the family having died before. Two cousins live in Buchanan, Mrs. Tenny Bunker and Mrs. Lillie File.

The funeral was held at 2 p. m. Wednesday from a Benton Harbor undertaking parlor and interment was made in Oak Ridge cemetery beside her mother.

"Won't you give a shilling to the Lord?" said a Salvation Army girl to an old Aberdonian. "How auld are ye, lassie?" he inquired. "Nineteen, sir." "Ah, weel, I'm past seventy-five. I'll be seein' Him afore ye, so I'll hand it to Him myself."

H. S. ORGANIZES FOR TICKET SALE FOR BENEFIT PLAY

THE WHOLE TOWN'S TALKING PRESENTED BY THE CLARK PLAYERS, OCT. 31, NOV. 1 AND 2.

Meetings of the students have been called by the presidents of the four high school classes to arrange for the distribution and sale of tickets for the benefit play presented by the Clark Players in the Clark Theatre, Thursday, Friday, and Saturday nights, Oct. 31, Nov. 1 and 2.

The play, "The Whole Town's Talking" by Anita Loos, the well known author of the popular novel "Gentlemen Prefer Blondes," is a screamingly funny comedy that no person, child or adult, in Buchanan can afford to miss seeing. Under the able direction of M. L. Hanin, the play is going into its final rehearsals. The entire proceeds from the three nights will go toward paying for the new uniforms in which the thirty-two members of the high school band will appear on the stage between the second and third acts.

Students! Let's go out and sell our tickets! Let's show Mr. Robinson, by our efforts, that we appreciate the wonderful work he has done for our school, and prove to the Clark Players that we are as willing as they to work for the financial success of the play. It is our school, it is our band! The townspeople are ever ready to help us put over any worthwhile project. Tickets are 50c for adults and 25c for children under 12. Let's go!

Covered a Wide Range Mrs. Jones—John, I have been talking for over two hours and now I want your opinion on the subject. Mr. Jones—Well—er—on what subject my dear?

5 Powers Spend \$1,500,000,000 on Upkeep of Navy

Close to \$1,500,000,000 is being expended yearly by the five great naval powers, Britain, the United States, Japan, France and Italy on their respective navies. This vast expenditure goes for construction, repairs and maintenance.

Stupendous as it is, the vast sum is still a very appreciable saving over what naval costs would have been had not about a ship building holiday—put an end to naval competition, at least in certain categories.

The great outlay discloses also how much room there is for reductions and savings. If, as President Hoover and Ramsey McDonald hope, an agreement can be reached at the forthcoming naval conference arranged by them by which the limitations of the Washington conference can be extended to auxiliary ships, enormous savings will result.

In 1921 when the Washington conference was held, the United States spent \$443,980,000 on its navy, Britain \$406,033,000, France \$21,609,980 gold standard francs, Italy \$1,088,000 lira and Japan \$48,519,000 yen.

Since then the naval outlays for the United States, Britain and Japan show an appreciable decrease. Italy and France realized large savings for several years, but since 1925 there has sprung up a sharp naval race between them and their navy costs are again on the increase.

Britain shows the largest drop in naval expenditures in the seven-year period, cutting her outlay for this purpose from \$400,000,000 for the current year. The United States dropped to slightly over \$300,000,000.

President Hoover and Mr. MacDonald have evolved a formula of reductions by "obsolescence," that is, not scrapping existing craft but extending their period of ser-

vicability and then decommissioning them without building new ships for replacement. Of capital ships, the United States has 18, totaling 223,850 tons; the British Empire, 20, totaling 580,450 tons; Japan, 10, totaling 301,320 tons; France, 9, amounting to 194,544 tons and Italy seven of 133,070 tons.

In cruisers the United States has 10 of the smaller type built, eight 10,000-ton ships building, and 15 others authorized. The British Empire has 52 mostly small ships of this class with seven larger vessels building and three provided for. Japan has 23 built, all but seven smaller vessels and five large ships building. Italy and France have 11 each of this category of ships.

Of destroyers the United States has 284, Britain 182, Japan, 115, France 82 and Italy 90.

Handy Hannah Helps Housewives

Treat a wasp sting by touching it with strong liquid ammonia or common washing soda.

A crease of tartar solution applied as a paste and left overnight (sometimes repeating) will remove grass stains from white woolen fabrics.

A temporary stopping for a leak in either a gas or water-pipe may be produced by working powdered whiting and yellow soap into a paste. Press it into the leaking part of the pipe, and put on sufficient to make the hole airtight.

Rub the hands in dry salt after having had them in water for a length of time; afterwards rinse them and keep dry. If this is done daily it will keep the hands soft, and white.

Silk stockings should be washed in cold water and with white soap. Afterwards lay them flat in a fine towel, roll it tightly, and let the stockings remain until dry. Finally, rub a piece of dry flannel to produce a gloss.

Women of Greenland still wear hoods similar to head dresses of the middle ages.

Harmonious Colors On Bridge Tables Reduce Mortality

When one spends an evening, or many evenings, at a bridge table, why not decorate it? In the best shop windows in the large cities are covers and cushions of embossed fabric in red and black, decorated with gay parrots and snappy designs in contrasting and harmonizing colors, with table covers in black with more gay parrots in the corners. Help make the tables attractive. The winning of the game is perhaps easier when the furniture used in the game looks the best.

Small Animals Are Bird-Killers

Among mammals the most dangerous enemies of birds, including game birds, are cats, free-roving dogs, rats, and weasels; of lesser importance are minks, foxes, badgers, skunks, opossums and raccoons. Even the little ground squirrels, or pocket-puns of the prairie states, eat the very small young of game birds. Snakes sometimes figure prominently as egg thieves and bull frogs, snapping turtles and such fish as pike, pickerel, and bass, if allowed to live in a duck pond will seize and devour a great many ducklings and even attack adult birds.

Wrong Number. The motorist had an accident with his light car on the road. He limped to a telephone booth and called up the nearest garage.

"Hello," he said. "I've turned turtle. Can you do anything for me?" "I'm afraid not," came the sweet feminine reply. "You've got the wrong number. What you want is the zoo."

There were more than 20,000 students in the medical colleges of the United States last year.

1st insertion Oct. 24; last Dec. 5
STATE OF MICHIGAN, the Circuit Court for the county of Berrien, in Chancery.

Charles Francis Miller, plaintiff, vs. The Federal Realty and its unknown heirs, devisees, legatees and assigns, defendants.

Suit pending in the circuit court for the county of Berrien, in chancery, at the city of Saint Joseph in said county on the 16th day of September, 1929.

In this cause it appearing from the bill of complaint in the clerk's office that certain of the defendants herein are not residents of the State of Michigan. On motion of Geo. H. Batchelor, plaintiff's attorney, it is ordered that the above named defendants cause their appearance to be herein within three months from the date of this order and in default thereof said bill of complaint be taken as confessed by said defendants.

And it is further ordered, that within forty days, the plaintiff cause a copy of this order to be published in the Berrien County Record, newspaper printed, published and circulating in said county, and that said publication be continued therein at least once in each week for six weeks in succession, or that the plaintiff cause a copy of this order to be personally served on said non-resident defendants at least twenty days before the time set for their appearance.

The bill of complaint herein, waits 12 miles by road daily to make his route, and you can nearly double this to allow for the distance from the sidewalk to each mail box. He carried a total of 1353 pounds of mail, comprising 10,444 pieces, during the first 12 working days of October. Striking an average, it will be found that he started each day with an average net weight of 52 pounds of mail. He served a total of 493 possible stops, averaging 208 actual stops per trip.

Carrier No. 2, who is Ken Blake in private life, walked a total of 13.6 miles daily on his two trips, not counting the entrance to each place of delivery. He carried a total of 1,008 pounds of mail, comprising 10,905 possible pieces. He averaged 202 stops each morning and 216 stops each afternoon out of a possible 431.

On the approximately 300 working days on which these carriers travel their route they bring over a distance equal to that from New York City to San Francisco and back, without any inducements from Cold Cash. Fyfe or recognition in the sporting headlines. They report for duty at 6:30 a. m. daily, leave at 7:30 a. m. on their route and are back at the office again at 1:30, bearing punctures or breakdowns. They then work until noon sorting for the afternoon delivery. After an hour off for refreshments, they return to the post office at 1 p. m., finish sorting mail and leave the office at 1:30 p. m., talking about two hours for their trip. This teaches us that a mail carrier does not have a lot of time to study the pictures on the post cards, however, much he might enjoy them.

Each mail carrier takes with him as standard equipment a package of safety razor blades, a box of corn patches and a spare rubber heel. After 3:30 p. m. he has the day for himself to practice up waiting for the next day's marathon.

After perusing the above, it is the heartfelt wish of the Record and the local postal authorities that any of our readers who have a spark of Christian charity in their make up will move their mail box closer to the sidewalk, or at least not be quite so free to ask the postman for a nickel and kick it for me, will you please?

When Benjamin Franklin recommended a plan for daylight saving more than 150 years ago, the idea was ridiculed.

Any way, you can believe it or not and you probably won't but Postmaster Herbert Batchelor walked the rounds after both of them last week checking on their mileage and number of pieces carried and has consequently furnished the Record with the following interesting details.

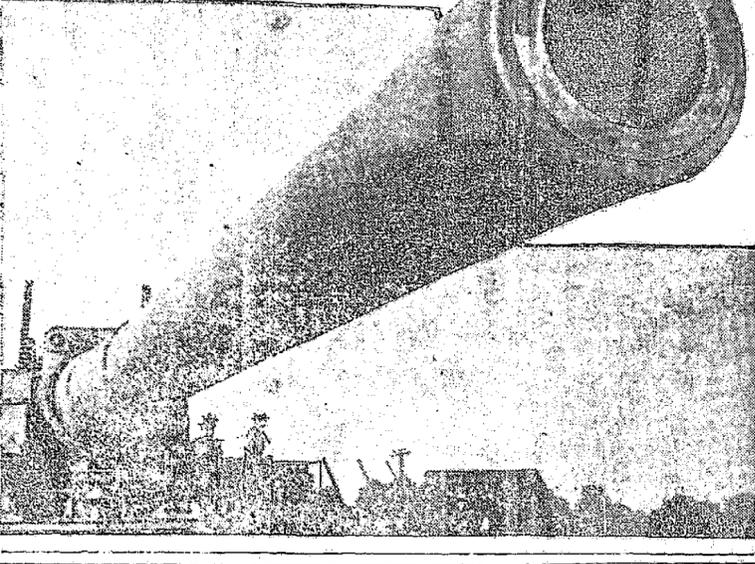

Carrier No. 1, known to his friends as Allan E. Matthews, waits 12 miles by road daily to make his route, and you can nearly double this to allow for the distance from the sidewalk to each mail box. He carried a total of 1353 pounds of mail, comprising 10,444 pieces, during the first 12 working days of October. Striking an average, it will be found that he started each day with an average net weight of 52 pounds of mail. He served a total of 493 possible stops, averaging 208 actual stops per trip.

Carrier No. 2, who is Ken Blake in private life, walked a total of 13.6 miles daily on his two trips, not counting the entrance to each place of delivery. He carried a total of 1,008 pounds of mail, comprising 10,905 possible pieces. He averaged 202 stops each morning and 216 stops each afternoon out of a possible 431.

On the approximately 300 working days on which these carriers travel their route they bring over a distance equal to that from New York City to San Francisco and back, without any inducements from Cold Cash. This teaches us that a mail carrier does not have a lot of time to study the pictures on the post cards, however, much he might enjoy them.

Big Noise of the Army Ordnance Meeting

One of the features of the Army Ordnance association meeting at the Aberdeen proving grounds was the firing of this 16-inch gun, one of the biggest in the world. It hurled projectiles twenty-five miles to sea.

Please Read Carefully and Then Move

(Continued from Page 1) got how to walk. The government provides the carrier with a new suit which he pays for, a park, and a chart of course, which he may cover on bicycle, roller skates or by such other means as his fancy may dictate. As a matter of fact he usually accomplishes his route by placing one foot on the ground, setting the other about three feet in front of it and propelling the hind foot past the front foot an indefinite number of times until he is back at the post office. If, as seems likely, each mail carrier walks in the neighborhood of 20 miles daily, it will readily be seen that he picks 'em up and lays 'em down about 35,000 times daily in the course of his duties, not mentioning the long hike which he takes into the country for pleasure each evening.

