SIXTEEN HUNDRED EIGHT CENTRAL NATIONAL TOWER - BATTLE CREEK, MICHIGAN

**What's hot as a firecracker and pretty as a firecracker.**

**In two short words—this one!**

This big and brawny beauty with the trim, bold front and the long sweep-through fenders.

This broad-chested traveler with the big Fireball straight-eight engine and the spirit of lively action in every line and movement.

This gracious, spacious carriage that seats three in comfort both front and back—handles light as a baby's stroller—strides always level and smooth on big, soft, cushiony coil springs on each of its four wheels.

This stout and ready Buick, fresh in looks as tomorrow's daisies, rugged as a battle cruiser, and full of zip and pepper as a string of popping firecrackers.

You're looking at America's most wanted car every time you see one.

You're looking at the forecaster of fashion, the top star on performance, the standout buy-for size, room, steadiness, comfort.

So naturally it's in demand. In such steady demand, in fact, that about the most Buick's slowly mounting production can do is move you a little faster from the bottom of our waiting list to the top.

Needless to say, we'll do all we can to speed that process. We'll take your order any time, with or without a trade-in, and get you your Buick the minute your number comes up.

But we can't do more than you'll authorize us to do—which means we're stymied till you get your order in.

**ONLY BUICK HAS ALL THESE STAR FEATURES**

- AIRFOIL FENDERS
- BUICOIL SPRING
- FIREBALL POWER — from valve-in-head straight eight engines in two sizes
- ACCURATE CYLINDER BORING
- SILENT ZONE BODY MOUNTINGS — scientifically placed for a firm and quiet ride
- FULL-LENGTH TORQUE-TUBE DRIVE
- BROADRIM WHEELS

- PERMI-FIRM STEERING — light but positive control with reduced need for adjustments
- DEEPLIF SEAT CUSHIONS

Good Companions for Happy Trips

There are no better driving companions than D-X Lubricating Motor Fuel and D-X Motor Oil. Ordinary gasolines do not provide the extra protection—at no extra cost—offered by the lubricating feature of D-X and D-X Ethyl Motor Fuels. And, in motor oils, none is higher in quality than D-X. For happy, carefree trips this summer, in town or on the road, use these companion products. Sold at all D-X Stations.

D-X Lubricating Motor Fuel

D-X Premium Motor Oil

D-X is different from ordinary gasolines in that it contains a special, high heat-resisting lubricant—blended into the gasoline—which protects those parts of the engine which frequently are inadequately lubricated by crankcase oil, especially during the starting and "warm-up" period. In addition, it gives you all the best features of the best gasolines.

This solvent-processed premium motor oil guarantees a tough, oily film that stays on and protects hot, fast-moving engine parts. Sludge and corrosion are minimized... and, because of the addition of a mild detergent, "It Cleans as it Lubricates." D-X Motor Oil is an aviation-type lubricant, high in heat-resistance, long-lasting, safe, economical.

- 7 Ways Better: Top Quality, Resists Heat, Cleans Motors, Protects Bearings, Tough, Long-Lasting, Resists Sludging.

# The real low-down on the Midwest gasoline situation!

More motor cars and trucks are on the road in the Midwest today than in 1941 and the per car consumption of gasoline is higher.

Twice the volume of gasoline is being consumed by tractors on Midwest farms as in 1941.

The railroads have four times as many Diesel locomotive units today as they had in 1941. Diesels burn lots of fuel oil.

Additional hundreds of thousands of homes, old and new alike, are depending on fuel oil for clean, economical, efficient heat.

More planes arrive and depart from Midwest airfields. Every plane has a hungry maw that must be filled with high octane gasoline.

It takes a lot of tank cars, pipe lines, and barges to bring crude oil to the refineries to produce the needed gasoline and oil.

#### Steps taken to increase supplies

Thousands of new wells have been drilled and are producing additional supplies of crude oil. Hundreds of miles of new pipe lines are in service. Our refineries are producing as never before—operating at new high levels.

Standard Oil's expansion program was blueprinted long before there was any break in the war clouds. It has been driving ahead ever since V-J Day.

Refinery projects already completed have added 13% to our crude-running capacity and other projects now under way, although behind schedule because of shortages of materials, will increase this figure to 27% by next spring.

Great progress has been made. But all this is not enough.

#### Why the Midwest feels the pinch

Last winter's heavy demand for heating oil caused Standard Oil to make large increases in fuel oil yields at the expense of gasoline. As the result of this and heavy gasoline demands this spring, Standard's available inventories of gasoline at refineries and terminals are 30% below a year ago.

Also, in the Midwest transportation is a serious bottleneck. At present there just aren't enough

pipe lines and available tank cars to carry to the Midwest the extra load of crude oil and finished products from distant producing and refining areas. Here again, projects which will help the situation by next spring are under way.

#### How Standard Oil is handling the situation

In the interest of fair treatment of all our customers, we are putting into effect at once an allocation system for the distribution of our gasoline during June, July and August. Throughout these months the total amount to be supplied Standard Oil Agents and Dealers in the Midwest will be approximately equal to what they received in 1946 during the same period. Since gasoline sales are running millions of gallons ahead of last year's, Standard Oil Agents and Dealers, in turn, will be unable to meet an unlimited demand. This temporary allocation system is adopted for your protection.

We frankly do not know how long this situation will last. We are laying our plans on the belief that it will continue through August—perhaps longer.

We do not believe the situation is serious enough to justify the introduction of formal rationing.

#### How you may be affected by this situation

There may be times when your service station dealer will be out of gasoline temporarily. Even if you are not always able to buy all the gasoline you want, there should be no need for real hardship. Although this is vacation time—if folks will take it easy, will reduce unnecessary driving, and not drive at high speeds that consume a lot of gasoline—everybody should be able to stay on a fairly normal basis. Nobody needs to become panicky. Hoarding, which is dangerous, would only aggravate the situation.

Standard Oil Dealers are cooperating wholeheartedly in this temporary emergency, which there is every reason to believe will not be of too long duration.

We earnestly bespeak your cooperation with your favorite Standard Oil Dealer. Both he and we want to see you often—and for a long time to come.

## The Picnic Was a "Hug" Success!

Our local Wild Life League went on a picnic Saturday, and I went along to cover it for the Clarion. Monday, folks kept stopping me, and saying: "Must have gotten out of hand, that picnic!"

"Nonsense," I says. "It was mighty pleasant and congenial. Just beer and hot dogs, cheese and soda." And then they show me the headline-reading: "WILD WIFE PICNIC HUG SUCCESS!"

Of course it was Elmer, my typesetter, who had made the misprints. But is my face red! It's only be-

cause folks are so temperate and well-behaved in our town, that they could afford to take the whole thing as a joke.

From where I sit, even a newspaper editor's entitled to a few mistakes. And since I reported that they served a moderate beverage like beer, I'm sure nobody thinks the picnic was the least bit wild, or anything but a huge success—and I mean huge!
