

BUCHANAN FLOAT WINS PRIZE

B. H. S Commencement Exercises Will Be Held on June Fifth

Now Here's the Proposition

HAZARDS
By Hawes

If you aim to be a player in the game of golf, my friend, You need a bit of hazard 'twixt the take-off and the end. It's the hazard, not the fairways, make a player learn his stuff. And you get your education when you're playing in the rough. When the green's smooth and even, not a stick or stone to mar. Every dub that chases golf balls ought to make the course in par.

It's the hazards, not the fairways, make a player from a dub; It's the hazards, not the fairways, teach a man to use his club. It is shooting over doglegs, it is playing out of sand. It is lifting over rivers puts the cunning in your hand. And the knowledge in your noodle; and then when the game is done, It's the hazards, not the fairways, are the measure of your fun.

It is so upon the golf course and in life it is the same; It's the hazards, not the fairways, put the pep into the game. It is firm and steady playing, spite of any hole you're in. That makes a man a winner if he's got the stuff to win. Since the day when Adam teed off on this old transducer star. It's the hazards, not the fairways, that have made us what we are!

CRANES NEST IS LEASED FOR SUMMER CAMP

Chicago School Leases for
Its Summer
Headquarters.

ON BERRIEN SPGS. ROAD

Morgan Park Boys' School
To Occupy in Vac-
Season.

Another summer boys' camp will be added to the rapidly growing number in this section this season with the leasing by Mrs. Effie Crane of her beautiful home, 5 1/2 miles north of Buchanan to the Morgan Park Junior Boys' School for the entire vacation season.

Charles West, supervisor of boys at the Chicago suburban school, visited Crane's Nest Sunday and completed the negotiations for the lease, stating that he was highly satisfied to secure a place so beautiful and so well located. The house is located on the paved road from Buchanan to Berrien Springs, a mile and a half north of the Colvin School, and is one of the most beautiful rural residence properties in this section, located in a wooded section interspersed with lakes.

The house is thoroughly modern and contains nine rooms in addition to a summer kitchen. Tents will be pitched in the yard to accommodate the overflow, as it is anticipated that from 15 to 20 boys will be accommodated at one time.

The Morgan Park Junior school is a high class boy's school located at 10615 Leavitt Street, Morgan Park. The boys attending the camp will enroll for a period of six weeks for a fee of \$250.

Clark Employee Fined for Theft of Brake Linings

Jack Dillon, an employee of the Clark Equipment Company, pleaded guilty Wednesday morning in the court of Justice of the Peace Al Charles to stealing brake linings at the plant the previous day. He was given the choice of paying a fine of \$25 and costs or spending 30 days in jail. He paid the fine.

The Buchanan Choral Society will rehearse with the Galien Valley Choral on Tuesday evening, at 8 o'clock fast time, at South Bend in the Y. M. C. A. at the corner of Main and Wayne streets.

REV. RAEMER DECORATION DAY SPEAKER

Legion Post Arranges an
Elaborate Program
For the Day.

URGE VETS TO MARCH

Memorial Services on May 25
at the Evangelical
Church.

Arrangements are now under way under the direction of Commander Tom Burks of the Legion, and a staff of assistants for one of the most complete and carefully arranged Decoration Day programs of several years.

Father Raemer of the Department of Philosophy of Notre Dame University, will give the address of the day. Father Raemer is supplying the local Catholic Church, and has appeared on a number of occasions here, establishing himself as a favorite speaker.

Rev. Thomas Rice of the local Methodist church will give the opening prayer and Rev. A. Geist, retired Evangelical minister and Civil war veteran, will give the closing prayer. Negotiations are under way with the high school glee club to furnish the music.

All the churches of the city will meet in a Memorial Day Service at the Evangelical Church on Sunday evening, May 25. The complete arrangements will be announced later.

Commander Burks stated that a special effort is to be made to have all veterans of the Civil, Spanish-American, and World War to be present. Only the firing squad will be asked to appear in uniform, other veterans coming in civilian garb.

QUEEN CECILIA HONORED AT POST FETE ACTIVITIES

SHOWED WITH ENOUGH
VITATIONS TO LAST
TWO SUMMERS.

The song is over but the melody is still apparently lingering on for the Queen of the Blossom Fete and her court, according to Miss Cecilia Eisenhart, who arrived at her home here Monday evening with enough invitations ahead to occupy her time "for two summers if I take them all."

The court disbanded Sunday after special services held at the Congregational Church of Benton Harbor in their honor, Miss Eisenhart remaining over until Monday with her roommate, Miss Jennette Barrington of Ludington, who left then for Chicago where she attends an art school.

Last night Miss Eisenhart was among the guests of honor at a dance given at the home of a special honor of the representative of that place, Miss Libbie Strakes.

On the coming week end Miss Eisenhart will be the guest of friends at the University of Indiana at Bloomington, and at Indianapolis. Next Wednesday night she will be the guest of Miss Dowagiac (Velma Lason) at a dance given at the Ramona. Dance Hall at Star Lakes, Dowagiac. At all after affair the members of the Blossom Queen court are to receive handpainted miniatures of themselves in gold frames as tokens.

During the week preceding Decoration Day she will be the guest of Miss Jennette Barrington, who was Miss Ludington, at the latter's home there.

"It had a wonderful time throughout the whole affair and I enjoyed myself to the very limit every minute of the time," was Miss Eisenhart's summary of her triumph as Queen of the Fete.

Vogue Beauty Shoppe Observes 7th Anniv.

The Vogue Beauty Shoppe will observe their 7th anniversary on Saturday, May 17th. They are offering several specials for the occasion. There are three experienced operators there to take care of your needs.

CLARENCE MARSH INCURS INJURY IN M-60 AUTO UPSET

YOUTH TRIES TO PASS CAR
ON HILL; MAY LOSE
LEFT EYE.

Clarence Marsh, 15, son of Mrs. Tillie Marsh of the Wagner District, incurred serious burns on face and eyes, when the car in which he was driving overturned while en route home from Niles Sunday afternoon.

Young Marsh was en route west on M-60 in company with his brother, Herbert, and Frank and Elmer Lurke, when they attempted to pass another car mounting a hill just beyond the entrance to the B. B. Clark home. As they drew alongside the car they were passing, another car loomed up immediately in front of them at the top of the hill. Young Marsh put on his brakes and swerved sharply to get behind the car he had attempted to pass. Due to the sudden turn and violent application of the brakes the car turned over in the ditch, wheels up. All the boys escaped without injury save Clarence, whose face was burned by the acid which ran out of the battery.

He was taken to the Wallace hospital, where it was found that two blisters had been raised on the pupil of his left eye, and that the sight of the optic is threatened. He is now progressing satisfactorily and it is believed that he will retain the sight of both eyes.

Frank F. Rough, Buchanan Native, Dies in Detroit

Frank Rough, former Portage Prairie resident and a cousin of Harry and Jacob Rough, died on Thursday of last week at the Henry Ford hospital in Detroit and was buried Saturday in Roseland Park cemetery. He was born in Buchanan Oct. 18, 1869 and was married to Daisy Emery of Galien, a niece of the Blakeslee family of that place. He owned and operated the old Rough farm on the north side of the Portage Prairie road to South Bend, immediately east of the York corner. In 1913 he went to Detroit, where he lived until his death. For the last ten years of his life he was associated with the Detroit water board. He was a member of the Ingleside Club and of Buchanan Lodge No. 68 F. & A. M. He is survived by his widow, by two daughters, Virginia and Marjorie; and by a sister, Mrs. F. J. Meyer of South Bend.

CLAUDE MATHEWS, FORMER RESIDENT, EXPIRES TUESDAY

EMPLOYEE WYMAN'S FOR 40
YEARS; CLERKED FOR
HIGH BROS. HERE.

Claude E. Mathews, 70, a resident of Buchanan during his youth and young manhood, passed away at 8:45 a. m. Tuesday at his home 404 Lincoln Way West, South Bend, after an illness of four weeks.

Mathews was born in Muncie, Ind., on Jan. 26, 1860, the son of Webb Mathews. He came to Buchanan with his parents in early youth. Here he entered mercantile work, clerking for several years in the dry goods store operated by High Bros. In early manhood he went to South Bend and entered the employ of the George Wyman Company. He married Miss Emeline Z. Fredrickson April 26, 1894. He continued in the employ of the Wyman store until obliged to leave for Colorado on account of ill health. After recovering his health he returned to South Bend and entered the credit department of the same store, where he remained until his death. He is survived by his widow.

Funeral services are to be held at 2:30 p. m. today (Thursday) at the L. H. Orvis Funeral home, with Rev. Archibald McClure of the First Presbyterian church officiating, and interment is to be made in the South Bend city cemetery.

Mrs. Otto Schurr, Chicago Star, left for Detroit Tuesday, to spend a few days at the home of her son, S. T. Johnson.

EVAN. CHURCH CONVENES AT PORT. PRAIRIE

Sixty-First Michigan Confer-
ence Held in Local
Church.

200 DELEGATES ATTEND

Three Sessions Daily to
Close on Sunday
Evening.

Bishop M. T. Maze arrived yesterday from Harrisburg, Pa., to take charge of the sixty-first annual session of the Michigan conference of the Evangelical church now in session at the Portage Prairie Evangelical church.

The 140 churches of the conference are represented by either ministers or lay delegates, who are being entertained by the members of the Portage Prairie and Buchanan churches. This is the fifth time the sessions of the conference have been held at the Portage Prairie church, which is ranked as one of the strongest open country churches of Michigan. The last conference to be held in the local church convened there ten years ago.

The Portage Prairie church was founded by the Germans who came to Portage Prairie from Pennsylvania in the early days. The present structure was built in 1887 and has a seating capacity of 450. The membership of the church is 170 and the Sunday School enrollment is about 200.

One of the features of the conference was the address of Rev. C. W. Guinter, returned missionary from Africa, and the vocal music rendered by the choir of the Scotland Evangelical church at the meeting held Tuesday evening. Last night Professor E. D. Ribbel of Naperville College, Naperville, Ill., addressed the conference. He formerly occupied the local pulpit, preaching here seven years; the maximum tenure allowed by the conference. He left here five years ago, going to Detroit, and went from there to a chair in Naperville College.

The ordination service is to be held Sunday afternoon in the First Presbyterian church of Niles, to secure the larger seating capacity for the attendance anticipated on that occasion.

Thursday, May 15th—Evening

7:00—Song Service
Evangelism Rally, Speakers
Present: Need, Rev. Splitter
East Method, Rev. Banden
Release of Power, Rev. Fall.

Afternoon—

2:30—Ordination Service.

At First Presbyterian church 15 So. 4th Street, Niles.

Evening—

7:30—Song Service.

(Speaker to be announced)

Break Birdies at Club Traps Sunday

"Red" Wood again topped the crackmen at the weekly clay bird contest at the Buchanan Gun Club traps Sunday, scores being as follows: Wood 20-20-23-23, L. Sands 20-21-17, C. Bennett 15-16, Michaels 10; Keigley 11; Ed Sands 13.

J. Smith Buried at
New Carlisle, Wed.

John Smith, former resident of Buchanan, died yesterday at New Carlisle, where he had lived several years. He was buried at New Carlisle. Since that time his farm has been subdivided into the Ladyard addition.

FRED MEAD AGAIN TAKES OVER HELM BUCHANAN BLUES

OPENING GAME OF SEASON
VS. STEVENSVILLE HERE
ON MAY 25.

The baseball season will be inaugurated in Buchanan on May 25, when the Buchanan Blues under the direction of the veteran manager, Fred Mead, will again take the field, opening up with a game against the nine representing Stevensville. Manager Mead has a promising bunch of candidates from which to make his selection, several of whom have been playing two or three weeks on other teams. Ladies and children under 12 years of age will be admitted free this year, Mead states.

HATTENBACH ERECTS NEW COAL CARRIER

Modern Type Electrically
Controlled
Conveyor.

TO SAVE COAL WASTE

Construction work is in progress at the yards of the Hattenbach Coal & Ice Company on the installation of a new coal conveyor of the most modern type, designed to handle coal economically and with as little waste and breakage as possible.

The conveyor is to be mounted on a timber frame work 140 feet long and 50 feet high which is to eventually house a row of circular cement silos to hold the different grades of coal.

A pit, fourteen feet deep, has been excavated below the unloading spur, to house a conveying bucket which holds a ton. Into this bucket the coal is unloaded from a chute by the hopper cars. The coal is dumped from the hopper cars into a shallow pit from which it feeds into the conveyor. The conveyor is then lifted and runs along the conveyor track under electrical power and control, automatically dumping into a bin designated on a dial in the office. The operation and dumping of the conveyor is entirely controlled by electric switches in the office. The conveyor dumps automatically as soon as its bottom touches in the coal bin, the release of 25 pounds in weight causing the conveyor to raise and let go its load, which is dumped with a minimum amount of breakage.

This conveyor type has been on the market less than a year and is a distinct improvement over anything hitherto put on the market. It is one of a very few to be installed in this part of the country.

Three Oaks Youth Expires as Result of Auto Collision

Parmalee Dillenbeck, Three Oaks high school senior, died Monday in St. Anthony's hospital, Michigan City, as the result of injuries incurred when the car in which he was en route home with two other youths from the Blossom Queen Cornation Ball at St. Joseph crashed into a truck parked on the highway without lights. The other youths, Harold Fisher and Willie Glavin, and high school seniors, were seriously injured but are recovering at their homes.

George Fritz Dies at Twin City

George Fritz, 92 year old Twin City resident and former member of the Chicago Board of Trade, died at his home there Saturday. For twenty years he was a member of the firm of Leet & Fritz, prominent operators on the Chicago Board of Trade. Coming to the Twin Cities at the age of 60, he operated a large fruit farm on Lake Avenue until past 80, when failing sight obliged him to give up his fruit activities. Since that time his farm has been subdivided into the Ladyard addition.

PRES SPENCER OF HILLSDALE WILL SPEAK

Is the District Governor of
the Rotarians, Noted
Speaker.

BOYS WIN CLASS HONOR

Rev. J. L. Griffith to be
Baccalaureate
Minister.

William Gear Spencer, president of Hillsdale College, Hillsdale, Mich., and district governor for the Rotarians, has been secured as the commencement speaker for the 1930 graduation exercises at the Buchanan high school. Spencer is a speaker of wide reputation and his selection is most fortunate for the success of the commencement exercises.