Anyway, you can believe it or not and you probably won't but Postmaster Herbert Batchelor walked the rounds after both of them last week checking on their mileage and number of pieces carried and has consequently furnished the Record with the following interesting details.

Carrier No. 1, known to his friends as Allan E. Matthews, waits 12 miles by road daily to make his route, and you can nearly double this to allow for the distance from the sidewalk to each mail box. He carried a total of 1353 pounds of mail, comprising 10,444 pieces, during the first 12 working days of October. Striking an average, it will be found that he started each day with an average net weight of 52 pounds of mail. He served a total of 493 possible stops, averaging 208 actual stops per trip.

Carrier No. 2, who is Ken Blake in private life, walked a total of 13.6 miles daily on his two trips, not counting the entrance to each place of delivery. He carried a total of 1,008 pounds of mail, comprising 10,905 possible pieces. He averaged 202 stops each morning and 216 stops each afternoon out of a possible 431.

On the approximately 300 working days on which these carriers travel their route they bring over a distance equal to that from New York City to San Francisco and back, without any inducements from Cold Cash. Fyfe or recognition in the sporting headlines. They report for duty at 6:30 a. m. daily, leave at 7:30 a. m. on their route and are back at the office again at 1:30, bearing punctures or breakdowns. They then work until noon sorting for the afternoon delivery. After an hour off for refreshments, they return to the post office at 1 p. m., finish sorting mail and leave the office at 1:30 p. m., talking about two hours for their trip. This teaches us that a mail carrier does not have a lot of time to study the pictures on the post cards, however, much he might enjoy them.

Each mail carrier takes with him as standard equipment a package of safety razor blades, a box of corn patches and a spare rubber heel. After 3:30 p. m. he has the day for himself to practice up waiting for the next day's marathon.

After perusing the above, it is the heartfelt wish of the Record and the local postal authorities that any of our readers who have a spark of Christian charity in their make up will move their mail box closer to the sidewalk, or at least not be quite so free to ask the postman for a nickel and kick it for me, will you please?

When Benjamin Franklin recommended a plan for daylight saving more than 150 years ago, the idea was ridiculed.

Anyway, you can believe it or not and you probably won't but Postmaster Herbert Batchelor walked the rounds after both of them last week checking on their mileage and number of pieces carried and has consequently furnished the Record with the following interesting details.

Carrier No. 1, known to his friends as Allan E. Matthews, waits 12 miles by road daily to make his route, and you can nearly double this to allow for the distance from the sidewalk to each mail box. He carried a total of 1353 pounds of mail, comprising 10,444 pieces, during the first 12 working days of October. Striking an average, it will be found that he started each day with an average net weight of 52 pounds of mail. He served a total of 493 possible stops, averaging 208 actual stops per trip.

Carrier No. 2, who is Ken Blake in private life, walked a total of 13.6 miles daily on his two trips, not counting the entrance to each place of delivery. He carried a total of 1,008 pounds of mail, comprising 10,905 possible pieces. He averaged 202 stops each morning and 216 stops each afternoon out of a possible 431.

On the approximately 300 working days on which these carriers travel their route they bring over a distance equal to that from New York City to San Francisco and back, without any inducements from Cold Cash. Fyfe or recognition in the sporting headlines. They report for duty at 6:30 a. m. daily, leave at 7:30 a. m. on their route and are back at the office again at 1:30, bearing punctures or breakdowns. They then work until noon sorting for the afternoon delivery. After an hour off for refreshments, they return to the post office at 1 p. m., finish sorting mail and leave the office at 1:30 p. m., talking about two hours for their trip. This teaches us that a mail carrier does not have a lot of time to study the pictures on the post cards, however, much he might enjoy them.

Each mail carrier takes with him as standard equipment a package of safety razor blades, a box of corn patches and a spare rubber heel. After 3:30 p. m. he has the day for himself to practice up waiting for the next day's marathon.

STATE TO RENAME LAKES, STREAMS TO AVOID DUPLICATES

FINAL AUTHORITY IN NAMES RESTS WITH SUPERVISORS OF EACH COUNTY.

The name of any lake or stream in Michigan can be changed only by authority from the Board of Supervisors of the county in which that particular lake or stream is located and the State of Michigan intends to usurp no authority in this according to the State Committee on changing geographical names.

This committee was appointed some time ago by Governor Fred W. Green to formulate some system by which names of lakes and streams could be changed, principally to avoid duplication. The committee is composed of George N. Fuller of the State Historical Commission, chairman; R. A. Smith, state geologist and L. R. Shoemann, head of the Land Economic Survey of the Department of Conservation; and acting in an advisory capacity are: Geo. E. Bishop, secretary of the Upper Peninsula Development Bureau; Hugh J. Gray, secretary of the Michigan Tourist and Resort Bu-

reau and T. F. Marston, secretary of the East Michigan Tourist and Resort Association. A complete system of routine by which names of lakes and streams can be changed, has now been formulated and announced by the Board.

The state of Michigan has many lakes and streams which are duplicated in names, according to the Committee. There are innumerable Grass, Mud and Crooked lakes and several Trout, Silver and Crooked Creeks. This has often caused confusion in the past. To avoid this duplication the Committee has formulated a system by means of which changes in names are to be made.

A desire to change the name of a lake or stream must initiate with the people of the county in which the body of water is situated. By petition or request, the board of supervisors may be asked by the people to take some formal action toward changing a name. This petition presented to the supervisors must state the name of the lake or stream whose name it is desired to change; the reasons for making the change, and the preferred name.

If the board of supervisors agrees and adopts a formal resolution asking that the name of the lake or stream be changed a copy of the resolution may be sent to the state committee. The committee will consider the petition. It will determine whether the preferred name is duplicated any place in the state and whether a change in name is necessary and desirable. If the state committee considers the petition favorable, the petition together with the preferred name.

If the board of supervisors agrees to adopt a formal resolution asking that the name of the lake or stream be changed, a copy of the resolution may be sent to the state committee. The committee will consider the petition. It will determine whether the preferred name is duplicated any place in the state and whether a change in name is necessary and desirable. If the state committee considers the petition favorable, the petition together with the preferred name.

Recommendation will be sent to the National Board on geographical names. This board, in turn, will consider the petition. Its decision is final. If the National Board approves the change, then the name of the lake or stream will be formally changed and the new name will be listed on all official maps and documents.

"Since the state committee was appointed some time ago, the public has obtained an erroneous impression as to its objects and purposes," chairman Fuller said, in announcing the formal name-change plan. "The public has been under the impression that the committee intends to change the names of lakes and streams wholesale and without consent of the local residents. This is not true. We will change no names at our own initiative. The initiative must come from the county in which the lake or stream is located. The only function of this com-

mittee is to provide the machinery by which names may be changed officially; to provide some official local authority that can consider the desired change in name and to provide means of making official decisions."

The committee is now ready for action whenever formal resolutions from boards of supervisors are presented to it for consideration.

CHURCH ANNOUNCEMENTS

Methodist Episcopal Church

Sunday school at 10 a. m. Mr. Elmer Ormiston, superintendent. We study lessons that are most practical for every day living and if you do not attend any other Sunday school your presence will be appreciated and you will be made most welcome.

Sunday morning service at 11 o'clock. The special number will be a vocal solo by Mr. Hyink. Sermon subject, "What is the Main Business of the Church?" An hour of fellowship and worship will do you untold good, try it.

Epworth League at 8 o'clock. Mr. Hyink was our leader last Sunday and it was a splendid meeting. We are looking forward to a good meeting this Sunday. This is a meeting especially for young people, so any young person desiring really good times try the League for a while. Last Saturday the Leaguers had a wonderful party at Tower Hill and then went in a body to the high school game at Three Oaks, no wonder the boys did so well.

Evening service at 7 o'clock. Subject of address "Radio Religion". We are glad to see so many attending these Sunday evening services. We try to make it a happy helpful hour. Every one is invited. This Sunday will be especially attractive to radio fans. Come and bring the folks.

Midweek service Thursday at 7:30. Mr. Hyink will be the leader. Come and hear him. Services at Ononoko: Morning worship at 9. Sunday school at 10. Folks in this neighborhood will find these services quite worthwhile. Join your neighbors in worshipping God and in friendly fellowship. It will do you and them good. Start Sunday.

Thomas Rice, Minister.

Church of Christ

Unified Bible school and preaching service at 10 a. m. Bible study, "Christian View of Recreation," Mark 2:13-28. Sermon subject, "The Purpose of the Church."

Scout Troop No. 42 will meet at the church Tuesday at 7:15 p. m. Every scout on the job! Something doing!

The Loyal Workers class will meet for a social meeting at the church Tuesday evening. Mid-week service Thursday evening at 7:30 o'clock. Devotionals conducted by the pastor. Study, "A Carpenter Builds a Church."

Sunday evening service at 7. Subject, "The Hallelujah and the Restoration Movement."

There will be a young people's get-together meeting at the church Friday evening, Oct. 24, at 6:30. A good program has been arranged.

Rally Day Sunday. Come and be one of 350 to enjoy a new type of Rally Day program. Something different.

Evangelistic services will begin Sunday, Nov. 10, and close Nov. 24. The pastor will be the evangelist and Walter F. Scott of Wheatland, Ind., will conduct the singing.

J. L. Griffith, Minister.

The Old Timer's Corner

Old Timer Describes Communion With Nature Experienced By Youth in His Life on the Farm

From force of habit or for some other reason, I feel the urge to send in another letter to the old "corner" and for a day or so I have been thinking along the lines of when I was a small boy running about the farm and with my eyes and ears wide open and drinking in the inspiration that youth alone can conceive, but does not then appreciate, the Communion of the "inspired" farmer lad with the things in nature.

Let us just close our eyes to the "unreality" of modern things as we have learned with sophistication in life, and turn back the pages to the days when we were perhaps seven or eight or nine years of age, and had the love of all Nature within us, and didn't know it. We can start at any point, during the summer day, taking a peek at things as we pass along and see what they seem to say to us, and how we react to their messages without the slightest knowledge of it all. We will stand on the side lines and watch this youngster as he passes the day among his friends on the farm.

In the garden he is sent to do some routine work and as he passes through the wide gate at the upper end of the garden he hesitates and pulls out a few weeds that he sees growing among the lettuce, along the fence in the "old frame," and he brushes his hand over the crisp, crinkly leaves of lettuce and seems to animate them to do their best with no hindrance from weeds pushing their way out of their natural growth. He gives them an affectionate look and passes on past the rows of blackberry vines and into the garden, where he finds a row of corn, the beans and peas and hets etc., needing a helping hand. He gets busy with hoe and hand garden plow (incidentally it is one that was made by George Black), and as he destroys the weeds and gently pulls fresh soil around the plants they almost smile back at him with a knowledge that they are safe and will not be hampered with weeds or lack of space to turn over in the warm breeze and their growth seems to bound along with the magic touch of confidence, as he passes them and on he goes through the entire patch, leaving it smiling and green in the sunshine.

He notices that the strawberries are getting ripe and bends to try one that looks good and says "It is good. Next, he goes to the barn and puts the harness on a good old Jack and after giving him a good old drink from the horse tank, latches him to the double shovel plow and with arms up, stretched to reach the handles he "hills up" the potatoes. There are some "bugs" coming along in a new "crop" to hinder the growth of the potatoes, so after "hilling up" and he has finished this little job, he goes to the tool house and gets the sprayer and mixes some gas and goes out to rid the potatoes of their destroyers. He notices that the cabbage plants are doing fine and that very few have a worm or two on them, which he destroys, picks off a few big ugly looking worms from the tomato plants and with a very young farmer, scans the raspberries and takes note of the general condition of the garden friends and decides that it is all right for the present and puts away his tools and goes out for other things to do.

As he passes through the barn yard the old hens "caw" to him and follow him around, hoping to get a handful of grain of some sort. Some are busily clucking to their little chicks, others are following in the dry dust by the side of the barn. He goes to the granary and brings out a handful of wheat and squats down to watch them come and pick it from his hand. He talks to them and they seem to know what he says but all they can do is to reply in their own way, a series of caws and clucks. Then he turns to the grape vines where he has been instructed to pull the weeds and train the growing vines in a fenced-in place down along the road, is a small peach orchard and in this "lot" are two or three young calves who have been fed earlier in the day but who think it is time to eat again when they see our "boy" coming their way, so they come close to the fence and "baw" to him, to reach thru and pet them and notifies them that there is nothing doing in the way of eats for a while, but advises them to try to get busy with the green grass that is at their feet. They are too young to know that grass is good for them but they are somewhat mollified and he passes on to the yard and is called to the kitchen door to get some wood for the kitchen stove for Mother.

