Cases Reported in Cass County

Infection Believed To Be Spread by Mosquitos or Other Insects

Of interest to farmers in the Buchanan community is the report that an epidemic of sleeping sickness is taking a toll among horses in the central and northern border counties of Michigan...

Last week the disease was reported to be advancing westward, several cases being reported in Cass county. The epidemic first made its appearance this summer in the southeast part of the state in Cass county...

Charles Figy, Commissioner of Agriculture for the State, has issued information and warning to horse owners regarding this condition, which is caused by equine encephalomyelitis...

The State Veterinarian advises that sleeping sickness among horses is caused by a virus which affects the brain and nerve tissue of the affected horse. He states that there are two types of the disease...

The cases studied in the present outbreak have proved clinically to be the eastern type. A brain from a horse was submitted to the State Veterinarian to the State Health Laboratory...

The first case in the state was observed by the state and federal authorities in Barry county, near Delton, on June 29. This was immediately followed by other cases, which were reported by Barry, Kalamazoo, and Calhoun counties...

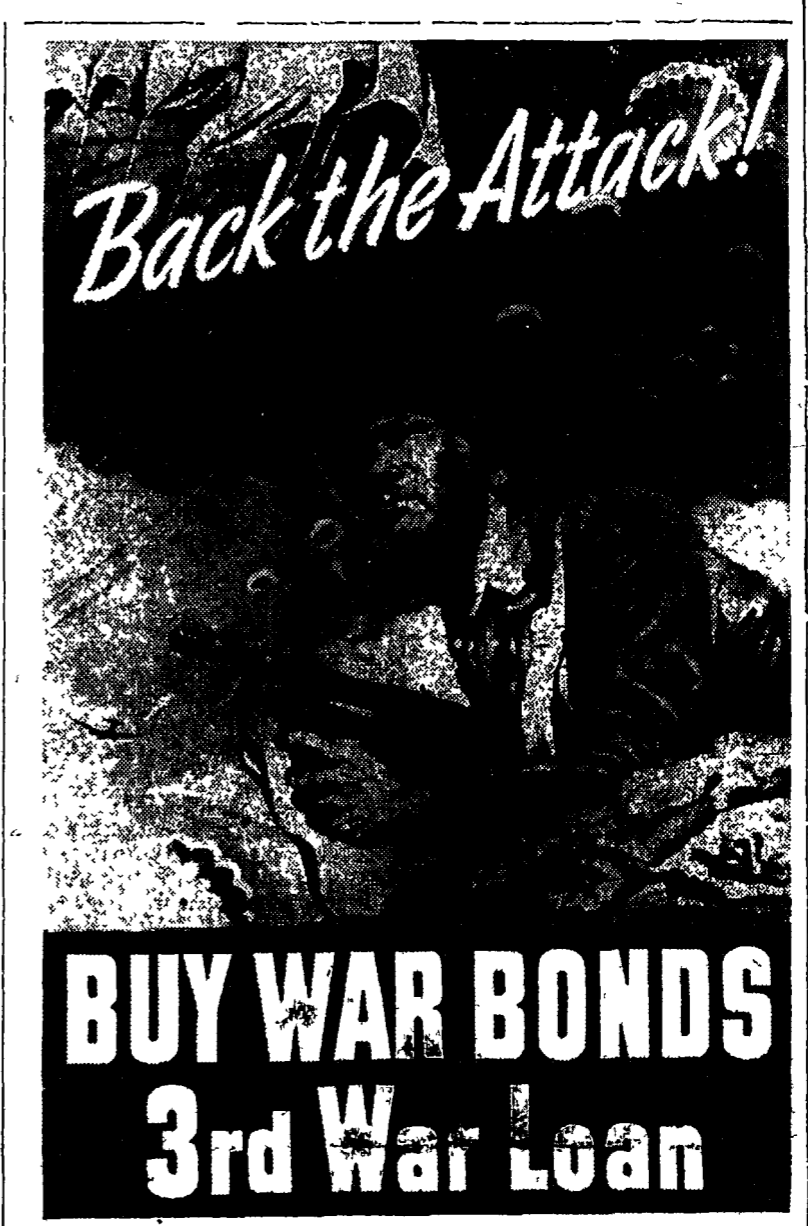

The State and Federal Bureaus of Animal Industry are continuing their attention and have to date located and recorded more than 100 cases in these same counties and in the adjacent area...

The virus of the disease does not seem to spread directly from horse to horse but is insect borne, most likely by certain species of mosquito. The disease has seldom occurred in cold weather...

It is usual that in the greater number of cases only one horse is attacked. This does not always occur and in a few cases additional horses may be affected on the same farm or premises...