A class of 44 is to be graduated this year, with two boys leading in scholastic averages. Richard Zerbe is high student in scholarship, with an average of 96.1 in all studies for the first seven semesters. The record of Zerbe is quite unusual, as he ranks six points ahead of his nearest rival, Arthur Anderson. Both young men were prominent in general activities, leading the debating squad last year. Zerbe has served as editor and business manager of the Microphone and is a middle distance star in track.

Edith Eddy actually ranked second in scholarship with an average of 94.6, but was disqualified from class honors by the fact that she had only recently come from Three Oaks where the greater part of her high school work was done.

The membership of the class is:

Arthur Anderson, LaMar Aronson, Irene Bachman, Marion Bachman, Ray Barbour, Esther Bradley, Ellsworth Bristol, Claude DeWitt, Velma Bagley, Edith Eddy, Dorothea Eisele, James Ellis, Sara Jane Ernst, Chancy Ernst, Mary Frikid, Robert Geyer, Marjorie Howe, John Kandrup, Helen Kean, Harold Knight, Jacob Kuntz, Elmer Lawson, Carleton Marble, Wanda Mitchell, Marie Mitchell, Elizabeth Montgomery, Mildred Morse, Freida Neff, Ralph Pfingst, Harold Pierce, Maynard Post, Hilma Rastatter, Raymond Reed, Kathryn Reed, Valmore Speckin, Walter Squier, Vernon Vincent, Alene Welbaum, Wilma Wilcox, John Zachman, Richard Zerbe.

Rev. Griffith Baccalaureate Speaker.

Rev. Jesse L. Griffith of the Church of Christ has been selected to deliver the sermon for the baccalaureate service on Sunday evening, June 1. The program for the baccalaureate is as follows: Selection, High School orchestra. Processional, Members of Graduating class.

Invocation, The Rev. W. D. Hayes. Hymn, My Faith looks up to Thee. Scripture reading and prayer, The Rev. Thomas Rice. Selection, Mixed Chorus. Baccalaureate Sermon, The Rev. Jesse L. Griffith. Benediction, The Rev. Harry W. Staver. Recessional, Members of Graduating class.

The program for the commencement service will be as follows: Processional, High school orchestra. Salutatory, Arthur Anderson. Music. Address, William Gear Spencer, A. M. LL. D. Pres. Hillsdale College. Valedictory, Richard Zerbe. Selection, High school orchestra.

Board of Review Holds Annual Kick Session May 19-20

Notice is contained elsewhere in this issue of the meeting of the city board of review at the office of the city clerk on Monday and Tuesday, May 19 and 20, for the purpose of reviewing the schedule and hearing any complaints that anyone who believes him or herself to be unduly assessed make their complaint at this time. The board of review is composed of the three supervisors, Harry Boyce, Harry Beck and W. T. Richards.

Mrs. Julia Thanning was a visitor in Chicago Sunday.

FORMER SHERIFF ENTERS LISTS AT COMING PRIMARY

GEORGE C. BRIDGMAN SHOES
HAT IN RING AS CANDIDATE FOR OFFICE.

George C. Bridgman today formally announced his candidacy for sheriff of Berrien county. He will seek the Republican nomination in the September primaries.

Announcement of the prominent known Benton Harbor man's

candidacy was made simultaneous with the appearance of his petitions in all sections of the county.

Word that Bridgman would ask the voters to elect him to a third term as sheriff definitely establishes his part in the 1930 election campaigns.

Bridgman will ask election this year on the strength of his record as sheriff during the years 1921-22-23-24. During that period he successfully handled a large number of the most baffling cases in the criminal history of Berrien county. There was but one unsolved crime on his books when he stepped out of office. That was the murder of George Thompson, Niles gambler who was shot to death in the south end city. Bridgman, however, was fast closing in on Thompson's slayer when he turned the county jail keys over to his successor.

Even out of the sheriff's office, Bridgman has demonstrated his ability to track criminals. As a personal friend of William Berk, Berrien county circuit court officer, the former sheriff trailed William C. Gates and his two sons across the nation and eventually brought them to trial in Federal court at Grand Rapids on charges of abducting Miss Marguerite Berk, St. Joseph high school girl.

A few of the outstanding cases handled by Bridgman during his regime were the now famous Red raids in the sand hills near the village of Bridgman; the Henry Gerling slaying; the Cora Raber murder; the killing of William Handy and the Galien and Eau Claire bank robberies.

The most spectacular event in Bridgman's career probably occurred the night when a mob of 1,000 persons stormed the county jail and unsuccessfully demanded that he turn over to them a Negro prisoner accused of attacking a white girl in a Benton Harbor park.

Private Cars—Reo Sales company (only entrant).

Associations and Jobbers—(1) Benton Harbor Retail Merchants association; (2) Preston Lumber company; (3) Benton Harbor Chamber of Commerce.

Villages—(1) Buchanan; (2) Berrien Springs; (3) Hartford; (4) Dowagiac; (5) Benton Harbor; (6) Allegan.

A huge apple blossom formed the piece of resistance of the Buchanan float, which more nearly embodied the blossom idea than any other equipped in either the village or city division. Nine girls rode the float, former Blossom Fete queen, Gladys Dempsey, being stationed immediately behind the huge blossom. Miss Mary Jane Harkider stood at the right of the central blossom and Miss Charlotte Arnold at the left. With Miss Arnold stood Barban Hamilton and Barbara Schram. Under a flowering arch in front sat Cherry Blossom Heim and Una Kelley.

Eddie Smiles of the Chevrole, garage force drove the float very competently.

Buchanan Encampment Gives Patriarchal Degree May 23rd

Buchanan Encampment No. 16, will confer the patriarchal degree work on a class of candidates on the evening of Friday, May 23.

Mr. and Mrs. Verl Clark and Mr. and Mrs. Pete Blanta of the Mt. Tabor section drove to Republic Friday, in the Upper Peninsula, returning Monday.

Four judges passed on the merits of the parade floats. They were: T. G. Kless of the P. M. Vol land company, manufacturers of art novelties, Chicago and New York; Robert Kyle of the South Bend News-Times; Elaine Stevenson of the Art College, Kalamazoo; E. A. Arbogast of Chicago, representative of the emission manufacturing company.

Measures, Eagle and Eagle, well known show men of New York and Chicago, were in charge of the scoring for the comic detachments in the parade.

The floats were judged on four points, as follows:

1—Appropriateness and originality, 50 per cent.

2—Beauty and design, 50 per cent.

The comics were judged as follows:

1—The most comical, 75 per cent.

2—Elaborateness and originality combined, 25 per cent.

As judged on the points listed above, the judges declared the following winners in the various float classifications:

Supervisors—City of St. Joseph. Lodges—(1) American Legion. (2) Veterans of Foreign Wars. Nursery Division—(1) C. A. Jeffreys; (2) Gard school. Religious—House of David (only entrant).

Retail—(1) Atlantic & Pacific. (2) St. Joe's Auto Sales; (3) B. A. Low Brothers.

Industrial—(1) New York Central Lines; (2) Robinson Marine Construction company; (4) Industrial Rubber Goods company.

Private Cars—Reo Sales company (only entrant).

Associations and Jobbers—(1) Benton Harbor Retail Merchants association; (2) Preston Lumber company; (3) Benton Harbor Chamber of Commerce.

Villages—(1) Buchanan; (2) Berrien Springs; (3) Hartford; (4) Dowagiac; (5) Benton Harbor; (6) Allegan.

Apr. 21-26 Cuts Michigan Fruit

The prospective Michigan fruit crop has been reduced by the cold weather that prevailed from April 21 to 26. Temperatures from 20 to 25 degrees prevailed throughout the fruit belt and destroyed many buds on sour cherries, plums, pears and early apples. The damage was heaviest in the southwestern counties where much of the fruit was in or near the bloom stage. This loss is believed to be very slight in the northern counties of the fruit belt. Peaches are practically a failure in Berrien County, a very light crop in Van Buren, but considerably better in Allegan and the counties farther north. Present indications point to the following percentages of a full crop: apples, 70; peaches, 32; pears, 70; cherries, 65; plums, 70 and grapes, 82.

A commodious dining room and a kitchen, to prepare food en route feature a new passenger airplane in service between Paris and Berlin.

In 1874 a law was passed in France ordering the manufacturers of handkerchiefs to make them square.

Because of the slump in farm land in Scotland landowners are having great difficulty in renting farms even at reduced rates.

HERE'S

THE WHY HUNDREDS OF THOUSANDS OF USERS have not spent a cent for service

FLAWLESS mechanism—sealed in steel—makes the General Electric Refrigerator unit trouble-proof and service-free. Thousands of persons in hundreds of cities have seen it actually submerged in water—operating perfectly day after day. No other mechanical refrigerator could withstand such a grueling test—a test which has dramatically shown every owner—out of hundreds of thousands—has ever paid a cent for service.

General Electric Refrigerator gives you a perfect mechanism, permanently sealed, properly placed and hermetically sealed. Dust, dirt and moisture cannot get inside the steel-walled unit. Nothing—not even complete submersion in water—can halt faithful operation. This refrigerator serves you quietly, efficiently and unflinchingly.

The cabinet, striking in modern beauty, is all steel, porcelainized and easily movable. Food-storage space is far greater. Let a refrigeration specialist show you the model that best meets your particular needs.

SMOOTH... YES!

because of its rigid, counterweighted crankshaft, Harmonic Balancer and new-type engine mountings

Smoothness is an outstanding quality of Pontiac performance—because Pontiac design includes those features essential to smooth operation.

The 69-horsepower motor operates at moderate engine speed when developing maximum power. The 33-pound crankshaft is counterweighted and has the Harmonic Balancer to

offset torsional vibration. The crankcase is heavily ribbed to retain the main bearings in accurate alignment. And the engine is insulated from the frame by rubber mountings.

You can sense the result of these quality features the minute you take the wheel of the Pontiac Big Six—smoothness at low speeds; smoothness when accelerating; smoothness when the throttle is open wide! And smoothness is the distinguishing characteristic of a well designed, up-to-date automobile!

Consider the delivered price as well as the cost of the price when comparing automobile values.

Pontiac dealers' prices include only authorized charges for freight and delivery and the charge for any additional accessories or optional equipment.

CHAIN STORE FACTS No. 8

YOU HAVE BEEN TOLD "Chain stores sell popular brands at a loss and mislead the public about price and quality of merchandise."

HERE ARE THE FACTS

In American Stores Inc. nothing can be further from the truth since we have never broken faith with the consuming public and have built up our organization on the word "quality." As a matter of fact, widely advertised items and certain staples are highly competitive and carry comparatively little margin of gross profit, and the advantage the chain store is able to offer on these items is comparatively small. However, all other grocery lines such as canned foods, teas, coffees, cereals, etc., have always been sold at long profits under the old regime of distribution. American Stores Inc. has always offered these items as well as others at a decided advantage to the consumer.

Head of Highway Department Tells Where Money Goes

If Michigan people would carry in mind the state wide aspect of the state's highway financing problem there would be less disposition to contentious advocacy of a different division or distribution of the highway funds, is the opinion of Grover C. Dillman, head of the department.

Commission Dillman feels that people generally should realize that, in spite of the impressive totals received from the weight tax and gasoline tax, there is not left a prodigious amount for new construction.

The explanation why there is not ample money to build all the roads and highways, requested continually from many places over the state, is because the fixed charges, which must first be paid from the weight and gasoline tax money, is of a very impressive total.

From the weight tax paid when motorists renew their license tags, the first of each year, there was derived \$21,620,812, in 1929. The gasoline tax totaled a similar amount, or \$21,258,515 during the same year. The total of these two principal sources of income for the highway department is \$42,879,327, and approximately \$2,200,000 in Federal aid.

Those who notice the more than \$45,000,000 perhaps wonder why the state highway department does not meet each year every demand for new roads and highways made upon it. The reason is that the fixed charges which must first be met amount to the sum of \$24,053,804.

The large total of fixed charges is made up as follows: Using the 1929 figures in illustration, there was \$6,000,000 distributed to the counties from the weight tax money.

From the gasoline tax money there was a similar distribution to the counties amounting to \$4,810,106. These two similar items combined are of a total of \$10,810,106. Next most important among the fixed charges is the cost of trunk line maintenance. For 1929 that item amounted to \$6,058,000. Another important fixed charge is that for the interest and sinking fund. In 1929 there was placed in the sinking fund \$4,082,635 for the purpose of one day paying off the \$50,000,000 bond issue instead of paying it from prop-

erty. Beside the items already mentioned there were rewards to counties and townships for certain road building. This item of highway rewards was of a total of \$2,016,802 during the last year. Then there is trunk line maintenance in cities and towns which cost \$320,000; highway department administration, at \$280,000; construction and maintenance equipment at \$200,000; and a final item of \$62,038 for trunk line drain tax.

There is a group proposing that a third of the weight tax money be given to the cities. Since this could not be paid before the fixed charges were met, it would mean that the extra sum for the cities would have to come from the funds now used for construction, and so that sum would be cut down nearly one third.

INCREASE IN MOTOR CAUSES GRAIN SURPLUS

DISPLACEMENT OF HORSES AND MULES REMOVES FEED MARKET.

The ease, speed, and wide range of travel resulting from the motor age are bringing disaster to the farmer, according to Wayne Dinsmore, secretary of the Horse Association of America.

The reason is that the automobile, truck and tractor since 1900 have displaced or have prevented from coming into existence a total of 18,703,000 horses and mules.

Nor is this all. The displacement of these work animals means that 54,257,500 acres of land—the amount that would have been required to maintain such animals—has been converted to the production of food for man, seriously depressing farm markets.

In 1900, Mr. Dinsmore further points out, there were one horse or mule for every 3.05 persons in our total population, now there is but one horse or mule for every 5.92 persons in our population. The decline, he declares, has cost the farmer three markets—namely, the normal increase in demand for horses and mules; the normal increase in demand for hay and grain; and the greater demand and higher price the farmer would be receiving for all other farm products. Mr. Dinsmore holds it requires the product of four acres of fertile corn belt land or its equivalent, to maintain a city work horse, and the product of 2 1/2 acres of such land to maintain horses or mules on the farms.