Little odd jobs and all in the routine of his day, but in every moment of the time he is shedding his nature among the things of a sure and he is happy and so are they.

About this time Mother calls a "rain" and tells him that "the bees are swarming" and for him to run out to the field and to his father. That is always an interesting sight for the boy and he stands a safe distance away and watches the operation of establishing the new family of bees in their new home. With sleeves tied tight around his arms and

and finger tips. The Harris family were unusual in musical endowment. Indeed Lew Harris, as "lion bass" went for years with the Swiss Bell Ringers Concert company. Besides several good common voiced singers did their part in the Roe singing class. Mr. Roe, like his brothers, was self-centered—not a mixer. But his class was immensely popular for several summers. Sawing lumber for sale was his working day's occupation. The singing class Sunday afternoons was his recreation.

It was recreation for the youth for miles around as they came in lumber wagons to the class.

Those three spring seats on each lumber wagon were to the "seats of the mighty". I was too old then for dolls and too young for beans. Hence my envy of the big girls who could ride on spring seats to the singing school, girls who have lived to see the butcher, the baker and garbage taker and others galore, all come to the door in automobiles at the call of the telephone.

Here's greetings to the Gallen River Valley Choir. Paved streets and automobiles, successors to the corduroy roads and lumber wagons, is your heritage from those who tramped down the nettles of a civilization in its beginnings. Success to your endeavors.

When Buchanan was a cluster of houses on McCoy's creek, a family "took up" land a mile and a half from the creek, now Buchanan, built a log house and with the passing of years became well to do, substantial, highly respected citizens of Buchanan township. The wife and mother was the most efficient person I have ever known. She sheared the sheep, picked the geese, planted corn, made maple sugar, cooked and kept house, besides milking, spinning and weaving jeans and woolens for her family and carpets for the neighbors. The husband was an industrious, upright man, a kind neighbor and a good provider for his family. The gentle christian mother often said "my children will not need to work as I have. And yet, tragedy was their heritage. She dropped dead while preparing for a family reunion in their handsome new farm home. The 60 year old husband married a sixteen year old girl four months later and went west.

Holmes Recalls Start of Stove Mfg. Industry

I enjoyed the letters in last week's Record from Mrs. Winch and also from John Holmes. I shall hope to see others represented in this week's Record in the old "corner" and to see more letters from them.

OLD TIMER.

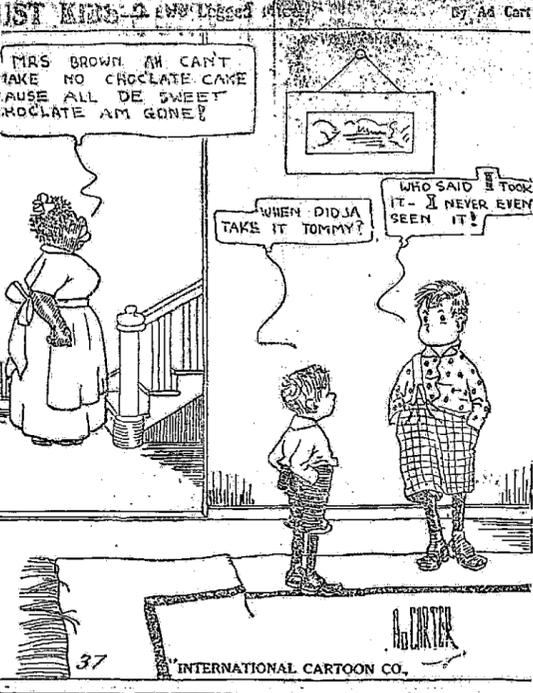

TALES FROM AWAY BACK

Here is a mate for "Old Timer's" story of the boy's version of "the comforter." "Arthur," said the Sunday School teacher, "What is today's golden text?" "It's me, don't get scared?" was Arthur's interpretation of "It is I, be not afraid."

Mr. Holmes' story of dipping and moulding candles was staged in every household in Buchanan. He was lucky not to be a girl then wasting his youth trying to draw candle wicks through the points of the moulds.

The Gallen River Valley choir as told of in the Record, was of great interest to me. I knew the Gallen River from its rise to marsh expansion in New Buffalo. There it drained into Lake Michigan, there, too, grew pond lilies in every household in Buchanan. He was lucky not to be a girl then wasting his youth trying to draw candle wicks through the points of the moulds.

A good story in connection with the railroad fuel comes from Dowagiac. A short way west from the depot there is a heavy fill where the track crosses Dowagiac Creek. On the bottom land and the street to the north of the track stood a low one story shop where P. D. Beckwith had a foundry and machine shop and made roller grain drills. When the trains started out from the depot the stoker fired up just about as they were opposite the Beckwith shop and when he found a stick so large it would not go into the fire box he threw it down the embankment until several cords of first class knotty wood accumulated. Mr. Beckwith did not like to see all of that wood go to waste, so he made a large, perfectly plain, heavy cast iron stove, with a door large enough to take in that wood and so began using it for heating his shop. The R. agent reported the matter to

INTERNATIONAL CARTOON CO.

the officers at Detroit and it was but a short time before there was a delegation out to see Mr. Beckwith and his stove. When those fellows left Dowagiac Mr. Beckwith had an order for enough of that pattern of stoves to supply every passenger room on the road. Ungainly looking but great heaters. That was the start of the Beckwith stove business and took P. D. Beckwith out of the "plodder" class. As soon as he had the railroad contract filled he began working on a stove more suitable for household use.

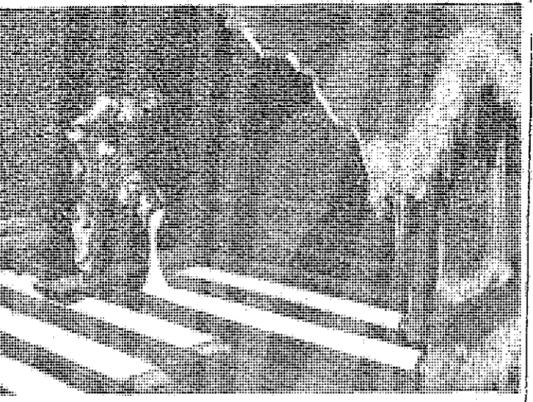

In the account of the early history of the Miller school is mention of a man whom I have seen but little mention of and that was Thomas Morley, first teacher of that school. I never saw him but have known a lot about his family. He bought the east half of the southeast quarter of section 32 of Buchanan township, just one mile north of the village of Dayton. He married Celia Glover and they had six fine children, three sons and three daughters, and when they were all quite young he enlisted in the northern army and went away to the south. All went well with him for a time and then all knowledge of his whereabouts stopped and he was never heard of again so far as was known in that neighborhood. The family grew to man and womanhood and so far as I know the only one remaining is the youngest son, Thomas, whom I met in Buchanan in August 1925. The second son, William, went to Fontenelle, Ia., into the implement business and his son, William, is still continuing the business. The twin sister of William, Jane, married Israel Young and came to Iowa. The rest spent their lives in their native neighborhood.

School nurse says all girls should know this

TALKING to a roomful of high school girls on personal hygiene, an experienced district nurse said: "One of the basic rules of health for girls is to keep the system functioning naturally at all times. Normal exercise and diet habits should be encouraged. But when necessary there's no harm in taking nujol, since it works mechanically and can't disturb the normal functions of any organ of the body. Particularly with girls, there are times when nujol should always be taken. Take a spoonful every night for a few days. It's a thoroughly safe and harmless method. It won't cause distress or gas pains or griping."

Nujol is different from any other substance. It contains no drugs or medicine. It can be taken safely no matter how you are feeling because it is so pure and harmless, and works so easily. Every woman should keep a bottle on hand. Every druggist has this remarkable substance. Get the genuine.

Quick, Easy, Inexpensive INSULATION

SIMPLY pour Thermofill dry—just as it comes from the bag—between your attic floor joists, as shown above, and get real comfort, summer and winter.

This modern insulating "blanket" saves 60% of the heat lost through the roof. The fuel saving alone will quickly pay for it.

New homes can have Thermofill poured between inner and outer walls as well as in the attic, giving complete Thermofill insulation. Made by the United States Gypsum Company—so you know it will do what we say.

The low cost will surely surprise you. Let us estimate for your house.

Your car will be worth more next year if it's an Eight!

You're out of date without an EIGHT!

On every hand you hear people talking Eights. And, what is more convincing, you see them buying Eights.

In 43 states,* for the first seven months of this year, new car registrations above \$1000 showed a 94 per cent increase in Eights—an 18 per cent decrease in Sixes. (Five states do not compile registrations by engine types.)

Every fine car in America is an Eight. In fact, 41 per cent of all makes of American cars are Eights.

Is it any wonder that thousands intending to buy new Sixes are hesitating?

What is a Six going to bring in next year's trade-in markets? How can it possibly measure up in value with an Eight? Those are the questions that every thinking motorist is asking himself.

Right now, at the price of a Six, you can buy a brilliant new Studebaker Eight. A champion Studebaker Eight with all the extra power, extra smoothness, extra flexibility and extra value that only an Eight can give.

... an Eight built by Studebaker, now enjoying its 77th successful year—now the largest producer of Eight cylinder cars in the world... an Eight by Studebaker, holder of 11 world records of speed and endurance and more American stock car records than all other cars combined.

Choose an Eight from the three great Studebaker lines of Eights now available at new low One-Price prices. Your car will be worth more a year from now if it's an Eight.

"In Michigan, Eights increased 88 per cent while Sixes declined 17 per cent."

Studebaker Eights

U. S. GOVERNMENT HAS A LONG-TIME ROAD PROGRAM

25 PER CENT OF PROGRAM IS DONE AFTER 12 YEARS OF CONSTRUCTION.

Road building under the present plan of Federal cooperation with states has been in actual operation about twelve years. During that time there has been a growth in the motor industry and achievements in highway construction that are not generally realized by the public. Also, it is not generally known that the states themselves have taken the leadership in roadbuilding to such an extent that their own expenditures in this form of public investment have gone far beyond like expenditures on the part of the Federal Government. In other words they have outstripped Federal Aid, in their zeal to complete their respective state systems as early as possible.

It will be the aim therefore to carefully restate the whole highway program for the purpose of making clear the logical steps by which roads have been brought to their present state of improvement, bearing in mind the fact that the original job for which the Federal Aid plan was devised is as yet little more than 25 percent over which traffic may move at lessened fuel cost and upon which road repair expense may be held to a minimum.

Only those upon whom the duties of road building have been placed in a heavy and fast traffic age can appreciate the time it has taken and the extreme patience which has been required to separate road building into its logical economic divisions. These divisions are township, county, state and interstate. They have been forced by the necessity of establishing responsible construction units through which the motorist's money may be applied to the road.

It should be remembered that when the horse had the road, the travel range was defined mainly by the township and for this reason the township was the basic base of road improvement. But the automobile as everyone knows, changed all that with its greatly widened range, and in doing so it brought the public face to face with the unescapable duty of bringing road construction up to a higher and more economic standard. It was like pulling teeth to use a familiar phrase, to get township consent to county control over roads that logically belonged in the county system. The same teeth-pulling difficulty was encountered in getting county consent to state control over roads that logically belonged in the state system. Much outcry on this point was heard in many unimproved school houses throughout the land, and many hands pointed with warning alarm toward centralized political power, either at the county court house or at the state capital. The whole controversy was shot through with politics and selfish aims.

But in due time, the truth began to dawn upon the public that the road was an economic and not a political tool, and from that time forward its development according to modern standards became easier going. The main job was wheeled around from township and county to state and interstate, logically beginning where traffic is heaviest and it is precisely at this point where the interests of motorists and other taxpayers are being helped and safe guarded in the co-operative principle under which the state and Federal Governments are carrying the work forward. The important point now is to keep the job moving steadily toward the completion of heavily traveled roads first.

