1945 A BUSY YEAR AT MICHIGAN BELL

TRANSITION War gave way to peace, but unfilled orders for new telephones continued to soar, reaching 127,500 in November. As Michigan Bell's Postwar Expansion and Improvement Program gained momentum, the number of applicants waiting for service was reduced to 113,200 by year's end.

WELCOME 1,295 of Michigan Bell's 3,056 war veterans had returned by Dec 31. Mounted were 57 who had died in service. During the year, total employees had climbed 3,400 to an all-time high of 16,500. The prewar ratio of about 50-50 between men and women had shifted so that 2 of every 3 employees were women.

MORE CALLS Calls in 1945—159,700—fell and 6,004,000 local per day—were about double the prewar average. Service, although not up to prewar quality in some respects, was generally good.

MORE TELEPHONES By Dec. 31, telephones in service totaled 1,174,513 compared with 742,118 in 1939. In the last 3 months of 1945, the increase was 37,000 telephones, largest 3-month gain in Michigan Bell history.

GOAL To return as quickly as possible to the kind of service wanted, when and where it is wanted, is Michigan Bell's aim. By year's end, work was being rushed on nearly 100 major projects which will boost central-office capacity by 25,000 lines and add about 850,000 miles of subscriber lines, 2,600 miles of open wire were built in 1945.

PROGRAM BOOSTED The figure for Michigan Bell's 5-year Postwar Expansion and Improvement Program was boosted from \$120,000,000 to \$150,000,000 after experience gave a clearer picture of increasing public needs, rising costs of materials and labor. Money for the program must come largely from the sale of Bell System securities to investors.

EARNINGS DOWN While Michigan Bell's total revenues of \$90,806,000 in 1945 were 10 1/2% over the prewar 1936-1939 average, costs were up 137% to \$71,254,000. The amount left over to pay for the use of investor's money was about \$569,000 less than the average of prewar years, although an additional \$36,000,000 had been invested in the business since 1939. So the average return on the stockholder's dollar dropped from 7% to 5% cents.

RATE-CUT RESISTED
To attract the investor's dollar, the rate of Telephone Company earnings must compare favorably with the average of other industries—not substantially less, as has been the case in recent years. The future quality of telephone service, then, depends on earnings attractive to investors. So Michigan Bell in January, 1946, appealed to the courts for relief from a Michigan Public Service Commission order calling for retroactive reductions of \$3,500,000 a year for 1944 and 1945, and lower rates for local service in 1946.

ANNUAL REPORT The full story of Michigan Bell's operations for 1945, complete with all the facts and figures, is contained in an interesting, illustrated booklet, entitled "War to Peace." Copies may be obtained at any Michigan Bell business office.

Apple Fruit Buds Now Advanced To Point Of Danger

Peaches, Plums, Cherries Also Nearing Risk Of Crop Loss

With plum blossoms almost on the verge of breaking open and cherries close behind, nearly all fruit of the Buchanan area has been advanced by unseasonable warmth and rain to the point where damage may result from later freezes.

While early apples, such as McIntosh, Dutchess and Transparent are advanced close to the breaking point, the later varieties, as Northern Spies, are practically dormant at the Hill Apple Farm, according to Robert Hall Peaches are slightly more advanced than apples. Growers are now waiting with fingers crossed, hoping for cool (but not too cool) weather very soon.

The crop has a further hazard because of the fact that in many orchards the dormant spray has not been applied yet. It will be necessary to apply it yet, but the application will have some hazards in view of the progress of the bloom.

Mrs. Elmon Stull reports that at her home on Charles Court tulips, pansies and crocuses have been out for over a week. Foyseytha bushes and daffodils are also reported in bloom.