He believes that horses and mules should be used wherever and whenever they will do the work as cheaply and as efficiently as other forms of power, that is, that they should be used for all short-haul, frequent-stop work in cities, and for all field work on farms. Mr. Dinsmore declares that if horses or mules are used in 5, 8, 9, 10, or 12 unit outfits on farms, and are intelligently maintained on pasture, they are the cheapest, most efficient form of motive power to be had; and, he adds, "a general return to horse-use will result in the diversion of increasing acres to production of power instead of continuing in production of food of which we have too great a surplus, particularly with all other leading coun-

Officers of the Best American Cavalry Unit

Left to right: Capt. J. M. Shelton of New Orleans, La.; Lieut. George B. Hudson of Columbus, Ohio, and Lieut. Donald D. Sawtelle of New York city, officers of Troop F, Third Cavalry, of Fort Myer. The troop was adjudged the best in the United States and awarded the Goodrich trophy, symbol of the highest rating in the cavalry.

tries of the world increasing production of the same foodstuffs and competing against us."

Mr. Dinsmore's arguments are set forth in a recently issued bulletin called "Grain Surplus Due to Decline in Horses."

State Placards Woods to Promote Fire Prevention

Twenty thousand cloth and cardboard signs are now being placed along highways, in state tourist camps, in railroad cars, at fire towers and at other places where they may be seen by the public, by the Forest Fire Division of the Department of Conservation as part of its 1930 educational campaign for forest fire prevention.

In cooperation with the railroad, the Forest Fire Division is placing 3000 cards in railroad cars warning passengers against throwing lighted cigars, cigarettes or tobacco out of the windows.

Thousands of signs are being placed at strategic places along the highways warning against fire. Thousands of small signs are being placed along woods trails and thru the woods. Several hundred signs are being placed in tourist camps outlining fire laws.

The oil fields of the state will be placarded, warning against smoking and the danger of oil fires.

During periods of great fire hazard, when the woods are tinder dry and forest fires start at the least provocation, tags will be placed on every car crossing the Straits of Mackinac. The tags will be attached by men on the state ferries. The cards will warn motorists of the special danger from fires and it is believed that they will have considerable effect in helping to reduce the large number of roadside fires that cost thousands of dollars every year to suppress.

Applications for free pheasant eggs from the State Game Farm, are now being received by the Game Division of the Department of Conservation at Lansing.

Each year the Game Farm near Mason produces a surplus of eggs over the hatching and rearing requirements of the Mason farm, and the "branch" farms at the Jackson State Prison and the Boys Vocational School. These surplus eggs, the department sends out to individuals who agree to raise and release the birds. For several years now the Department has been able to fill all approved applications which were on file when shipments had to stop because of hot weather.

This year's egg distribution will start in about a month. One important change has been made in this year's application form. A new clause reads: "I certify that none of these pheasants are to be used in connection with any licensed shooting preserve or pheasant farm, or for release on areas where a fee is charged for hunting privileges." The applicant must also agree to provide the sort of equipment and to follow the suggestions outlined by the Game Division in its circular "Instructions for Hatching and Rearing of Ring-Necked Pheasants in Michigan."

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

"After more than 15 years of distribution in all parts of the state it has become quite certain that the pheasant will not take hold and maintain itself in the wild-land and deep snow districts," says the last report of the Department to the Legislature. The further placing of birds and eggs in such districts would, therefore, be mere waste. In considering applications for eggs, preference will be given to districts which have proven to be good pheasant territory. Preference is also given to groups of neighbors as against scattering individuals.

Eggs are sent out carefully packed in baskets, with 15 eggs constituting a setting. Successful pheasant culture should hatch about 80 per cent of the eggs set, and rear at least 50 per cent of the resulting chicks. When less than 20 per cent of the eggs "make" birds, the operation is considered hardly worth while, except as the experience challenges somebody to do a better job next time.

During the last two seasons, the Game Division has done much follow-up work on the free pheasant eggs and by visiting with the people who are working with the eggs and chicks, a number of difficulties have been found repeating themselves over and over. The revised circular of instructions includes suggestions for avoiding the common difficulties.

The Great Wall of China is 1250 miles long in a straight line and its twists and curves increases it to nearly 2,000 miles.

YOUNG MOTHER HIGHLY PRAISES MODERN KONJOLA

IN 1 MONTH NEW MEDICINE ENDED SUFFERING AND RESTORED HER HEALTH.

MRS. JOSEPH FREMO

"I think Konjola is the most wonderful medicine in the world, and I have reason to think so. I suffered for a number of years with stomach and kidney troubles and Konjola was the only medicine that gave me more than temporary relief," said Mrs. Joseph Fremo, 1224 Johnson street, Saginaw. "Gas formed in my stomach, pressed up around my heart, caused it to palpitate and made it hard for me to get my breath. I had terrible pains in my chest. The pains in my back, resulting from kidney trouble, also were very severe."

"An indorsement of Konjola by a lady I knew, and with whose case I was acquainted, led me to give this splendid medicine a trial. The first bottle proved to me that I had found the right medicine. After taking the treatment for just one month I felt fine. My ailments are gone, pains have vanished, and I have the strength and energy a mother of two children needs. Do you wonder that I am grateful for Konjola?"

Why not let such happy experiences as that of Mrs. Fremo point the way for you to new and glorious health? A complete treatment of from six to eight bottles of Konjola is recommended for thorough relief.

Konjola is sold in Buchanan, Michigan, at W. N. Brodrick's drug store and by all the best druggists in all towns throughout this entire section.

University of Michigan News Dissemination Service

A University off the campus is maintained by the University of Michigan through its Extension Division. In various centers throughout the state members of the faculty are conducting courses which correspond, as regards requirements and credits, to those given on the campus in Ann Arbor. Over 13,000 students have received credit from the University during the past ten years through these classes conducted away from Ann Arbor.

This year, 3,403 students are receiving their University credit through these extension credit classes. So keen is the appreciation of this service of the University that it is now practically self-supporting.

The classes are composed of graduates of the University of Michigan and other Universities, people who have taken their doctor's degree, teachers in public and private schools of the state and many others seeking an opportunity to broaden their academic interests. Instruction is given by members of the University of Michigan faculties, the classes being scheduled to meet at a time convenient for both instructors and students. No formal requirements are necessary for admission to extension credit courses and this year, for the first time, the University has offered this work to the people of Ann Arbor.

About sixty per cent of the students registered take the examinations, given for those who wish credit, at the close of the semester and the remainder being merely interested in attending the lectures. Credits earned are placed on file and may be used in case the student regularly enters the University.

The extension courses offered for credit cover a wide variety of subjects. Included are: Anthropology, Business Administration, Economics, Education, Engineering, English, Geology, History, Journalism, Landscaping, Design, Philosophy, Political Science, Psy-

chology, Sociology and Zoology. The University Extension Service was organized in 1910 by the late President Harry B. Hutchins. It came as a response to the demand on the part of the people of the state for such forms of public service as may legitimately be rendered by a state university. During its first year this work was carried on through the president's office. The requests, however, grew to such proportions that Prof. William Henderson, who was then in the Physics Department, was asked by the president to give a part of his time to the rapidly developing extension activities.

In 1912, in response to a petition signed by 1,800 teachers, the Regents authorized the giving of Extension Credit Courses in addition to the extension lecture program. Professor Henderson was asked to give full time service to the Service in 1913, and was appointed by the Regents as Professor and Director of the Extension Division.

Game Department Announces Season For Lake Fishing

All lakes designated by the Conservation Commission as "pike" lakes and "trout" lakes and all streams were opened to fishing on May 1. Through an error in a previous announcement the word "pike" was omitted, leaving an impression that all inland lakes were open the first of the month. The open season for bass, bluegills, and sunfish will begin June 25 when all lakes will be open to fishing.

Real Mean. "I hear that Bobby Peterkin's wife is mean." "Mean? Why man, she uses barbed wire for a clothes line so that the birds can't sit down."

May 8 June 12
STATE OF MICHIGAN, The Circuit Court for the County of Berrien, in Chancery.

Marle A. Bauer, Plaintiff vs. Morris C. Bauer, defendant.
Suit pending in the Circuit Court for the County of Berrien in Chancery, at the City of St. Joseph in said county, on the 5th day of May A. D. 1930.

In this cause it appearing from affidavit on file, that the Defendant, Marle A. Bauer, is not a resident of this State, but resides at Chicago, in the State of Illinois.

On motion of Frank R. Sanders, Plaintiff's Attorney, it is ordered that the said Defendant Marle A. Bauer cause his appearance to be entered herein, within three months from the date of this order and in case of his appearance, that he cause his answer to the Plaintiff's Bill of Complaint to be filed, and a copy thereof to be served on said Plaintiff's Attorney within fifteen days after service on him of a copy of said bill and notice of this order; and that in default thereof, said bill be taken as confessed by the said non-resident defendant.

That within forty days the said Plaintiff cause a notice of this order to be published in the Berrien County Record, a newspaper printed, published and circulating in said county, and that such publication be continued therein at least once in each week for three successive weeks, or that she cause a copy of this order to be personally served on said non-resident defendant at least twenty days before the time above prescribed for his appearance.

Dated May 5th, 1930.
CHARLES E. WHITE, Circuit Judge.

Frank R. Sanders, Attorney for Plaintiff.
Business Address, Buchanan, Michigan.

1st insertion May 8; last May 22
STATE OF MICHIGAN, the Probate Court for the County of Berrien.

At a session of said court, held at the probate office in the city of St. Joseph in said county, on the 2nd day of May A. D. 1930. Present: Hon. William H. Andrews, Judge of Probate. In the matter of the estate of Alma Speckline, deceased. William E. Speckline having filed his petition, praying that an instrument filed in said court be admitted to Probate as the last will and testament of said deceased and that administration of said estate be granted to William E. Speckline or some other suitable person.

It is ordered, That the 2nd day of June A. D. 1930 at nine a. m. (Standard Time), at said probate office is hereby appointed for hearing said petition.

It is further ordered, That public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing in the Berrien County Record a newspaper printed and circulated in said county.

WILLIAM H. ANDREWS, Judge of Probate.
SEAL. A true copy. Lillia O. Sprague, Register of Probate.

be drawn to the treasurer, for the difference between Paul Wynn's assessment and the settlement.

The question of placing calcium chloride on the streets was brought before the meeting.

Moved by Com. Hathaway, supported by Com. Leiter, that the commission purchase 40 tons of Salvo Calcium Chloride for the streets.

Upon roll call the following Com. voted aye: Kelling, Hathaway, Merson, Leiter and Pears.

The water works committee reported that some of the old wells were in bad condition, and recommended new wells be sunk.

Moved by Com. Pears, supported by Com. Merson, that the water works committee be authorized to purchase two new wells at the water works.

Motion carried.

The committee on the purchase of the lots at the end of Michigan Street, reported that Mr. Benack asked \$500.00 for the lot. The commission decided the price to high and the matter was tabled.

The matter of taking up compensation was discussed by the commissioners. It being moved by Com. Pears, supported by Com. Hathaway, that the matter of compensation be left with the mayor with power to act.

Motion carried.

The mayor next made the following appointments: Finance committee, Charles F. Pears; street committee, C. C. Hathaway; water works committee, Wilson Leiter; light, parks and library, Frank Merson; city clerk, Harry A. Post; city treasurer, Ada Darcy Sanders; assessor and poor superintendent, Wm. T. Richards; city attorney, Frank R. Sanders; health officer, Dr. Orville Curtis; marshal and street commissioner, Ed. F. Mitchell; night police, John Camp; motorcycle police, Fred Hall; chief of fire department, Tenie Banker; superintendent of water works, Alvin Clark; cemetery board, George B. Richards, Isaac Clevenger, A. F. Peacock; election commissioners, Frank R. Sanders, Rex E. Lamb, Al W. Charles; election inspectors, J. G. Rogers, Harry A. Post; election inspectors, second precinct, Rex E. Lamb, Wilson Leiter, Glen Hasket.

Moved by Com. Pears, supported by Com. Leiter, that the appointments be confirmed.

Motion carried.

The creating of a new fire district was placed before the commission. It being moved by Com. Pears, supported by Com. Merson, that the mayor appoint a committee of three to draw up an ordinance creating a new fire district.

Motion carried.

The mayor appointed Com. Leiter, Hathaway and Buniker.

After some discussion the following motion was offered by Com. Merson, supported by Com. Hathaway, that the mayor be authorized to make arrangements to rent the Mrs. Pears building on Front Street for library and all city offices.

Motion carried.

The commission next canvassed the statement of unpaid Portage and Third Streets Storm and Sanitary sewer and paving tax.

Moved by Com. Pears, supported by Com. Hathaway, that the treasurer's statement of unpaid Portage and Third Streets storm and sanitary sewer and paving tax be accepted and the clerk deliver same to the assessor.

Motion carried.

Social, Organization Activities

Entertain at Dinner-Bridge
Miss Belle Landis and Charles Landis entertained a party of friends at dinner bridge at their home Friday evening. Eighteen guests were present for the evening. Out of town guests were Misses Grace and Lillie Peet and Irene Scott of Grand Rapids and Richard Judd of Dowagiac. Miss Lillie Peet and Lester Lyon held high scores for the evening.

Sunday service at 11 a. m.
Subject, Mortals and Immortals.
Wednesday evening meeting at 7:45.

Reading room, located in the church at Dewey Avenue and Oak Street, is open each Wednesday afternoon from 2 till 4 o'clock.

Christian Science Churches
"Adam and Fallen Man" was the subject of the Lesson-Sermon in all Christian Science churches Sunday, May 11.

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "Therefore the Lord God sent him forth from the garden of Eden, to till the ground from whence he was taken." (Gen. 3:23.)

The Lesson-Sermon also included the following passages from the Christian Science text book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Through discernment of the spiritual opposite of materiality, even the way through Christ, Truth, man will reopen with the key of divine science the gates of Paradise which human beliefs have closed, and will find himself unfallen, upright, pure, and free, not needing to consult almanacs for the probabilities either of his life or of the weather, not needing to study brainways to learn how much of a man he is." (p. 171.)

Redeemer Lutheran Mission
Corner Front and Main, 2nd floor
Divine service every Sunday at 9 a. m.
Visitors always welcome.
"We preach Christ and Him Crucified."