Crime

A gang of cattle rustlers and hog thieves had been operating around High River for some time. Finally, a culprit was apprehended and was brought into court. The jury was composed of farmers and cattlemen and they speedily brought in a verdict of "guilty," and it was up to the judge to sentence him. Glaring at the prisoner he spoke sonorously:

"There's been too much of this old stealing going on lately and I'm going to make an example of you or none of us will be safe."

MARKET DIRECTOR ISSUES BULLETIN TO SPUD GROWERS

MUST OBSERVE RECENT REGULATIONS ON GRADING AND PACKING.

A bulletin of important interest to potato growers was issued this week by the state department of agriculture. It includes the latest laws regarding packing and grading of potatoes, which must be followed by all who grow, sell or purchase potatoes in wholesale lots.

The following must grade potatoes:

Each firm or person: Who offers for sale or sells table stock potatoes either at retail or wholesale in intra or interstate commerce must have them graded as U. S. fancy or U. S. No. 1 or U. S. No. 2.

Each container must be branded, stamped, labeled or tagged with the name and address of the firm or person responsible for the grading and the name and number of the grade and the true net content either by weight or numerical count.

When second hand bags are used and upon such bags there appears the brand, stencil or label of any other mark of any other firm or person not responsible for the grading or marketing, such bags must be turned inside out.

When growers sell their own production direct to the consumer, they are not compelled to grade the potatoes or mark the containers. Sales to other purchasers must be graded and marked.

Providing also: When retail merchants sell potatoes from a legally graded and legally marked container and such container is in plain view of the customer the retail merchants are not compelled to grade the potatoes or mark each container, otherwise they must do so. The following must have a license:

Each firm or person: Who buys, transports, grades or loads table stock potatoes for retail purposes.

Retail merchants who sell for wholesale. A license is not transferable. One license entitles any qualified holder to buy, transport, grade or load potatoes. License must produce license upon demand.

Apply to the commissioner of agriculture, Lansing, or any of his representatives for a license.

Peter A. Dukeshofer, Director, Lansing, Mich.

Handy Hannah Helps Housewives

Melted butter is a good substitute for olive oil in salad dressing.

Do not salt beef cooked in a fireless cooker until removed for serving.

To soften butter so that it may be more easily creamed when making cake, heat a bowl, put the butter into it and cover a few minutes.

If you wish a pot roast for a small family, purchase a two-pound piece of beef stew and cook it as for pot roast.

The juice of half a lemon in a cup of black coffee without sugar and milk is an excellent remedy for a sick headache.

When cooking if an onion is cut and only half used, cover the other half with paraffin and it will keep fresh for some time.

Medicine bottles should be kept in one place and put back in that

place after they are used. Stoppers if lost should be replaced so that the medicine may not lose strength by evaporation.

Boil a few potato peelings with a little water for a few minutes in the new frying pan. Food cooked afterwards in the pan will not be so apt to stick.

An egg pricked with a pin is unlikely to crack during boiling.

Dried orange peelings will prevent moths and leave a surprisingly pleasant odor.

Colored cotton dresses should be starched with cold starch and dried in the shade.

A dry paint brush will get in the cracks and remove dust from carved furniture.

Add a tablespoon of paraffin to the water when washing linoleum. This removes the stains and helps to preserve the linoleum.

To prevent the bristles of a tooth brush coming out soak the brush when new in cold water for

TREES PLANTED BY PORTAGE PIONEER 90 YRS. OLD FRI.

PLANTED BY FRANCIS W. HOWE ON BIRTHDAY, OCT. 4, 1839.

The row of fourteen beautiful hard maple trees along the South Bend Road immediately north of the Emory Rough residence had a birthday last week, on Friday, Oct. 4, on which date they attained the venerable age of 90 years. This is known from the fact that Frederick Howe has a record of their planting by his uncle, Francis Willard Howe, who set them on his birthday on Oct. 4, 1839, four years after he had come from Courtland county, New York, with his father, Frederick Howe.

The largest of the trees is now about seven feet in circumference at the height of 4 feet from the ground.

Bedtime Tales Over Radio Save Parents 299 Years Nightly

Sandman stories, radio-cast each evening, save the parents of the United States 299 years every day, according to an estimate of the Bremer-Tully Institute of Radio Research just made public.

The statisticians figure that there are 10,500,000,000 families in the country possessing radios and that half of them have small children. Calculating that each family would spend a half hour entertaining the youngsters before bedtime if the task were not performed by the radio, the results show that the 5,250,000 parents save a total of 2,625,000 hours, or approximately 299 years, nightly.

Check This List And See if You Violate the Law

A total of \$6,828.59 was collected in Michigan during August in fines and costs levied on violators of state game laws. Among the illegal acts committed were: helping to catch fish by padding boat without license, loaded rifle in car, no fishing license, rifle in non-hunting area, shooting non-game birds, illegal possession of nets, killing deer in closed season, shipping short perch, illegal possession of raccoon, fishing for trout in closed stream, catching more than limit of fish, trapping muskrat in

CHEVROLET SIX

- the Car of Universal Appeal!

SINCE January 1st, over a million one hundred and thirty-five thousand six-cylinder Chevrolets have been produced. Naturally, this is an outstanding industrial achievement. But it is more than that. It is a great public endorsement of Chevrolet's policy of progress: to build a quality automobile whose design incorporates every possible feature of progressive engineering . . . whose beauty is distinctive, smart and satisfying . . . whose reliability is assured by fine materials and precision manufacture . . . and whose price is so low as to be within reach of the great majority of the people. We want you to know what this policy has meant in the development of the Chevrolet Six—the modern car of universal appeal. We want you to know that Chevrolet has brought within the reach of everybody, everywhere, all the advantages of smooth, six-cylinder performance. Come in today!

MICH. BELL PUTS UP 32 PHONE BLDG.

Has Three Year Building Program of \$8,600,000. FOUR IN DETROIT Plans \$136,000,000 Plant Expansion in the Next Five Years.

Thirty-two telephone buildings, including five placed in service this year, those under construction and those planned, are listed in a report on the 1929 expansion program of the Michigan Bell Telephone company, which is being prepared in this area. The Michigan Bell company, he says, is adding to its facilities in anticipation of a constantly increased telephone service demand, based on the indication that for the long run, business conditions will continue to expand in the state.

During the past three years the Michigan Bell has erected 25 new structures, at a cost of \$3,900,000, exclusive of equipment, and placed in service 33 new central offices.

Thirteen telephone central office buildings and two large garage and warehouse structures are either under construction or work on them will be started shortly, at a cost of \$5,700,000, which installation of equipment will increase to more than \$11,500,000. Besides the buildings under construction, one structure has been remodelled by the owners for leasing to the company, and one has been built especially to lease to the company.

Four telephone buildings are under construction in Detroit. The Pioneer and Niagara telephone buildings will be placed in service this fall on the rapidly growing east side. Election of University central office, to serve the University of Detroit section, will be finished within a few months. Madison, a five-story structure to house the Empire manual central office and the new Madison dial office, besides providing some general office space for the telephone company, is nearing completion in the north central section. Madison will cost approximately \$300,000, each of the other Detroit buildings costing approximately \$230,000. Installation of equipment will more than double these costs.

Other telephone buildings projects in various stages of progress or planned to start this year, include structures at Dearborn, Holland, Charlotte, Port Huron, Benton Harbor, Greenville, Lansing, Grand Haven, Rockwood, Macatawa Beach and Saginaw, a \$1,500,000 warehouse and garage building at Detroit and a similar structure at Grand Rapids to cost nearly \$200,000. New buildings have been placed in service this year at Pontiac, Grand Rapids, Bad Axe and Howell. At Lan-

ing, a fourth floor has been added, to house additional long distance equipment. At Ishpeming, space in a newly remodelled building has been leased and new local and long distance central office equipment has been installed. At Wayne, local interests have erected a structure to lease to the Michigan Bell for a central office and business office. At St. Clair, complete new central office equipment and much new outside plant facilities have been installed.

Notable among building projects of the past three years, additional structures placed in service this year, were the sixteen-story Bell Telephone building at Detroit, which houses the general offices of the company; the Grand Rapids Bell building, and buildings in Traverse City, Flint, Iron Mountain, Ypsilanti, Plymouth, Niles, Battle Creek, Kalamazoo, Jackson, Lincoln Park, Ross, Oak, Redford, Roseville, Trenton and Wyandotte and Hoarsh, Longfellow, Whittier and Columbia, in Detroit. Six dial central offices were placed in service in Detroit, in that time, and seven in other cities. Several more are to be equipped with dial system apparatus.

This building program represents only a portion of the expansion plans of the Michigan Bell company this year. President Burch Foraker has announced that total plant additions by the company during 1929 involve an expenditure of approximately \$26,500,000. In three years, more than \$72,000,000 has been added to the company's telephone plant, and during the next five years \$136,000,000 more will be added. Growth of industry and population in Michigan the last three years is indicated by a net increase of 129,000 telephones.

The general enlarging of telephone plants is in harmony with the company's building program. More than 1,471,000 miles of wire in exchange cable and 199,000 miles in long distance cable, besides a large amount in open wire circuits are being placed this year. Several million dollars is being spent on additional central office equipment at various points. Practically every exchange is being outfitting. In addition, the company has expended approximately \$1,000,000 this year to repair spring storm damage to its plant.

Completion of the trans-Michigan long distance cable was one of the outstanding telephone plant expansion items of recent years. It connects Bay City, Saginaw, Flint, Pontiac, Birmingham, Royal Oak, Detroit, Centerline, Roseville, Mt. Clemens, Port Huron, Wyandotte, Trenton, Monroe and Toledo, Ohio, on the east, with Grand Rapids, Grandville, Marne, Wayland, Martin, Plainwell, Kalamazoo, Lawton, Niles, Berrien Springs, South Bend, Benton Harbor and St. Joseph on the west, and passes through Dearborn, Plymouth, Northville, Ypsilanti, Ann Arbor, Chelsea, Jackson, Albion, Marshall, Battle Creek and Galesburg. A spur of that cable is being built from Jackson to Lansing. The cable connects at Toledo and South Bend with the New York-Chicago-St. Louis cables and the transcontinental and transoceanic circuits.

New outside plants, such as underground conduit and cable and aerial cable in the 250 exchanges of the company, have cost, during three years, more than \$23,500,000. Additional central office fa-

CONDEMNED TO DEATH

Miller, secretary and treasurer, Michigan Bell Telephone company, Detroit; Dudley Waters, president, Grand Rapids National bank; Oscar Webber, vice president, J. L. Hudson company, Detroit; George M. Welch, vice president and general manager, Michigan Bell Telephone company, Detroit.

Ants Eat Building As Mere Appetizer

The old-time, unwelcome guest who was accused of eating his host out of house and home now has his record dimmed by the northern, white ant which will not only eat houses but has sometimes satisfied its appetite by attacking warehouses and public buildings in Michigan, according to the statement of the entomologist at Michigan State College.

This insect is too lazy to walk to houses or other buildings for its meals and waits till its unsuspecting host carries cornstarch or wood in which it is concealed to the house or barn.

Usually, the presence of the ants in the building is not suspected until the winged form begins flying around the basements in late winter or early spring. An inspection of the building will then show where the ants have eaten tunnels in the stils and woodwork.

It is necessary to take immediate measures to control this insect when it once has become established in a building. Liberal amounts of kerosene applied in the nests and in places where the ants are working will usually kill them. Several doses of the kerosene will probably be needed to completely rout the insects. Circular bulletin number 63 issued by Michigan State College describes this pest and gives more detailed instructions for its control.

NEEDED FIVE TRUCKS TO CARRY BOND ISSUE MAIL

When the stockholders of the American Telephone and Telegraph Company were notified of the company's offer of \$215,000,000 worth of Ten-Year Convertible 4 1/2% Debenture Bonds, it required five trucks, each with a cargo of forty well-stuffed mail bags, to carry the notifications to the New York Post Office, which is one of the biggest single batches of mail the post office had ever received. In order not to swamp the office entirely the bags had to be distributed to several branches. The mail bags contained over 450,000 circular letters addressed to stockholders, of whom all but one per cent reside in the United States.

AVERAGE MICHIGAN WORKER PRODUCES \$6,500 PER YEAR

\$1600-\$1800 WAGES; \$2000 MATERIAL; REST FREIGHT PROFITS ETC.