Legion Auxiliary Will Sponsor Poppy Sale

The poppies which the people of Buchanan will wear on "Poppy Day," May 24, have been received by the local unit of the American Legion Auxiliary. Mrs. Charles Pears, chairman of the Auxiliary poppy sale committee, announced today. The little red flowers, packed in neat boxes, were shipped from Battle Creek hospital where they were made by disabled World War veterans under Auxiliary direction. They are paper replicas of the poppies which bloomed on the battle fields in France and Belgium during the war.

"There is a story behind each of the little paper flowers," Mrs. Pears said as she directed the advance preparations for the sale at Auxiliary headquarters. "Each has been made individually by some disabled veteran and each has contributed to the welfare of some disabled man or his family. Hundreds of veterans unable to do other work have been given employment making these flowers

during the winter and spring. "For each poppy made the Auxiliary pays the worker one cent. The disabled man can make about 300 a day without taxing their strength, meaning \$3 earned for the support of themselves or families. The work is given only to veterans who receive little or no government compensation."

S. B. Degree Team Stages Oddfellow Initiatory Work

The South Bend I. O. O. F. Lodge No. 25 degree team exemplified the initiatory degree work at the meeting of the local chapter here Tuesday evening. A number of guests were present from the Niles lodge and the Robert Blum lodge of South Bend.

Seth Ingleright Delegate Encamp. At Cadillac Meet

Seth Ingleright will leave Sunday for Cadillac where he will represent Buchanan Encampment No. 169 at the state convention of the

organization, which meets in that city three days, beginning Tuesday.

Strawberry Crop Good; Harvest to Start Next Week

The 1930 strawberry harvest will begin in this district about the middle or end of next week, with prospects of better than an average crop according to local growers. Only the very earliest berries were nipped by the April frozes.

Mrs. Alice Clark Honored on Anniv. of 82nd Birthday

Mrs. Alice Clark was honored on her 82nd birthday at a weekly pot luck dinner at the Mt. Tabor Ladies' Aid at the Grange Hall on Thursday, about sixty attending, including a number of relatives and friends from South Bend, Berrien Springs and Buchanan. The tables were very prettily decorated with spring colors. Mrs. Clark received many bouquets of cut flowers and potted plants.

111 DAYS AVE. BUCHANAN

Chicago-Buchanan Society Picnic to Be Held June 28

The Chicago-Buchanan Society picnic will be held here this year on the evening of June 28, which will be the Saturday immediately following the close of the Chicago schools, according to an announcement by the president, Miss Mary Reynolds, who conferred recently with the local chairman, Mrs. Leah Weaver. The picnic will again be held on the high school grounds.

Country Schools Close for Summer On May 15 and 23

Rural schools of the districts surrounding Buchanan will close for the most part on May 23, a few closing at the end of the present week. The Kelsey school on the River Road will close tomorrow, following two days of county examinations, and will celebrate at a picnic Saturday.

gentleman's apartment in New
York City; the second and third, in
the Van Zile summer home in
Northampton Long Island. The
time is in mid-summer."Polly with a Past" was first
produced Sept. 6, 1917, at the Bel-
asco theater, New York City,
where it played 326 performances.
It was also produced at the St.
James theater, London, March 2,
1921, under the direction of Gil-
bert Miller.Ina Claire, noted actress, was
first to play the part of Polly,
played by Kathryn Reed in this
production. Hilma Rastetter is the
property manager and Harold
Knight is stage manager.

Grade News

Grade 2—Wilcox

Ruth Campbell, Johanna Burks
and Catherine Harris are ill with
the mumps.The children in Mrs. Wilcox's
room completed their Spring Art
books this week. This concludes a
project in art work.We are making a collection of
birds' nests in nature study. We
have an oriole's, wren's, and spar-
row's nest.Frank Bannak and Dickie Pierce
have the mumps.

Grade 2—Fischner

The boys and girls have finish-
ed their spring books. We also
made a little bird poster this week.Our room, together with Miss
Simmons' gave an assembly last
Tuesday. We invited the boys and
girls in Mrs. Wilcox's and Miss
Carnagan's room.Our share of the program was
as follows:
Song, "The Crocus" by the girls;
song, "Springtime," by the boys;
piano solo, Edward Pascoe; piano
solo, Catherine Wyman.

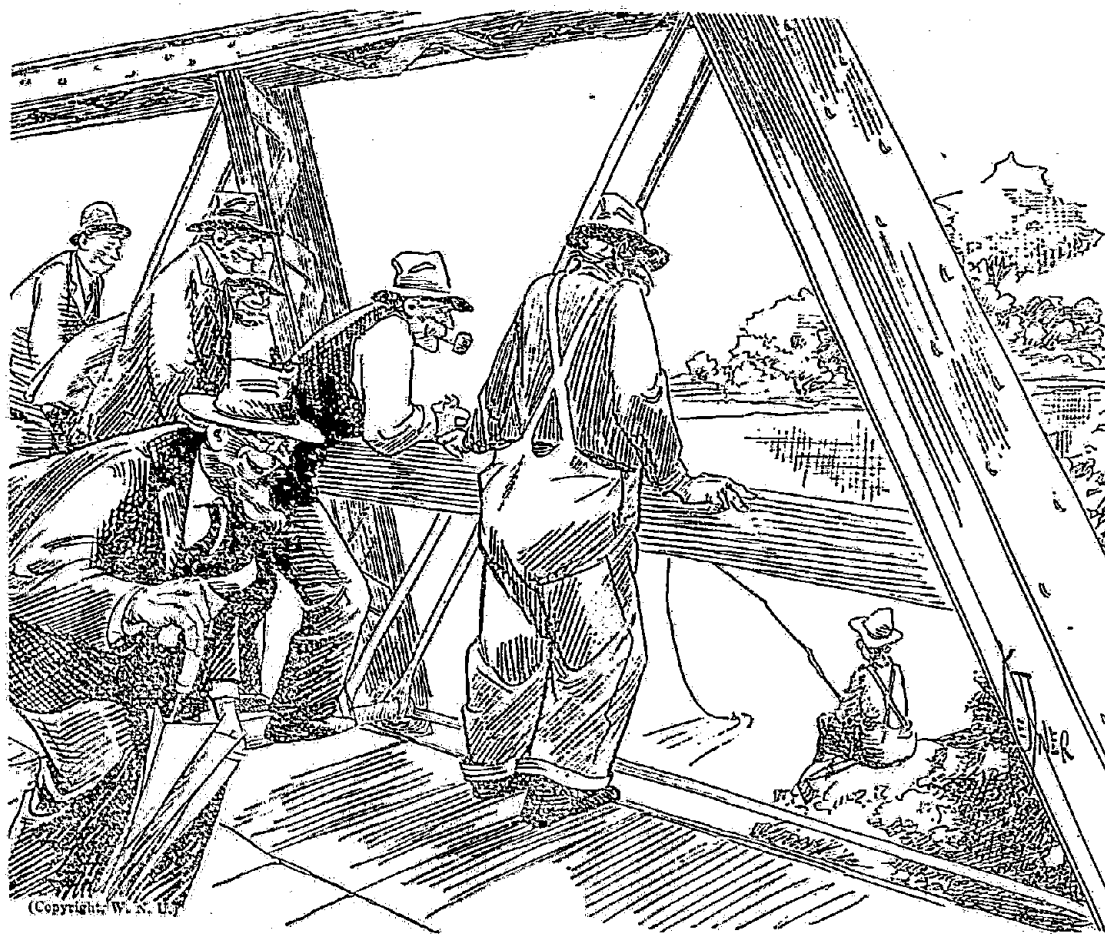

Grade 3—Simmons

We had our last assembly pro-
gram Tuesday afternoon. Mrs.
Fischner and her pupils went in
with us and we had a musical pro-
gram.We invited Mrs. Wilcox's and
Miss Carnagan's pupils to attend.We are sorting out work for the
exhibition next Friday.We are making mats out of bur-
lap for art work.Twenty-six stood 100 per cent in
spelling and the rest stood A and
B.

Grade 3—French

We are learning "A Boys' Song"
for language. We have also writ-
ten stories and poems about the
birds that we have drawn for our
bird books.Mildred Ferris wrote this May
poem for us:
Good morning, Mrs. May Time,
And how do you do?
We're glad to have you here
Don't you think that's true?For art we have worked on our
bird books. Last Friday each boy
and girl made a bird house for a
wren. The houses and trees were
free hand paper cutting. Robert
Hollenbaugh made the best one.The Third Division are enjoying
history stories for their supple-
mentary reading. The second di-
vision are reading nature stories
"By the Roadside."Roy Chapman Andrews tells of
racing a gazelle with his auto on
the Gobi desert. The gazelle pass-
ed him when he was going 50
miles an hour and fast outdistan-
ced the car.

Spring Fever

AG DEPARTMENT
BUILDING ROCK
GARDEN AT H. S.BEAUTY SPOT CONSTRUCTED
IN S. W. CORNER OF
GROUNDS.The Horticultural and Econom-
ic classes of the Agricultural De-
partment of the high school have
turned landscape gardeners this
week and are constructing, under
the direction of Mr. Knoblauch,
a rock garden in the northwest
corner of the school grounds. The
garden opens in a fan shape to-
wards the school and is to be
screened from the rear by a tri-
angle of spirea. The water is to
be piped from the hydrant at the
west end of the building. The
pool has a field stone background
so arranged as to permit the plant-
ing of pockets of flowers, which
will be largely of the Daphne por-
trate crepers. Several dwarf
Mugha pinks and Colorado Blue
spruce are to be planted as back-
ground. In the rear of these a
number of weeping willows are to
be trained so that they will droop
into the pool.Two of the class members have
started rock gardens at their
homes.Award System
Is Devised For
Girls' Glee ClubA committee composed of Irene
Buchanan, Edith Eddy, Nina Huff,
Geneva Metzgar, Francis Sutphen,
Jane Habicht, and Anita Andrews,
met in the auditorium with Miss
Olson, Monday noon. The meet-
ing was called for the purpose of
setting a permanent system of
awards for the Girls' Glee Club.Each girl having perfect attend-
ance, good citizenship, enthusiasm
and good posture, will be given a
gold star at the end of the year.
The committee appointed to decide
who should get the stars is
composed of Anita Andrews, Fran-
cine Sutphen, Nina Huff and Edith
Eddy.Gold lyrics will be awarded to
senior girls who have four gold
stars. This will be a distinctive
honor for those who may receive
the gold star, because it will desig-
nate four years of active ser-
vice in the Girls' Glee Club, per-
fect attendance, and good citizen-
ship.A maroon service bar also shall
be given at the completion of each
year's work in the Glee Club.Buchanan Pupils
Deposit \$6,000
in Thrift AccountsMiss Swift, representing Thrift,
called upon the schools last Wed-
nesday. In our last banking re-
port we find that we have now in
the bank \$5,985.09. We feel that
this is worth while. Total number
of depositors last week were 488
out of 773 pupils present, and the
amount deposited last Tuesday was
\$74.97.BUCK TRACK

Bradfield Enters Men in the
Kalamazoo Regional Meet
May 9.Coach Harold "Curly" Brad-
field's Buchanan tracksters show-
ed the best form that they have
had all season and walked off with
the annual county class "C" and
"D" track meet with little compe-
tition. The "Bucks" ran up twelve
points in the first event, the pole
vault, and increased their lead in
every event. Buchanan rolled up
106 points and Berrien Springs
collected 31½. The other scores
were: Bridgman, 22; Coloma, 18;
Watervliet, 7; Stevensville, 6; and
East Claire, 4½.The "Bucks" scored in every
event and took nine of the thirteen
first places. Graham of Berrien
Springs, won individual high point
honors with 15 points and Wood
of Bridgman was second with 13.
Eiffert led Buchanan with 10
points.Several good marks were set in-
cluding Buchanan's time of 1:41.1
in the 880 relay and Word's of
Bridgman, jump of 20 4½ in the
broad jump.Coach Bradfield will enter sev-
eral of these winners in the regional
meet held May 17 at Kalamazoo.

Annual Exhibit

Grade School Work
To be Held May 16The annual grade exhibit will
take place May 16th, afternoon
and evening. Regular school work
will continue until 2:15 on that
date. The doors will be open un-
til five o'clock. Then again from
6:45 until 9 o'clock in the evening
the teachers will be in their in-
dividual rooms to aid the parents
in any way. This work represents
some of the activities that have
been carried through by the chil-
dren during the entire year. Then
on the other hand, some will re-
present just the day's work.The parents have shown a great
deal of interest in the grade meet-
ings this year and it is expected
this final showing will prove a
worthy incentive to the many
parents who are expected to at-
tend the exhibit.The last reports in Palmer are
being received now from the Chi-
cago office. The year's work
has been very satisfactory. A
compiled report of the different
awards will be published as soon
as it is completed.TO COMPLETE
AERIAL MAP
OF MICHIGANCONSERVATION DEPT. AND
STATE HIGHWAY BOARD
TO CO-OPERATE.The Department of Conservation
and State Highway Department
and the United States Geological
Survey will begin work soon for
the second season of the aerial
mapping of Michigan.The ground control surveys will
be carried on in Mackinac, School-
craft and Delta counties, and as
soon as weather permits aerial
photographing of these counties
will begin. It is possible that other
counties of the peninsula will be
photographed before the end of the
season. Accurate base maps will be
made from the photographs and
ground control surveys.Last summer Muskegon, Oceana,
Mason and the western half of
Lake counties were photographed.
However, ground control surveys
were not made. These will be com-
pleted during the coming season.Through an act of the last ses-
sion of the legislature and through
co-operation of the federal govern-
ment, all of the northern part of
the lower peninsula and all of the
upper peninsula probably will ul-
timately be photographed from the
air to form base maps that will
prove valuable to the Department
of Conservation, the State High-
way Department and to the pub-
lic. The complete survey is ex-
pected to cost \$53,000 with the
federal government bearing half of
the cost.In each county a ground control
survey, which includes proper
markings of identification points
and lines, is being made. These
survey marks and lines are used in
correlating boundaries of photo-
graphs taken from the air.The photographs are taken from
army air corps planes flying at an
average altitude of from 10,000 to
11,000 feet. Each picture shows
clearly all elevations, lakes, roads,
streams, woods, clearings, build-
ings, railroads, etc.