Taking it by and large 100 square feet of factory room, under average manufacturing conditions in Michigan, represent the floor space required or occupied by each individual industrial worker. He produces an average of \$6,500 of product per annum. Of this value of production, 32 per cent, or slightly better than \$2,000, represents the raw material going into fabrication. From \$1,600 to \$1,800 represents wages necessary to change this raw material into the finished product. The balance of the \$6,500 represents overhead, transportation charges, selling expenses and manufacturer's profit.

These are rough figures but they are good averages and represent results in all classes of industrial shops in the state. When factory additions are made, therefore, they represent a growth which can be measured in terms of increased manpower and increased value of future production. Each increase in manufacturing floor space represents, on an average, many additional workers and so much value of output.

The end of the late war found the factories of the state with considerable unnecessary floor space on hand. Surplus production, necessary to meet the exigencies of war, was suddenly eliminated. There existed a slack in factory space which had to be taken up. This was taken some years. With the exception of the very great industrial operations of Michigan—including most of the motor car manufacturing plants—no very substantial increase in manufacturing floor space was recorded in this state during the 1919-1923 period.

Last year, however, it became apparent that most of the slack created by the war, had been taken up. The construction record of the state last year showed factory additions here, there and everywhere and included factories of many kinds, both large and small. The increase in facilities has continued this year and may be expected to continue for some time to come.

Careful estimates indicate that approximately 4,000,000 square feet of manufacturing floor space has been added to the industrial fabric of Michigan this year. No matter how you figure it, this is a lot of feet. It represents nearly 100 acres of new floors upon which additional products and new products can be made. It represents a potential employment of some 40,000 additional workers. This is an increase of seven per cent, based upon total industrial employment in the state at the close of 1928.

HUGE FLOCKS SEEN ON MICHIGAN TOUR

POULTRY INSPECTED ON TRIP THROUGH SOUTHERN COUNTIES

Farms where they keep 5,000 laying hens, raise 25,000 chicks, keep 25,000 rabbits, have 1,500 turkeys, or grow and market 60,000 ducks a year, were just stopping places along the route of the second annual Michigan Poultry tour.

That poultry raising has gone beyond the spare time class was also proved by the inspection of plants which are equipped to incubate 140,000 eggs at one time and those which have laying houses to accommodate 5,000 hens.

The trend of the poultry business was shown by barns which formerly had been used to raise livestock but which after remodeling, are now devoted to the production of first class eggs.

Eighty-two cars left East Lansing on the tour and this number was increased at different points along the route. Towns visited were Bancroft, Holly, Oxford, Romeo, Denton, Ann Arbor, Napoleon, Bridgewater, Jackson, Middleville, Springport, Battle Creek, Augusta and Lowell.

A banquet at Lowell which was attended by 200 poultrymen was the closing number of this year's tour.

Chicago Skyscraper Has 1000 foot Per Minute Elevator

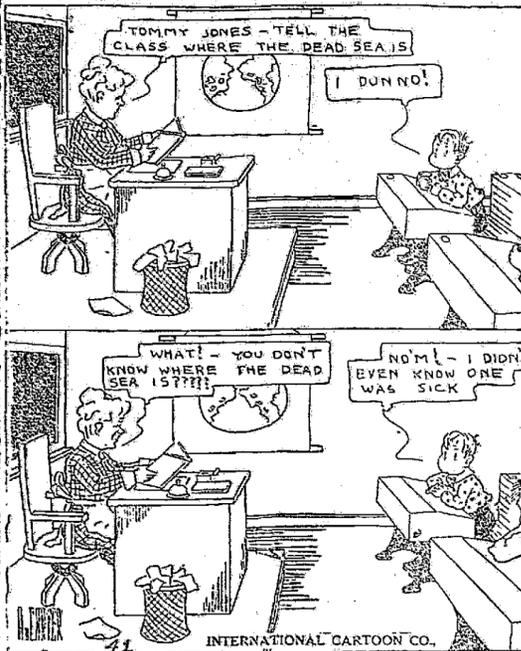

The LaSalle-Wacker building, which is fast climbing skywards at the southeast corner of LaSalle St. and Wacker drive, is the first Chicago office building, so its elevator, which has announced 1,000 feet per minute elevators for its tenants.

According to J. Milton Trainer of Clark & Trainer, renting agents and managers of the building, the tower lifts will have a speed of 1,000 feet every sixty seconds. The elevators in the main section of the building will hit it up at 700 feet per minute and the express lifts will be able to reach a speed of 800.

Mr. Trainer also announces that the plague of noisy, crashing elevator doors, which mars the quiet of a good portion of our skyscrapers, even some of the newest, will be present in the LaSalle-Wacker building. All doors will close automatically and noiselessly.

The white population of the Belgian Congo has tripled in the last ten years.

JUST KIDS—Behind the Times.

SCIENTIST STUDIES TROUT MIGRATIONS

RAINBOW TROUT PROVE TO BE ROLLING STONES OF PENNY TRIBES.

Brown trout are practically non-migrating; brook trout are conservative migrants and rainbow trout are migrative to the point where they are essentially "open water" fish.

These are three of the many conclusions reached by the late Dr. Jan Metzlar, fisheries expert of the Department of Conservation following a year of experiments with trout tagging. The report was filed but two days before he was drowned in Grand Lake, Presque Isle county.

Since 1928, when the experiments began, 6,712 trout were tagged and 128 have been recovered, less than two per cent. Of those recovered 60 were brook trout; 25 were brown trout and 44 were rainbow. Twenty-five records of recovered brown trout failed to show any migration.

Sixty recovered brook trout show that this species "is a very conservative migrant, and the extent of its travels bears a certain relation to its age and size."

The most spectacular feature of the experiment occurred during the past summer with the recovery of three rainbows tagged in the Little Manistee river, on the Wisconsin side of Lake Michigan several hundred miles away.

The records tend to show, according to the report, "that the adult rainbows of the Great Lakes are essentially fish of the large open waters where they can obtain abundant food.

Several additional conclusions were obtained by Dr. Metzlar through recovery of tagged fish. "All the rainbow trout were wild fish, trapped while ascending certain streams of western Michigan. On the other hand the majority of the brook and brown trout used in these experiments were hatchery reared. All the brown trout and about 350 brook trout were large fish; the balance were yearling brook trout. The 'old' brook trout ranged from 13 to 16 inches and were all planted on Dec. 12, 1925 in the Au Sable system."

Dr. Metzlar said in his report explaining the source of the tagged fish. "The validity of experiments on migration with hatchery fish, of course, be questioned. We have keenly realized the objections against this method and have tried to duplicate the work with wild fish." Dr. Metzlar succeeded in tagging 134 wild trout on the spawning bed, but said this method was impractical for wholesale purposes. Whenever a brook trout was recovered at a considerable distance from the point where it was released, it was invariably a large fish. In other words, he said, the fish which had been reared in the Au Sable system. Thirty-

eight were recovered within one mile from the place where planted. The remaining 15 fish, however, shifted slightly upstream or had moved down stream not more than four miles.

Rainbows ascend certain western Michigan streams to spawn, but just how long the young ones dwell in our streams before following their parents to the lake has not yet been determined, the report indicates.

Newspaper Reporter Listens to Wonders At Telephone

A newspaper reporter, who attended a recent demonstration illustrating the result of telephone research and engineering recorded that—

He "heard" a picture of President Herbert Hoover. He heard a speechless man "speak." He saw a deaf man "hear." He heard the power of 500,000 times 50 strong lunged men's voices shout the words of one man. He heard his muscles move, with a sound like thunder. He telephoned his photograph. He learned it is possible to gaze at a scene miles distant. He heard his heart "missing" as a cook scrambles eggs. He heard the top third, bottom third and center third of a strain of music. He danced to "upside down" music and heard speech "upside down" and "right side up" at the same time. He heard a bar of steel float in the air. He was looked over by an electric eye. He saw and heard speech "take a rest" on the route from lip to ear. He talked into a telephone and then walked over to the other end of the line and listened to his own words four seconds after speaking them. He heard the music continue after a phonograph record had stopped playing.

Easy. Two pickpockets had been following an old man whom they had seen display a fat wallet. Suddenly he turned off and went into a lawyer's office. "Good lor," said one, "a fine mess. We'll do now?" "Easy," said his mate, lighting a cigarette, "wait for the lawyer." Great Britain is sending a commission to the West Indies and British Guiana to investigate the state of the sugar industry.

DROUGHT-REDUCES MICH. SPUD CROP

CORN, BUCKWHEAT, SUGAR BEET ESTIMATES ARE ALSO CUT.

A decline of more than four million bushels in the Michigan potato crops since Sept. 1, was the outstanding feature of the report issued this week by the Michigan Co-operative Crop Reporting Service. The drought which prevailed throughout the state during August and part of July continued through September, and this, coupled with the severe frosts during the latter half of the month, reduced the indicated production to 19,400,000 bushels—a figure below the final estimate for every year since 1916. The total United States crop is now estimated at 345,177,000 bushels which is 3,935,000 bushels less than the September estimate and 19,306,000 bushels smaller than last year's final production. If the final estimate is no larger this will mean a crop the smallest since 1925.

The Michigan corn crop also showed a decline in condition; the forecast of production on Oct. 1 being 36,134,000 bushels as compared with 36,984,000 bushels on Sept. 1. The yield of barley as reported by crop correspondents was 23.0 bushels as compared with 30 last year. The forecast of production is 5,888,000 bushels or 1-

273,000 bushels more than average production of the last ten years. Buckwheat and sugar beets were other crops showing a decline in condition during the past month. The total production of buckwheat is now estimated at 639,000 bushels as compared with 720,000 last year. The sugar beet crop is forecast at 338,000 tons or 134,000 tons less than last year's production.

Harvesting conditions for field beans have been unusually favorable during September, and the condition of the crop as reported on Oct. 1 was six points higher than that for one month ago. As a result, the forecast production is for a crop of 5,985,000 bushels or 182,000 bushels more than the September 1 estimate. The state average yield of oats was reported at 29.8 bushels per acre, which gives an estimated production of 44,760,000 bushels or more than five million bushels below the average crop of the past ten years. The average yield of cane hay was reported at 1.68 tons per acre as compared with last year's yield of 1.51 tons. The estimated production of 5,147,000 tons is the largest on record for the state.

The prospective production of all fruits except grapes showed an increase during the past month. The total apple crop is now estimated at 6,472,000 bushels and the commercial crop at 1,112,000 barrels. The peach crop estimate is 316,000 bushels; pears, 476,000 bushels and grapes 66,000 tons or the same as one month ago.

Roses in History. The rejoicings of victory, the melancholy monuments of grief, have known roses. Arbors of delight, the desolation of surrender, playtime of children, dreams of aging men and women, hesitant hope of the sick, all have known the language of roses. In the choruses of the world's sentiment they have sung their part.—Boston Herald.

Farm lands along the River Nile are valued at \$1,000 or more an acre.

THE MICROPHONE News of Buchanan Schools

News of Student Life Gathered and Written by Upper Classmen of Buchanan High School

Bucaneers Crack Three Oaks Acorns by Score of 36-0

3 TALLIES NOT ALLOWED BY REFEREE

High School Eleven Comes Out of Slump Saturday.

NILES COMES NEXT

Paper Dope Looks Rosy For the Local Grid Squad.

The old saying of "they never come back" fits the Buchanan "Bucks" like Col. Lindberg's uniform would fit "Hack" Wilson. After the Dowagiac chiefs had downed the "Bucks", 13 to 0, last Saturday, the "tough" outfit came back and hewed down the Three Oaks aggregation to the tune of 36 to 0. Not only that, but "Finkle" Pfingst crossed the enemy goal for three touchdowns that were not allowed, because an official thought he saw some misdemeanor committed by a Buchanan player. It was a hard blocking, hard tackling, hard fighting group of "Bucks" who showed a complete reversal of form after their defeat last Saturday. The game was all Buchanan's from start to finish, except for the closing minutes of the first half, when the lads from the Acorn City carried the ball to the 5 yard line.

The first quarter saw Buchanan hitting the line for a march which finally culminated in "Red" Bronson's dash for a touchdown. Pierce scored twice in the third quarter and Chubb and Pfingst counted in the final session. Pfingst's

extra runs also came in the fourth quarter. The large number of penalties called on the "Bucks" was the only dull spot of the day; the officials receiving 45 yards from penalties in succession during the last quarter, when the reserves were pushing the enemy back. The Niles team was only able to eke out a 13 to 0 victory against the Acorns last Saturday, which boosted the team's chances against their old rivals next Saturday. The "Bucks" must build a defense against the pass attack which Niles uses to such advantage, the outfit being rather weak in this department.