The photographs and the base

An especially posed photographic
portrait of Kaye Don, British rac-
ing driver, who is to attempt at Day-
tona Beach, Fla., to shatter the ex-
isting world's land speed record for
automobiles of 231 miles per hour,
established last year by Maj. H. O.
D. Seagrave, also of England.maps made from the photographs
and ground control surveys are ex-
pected to prove especially valu-
able in the work of the Forest
Fire and Forestry Divisions of the
Conservation Department, the
game refuge work, and the Land
Economic Survey; and to the
Highway Department in laying out
new roads.The tops of the fire towers op-
erated by the Forest Fire Division
of the Department, in several
counties are being painted white
this spring to facilitate identi-
fication of points from the air.After a wedding in the Island of
Rhodes—in the Mediterranean—the
husband dips his finger in hon-
ey and makes a cross over the
door. The spectators then call
out: "Be always good and sweet
as this honey is." The advice is
addressed to the wife!MOLE DRAINS
ARE FAILURE IN
MICHIGAN TESTSYSTEM INSTALLED CHEAPLY
BUT BENEFITS ARE LIMIT-
ED AND TEMPORARY.Mole drainage systems can only
be successful on lands which have
a heavy clay subsoil, and the bene-
fits, even on such areas, are limited
and of short duration, according
to experiments conducted by the
agricultural engineering depart-
ment of Michigan State College.Mole drainage is attractive in
theory because such a system can
be installed at a cost of two dol-
lars per acre where the lines are
spaced two rods apart but the col-
lege trials showed that the lines
would remain open only a compar-
atively short time, and that a
heavy rain soon after the drains
were made might fill them up im-
mediately.The mole drains are made by at-
taching a cylindrical piece of steel
to the bottom of a plow coultter
which is specially constructed to
run in the subsoil below the usual
plowing depth. The coultter cuts a
narrow slit in the soil and the
passage of the steel cylinder leaves
a tunnel at the bottom of the slit.
This tunnel will not remain open
except in clay subsoil and, as
water permeates such soils very
slowly, each tunnel drains only a
narrow area under ideal condi-
tions.The college agricultural engin-
eers advise the use of such a sys-
tem only in combination with tiledrains where the mole drains can
be used as laterals.Birds Caught With Mirrors
Greediness of pigeons is to
be used in ridding London of many
the undesirable birds. Men em-
ployed by the city to do away with
2,000 pigeons say that the birds
are quick to seize any food before
them if another is near. The mir-
rors are to be used to produce the
"other girl," and so enable men
to catch them while they are un-
prepared.In the Philippine Islands the
property of a bride is never settle-
d on her husband. Also, if the hus-
band goes bankrupt and the wife
can prove that any of the money
invested in the business was hers
she ranks as an ordinary creditor.

From Youth to Age

There are three trying periods in a
woman's life: when the girl marries
to womanhood, when a woman
gives birth to her first child, when a
woman reaches middle age. At
these times Lydia E. Pinkham's
Vegetable Compound helps to re-
store normal health and vigor.If you will fill in the coupon and mail to the Lydia
Pinkham Medicine Company, they will send you a
free copy of Lydia E. Pinkham's Private Text Book,

To
Insure or ...is no longer the question. Today practically
every property is insured against fire. And
yet there is an enormous total value not
covered by insurance, in the form of property
that is under-insured.Such cases are usually the result of failure to
increase insurance coverage as value has in-
creased, or of neglect to make proper inven-
tory or appraisal before applying for a policy.
Let us help you to make your insurance ade-
quate.

New Shipment of Popular
sheer, summery, fast color

Chiffonette Arrives

89c

Did hot weather catch you with your sum-
mer wardrobe unprepared? Then hurry to
Wyman's Wash Goods section tomorrow
to stock up on cool wash materials. A new
shipment of the popular 36 in. printed chif-
fonette has just arrived in all the delightful
summer pastel and street shades. This
charming chiffonette is sheer and all fast
color, and because it washes so easily it is
ideal to make up into warm weather frocks.

Lindbergh Now a Success.

Any doubt we may have had for the future success of young Col. Lindbergh has been dispelled. When we read that he had mastered the telegraph key or rather the wireless key—all worry about his was dispelled. For being acquainted with the mysteries of dots and dashes or having the ability to sit down to a little metal key and pound out messages is tantamount to being born in a log cabin.

All of the successful men in this country who were not born in log cabins were once telegraph operators, or so it seems. There is a slight distinction between the kinds of success fostered by the two that is at once apparent. Those born in log cabins usually win fame in political fields; those who were once good, steady telegraphers, usually win fame in commercial, mechanical or inventive fields.

We were afraid for a while that Col. Lindbergh was not going to have a sufficient background of commonness to make him an unqualified success but his latest achievement in sending a wireless message by his own hand, removes the last obstacle.

Soviet Coal Exports

Pennsylvania is thoroughly aroused because of the importation of coal from Soviet Russia. The Philadelphia Public Ledger reports that 160,000 tons have been landed at New England ports and that a Canadian Export Co. has contracted to bring 500,000 tons more as rapidly as it can be moved.

The Ledger says the pay of Russian miners who bring out the coal is about 17 cents per day, while the miner in Pennsylvania is paid \$3 per day. The difference in the cost of production gives the Russian coal dealer a very great advantage in fixing the selling price in this country. As New England is the great market for Pennsylvania anthracite any threat of having that market invaded by cheaper coal is serious.

Pennsylvania is moving to protect its coal trade. In the pending tariff bill is a provision that after Jan. 1, 1932 all articles mined or manufactured abroad by "indentured or forced labor" are to be excluded from the market in this country. Pennsylvania wants the date brought down to the present, make the prohibition effective immediately and stop the danger that hangs over the coal trade there.

Sins Against the Stomach

Warnings against overeating have been made time and again, and the dire results from intemperate eating have become common knowledge. Yet, in the press and rush of present day life sins against the stomach continue. In a recent edition of The United States Daily, the surgeon general of the United States issued another warning against improper eating, and addressed his communication especially to business men.

The majority of disorders, he pointed out, result from the American habit of doing everything, including eating, in a rush. If the American business man would use as much common sense in his daily habits as he exercises in commercial activity, there would be far less dyspepsia, indigestion and ulcerated stomachs, he said.

It only requires a few extra minutes a day to eat properly. These few minutes spread over a long number of years pile up enormous dividends of comfort, good health and energy. What profit is it a man to earn an extra dollar if he must spend it for poison? Or which is the gain if for a small fortune, health is the price? It needs only a little reflection and the realization that the world will go on its steady way even if you are forced to be away from the office five extra minutes at lunch time, to see the value of proper eating.

Do You Smoke in Bed?

Smoking in bed is dangerous as one may know without meeting the experience. It brings many warnings against it have been made, but there are many who insist on disregarding these warnings. As a result many fires are started and each year there is a succession of stories from various places telling of lives lost. As a rule the lives are lost as a result of the smoke. It is difficult to find a greater smoke producer than a flicking cigarette, and fire started in one fills the room with smoke so quickly the sleeping inmate of the room has no chance to escape.

At a recent meeting of fire insurance executives in New England fire losses from smoking in bed were given consideration. In amount these losses had become important. The question was raised about such fires being inside the limits of a fire policy, and if so, the wisdom of preparing a new policy form that would make the owner of the property carry a part or all the risk of smoking in bed if that habit was permitted by the owner. The danger of smoking in bed was great enough in the days when smokers used pipes, but in the days when so many are using cigarettes the danger has been multiplied many times. Those who have acquired that habit jeopardize their own lives and property with each night's smoke.

Vacation Season Near

Vacation plans have been completed by many families, a still larger number have plans under consideration. Indications are that thousands will journey to Europe dur-

ing the summer, but a far greater number will visit some of the interesting resorts in this country and Canada. There are delightful resorts in the regions around the upper lakes. Good highways have been completed to these resorts, one may reach them in a short drive, even if one lives far away. The scenic beauties of the Rocky Mountains will claim a large share of tourists. The Pacific northwest has claims that win tourists each year. Canada is a field of glory and unknown to most tourists from this country. It has a growing number of American visitors each summer. The new country, abundant waters, fine fishing, a temperature that saves the tourist from the intense heat of summer—who can resist such appeals?

A great army of American tourists will travel by auto if history of former years is a reliable indication. One may drive from coast to coast in a few days and find good roads the greater part of the distance. One may carry camp equipment and live in the open, one will find good hotels in most small cities, and one may reach the larger places without undue driving. One may tour Canada by auto and find each hour delightful and expense not burdensome. One may reach the Rocky Mountains without a tiresome drive, and for those who love the mountains there is endless delight ready no matter at what point you reach the towering piles of stone.

Each year some who went west years ago find time to drive back to the old home country and spend a short vacation in scenes once familiar. That is a real vacation, the sort we can enjoy over and over. It helps strengthen human ties that need attention. When distance separates those kin, by ties of blood there is needed the occasional reunion at the old home to bring anew the appreciation of the value and importance of the ties.

New Reason for Crime.

The other day we heard a girl who has not yet hogtied a man for altar duty, tell about going out and catching a dozen or so toads and bringing them home to cook as frog legs. Fortunately she was stopped by wiser women in the kitchen. Suppose, however, that at this time she had been a bride and suppose she had cooked the toad legs and suppose her husband had eaten them. No wonder there is so much crime.

Illinois Senatorial Race.

Both Mrs. McCormick and Mr. Lewis have demonstrated extraordinary ability as campaigners. The contest will be exceedingly interesting. But the only chance the Democratic nominee would seem to have, if the issue is dominantly wet-and-dry, is in a strong gain of sentiment against prohibition. It looks now as if the race might be a very good test of such a gain, claimed very generally by wet propagandists.

Well, we see where a former saxophone player confessed his sins and was converted, so it looks like there's hope for everyone now.

Mrs. Ruth McCormick's expenditure of a mere \$250,000 for a senatorial nomination is to be taken, we suppose, as another example of woman's refining influence in politics.

About the easiest way to combat dandruff is to wait until their hair turns gray and then run the vacuum cleaner over the lawn.

A geologist says the Ohio river once emptied into Lake Erie, but that, of course, was when it was quite young and foolish.

It will be a peaceful summer if the gasoline price war lasts that long.

We bet the mother of that French axiatix who made 344 loops the other day wouldn't even have thought of skinning the cat in the peach tree in the back yard when she was a girl.

If the state ever vacates the penitentiary in favor of another site we suppose some oil company will snap it up as another corner filling station.

If Congress put thru that 2-cent tariff on sugar, it's safe to predict that the next election will be campaigning season for some of the members.

After reading of the high-handed manner in which the customs officials carried on, slapping hips and insulting the 7000 visitors on the Bremen in New York harbor the other night, all for a few flasks of confiscated liquor, one wonders when they'll start using stomach pumps to detect dry law evaders.

A fish that has two spines was brought back to this country from the Galapagos by (Incant Astor, no doubt with the idea of propagation for restaurant use.

That Mexican woman who had 18 sets of twins must have been a firm believer in the theory that two can live as cheaply as one.

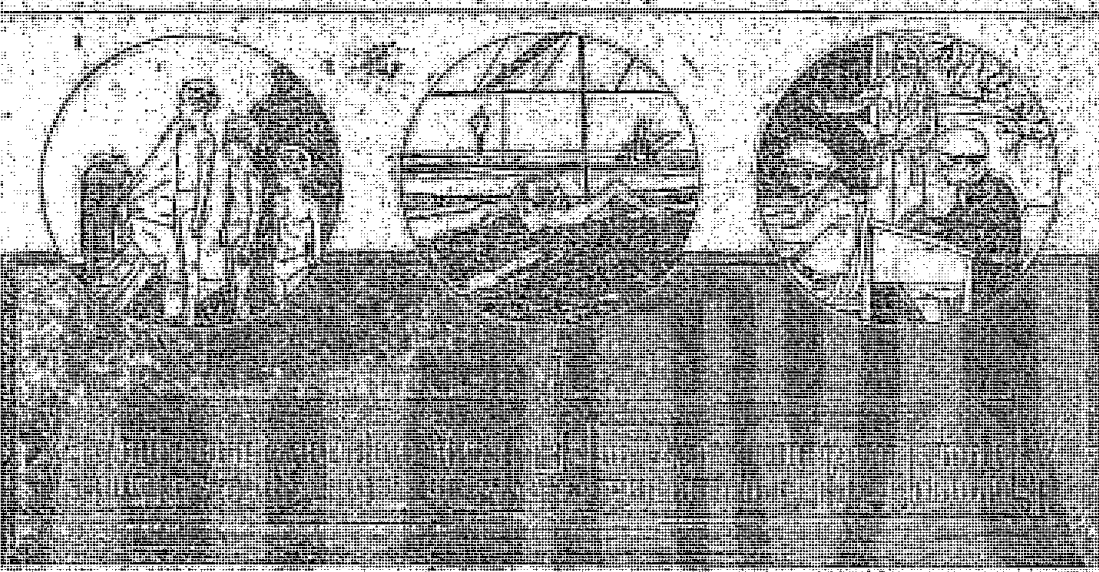

One of the chief worries will be solved when an auto tire is invented that will get flat on top instead of the bottom.

We say it to, rather than with, flowers when they happen to be dandelions.

News which all the readers like, is that which tells of a postponed fare hike.

A wave of caution having swept over Milwaukee, health officials have ordered pretzels wrapped in individual envelopes as a sanitary measure, and next thing they'll be serving beer with eye droppers.

"HAPPINESS SCHOOL" NEW PROJECT FOR HANDICAPPED CHILDREN

Every possible means for offsetting or relieving disabilities is to be housed in the new Kellogg school.

An entirely new and unusually practical brand of happiness, extended in a quarter where it is as much needed as in any phase of human affairs, soon is to be realized at Battle Creek, Michigan.

It is the most highly organized program ever undertaken for bringing every possible aid to children who because of physical handicaps face an unequal start in life. Through special provisions for each type of disability and by making available all known curative means it is proposed to remedy as far as is humanly possible the disadvantages under which blind, crippled, deaf and otherwise unfortunate children must labor.

The new Ann J. Kellogg School, where this humanitarian work will be carried on, unquestionably will represent one of the most distinctive advances in the entire field of education. The gift of W. K. Kellogg, the cereal manufacturer, who long has been interested in child welfare, the school is to be a memorial to his mother, one of that small company of pioneer school teachers who brought sal-

vation to the early settlers of the west.

"The aim of the special school of instruction for handicapped children," explains Dr. A. C. Salmon, medical director for the Kellogg company who has recently made a survey of this department of education, "is to establish a school with the conveniences that will make it possible for the handicapped child to get just as much education as the child who has never suffered at all."

Three-fold Aim.

The helpfulness to be provided through the Ann J. Kellogg School may be divided into three phases. First, to give every child the best physical condition possible for him to acquire. Second, to give him the best education possible for him to assimilate. Third, help him find his place for service in the world.

The school will have a total of 45 rooms, sixteen of which will be devoted to the ordinary pupil. The remainder of the building, except of the auditorium, gymnasium, library, offices and teachers' room, will be devoted exclusively to the underprivileged child.

In addition to the familiar "grades" of the usual public school, the young pupils of the Kellogg School will learn to speak of going to such rooms as the "orthopedic," "physiotherapy," and "occupational therapy room." Other special equipment includes a dental room, cooking room, sewing room, and open-air sleeping room and two open-air classrooms.

One interesting feature will be a "treatment pool." It has been found that this type of swimming pool is wonderfully effective in many cases in gaining responses from partially crippled parts of the body. The water offering buoyancy to the arm or leg so that the muscles may be relaxed, a gradual massaging treatment has been found to develop positions of arms and legs which had ceased to function. Cripples who could not walk have been known to swim, and these treatment pools have been used in treating the effects of infantile paralysis.

A Palm Beach environment and the benefits of artificial sunshine will be provided in another room housing a battery of sun lamps.

PNEUMONIA MAKES HEAVY INROADS IN DEER OF MICHIGAN

WARM WEATHER FOLLOWED BY RAIL MERCURY CAUSES EPIDEMIC

"Death due to pneumonia and with stomachs full of good feed." This was the way the Game Division summarized its findings in the recent investigation of deer found dead in the yarding areas near Alpena, in reporting to Director Geo. E. Hognath of the Department of Conservation.

Nineteen dead deer were found in the woods by V. H. Cahalane, the Department's deer specialist, who was sent to Alpena a short time ago to find out just what has caused the deaths of deer in the woods. Many other carcasses could have been found, but of the 19 examined, two had met death by accidents. Sixteen carcasses were opened. All but one of these were of small fawns, small in size and in frame as well as low in weight—evidently the runts of the season's increase, the report said.

"All of the sixteen examined had full stomachs at the time of death and with one exception the stomachs were well filled with cedar browse, excellent deer food. In only three cases was there an appreciable proportion of fir or balsam. All of these deer showed serious congestion of the lungs, indicating that pneumonia had been the cause of death. Local residents agreed in reporting that just previous to the deaths of these deer there had been warm weather or followed by a sudden and severe drop in temperature, from barely freezing to many degrees below zero.

Early in February local conservation officers were instructed to make an investigation along the Upper South Branch of the Thunders Bay River, north of the Turtle Lake Club grounds. The field men reported that as usual there was a very heavy concentration of deer in these swamps, but that the deer were in satisfactory condition and that no danger from wholesale starvation was to be feared this winter. During this investigation hundreds of lively

deer were seen and only two or three dead fawns were found.

At the end of February, however, a local newspaper published statements that many starved deer were being found, that conditions were "pitiable" and that local sportsmen were organizing an investigation "to fix the blame." Another local newspaper immediately published a statement to the effect that stories of starving deer were unfounded. Statements received by the Conservation Department from various local people were also very contradictory.

"The Game Division," the report said, "deciding to obtain some first hand information, sent Mr. Cahalane to investigate and sent out letters asking that local people assist him in locating carcasses. Cahalane went into swamps and with various co-operators, had no difficulty in finding dead deer, many of which he autopsied at all once.

"Since almost all of the dead deer were undersized fawns and since right up to their final sickness they had been able to fill their stomachs with food, there is no evidence that shortage of food was responsible for these deaths," the report concluded.

"This is a fine example of the way game affairs sometimes tangle up," P. S. Lovejoy, head of the Game Division said. "The reports from our field officers in February, were evidently correct, and at that time the deer were not suffering from lack of food. Then came a sudden drop in temperature and the weaker of the fawns died of pneumonia. This

is probably a normal occurrence which has happened thousands of times and will probably happen as long as there are deer in Michigan. Seeing these dead deer, many people thought that they must have died of starvation. If it had happened in a wolf district, by spring there would no doubt have been stories of great damage done by

wolves in the deer yards. Nobody would have thought of disease.

All our reports agree. Lovejoy said that in some of these swamps there is a heavy and increasing concentration of deer and that in some places the available natural feed is getting very low in genuine emergencies the feeding of hay is certainly justified but as a yearly and long-time proposition the feeding of hay is apt to prove an expensive

and unsatisfactory practice which only intensifies the trouble and postpones a real solution and may will hardly prevent pneumonia.

One trapping to remove the surplus, scattering the deer early in the season so as to make some of them use neighboring and uncrowded swamps, the planting of new stands of cedar, buying up yarding areas so as to prevent further cutting, and various other schemes may prove of value.

"Telephone Neighbor"

INCONVENIENT, isn't it, to leave your housework in the midst of some important bit of cleaning, in order to answer the telephone at your neighbor's. It is inconvenient for your neighbor, too.

A telephone is a Comfort, and a Convenience—and it is a Safeguard in case of emergency. It costs less than many of our smaller luxuries and really is a necessity of modern living.

MICHIGAN BELL TELEPHONE CO.

It's human nature!

Pride in personal appearance is inherent in all of us. No one wants to look seedy, unkempt, to appear ill-dressed or classed as a has-been. It's only human nature after all.

Advertisements are the barometers of style. The advertisements of collars and clothes have served as the models after which the modern well-groomed young man patterns his personal appearance—even to the dressing of his hair.

The advertisements of fashionable gowns from Paris, the exquisitely dressed women pictured in the advertising of silks and other dress materials, are the criterions by which the twentieth century woman judges whether she is costumed to the minute or not.

You cannot ignore advertising and be up-to-date in matters of dress. No more can you pass over advertisements that tell you of the latest necessities and luxuries that make for better and happier living. In fact, advertising keeps us modern in every sense if its reading is made a daily habit.

Read advertisements regularly and you will soon surprise yourself with your keen knowledge of values—to say nothing of your increased knowledge of every day affairs.

The regular and systematic study of the advertisements in this newspaper is a liberal education in economics.

famous the world over

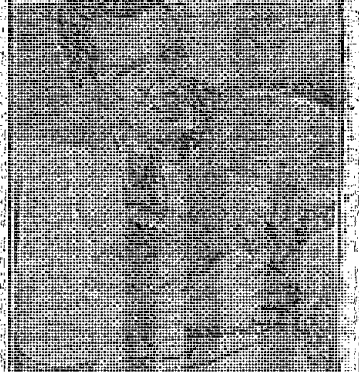

Pinaud's Shampoo

Leaves your hair lustrous, healthy and not too dry!

At your dealer or send for full-size bottle to Pinaud, Dept. M-20 E. 21 St. New York.

We will send sample bottle free!

Relieve that Pain

DOES pain ruin your temper, spoil your looks, interfere with your business or pleasure? Millions of sufferers from Neuralgic Pains, Functional Pains, Ordinary Headache, Simple Neuralgia, have found relief by using DR. MILES' Anti-Pain Pills.

Why don't you try them? At all drug stores, 25 for 25 cents, 125 for \$1.00.

Hills Corners

The Hills Corners school will close Friday, May 23, with a picnic.

The Coveney school will close the same day with a pot luck dinner at noon.

Siege I Stevens, who has had poor health since early last November, is now confined to his bed.

Mrs. Donald Rhoades, who has had sinus infection for several weeks, had an operation last Monday at the Taber sanitarium in Benton Harbor.

The Hills Corners church is on fast time now. Bible school at 10 a. m. and church at 11 a. m.

Mr. and Mrs. Ward Wright, who sold their farm, are moving to the cottage on the farm of Mrs. Wright's father, Clarence Boyle.

The exhibition of the year's work by the girls in the 4 H Club, under the leadership of Marion Boyle, was held last week Wednesday evening at the church.

County Agent Larkins accompanied by State 4 H Club leaders was present. The work of Vera Hartline ranked first, Dorothy Blackmun's work took second.

NEW TROY
The last P. T. A. meeting of the year was held last Thursday evening at the school house. About two hundred enjoyed the banquet put on by the society, which Mrs. Keefe's room had charge of. The manual training boys had their year's work on display, exhibiting some fine work.

The McCormick Machine Co., put on three or four reels of pictures at the close of the meeting.

Mrs. Nina Fischer spent the week end at her home here.

Mrs. Flora Guttler entertained her daughter, Vera, of Kalamazoo, and other relatives over the week end. They came to see the blossom parade.

Mr. and Mrs. O. A. Nash, Mrs. H. O. Piper, the Crawford family, Miss Emily Reischneider and Junita Ream attended the blossom parade.

The Clarence Phillips family motored from Grand Rapids to visit their mother and to attend the blossom festival.

The M. E. Sunday School held a special Mother's Day service Sunday. All classes participated. The fine numbers were enjoyed by all.

The church service was in keeping with the day. Rev. Cousin preached a Mother's Day sermon. Special music was furnished by a quartet consisting of Katherine Boyd, Ruth Conklin, Wayne Conklin and Paul Conklin.

The Brethren and M. E. churches are laying plans for Memorial Day services. Mrs. Fletcher and Mrs. Sol McKee will take charge. The American Legion boys of Three Oaks will be requested to participate.

All were glad to see Mrs. Joe Dillfield out to the Mother's Day service at the M. E. church.

Rebecca Barnhart and Genevieve Boyd spent the week end at their homes here.

There are prospects of an extensive fish camp on the north side of the road west of Morley's mill on the Morley and Boyd property.

The Bob McKee and Bob Lisky families have rented a camp near New Buffalo and moved there last Thursday.

Corra Ritchie is working week ends at the Blumhert camp.

Ed McKee and wife and Una visited at the Ed Barnhart home Sunday.

Mrs. Amy Martindale's brother, Gifford Griffith of Florida, is visiting her.

Mrs. Joe Woods and baby visited at the Prinkert home in Gallen on Sunday.

Mrs. Nina Boyd and son came Saturday for a two week visit. Her husband, Claude, will come later.

Andrew Hall, 79, passed away at his home, May 5th. Funeral services were held Wednesday at the home and at the United Brethren church. Rev. John English officiating. Burial was made in New Troy cemetery. Mr. Hall leaves two daughters, Mrs. Thomas Waters and Mrs. George Hanover.

NO EXCUSE FOR A "SPLITTING HEAD"

There's no need for an aching head to spell your day. At the first warning, take Dillard's Aspergum. Chew it a few minutes. Almost before you realize it, you have chased the pain away. It's as simple as that—no trouble, and Dillard's Aspergum is the new and easier way to take aspirin.

Dillard's Aspergum is the finest aspirin in delicious chewing gum form. You can take it any time—any place. You need no water to swallow it. There is no unpleasant taste—no choking.

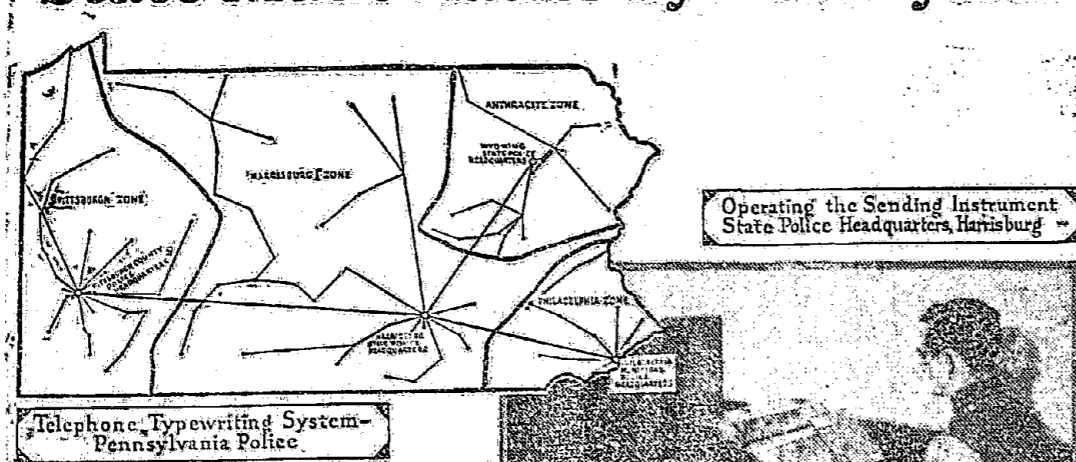

Because you chew Dillard's Aspergum, the aspirin mixes thoroughly with the saliva so that all its soothing qualities are effective quickly, continuously.

Keep a package of Aspergum on hand for quick, harmless relief from the pain of headaches, neuralgia, neuritis, etc. It helps break up a cold and soothes inflamed throats, even such severe cases as follow tooth extractions. If your druggist does not have Dillard's Aspergum, send for free sample to Health Products Corporation, Dept. A, 115 North 13th Street, Newark, N.J.

Catching Criminals in Keystone State Made Easier by New System

Telephone Typewriter System—Pennsylvania Police

CRIMINALS within the State of Pennsylvania have recently received a crushing blow with the installation of a new state-wide telephone typewriter police system, comprising the most perfectly coordinated police communication system in the world. By means of expert engineering the system links together, in one big crime-fighting network, 95 towns and cities and 100 locations within the State of Pennsylvania. The system uses 110 machines and operates over 3,427 miles of telephone circuits.

With this new system it is only a matter of ten minutes before the machines have tapped out all the available information regarding a crime to the four zones into which the state has been divided, and a network of police, state and municipal, has blocked all possible means of escape and stands ready to tighten the net on the criminals.

Service is maintained on a twenty-four hour basis and utilizes what is known as page-type equipment. This equipment, consisting of one regular and one emergency sending and receiving instrument and a telephone typewriter switchboard is located at Harrisburg, Philadelphia, Pittsburgh and Wyoming. There is also one page-type instrument for the receiving station located at each of the Zone Headquarters and three page-type receivers at the Central Headquarters. All of the other stations throughout the state are equipped with receiving-only machines.

TO MAKE TRAFFIC SURVEY OF STATE

PROPOSE TO CONCENTRATE BUILDING NEW CITIES FOR 5 YEARS

Definite announcement has been made by State Highway Commissioner Grover C. Dillman of a plan contemplating the completion of the state trunk line system with a view toward meeting the traffic needs of the state without prejudice to either rural communities or municipalities. During the past 6 years the State Highway Department has expended approximately \$125,000,000 in the counties of the State in trunk line improvements, of which 17.45 per cent has been expended in villages and cities.