Grade News

Kindergarten News We have three new children in our group. They are Helen Swartz, Walter Schoonmaker and Betty Jane Panselle.

We made mats of newspapers for the children to lie on while they are resting. We are learning to keep time to music now. This is a foundation for our orchestra which will be playing soon.

First Grade—Miss Myers The A class will start reading in their new Beacon Primer next week.

We are glad to have little Loraine Morley back in school again. L. C. Shoemaker enrolled in the first grade this week. We now have forty children in our grade. We are busy making animals for our circus bank.

Second Grade—Mrs. Wilcox The children in our grade who have been on the spelling Honor Roll since we started are as follows: George Lauer, Ruth Campbell, Dickie Dilley, Johanna Burk, Dickie Pierce, Ruth Runsey, Wanda Fergie, Marilyn Staver, Robert Fauman, Martha Leah But-

ton, Kathryn Hess, Arthur Rohl. We had a new boy enter this week, George Barker, Bridgman. Leona Campbell was absent two days on account of illness.

Second Grade—Mrs. Fischnar In our room the following are on the dental honor roll: Duane Beadle, Robert Donley, Dick Hayden, Doris Patterson and John Vicars.

Two new boys entered this week. They are Jelphe Barker, Bridgman, and Warren Domer, North Dakota.

The children who have been 100 per cent in written spelling this last week are: Catherine Wynn, Edward Pascoe, Virginia Arnold, James Leazenby, Donna Smith, Betty Ann Ryan, Thelma McKenzie, Mable Wilson and Betty Jane Burgoyne.

Third Grade—Mrs. French Kenneth Phisactor, Lee Marks, Iva Hamphill, Audrey Ruth and Robert Ferris have their names on the Dental Honor Roll.

Warren Virgil brought us a record with the story of the Three Bears and Cinderella. We enjoyed listening to it.

Wednesday afternoon the boys and girls in Mrs. French's room made a trip to the park for Nature Study class. They collected specimens of different leaves and drew and colored them for a leaf book.

For Art and Hygiene we are making Clean Teeth Posters. The tooth paste and brushes also the letters for the posters are free hand cutting. For Hygiene each day we learn a health rhyme and write it for our Health Books.

Fifth Grade We are still working on long division. Everyone is urged to do home work.

There are two new people in Miss Ekstrom's room: Orrel Barker from Bridgman and Dorrel Wise from Indiana. The fifth grade is working hard on their pageant.

Grade 6—Miss Abell The people on the honor roll for this month are Dorothy Brown, Eleanor Miller and Billy Habicht. We hope to add to this list next month.

We are having sides in Arithmetic—the "Speeders" are ahead of the "Racers."

We are painting scenes on grape basket covers. We are also painting black and white scenes on glass.

We had a Greek assembly for five minutes last Friday. We are making History note books.

COACH KNOBLAUGH TAKES SQUAD TO SESSIONS OF COURT

TWO DEBATE TEAMS PICKED; FIRST CLASH DATED FOR NOVEMBER 15.

On Monday, Oct. 21, the debating team and Mr. Knoblauch, the coach, spent the day at St. Joseph in the court house listening to a criminal case. The two squads have been selected, consisting of Marvin Gross, Arthur Anderson, and Richard Zerbe for the affirmative and Walter Spitzer, Jane Habicht and either Richard Zerbe or Maynard Post for the negative side. The team has only three experienced debaters left from last year. These are Arthur Anderson, Maynard Post and Richard Zerbe. The first debate is planned for Nov. 15, though it is not certain as yet whether the negative or affirmative is to be Buchanan's side.

Night work is frequently injurious to the health of workers, particularly to women workers, the United States women's bureau finds.

ORMISTON LAYS DOWN RULES FOR SPORTSMANSHIP

DEFINES ATTITUDE WHICH SPECTATOR AT GAME SHOULD ASSUME.

"Sportsmanship is that quality of honor that desires always to be courteous, fair, and respectful; and it is interpreted in the conduct of players, spectators, coaches and school authorities."—Fielding H. Yost.

Good sportsmanship was the main theme of the Friday morning assembly. Mr. Ormiston read from the hand book put out by the Michigan High School Association of which he, himself, is a member, and by enlargement and discussion, the following points on good sportsmanship were brought to the high school students and teachers.

High school students should set a good example in the matter of sportsmanship and should quickly condemn unsportsmanlike conduct on the part of other students or adults. To this end they should—

- 1. Remember that a student spectator represents his school the same as does the athlete.
2. Recognize that the good name of the school is more valuable than any game won by unfair play.
3. Respond with enthusiasm to the calls of the cheer leader for yealls in support of the team, especially when it is losing.
4. Learn the rules of the various athletic games so that either as spectators or critics they will be intelligent.
5. Accept decision of official without question.
6. Express disapproval of any abusive remarks from the sidelines.
7. Recognize and applaud an ex-

hibition of a good play or good sportsmanship on the part of the visiting team.
9. Be considerate of the injured on the visiting team.
10. Insist on the courteous treatment of the visiting team as it passes through the streets or visits the local school building and extend the members every possible courtesy.

11. Acquaint the adults of the community and the grade pupils with the ideals of sportsmanship that are acceptable to the high school.

12. Impress upon the community its responsibility for the exercise of self-control and fair play at all athletic contests.

13. Insist on fair, courteous and truthful accounts of athletic contests in the local and school papers.

14. Be familiar with the state rules of eligibility and support their strict enforcement.

15. Encourage the full discussion of fair play, sportsmanship, and school spirit through class work and auditorium programs in order to discover ways by which students and schools can develop and demonstrate good sportsmanship.

Perhaps by these helps as to bow a good sportsman should act, our game between Niles and Buchanan will be a successful one as was the one with Three Oaks. The first appearance of the Girls' Glee Club on the stage this year held a great interest to the rest of the assembly. They gave a selection, "Keep on Hopin'" by K. Heron-Maxwell. Another number was asked for upon the splendid delivery of the first, but due to the short time of organization this year, the assembly was quiet, and by the promise of another some other time as at present none other was prepared.

True courage is not incompatible with nervousness and heroism does not mean the absence of fear, but the conquest of it.

Girls' Glee Club Adopts New Garb

New uniforms have been voted for the Girls' Glee Club. They will be white, the same as last year, but of a different material and pattern. A new tie of maroon having an English "E" will be the main decoration for the dress. Awards also shall be given in the club this year. A maroon bar to be placed on the left sleeve for each year of membership will be given. Also each girl having perfect attendance at all concerts and activities in which the Glee Club participates will receive a golden lyre to be worn above the bars on the left sleeve. These uniforms will be ready for the concert at Bridgman for which the girls are already preparing.

Mary Frklich is Elected President of The Ushers Club

Mary Frklich was elected president at the first meeting of the Usher Club in Miss Niffenegger's room Monday evening. The other officers are Velma Eagley, vice president; Hilma Kastetter, secretary and treasurer. Ten new members were taken in, making a total number of twenty-five. Meetings are to be held every two months at homes of members of the club. The same dresses of white with red ties and belts, will be worn again this year.

Latin 9 has discovered the newest things in brain teasers. They are Latin cross word puzzles. The students worked them out in clever designs, using Latin words entirely.

Competition between the Senior boys and girls is running high. They are competing with each other to see which can earn the most money for the Annual in the shortest time.

The boys, under the leadership of Harold Knight, are haling old waste-paper to sell. The girls are gathering up old papers, shoes, hat pins, etc., to be sold to the highest bidder. They go out gathering Friday nights and would welcome anything you would like to give them.

Soviet Russia exported more than \$17,000,000 worth of products over European frontiers in the six months from Oct. 1, 1928 to March 1, 1929.

SCHOOL SLANTS

The Senior girls held a candy sale last Thursday in the upper hall. They cleared about \$12. Boys, you'll have to go some.

The Seniors came to school looking "spry" last Wednesday. Pictures for the "Pines" were taken by the Camp Publishing Company's photographer. They were all in high spirits until business manager, Dick Zerbe, demanded a crisp bill right after each picture was taken.

Plans are being made to take the group pictures on the school lawn if the weather permits, as the outdoor pictures have a much better appearance.

As not all clubs have been organized and some, such as the Glee and Usher clubs, haven't decided on suitable uniforms, they will be taken sometime around Thanksgiving, with the basketball and soccer pictures.

Changes Made in Microphone Staff

Due to the great amount of time demanded by their positions on the Annual Staff, Richard Zerbe, former editor of the Microphone, and Kathryn Reed, literary and social reporter, have resigned their positions on the Microphone staff. A few changes were made at the last meeting which resulted in the following staff: Jane Habicht, Editor; Teresa White, Literary and Social; Esther Bradley, Grade News; Pauline VanEvery, Routine; Elizabeth Montgomery, Exchange; Miss Haslin, Proof Reader.

Velmarian Lit To Meet Friday

Next Friday the Seniors will hold their monthly Velmarian Literary Club meeting. The purpose of these meetings is to give training in speaking before people and training in parliamentary procedure. For roll call, one statement on football, given by a foot ball critic, is to be answered. The program for the next meeting is as follows: "Origin of Halloween," Harold Knight. Harold Pierce will act as master of ceremonies.

The Ubiquitous Radio.
 Ten years ago the radio receiving set in the home was a distinct novelty. Yet today, the department of commerce estimates, there are more than 10,000,000 such sets in the United States and practically as many more throughout the remainder of the world representing an investment of more than \$1,800,000,000. There is now said to be one radio receiving set for each 83 persons in the world and one for every 12 1-2 in the United States.

There are more than 1200 broadcasting stations, of which the United States has 512. These are located in 69 countries, scattered all over the earth. Columbia, whose climate is described as the worst in the world for radio broadcasting, is the latest to have a broadcasting station. Despite its novelty, the radio has come to be an important feature of the world's life.

The hold that the radio has taken upon civilization in the brief space of less than a decade is almost miraculous. Nor is the end yet. Science and engineering are still making great improvements both in broadcasting and in reception and before long there is the promise that television will be harnessed to the radio. One has his mo-

ments of depression about the radio, of course, as when the neighbors have theirs on full blast at unreasonable hours. But who is there, in the face of the radio, the telephone, the electric light, the airplane, the automobile and other contributions of a scientific age, can honestly sigh for the "good old days" whatever they were? As a matter of fact, his real cause for regret is that he cannot live to see what is in store for the world 75 or 100 years hence.

The Art of Talking.
 James Adams in Forum.
 Not long ago I dined in America with an old friend I had not seen in some years. After dinner we walked into the library to have our coffee before the open fire. After we had sipped it and had a puff or two of our cigars, my host said with the inevitability of after-dinner New Yorkers: "Where do you want to go now?" I suggested that as I had not seen him for a long time I would much prefer to sit just where I was, before the fire and talk to him. His reply was: "Thank heaven, I haven't had a good talk with anybody in ages."

Here and there in America a settler has decided that he will move no farther, that he will content himself with the patch he has already cleared and begin really to live instead of always getting ready to. He has ceased to be a frontiersman and has begun to build the next stage of civilization. His talk is likely to be good. Conversation will begin when we cease to expand and begin to concentrate.

I read in a European newspaper that "what Denmark thinks today Europe thinks tomorrow." Look for little Denmark on the map and think that over.

time in order to record the entire range of piscine emotion. The plates were taken with a color camera and show the amazing progression of color changes in the lives of fish and the gamut of their unique actions, for it was detailed studies rather than actual specimens that featured this expedition.

Hundreds of fish casts and giant palmate corals—the largest ever taken, measuring 15 by 15 feet and weighing some four tons—were among the diverse return cargo. But, fascinating pictures and extraordinary undersea tales notwithstanding, Mr. Williamson likes to speak of nothing so much as the collaboration of his smart Captain "observing" alongside of him. Naturally, Sylvia has little comment to make, but it is to be believed that she holds within her early wide-eyed science knowledge of the bottom of the sea more wondrous facts, perchance, than her explorer-father.

Mr. Williamson says that Sylvia slept much and quietly at 100 feet under the water, for it was cool and quiet there. There is nothing to prove, however, that she was not conducting her own deep-sea investigation to the lullaby of the southern deep, for it would be strange if the Peet did not come to whisper in the ear of one who needs a cradle no bigger than a pink and pearl couch.