Now that the pavements through the villages have been practically completed Commissioner Dillman and the State Administrative Board plan to give constructive attention to the trunk line problems in larger municipalities and the approaches and main arteries leading to industrial centers. In view of this Commissioner Dillman has outlined a plan covering a period of five years, which contemplates as

Nine main channels of communication radiate from Harrisburg to various parts of the state, so that messages can be sent simultaneously to all the locations in its own zone. The channels between Zone Headquarters and Central Headquarters are arranged for two-way simultaneous service.

The telephone typewriter makes it possible for a state trooper at the sending end of the system in his Headquarters, located at Harrisburg, to sit down at the machine, connect the stations he wishes to receive his message, and typewrite a message, on the machine before him, which will be instantaneously received upon the receiving machines which he has connected, without regard as to the distance involved.

Let us suppose, for example, that a crime is committed in Lock Haven, Pa. Lock Haven is a small town located in the central part of the state. A trooper telephones the details of the crime to his Zone

Headquarters, which, in this case, happens to be Harrisburg. The office in Harrisburg immediately dispatches the information to all points within the zone, and if of sufficient importance, it is sent over the other channels to various parts of the state. Thus, matters of general interest from the State Police Department at Harrisburg can be sent from that point to all other points in the system.

An interesting feature of the plan is that much closer cooperation between State and Local police is possible under this new system of communication. This is brought about by the fact that the majority of telephone typewriters have been placed in Municipal Police Headquarters, making the state-wide crime news as readily available to Local police as to the State troopers.

The system, installed by the Bell Telephone Company of Pennsylvania, represents the cumulative achievements of the State Police, the Pennsylvania Police Chiefs' Association and others who, for several years, have been cooperating in the preparation of plans for the establishment of a communication system to expedite the transmission of vital crime information.

near as possible a complete state transportation system in keeping with increased traffic demands, including the establishment of important grade separations, construction of necessary bridges and the protection of railroad and trunk line grade crossings.

As a practical background for determination where most insistent needs exist, Commissioner Dillman has inaugurated a complete traffic survey covering the entire state. This survey contemplates an investigation of the needs of rural communities, accentuated by non-resident traffic and the necessity for widening trunk lines in municipalities to cope with increased congestion.

To carry out this program Commissioner Dillman has secured the co-operation of the U. S. Bureau of Public Roads. Thomas H. MacDonald of Washington, chief of the bureau, has designated E. W. James, head of the Division of Control, to co-operate with the Michigan State Highway Department in its complete and comprehensive survey according to the plans of State Highway Commissioner Dillman. Michigan is one of the first states to receive aid from the U. S. Bureau of Public Roads in this respect. Mr. James was in Lansing a few days ago conferring with Commissioner Dill-

man and Deputy-Commissioner V. R. Burton, and the preliminaries were determined. Mr. James returned to Washington with considerable data for study, and it is

expected that the actual work of the survey will begin about May 1st with a force representing the U. S. Bureau of Public Roads and the Michigan State Highway Department working together. Commissioner Dillman believes that in no other way can the actual traffic needs of the State be determined, and it is his purpose to use this survey as the basis of consideration where improvements are most insistent and to submit a report to the legislature as a suggestion for legislation, if such is deemed necessary, to adequately take care of the State's transportation needs without prejudice to either municipalities or rural districts.

The opinion is expressed that this would lead to a practical solution that will enable a more intelligent understanding of the highway situation than by any movement to divert highway resources to any particular sections of the state and to conserve a supervisory state control over the distributor of highway funds.

The largest cargo ever carried through the Panama canal on any ship was on the Swedish motor ship Svealand on Jan. 2, 1930. It carried 22,244 long tons of ore bound for Chile.

Printing—Prompt—Record

Benton Harbor Has Population 15,406, Gains 26 Per Cent

Advance information on census returns which may be altered by later additions give Benton Harbor a population of 15,406, which is a gain of 8,178 over the 12,288 recorded the city in the census of 1920, or approximately 26 per cent. The combined Twin Cities now have a population of 23,746.

B. H. Has \$26,000 Warehouse Blaze

Fire believed to have been started by tramps seeking lodging along the railway right of way Monday, destroyed the warehouse and storage shed of the Double Drive Truck Co., 75,000 fruit containers stored in the warehouse by the Godfrey Packing Plant, and the Pere Marquette section house, the total loss being estimated at \$26,000. Flying embers also set fire to the roof of the Jones Gear plant, a two-story brick structure, with an estimate loss of \$1,100. All buildings burned or damaged were insured.

Conserv. Officers Assist in Removal Dogfish and Garfish

Conservation officers will assist again this year in the removal of dogfish and garfish from inland waters, according to instructions sent out from the Law Enforcement Division of the Department of Conservation.

Under the law, conservation officers are empowered to organize and supervise drives against these fish. Last year such "parties" succeeded in removing thousands of pounds of these noxious fish from Michigan's lakes and streams.

Dogfish and garfish are generally taken with spears during the spawning season which will begin with rising water temperatures, usually about the first of June.

Conservation officers have been asked by the Lansing office to work on the removal of these noxious fish as much as time will permit.

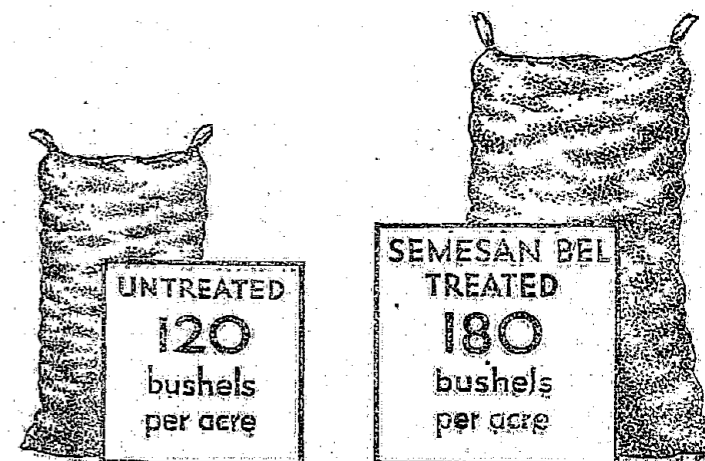

"No law which has to do with human thought or speech or conduct can by any possibility be enforced."

There were 3,600,000 car loads of automotive freight shipped over the railroads of the United States in 1929.

Lipstick to the value of \$1,750,000 was imported by Germany in 1929.

Big league score-keepers, really taken with spears during the spawning season which will begin with rising water temperatures, is Myhykangas of Dartmouth.

60 BUSHELS
more potatoes per acre
by INSTANTANEOUS dip
seed treatment

In Maryland, Daniel Leasure increased his potato yield 60 bushels per acre by Semesan Bel seed treatment.

Semesan Bel saves time and labor Controls diseases, increases yields

It costs just as much to plow, harrow, plant and cultivate an acre that yields a paying crop of potatoes as it does for one which yields a poor crop. In either case you must plant the same quantity of seed per acre, and put in the same amount of labor in your field. So anything you can do to increase your yield will also increase your profit at harvest.

Daniel Leasure, of Maryland, wanted a bigger potato yield—and got it. He knew what to do. By treating his seed potatoes the quick, easy way with Du Bay Semesan Bel he not only prevented seed-borne disease losses, but actually increased his yield 60 bushels per acre.

thus stops development of diseases. This quick dip treatment increases yields and improves crop quality. Growers in Grant County, N. Dakota, increased their yields 10 to 24% by Semesan Bel treatment. A Wisconsin farmer harvested an increase of 11.4 bushels per acre. Bulletin 405 of the Wisconsin Agricultural Experiment Station reports that when seed potatoes were treated with Semesan Bel, they germinated better, made a more vigorous early growth and produced higher yields per acre.

Use on sweet potatoes

Surface-borne black rot and scurf or soil stain of sweet potatoes are easily controlled with Semesan Bel by quick seed treatment and dipping the sprouts before setting. Bigger yields are reported by many growers who protect their crops this way.

An economical treatment

One pound of Semesan Bel will treat from 16 bushels of small seed to 22 bushels of large seed potatoes. So it costs little when used according to simple directions. Ask your dealer for free Semesan Bel pamphlet. Or, write to Bayer-Semesan Company, Inc., 105 Hudson St., New York, N. Y.

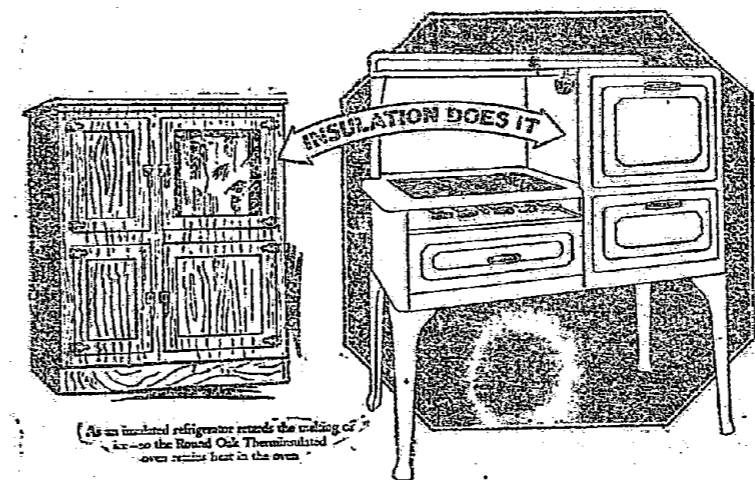

Treatment increases yield
Because Semesan Bel destroys scab; Rhizoctonia and black leg organisms on the surface of seed potatoes and

DEFEND ON YOUR GAS COMPANY TO SERVE YOU BETTER

Could You Keep Ice Without Insulation?

It's the **Insulation** That Does It!

You realize ice must be contained within the well-insulated walls of a refrigerator to keep it from melting too rapidly. INSULATION does it—maintaining a constant, uniform low temperature in the box, regardless of the weather outside, so necessary to the preservation of health and comfort.

The same principle applies to the Round Oak Gas Range with FULL INSULATED (Therminsulated) oven.

The oven is completely blanketed by a robe of thick felted rockwool—full of tiny dead-air cells that form a solid wall against heat and cold. The Therminsulated oven keeps your kitchen cooler, and more comfortable and makes baking cheaper by holding more of the cooking heat WITHIN the oven where every degree can do its work.

These with other new, unusual features such as two Double-Action full cooking or simmering burners, concealed manifold, rounded, dirtless corners, removable porcelain oven linings, and regulator and lighter as standard equipment—make the new Round Oak Gas Range the outstanding value of the day. When you can purchase WITHOUT INTERFERING WITH YOUR PRESENT MONEY PLANS—personally come in and see this remarkable gas range with the features you desire to enjoy. May we expect you in tomorrow?

DRUG TRADE TO SHARE INTEREST IN MEDICINE CO.

KONJOLA STOCK OFFER IS MADE AMER. DRUGGISTS GROWTH AMAZING.

G. H. Mosby, president and general manager of the Mosby Medicine Company, one of the world's largest manufacturers of prepared remedies, has announced that the eastern banking interests had bought a minority holding in the company. The purchase, however, will in no way affect the present control or management of the concern which remains in the hands of Mr. Mosby. A program of expansion in this country and in foreign markets will be inaugurated immediately. Banking interests will be represented on the Board of Directors by the following: James Imbrie of Imbrie & Co., Bankers, New York, and F. J. Romell, representing Imbrie & Co., Cincinnati. Other directors are G. H. Mosby, president and general manager, W. T. Maynard, vice president and merchandising director, Charles Mosby, secretary and treasurer and C. O. Rose, legal counsel, all of Cincinnati, O. The selected Konjola dealer in Buchanan is the Brodick Drug Store.

Application for change of the corporate name from the Mosby Medicine Company to Konjola, Inc., will be filed at the office of the Secretary of State at Columbus.

In discussing the negotiations which led up to the investment of the eastern capital in the Cincinnati concern, Mr. Mosby made the following statement: "Numerous efforts have been made in the last two years on the part of trade and banking interests to buy into the company but it has been only in connection with our present expansion program that a sale of minority interest has seemed desirable. This sale of minority interest not only assures our present expansion program but will also allow, through special arrangement, particularly favorable participation in the ownership of the company to those drug dealers who have been largely responsible for the success of the business."

1930 Prosperous

For Producers of Maple Sirup Sugar

The 1930 maple season was one of the best that Michigan producers have ever experienced, according to the report released today by Verne H. Church, Agricultural statistician for the Michigan Co-operative Crop Reporting Service, and Herbert E. Powell, Commissioner of Agriculture. Weather conditions were favorable throughout the main producing sections, and this fact, coupled with cheaper labor and attractive prices seems to have encouraged a renewed interest in this industry. It is estimated that 930,000 trees were tapped this year or 105 per cent of the number for 1929. This is the largest number since 1918.

Warm weather prevailed quite generally from the 17th to the 25th of February and many producers started tapping at this time. Alternate freezing and thawing during the March was also favorable and the run was the longest since 1926. The average date of tapping for the entire state was March 2 and the season closed April 2.

The average production per tree was reported at the equivalent of 2.61 pounds of sugar as compared with last year's low yield of 1.52 pounds and 2.00 pounds in 1928. The total production in terms of sugar was 2,427,300 pounds. Ninety-eight per cent of this was marketed in the form of sirup.

The average quality was ninety-eight per cent or three per cent higher than that reported last year and two per cent above the 1928 production. Few storms occurred during the season and the runs were consequently of a nearly uniform excellence.

The average prices received by Michigan producers were slightly below those for 1929. With the increased production, however, the total value is the largest since the estimates were started in 1917. In most sections the local demand was adequate to take care of the increased supply.

The number of trees tapped in 1929 were 890,000 and in 1928, 886,000. Average production per tree in pounds of sugar—2.61 in 1930, 1.52 in 1929. Sirup (gals.) in 1930, 297,000, 1929, 163,000. Price of sirup per gal, 1930, \$2.50; 1929, \$2.60. Total value, 1930, \$759,160.00, 1929, \$437,800.00.

He is raised the higher that he may fall the heavier.—Menander.

Zonite

For pyorrhea

For prevention against gum infections, use Zonite, the new powerful antiseptic. Also guards against colds, coughs and more serious diseases of nose and throat.

"THAT LITTLE GAME" Inter-nat'l Cartoon Co., N.Y.—By B. Link

The Old Timer's Corner

BUILDING OF A LOG CABIN

From Paper by E. K. Warren, Founder Three Oaks Museum

When the settler had selected the best place on his land for a house, the next thing was to clear the ground by cutting off and burning all the brush and timber. He felled the trees that were close enough to strike the future house if blown down. Then he hunted logs near at hand for a house. His order of choice was usually yellow poplar, linden, black cherry, beech, oak and in lack of these, elm or hard maple.

Construction of House 18 ft. by 24 ft. on Inside
For a house of that dimension, logs were cut 21 and 27 feet in length and if possible none of them were more than eight inches in diameter at the top end. Then the neighbors were called in, as

this was a size larger than the usual 16 ft. x 20 ft. house.

Twenty men at least were required to raise a house of this dimension, with one story and a loft. Stakes were set for the walls of the house corresponding with the cardinal points of the compass. In case the house was to be built near a section line, that was easy, but if not, a pocket compass was used or the stakes were set by the north star at night.

With the aid of two yokes of oxen the long logs for each side of the house were drawn. Then one man, picked for skill and experience, was placed in charge of each corner, standing on the logs as the house went up. They must be skilled with the axe so that the joints would fit and be level. It was very important that a perfect perpendicular be maintained at the corner.

There were several methods of

joining the corners. Sometimes the logs were flattened and squared at the ends. A more common and better method was "saddling" in which case a chip was cut out on each upper side of the log, the outer keel being about a foot from the end of the log and the inner far enough from the first to receive the width of the next log, which was to lie on it. When the log was completed the upper side of the log at the corner was nearly in the shape of a broad inverted V.

Notches were then cut in the side logs at proper distances apart to receive the sleepers for the support of the floor. The sleepers were placed, the upper sides having been hewed to hold the floor level.

After a height of three or four logs had been reached, sides were placed at the sides and ends, where the logs were being raised.

As the night wore on, for poles were used to push logs up the skirts. Sometimes ropes or chains were fastened to the highest log in position, thence passed under the log to be raised and back to the corner men who helped to pull it up. The logs for both ends and both sides were elevated at one end and one side and rolled across the top of the structure to the other end or side.

If the house was to be hewn on the inside, corner men scored the logs at the end and hewed back two feet or more. When logs were placed at the level of the top of a door, window or fireplace, the corner men cut notches in them indicating the desired position of the opening, which was later completed with a cross-cut saw.

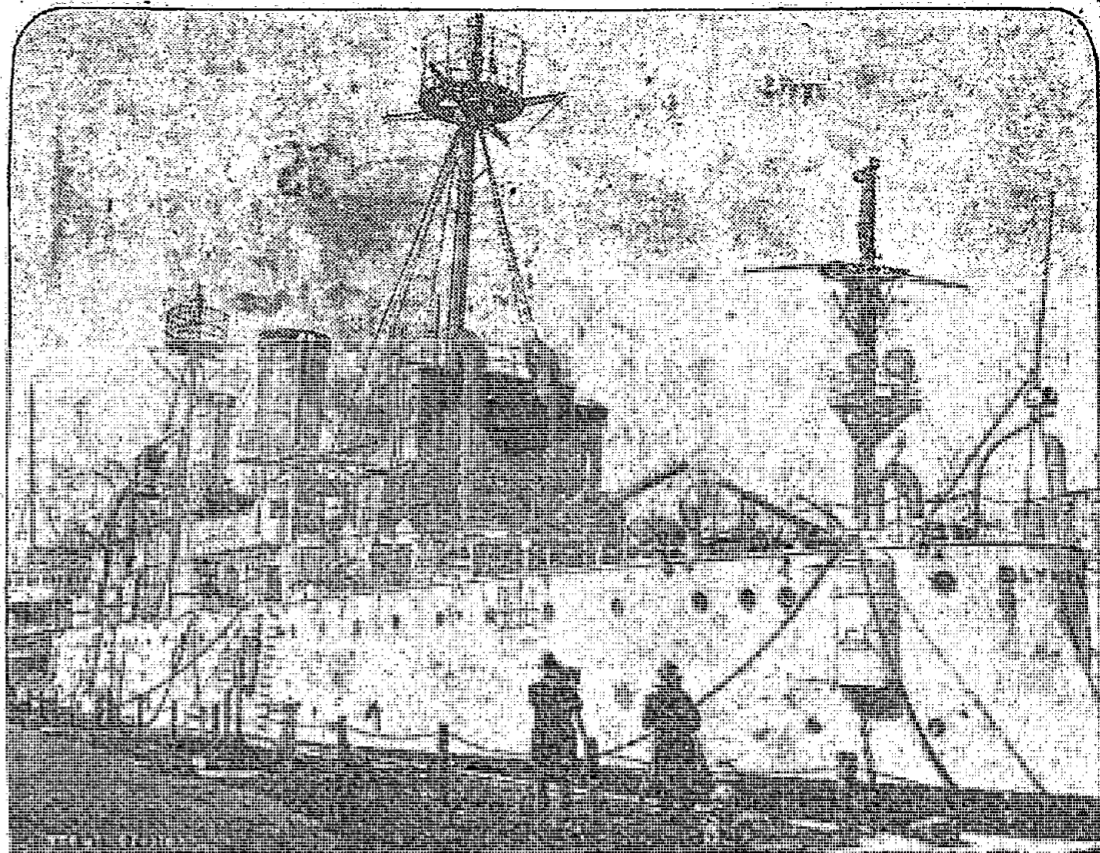

When the proper height was reached for placing the second floor, notches were cut in each side log to receive the timbers for the support of the floor. If a veranda was to be added to the building, the end logs, about three logs from the top, were allowed to project four feet to support the roof. Two more logs were added, the second logs projecting two feet from the side of the house.

After the addition of another log, there came the building of the gable ends and the ribs to receive the roofing. The ribs were straight smooth poles five or six inches in diameter and of the length of the side logs. These were placed to extend from end to end, the first being about two feet from the top side log. On these there were placed at each end a house log corresponding to the pitch of the roof. This process was completed, the ribs being laid the same distance apart as at first, and the end logs laid on them at a uniform slope, until the work was completed by laying the ridge pole.

The inside walls were then hewn down, scaffolding being used. The roof was then put on, usually made of shakes or clapboards, made preferably of red oak which warped less. This was cut in four foot lengths, split into bolts and driven with a three into shakes usually a half inch in thickness and of varying widths.

The eve pole was then secured by notches in logs left projecting from the side of the house. This

Dewey Flagship to Be a National Shrine

The Olympia, Admiral Dewey's flagship during the Spanish-American war, shown above as she rests in the Philadelphia navy yard, is almost certainly to be preserved. The house naval affairs committee approved a bill authorizing the expenditure of \$25,000 for reconditioning the vessel and taking her to Washington where she will be a national shrine.

was to hold the end of the first course of shakes. The shakes were placed on the ribs, usually double thickness and broken joints. A weight pole, straight and smooth and five or six inches in diameter, was placed on the top side log. The weight pole was kept in place by four or more pieces of wood placed against the eve pole. Another course of shakes was then added by the first rib, extending down so that the butts rested on the first

weight pole and this work continued until the roof was covered, pieces of wood being placed between each weight pole to hold it in place. The shakes on one side of the roof were cut off at the ridge pole and on the other side were allowed to project full length some distance beyond it.

Windows
Wedges were driven into the logs next to and outside of the opening to be cut to keep them in

place. When the sawing was done, logs at the top and bottom were leveled off to admit windows and doors. Then a plank or punchon the width of the log and about two inches thick was fastened to the end of the logs by wooden pins to keep the windows and doors in place and prevent undue pressure on them.

Purple lipsticks are in vogue in Paris.

This Sturdy Chevrolet Six 1 1/2 Ton Truck '520

f. o. b. factory, Flint, Michigan
Complete with front bumper, full length running boards and rear fenders

- 1 Six-cylinder engine—50-horsepower—combines remarkable smoothness, flexibility, power and economy.
- 2 Ball-bearing steering offers a short turning radius of 23 3/4 feet and assures easy handling in restricted places.
- 3 4-speed transmission gives ample power for every condition of road or load.
- 4 Channel steel frame, 6 inches deep, 15 1/2 feet long, takes oversize bodies without excessive overhang. Chevrolet offers unusually low loading height.
- 5 The rear axle is bigger, stronger and has spiral bevel gears—is easily accessible for inspection or adjustment, due to a detachable cover plate.
- 6 Four long semi-elliptic springs, mounted parallel to the frame, carry peak loads with safety, and provide better load distribution.
- 7 Rear fenders, splash aprons and full-length running boards are standard equipment on the Chevrolet truck and are included in the list price.

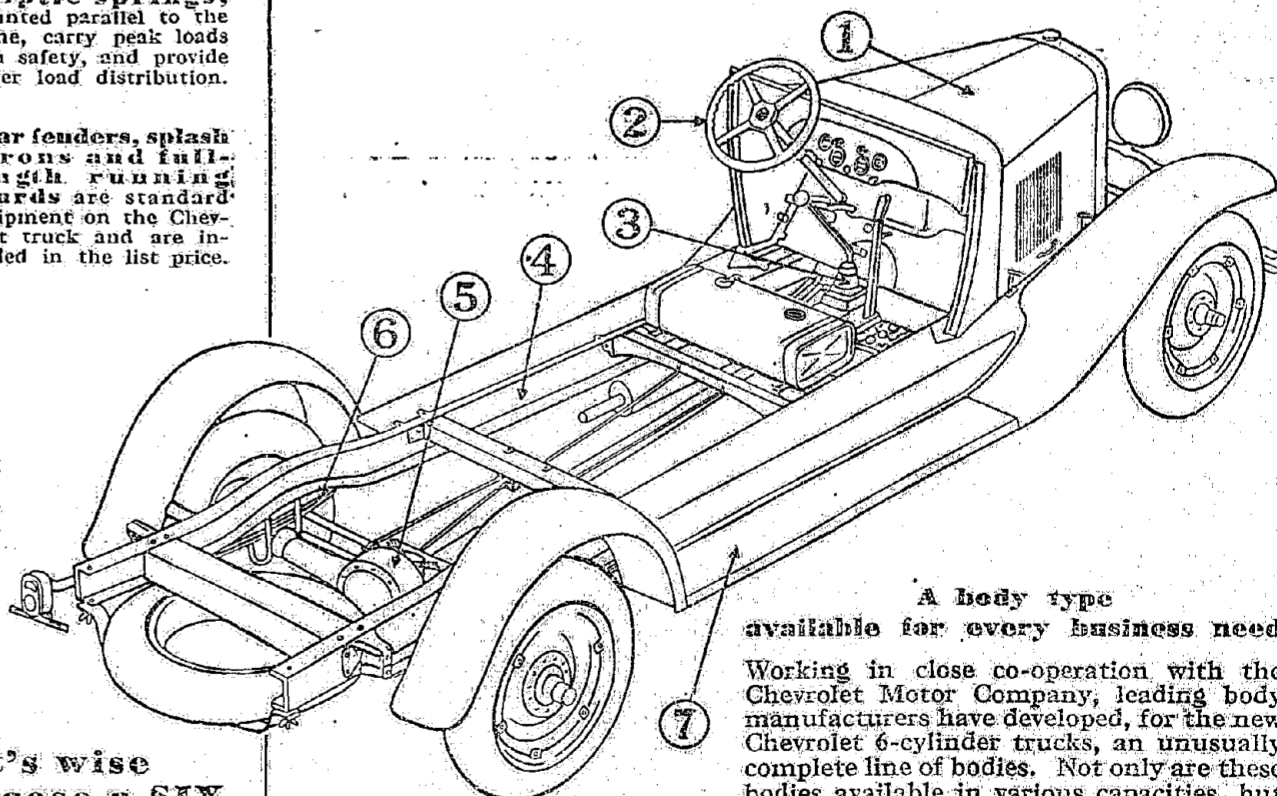

No matter what your business may be, bear in mind when you buy a truck that it's wise to choose a Six!

A six-cylinder engine runs smoothly—saving the chassis and body from the harmful effects of vibration. It is flexible in traffic. It requires less gear-shifting. And it maintains high speeds easily.

The Chevrolet Utility Truck gives you all the superiorities

of six-cylinder performance—for it is powered by a great 50-horsepower six-cylinder valve-in-head engine. And, in addition, it brings you all the advantages of modern design listed at the left.

Come in today and see this sturdy six-cylinder 1 1/2 Ton Truck. You can see for yourself why truck users everywhere are finding it wise to choose a Chevrolet Six!

A body type available for every business need

Working in close co-operation with the Chevrolet Motor Company, leading body manufacturers have developed, for the new Chevrolet 6-cylinder trucks, an unusually complete line of bodies. Not only are these bodies available in various capacities, but they include many special designs and types to fit the needs of every business.

It's wise to choose a SIX

RUSSELL CHEVROLET SALES
Buchanan, Michigan

Here is the proof that convinced these "Doubting Thomas" experts

LESS THAN the ordinary wear was found in the pistons after a 9000 mile test run with this improved motor oil—New Iso-Vis.

ALL THE piled-up evidence from hundreds of laboratory tests was not enough: The experts wanted the proof of a practical road test showing how New Iso-Vis Motor Oil protects the moving parts in an engine.

So this engine had been rushed through a test of 9000 miles: And now the micrometer reported less than normal wear—the bearing wear was less than 1/1000 of an inch. The experts were convinced.

Here are the reasons for the high lubricating value of New Iso-Vis:

- 1 New Iso-Vis will not thin out: It is made proof against dilution by a special patented process.
- 2 New Iso-Vis leaves but little carbon: It is Wholly Distilled and contains no undistilled parts of the crude.

- 3 New Iso-Vis lubricates effectively at engine temperatures both far above and below normal.

Have your crankcase drained, flushed and refilled with New Iso-Vis at any Standard Oil dealer or service station:

New ISO-VIS 30 in a quart
Motor Oil

The New Polarine also is produced by our new refining process—giving it an efficiency which is exceeded only by New Iso-Vis. The price is 25c a quart.

STANDARD OIL COMPANY (Indiana)