HOME RADIO SOON EQUIPPED TO GET AERIAL PICTURES

FULTOGRAPH, A TELEPHOTO DEVICE NOW IN USE IN EUROPE.

While visitors to the New York radio show are inspecting television, which authorities declare will not be commercially practical for many years, a highly developed still photo-transmitting device is being demonstrated with the possibility of its being on the market before the holidays. This is the "Fultograph" system now in general use throughout Europe. Picture transmission has been widely discussed during the last few years, but when it came to having a transmitter and receiver so simple that anyone could have it and operate it with good results, these various efforts failed. This Fultograph has been in regular use in Europe for a long time and pictures have been successfully transmitted from England to Australia, a distance of 11,000 miles. The invention of an English research worker, Captain Otto Fulton, the Fultograph, is next prom-

ised to the public as a transmitter of pictures in natural colors. The research to date proves that this is feasible and its reduction to commercial form is only a question of a few months more work.

The device is so simple in its operation that anyone who can run a phonograph can operate it. The pictures come out in excellent detail, their color being like the brown of rotogravure sections. They are fully as good as the telephone transmitted pictures now used by the newspapers.

Once the necessary transmitting apparatus is installed at a radio-casting station, this device may be plugged into your radio receiver on place of the loudspeaker. A piece of paper ripped in water is wrapped around a metal cylinder and the switch thrown. In 3 1/2 minutes a fine, brown-toned reproduction of the original photo is in your possession and the picture will last indefinitely without fading.

The possibilities of this are so great that we may see quite a change in the radio-casting art. Before a concert is started a printed program may be reproduced for your pleasure. A photograph of the artists also may be transmitted. The latest styles can be in your hands within 3 1/2 minutes from the time the radio-casting station receives the negative. News flashes may be seen, as well as stock market quotations. This is

the radio-casting angle. Then comes the journalistic angle, the immediate transmission directly to a newspaper of pictures from any point where there is a radio transmitter. The simultaneous release of a picture to a group of newspapers from a single transmitter also is possible. The British press has successfully used this method to bring news photos from other countries directly to London such as the finish pictures of yacht races, sporting events, etc.

Scotland Yard has adopted the system to aid the detection of criminals as photograph and fingerprints can be radiocast to every district in the country within a few moments of the time a suspect is reported. The army and navy are about to use it for their work.

In aviation alone a great field exists. A simple affair, the reproducer is very light and may be taken aloft in an airplane without difficulty. A transmitting station on the ground can then send out a weather map and the pilot will have an excellent reproduction in his hands in a few moments. He can have an equally simple transmitting device and write down messages, sketch maps, etc., and have them at the ground receiving station just as quickly.

Advertisers foresee a great use of this device for a ramification of

their present radio-casting activities. Instead of music, followed by a short advertising announcement, some interesting pictures will be sent and along the bottom will be a small printed message carrying home the advertising appeal. This may overcome the complaint that radio is too transient.

Captain Fulton has separate companies in practically all of the European countries, each with their own engineering staff. In addition, he is supporting a private laboratory with 42 engineers constantly at work. In order to get the system under way at once, the first machine may be imported but immediate production is planned in the United States.

One of the interesting radiocasts thus worked with this in Austria is the sending out of a picture each day illustrating some child's tale. The child watches for these at 6 o'clock every evening, and, if the picture book story lasts for 14 pictures the youngster, saving his daily picture and verse, has the whole story in two weeks.

Few American Indians It is questionable if, at the end of the Fifteenth century, there were a quarter of a million Indians in what is now the United States.

Fewer hairpins and combs were manufactured in the United States in 1927 than in 1925.

Microphone

WEEK END NOTES

Esther Bradley, Edith Eddy, Francis Sulpher and Ruth Pierce were guests of Warren Duncan of Three Oaks at dinner Saturday night after the game.
 Elizabeth Montgomery entertained her cousin, Agnes Dolph of Niles, over the week end.
 Miss Olson and Miss Roehenback spent Saturday and Sunday at their respective homes in Chicago.
 Mr. Hynik entertained the Methodist Epworthians Sunday night with an interesting talk on his experiences at the Moody Bible Institute.
 Mildred Brewer and Myrtle Rouse attended the Niles-St. Joe game Saturday at St. Joe.
 The Washburn Northwestern football game will attract Miss Hanlin to Chicago next week end.
 Miss Shriver and Miss Niffenberger motored to Clinton, Ia., over the week end to view the wonders of Mississippi. They stopped at Amboy, Ill., on their way to visit friends.
 Raymond Reed attended the Wisconsin-Notre Dame game at Chicago last Saturday.
 "Sally" Wilcox entertained a group of friends at a surprise birthday party on her brother, Frank, well remembered alumnus, on Monday evening. The guests, Hilna Rastatter, Bob Riniker, Felma Whittaker, Clem Savoldi, enjoyed a late lunch.

EDITORIAL

A prize has been offered to the class selling the most tickets for the band benefit play, "The Whole Town's Talking," to be given at the Clark Theatre on Oct. 31st, Nov. 1st, and 2nd. Here is a chance for some wide-awake class to replenish its dwindling funds. For years our school has been wanting and needing a band. Now that we have a band, we need uniforms. These uniforms have already been ordered, but not paid for. The Clark Players, under the direction of M. L. Hanlin, have kindly consented to put on a band benefit play.
 There are three reasons why every student ought to buy a ticket for this play. By doing so, each student will help his class to win the prize, he will help make our band one to be proud of and he will also be assured of seeing a first class production.

MICHIGAN TOLL CALLS SHOW LARGE INCREASE

During the past four years there has been a growth of approximately 75 per cent in the number of toll messages sent over the Bell lines in the state of Michigan. In 1924, the total of such messages reached the then high water mark of 15,700,000, and in the four years since then it has increased to 26,400,000 for 1928. With this great growth in the number of toll messages there has been a corresponding increase in the number of toll users.

There are now over 650,000 Bell telephones in the state and adding thereto the number of connecting telephones makes a total of over 730,000 interconnected telephones that can be reached alone in the state of Michigan. The number of Bell telephones in the state has more than doubled since 1920, while in the same period the number of miles of telephone wire has more than tripled. This wire mileage now comprises about 3,400,000 miles, of which over 2,200,000 is in underground cable, more than 1,000,000 in aerial cable and the balance, or nearly 200,000 miles, consists of open wire. About 21,000 miles of pole lines are employed by the Bell System in the state of Michigan to carry the aerial cable and open wires.

Bones of men who lived in North Africa in the old Stone Age, 25,000 years ago, have been discovered.

BABY TAKES NAPS IN DIVING BELL ON OCEAN FLOOR

SCIENTIST TAKES WIFE AND BABY DOWN IN DIVING BELL

The coral caves of Neptune and his lovely maidens have captured the imagination of children since the bard of Thrace sang of them, but it remained for Sylvia Williamson, 7 months old daughter of J. E. Williamson, leader of the Field Museum-Williamson undersea expedition to the Bahamas, to look within them. This young mermaid has just returned to New York with her father and mother on board the steamship Munargo of the Munson Line, laden with sea-born treasures such as even those accustomed to museum vari-

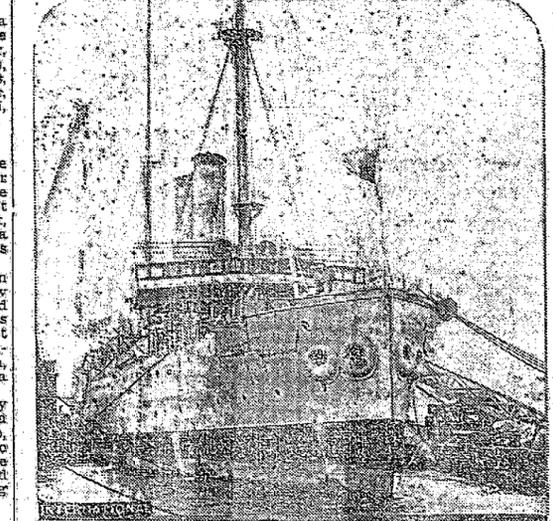

ties had never thought to gaze upon.

Marvelling a-plenty has been, and is, of how the fishes live in the sea, but Sylvia knows. Captain Sylvia, she is, before her first twelvemonth, and wearing her seaman's cap jauntily.

Sylvia's father is a pioneer in undersea photography, and day after day she descended with him through the flexible metallic tube of his perfected diving bell to the ocean floor. The apparatus is an invention of the explorer's father, Captain Charles Williamson, and holds three persons comfortably. It is equipped moreover, with electric lights and connected by a telephone to the ship above. It is not registered that Sylvia evinced surprise at all this, an explorer's daughter being inherently acustomed, no doubt to strange environments.

Through the glass windows they were able to record the lives of sharks, morays, angel, parrot and queen trigger fish, often photographing one such for hours at a

Here's the Chance to Buy a Cruiser

The U. S. Cruiser Cleveland at the Charleston navy yard where it is being dismantled preparatory to being sold to anyone that wants such a vessel. It was commissioned in 1903.

SPORTS

INDEPENDENTS WIN FIRST GAME FROM CELERY RAISERS

WILL PLAY THREE OAKS INDEPENDENT TEAM HERE SUNDAY.

A team of husky Kalamazoo footballers including three former Western State Normal regulars came to Buchanan Sunday and were instructed in the finer points of the grid game by an outfit of ex-Bucanneers, the final score being 12 to 0 in favor of the locals.

A review of the statistics of the game clearly shows that Buchanan deserved the two-touchdown margin, as they made 15 first downs to three by Kalamazoo and completed 7 out of 12 forward passes. The ball was in Kalamazoo territory during almost the entire game and the Buchanan goal line was never seriously threatened. Both local touchdowns were made by Wilcox, playing at right half, around the Kalamazoo right wing. Buchanan had another chance a few minutes after the opening whistle, when they advanced the ball to the one foot line, where Kalamazoo held. On another occasion they were cheat-

ed of a score by the 1920 revision of rules when Loren Perry scooped up a fumble and ran 25 yards to the Kalamazoo goal line.

The spirit of both teams was excellent and the game was free from roughness. Bob Rinker refereed satisfactorily, assessing one penalty on Kalamazoo and two on Buchanan, all for offside playing. The visiting team outweighed the locals 15 pounds per man.

The Buchanan Independents line up was as follows: R. E. Dempsey; R. T. Gregory; R. G. Bergman; C. Squires; L. G. Ferry; L. T. Howard; L. E. Burks; O. B. Pfingst; Savoldi; R. H. Chubb; Wilcox; F. E. Conrad; L. H. Chain. The Independents will play a Three Oaks team here Sunday afternoon, and will journey to South Haven Sunday after next.

Scotch Humor.

Sandy MacGregor, after being twenty years in Canada, went back to Scotland to visit his brother, Hugh. Hugh recognized Sandy at once, for his features had changed very little. Sandy on the other hand, couldn't believe that the man who greeted him was his brother. Hugh had been smooth-shaven, but this man's face was covered with a full I beard. At length Hugh exhibited an old scar on his chin which satisfied his younger brother of his identity.

"Why on earth did ye grow that beard, Hugh?" asked Sandy.

"Well, mon," replied Hugh, "ye know ye took the razor with ye when ye went to Canada."

More than 100 articles of every day use are made of bamboo in China.

AIR PLANE MAKERS DIRECT EFFORT TO GREATER SAFETY

RADIO BEACON SERVICE TO OFFSET HAZARDS OF BAD WEATHER.

Those agencies which are devoted to the promotion of safety in aviation are directing as much attention toward what may be termed the accessories of aviation as they are toward the aircraft itself. This indicates that the best aeronautical minds realize that complete safety in flying will not be attained until adequate airports and airways are established and some means found to cope successfully with bad weather.

The standard make of airplane today when flown by a capable pilot under normal conditions may be considered a safe carrier. It becomes unsafe when it is flown in storms or in fog, which blinds the pilot and makes it difficult for him to find his way about.

The recent accident to the Transcontinental Air Transport liner City of Los Angeles, in which eight people lost their lives near Grants, N. M., serves to show the hazards of bad weather flying. The plane was regarded as a safe ship of the type flown by a dozen other air lines in regular passenger carrying. It is improbable that the motor failed. According to those who investigated the accident, it was apparent that the plane had encountered a storm which raged over a wide area in the path of the ship's flight, that fog and clouds had closed down over the plane, obscuring the ground. It appeared that the pilot, his vision impaired, had crashed into the side of the mountain at full speed.

The perfection of the radio directional beacon and radio telephony is looked to as a solution of the dangers of fog flying. The radio beacon is now undergoing intense experiment by mail planes of the National Air Transport company flying between Chicago and New York, and the Boeing mail planes, flying from Chicago to San Francisco. Additional ground stations for broadcasting to the pilots are being established regularly, and the service gradually is being widened.

Radio service for planes in flight will never become entirely effective until an up to the minute weather service is provided by the government. Weather reports for flyers are of no use unless they are timely and continuous, so that they may keep informed of weather conditions.

When these two branches of aviation service are properly developed it will become possible for weather stations to learn the dimensions of storm areas and route planes around them while in flight, or advise them to fly above or under the storm in cases where the storms are only local. Aeronautical experts predict that it will ultimately become possible for a plane to take off from one point, fly across country and land at another point in the thickest weather through the use of ground to plane communications.

Further aid in locating landing fields in fog is the radio marker beacon which sends a strong signal aloft informing the pilot that he is above a landing field. Through such aids the Chicago-New York mail planes are able to travel daily over the fog shrouded Pennsylvania mountains with surprisingly few accidents.

Wide usage of the airplane as a pleasure craft by the private flyer awaits the establishment of adequate emergency landing fields and a network of well marked airways. The department of commerce is doing much in this direction, but the emergency fields are still too scattered. When the countryside is sprinkled with such fields it will be possible to fly anywhere, and always be within gliding distance of a level, unob-

structed field. Emergency fields are especially desirable in mountainous regions. Mountain flying during bad weather is particularly hazardous. With air fields located at the approaches to mountain ranges, pilots would be able to land and wait for the weather to clear ahead.

Airports located near cities and towns should be as large as possible, and free from fog and local haze. The landing area should have clear approaches from all directions, and the surface should be as smooth and level as possible. Proper marking and lighting of an airport has an important bearing on the safety of aviation.

As a safety venture the Guggenheim foundation for the promotion of aeronautics has instituted a campaign for country-wide roof marking.

Americans Prefer The Automobile to Tables and Chairs

Americans continue to prefer automobiles to furniture. The monthly report of business conditions in the Seventh Federal Reserve District showed a 10.9 per cent greater automobile production than this time last year while furniture production fell off 9.1 per cent.

The report said there were 449,714 passenger automobiles produced in the United States last month, an increase of 4.1 per cent over July. Furniture shipments, despite less production, increased seasonably 32.3 per cent over July

and 8.0 over the same period last year, the report stated.

OCEAN FREIGHTERS LOADING CARGOES AT DETROIT DOCKS

MICHIGAN MANUFACTURERS SAVE \$20 PER CAR ON FREIGHT TO EUROPE

Michigan-made products are being shipped to Europe regularly in vessels loaded at Detroit and with each sailing Detroit's dream of being an ocean port becomes more of a reality. Large ocean freighters are regularly creeping into the docks of the Detroit Railway & Harbor Terminal Company, at the foot of Clark street, this summer, taking aboard goods and merchandise manufactured in Michigan plants, and then steaming away for direct passage to Antwerp, Belgium.

The fifth sailing from Detroit took place on Sept. 12, when the S. S. Magnar cast off its lines and turned its prow seaward. Another ship left Sept. 26, which will be followed by two this month and two in November. The vessels are chartered by the Central West European Transport Company, officials of which have evidenced their confidence in Detroit's ability to provide sufficient tonnage to warrant tide-water ships operation on a regular schedule from this port by their investment in the

venture. The increase in freight each trip is proving the soundness of their judgment and the cargo carried by the second ship this month is expected to show a profit.

The all-water route is cheaper and substantial savings can be effected by many manufacturers, according to T. C. Steven, general manager of the line. A manufacturer of medium priced motor cars, who is making shipments regularly, is saving from \$18 to \$20 per car, depending upon whether the cars are shipped assembled or "knocked down" to be assembled at Antwerp.

No transfer or literature is involved, as is necessary at Atlantic ports. Costly charges and risk of damage are thus eliminated.

Goods are said to arrive in as presentable a condition as when shipped, due to the fact that but one handling is necessary.

The ships being used at present are 250 feet long and can carry a cargo of 2,500 tons. They draw 14 feet of water and are the largest ships that can pass through the Lachine canal.

The increase in tonnage shipped since service was inaugurated has been so great that the company is planning on purchasing six new ships for use during 1920. These, together with the six chartered at present, will enable the company to run a ship in and out of Detroit every two weeks from May 1 to Nov. 15. The voyage from Detroit to Antwerp requires 21 days.

The bones and claws of the tiger are prized by the Chinese for their medicinal value.

A Line. Contrary to the dictionary, a line is not a string, cord or rope. Neither is it a threadlike mark of pen or pencil. If straight, it is not necessarily the shortest distance between two points.

A line is what makes a beautiful girl leave the dance floor at 10 p. m. and sit in the back seat of a broken down touring car till 2 a. m.

A line is what makes a beautiful girl roll her eyes at a man who has freckles, big ears and no money.

A line is what makes a chicken cross a road and get into a strange automobile.

Mr. and Mrs. Harry Williams and daughters were in Niles Sunday. Mr. and Mrs. J. H. Nye of Benton Harbor, were guests in the Firmon Nye home Tuesday. Mr. and Mrs. John Dickey and grandsons, Russell and Stanley, were dinner guests at the home of Col. John Seymour Sunday. Mrs. Frank Wolf and son were visitors in the Ben Wolf home in South Bend Sunday evening. Dr. Frank Higbee, Three Oaks, was called to the Chas. Shepherd home, a few days ago because of the illness of Mrs. Shepherd and son, Jimmie. Vivien Ingles is working at Gladys the week. Mrs. Sadie Ingles and grandson, Sylvester, were in Three Oaks on Monday. Mrs. S. A. Engeswick and son of St. Paul, spent part of last week in the Currie McLaren home. Floyd Williams and brother, Orville, and families of Niles, spent Sunday evening in the Harry Williams home. Beryl and Foster Bowker of Gallen and their families and Kenneth Bowker and children of South Bend, spent Monday evening in the Mike Bowker home. Mrs. Anna McLaren and daughter, and guests, Mrs. Engeswick and son, were called in the Mary Straub and Fred Gleisner homes Saturday. Mr. and Mrs. John Dickey and grandsons and Mrs. Eva Dickey were dinner guests in the Albert Dickey home in South Bend on Saturday. Mr. and Mrs. Schommer (newlyweds) of Racine, Wis., were guests in the Joe Fulton home part of last week. Mr. and Mrs. Chas. Diedrich have received the announcement of a new grand daughter born in the home of Mr. and Mrs. Evert Hardman at South Bend. Mrs. Hardman was Miss Fay Diedrich. Mrs. Anna McLaren and her daughter, Elaine, and their guests, Mrs. Engeswick and son, were visitors at the Doan Warnke home at Gallen, Monday. Mr. P. McLaren and wife of Peoria, Ill., are guests in the Currie McLaren home. Mr. and Mrs. Firmon Nye and son, Lyvie, and wife, were guests at a birthday dinner party in the Henry Glade home near Benton Harbor Sunday. Mrs. H. T. Ingles entertained Chas. Bohn and sister, Minnie, Dick Norris and Sylvester Ingles at dinner Sunday. Mr. and Mrs. Henry Goodenough and mother, Mrs. Margaret Goodenough, spent Wednesday in Mishawaka, and Mrs. Mikessell came home with them. Mrs. Alice Best and Mr. Walkins of Lydick, spent Sunday in the Chas. Storm home. Miss Grace Harris and Paul Luther spent Thursday evening in the Herbert Goodenough home. Mrs. Dell Smith spent the week end with her daughter, Mrs. Gladys Gatherman of South Bend. Mr. and Mrs. Henry Goodenough spent Sunday in the Henry Kiefer home at Gallen. Miss Nola Vantilburg was home from Kalamazoo, over Sunday. Theina Norris was home for the week end from Gallen school. Mr. and Mrs. Howard Bessy and daughter were called to southern Ind. this week on account of the serious illness of the former's mother. Mr. and Mrs. Walter Raace of Benton Harbor, spent part of last week in the Herbert Raace home. Mr. and Mrs. Tim Powell and mother and Mr. and Mrs. Arthur Walters and family of Buchanan, were Sunday visitors in the Ed. Phillips home. Word comes that Mrs. David Enders has been taken to a South Bend hospital and is very sick. She was Minnie Warnke and is well known here. We hope for a speedy recovery.

Hills Corners

Several from here are planning to attend both the S. S. Convention Thursday and Friday and the Young People's Convention Saturday at St. Joseph. Members of the 1930 Club met Tuesday and Thursday evenings to continue redecorating their class room. The Home Economics Club met at the home of Mrs. Ray Weaver last Thursday afternoon. Refreshments were served by the hostess. The next meeting will be an all day meeting Oct. 31 at the Buchanan High School auditorium. The Kool reunion was held last Sunday at the home of Mr. and Mrs. Alva Lauer. Mr. and Mrs. Claude Blackmun entertained Mr. and Mrs. Dell Blackmun, Mr. and Mrs. Harold Blackmun and sons at a birthday dinner Sunday in honor of Harold and Dell Blackmun. Mr. and Mrs. Bohl, Mr. and Mrs. Shephardson, Mr. and Mrs. Barnhart, Mrs. Wm. Lewis and Mrs. W. Kennedy attended the L. O. O. F. convention at Escanaba last week. Contract Job The druggist was awakened long after midnight by the violent ringing of his door bell. On looking out his window, he saw a young miss in evening clothes. "What's the matter?" he cried, as he pulled on his dressing gown. "Somebody ill?" "Oh, no," she cried gaily, "but I'm not a dance close by and I've mislaid my rouge." "Really?" said the druggist softly. "Well, I'm sorry, but I never keep enough rouge in stock to cover a cheek like yours!" Bubonic plague, spread by rats, killed more than 11,000,000 people in India alone in the twenty years ending 1923.

Harnessing the Father of Waters

Major John C. Gotwals, under whose supervision the stabilization of the Mississippi from the mouth of the Missouri to Cairo, Ill., was made possible, will continue the enormous task by further harnessing of the river down to New Orleans. The project, which up to the present has necessitated the expenditure of \$10,000,000 by the United States, will continue by converting a winding river into a controllable channel. The photograph shows Major Gotwals at his desk at the custom house in St. Louis.

News around New Troy

Mrs. Naomi Harris and son, Clifford, spent Monday afternoon in St. Joe. The body of Dean Ferry, the five weeks old infant child of Mr. and Mrs. Clyde Ferry of Harbert, was brought from Ann Arbor hospital Tuesday by Undertaker Hall of Bridgman. The child passed away Monday night. The funeral services were held here Wednesday afternoon at the C. Carteville home, a sister of Mr. Ferry. Interment was made in the local cemetery. Mesdames O. A. Nash and Dean Morley were out Monday working in the interest of the school harvest festival. The M. E. Ladies Aid Society served lunch at the Floyd Miller sale Tuesday and did well financially. Mr. and Mrs. Chas. Moore, who have been visiting in Chicago for several days returned home Saturday. The Bridgman O. E. S. Club will give a farewell bridge party at the home of Mrs. Franks on Thursday, Oct. 24, in honor of Mrs. Hislop, who is going to California to spend the winter. Mr. and Mrs. Henry Barnhart and Elmer Barnhart of Chicago, and Mr. and Mrs. Alfred Plomb of Bridgman, were Sunday guests at the Zurliey home. Mr. and Mrs. Gerald English spent Sunday at the Henry Webster home at Benton Harbor. Mr. and Mrs. Ray Zimmerman will entertain at a bridge party on Monday evening at Mr. and Mrs. Raymond Briggs of Niles, Mr. and Mrs. Fred Hamilton of Buchanan, and Mr. and Mrs. Gerald English. Robert Elder, father of Mrs. Gerald English, has gone to Shelby to visit his niece, Mrs. Espey. The Ladies Aid Society of the M. E. church will serve supper in the basement Thursday evening, Oct. 24, at 5:30. Adults 35, children 25c. Mr. and Mrs. Joe Duffield en-