A vaccine is available for protection against the disease but even this does not afford 100% protection, especially against the eastern type of the disease. Protection from the vaccine is not immediate and cases may occur shortly after treatment where infection is encountered before the protection has been developed...

Farmers and persons owning horses may do much to interrupt and retard the spread of the disease.

City Waterless 4 Hrs. When Plant Valve Gives Way

Buchanan residents were without water for nearly four hours Sunday while workmen replaced a link of water pipe and valve at the city waterworks...

When workmen tried to shut off the water at one of the pumps which was to be repaired, the valve in the discharge pipe wouldn't hold and nearly eight inches of water flooded the pump room...

The city is having the pumps rebuilt and the contract calls for the work to be done on Sunday, so as to be of the least inconvenience to local war plants using the service.

City Without Secure Jail For 10 Years; Has Used Niles Facilities

Plans are now under way for the early construction of a city jail, as the result of action initiated at the September meeting of the commission held Tuesday night.

For the past ten years at least the city has been practically without any secure quarters for even temporary prisoners, and has been persons held for hearing to Niles where overnight detention has been furnished without charge. However recent conditions have resulted in an increase of arrests, chiefly on drunk and disorderly counts, and the Niles jail has at times been unable to accommodate the increased influx of overnight guests from both cities.

Also the necessity of taking persons arrested late at night to Niles to be held for hearing in a local justice court the following day has been a severe tax on the time of the police force. Such persons were often accompanied by two police, the entire night force, leaving the city without police protection for at least three-quarters of an hour. It was necessary for the police to go to Niles again in the morning to return the prisoners to hearing.

Tentative plans are now being drawn for a city jail, with separate compartments for men and women, and also a separate cell for prisoners who are too violent to be placed with others.

The building will also include a room for police headquarters. Definite announcements and a call for bids for construction will be issued at an early date.

Use of the old city jail on Oak street was discontinued in the early 1930s after several prisoners locked there had escaped. Three years ago the building was wrecked. The old cells were stored at the city garage until September of last year when they were turned in to the iron salvage campaign.

Harvest Carefully
Sweet potatoes should be harvested with extreme care to avoid bruises or cuts and should be allowed to dry for at least a half day on the ground. They then should be placed in thin layers in boxes or baskets and be permitted to dry for a week or two. Then if the potatoes are wrapped in newspaper or packed in real dry sawdust, they will keep well until the following summer.

THE VITAMINS

Dr. Barton

Physicians who have followed the history of the vitamins will remember that vitamin C was one of the first vitamins to gain fame as it was found that scurvy could be prevented by eating foods rich in vitamin C.

Later came the very great interest in vitamin D because it prevented rickets (rachitis) which up to that time had been widespread. Today, fortunately enough, one rarely sees a case of misshapen legs in children that is due to rickets.

Still later came the knowledge of the benefits derived from vitamin A; infections warded off and night blindness prevented.

Finally came vitamin B, with its family—B1, B2, B complex and others—as a nerve builder, a definite treatment for neuritis, an appetite builder and an aid to various run-down conditions.

Lately we have been reading about vitamin B complex as delaying the onset of fatigue. An interesting experiment on the use of vitamin B complex in the treatment of fatigue is recorded in the Journal of Industrial Hygiene and Toxicology by Drs. E. Smunson, N. Ezer, A. Baer and R. Braun. These physicians put 23 persons to various fatigue tests. First they found that each individual could do in the way of work before he became fatigued; then 12 were given vitamin B complex in tablet form and 11 were given plain tablets similar in appearance containing no vitamin B complex but with the same taste.

From the standpoint of fatigue of the muscles those given the vitamin B complex tablets showed no greater improvement than the ones who received no vitamin B complex. However, from the standpoint of fatigue of the nervous system, measured by the thicker light test, considerable difference was shown. Of the 12 given the B complex, 5 required a great deal more time to become tired, 3 showed moderate amount more time and 4 showed no change. In the 11 who received no B complex, there was no change in the amount of time it took to cause tiredness of the nervous system.

Some months ago articles appeared in the medical journals in which two prominent physicians warned those over 40 of the dangers of exercise. They pointed out that after 40, we are on the way down hill and that exercise would be dangerous to heart and blood vessels. Neither the heart nor the blood vessels should be asked to do any unnecessary work, not even "lift a finger."

Most physicians will agree with the idea that strenuous exercise in those at and past middle age is not necessary to maintain health and can do more harm than good.

What is a middle-aged man or woman who walks to his or her employment instead of riding, does the housework, or plays a round of golf a couple of times a week, or takes five minutes' exercise every morning, going to think about this business of "not lifting a finger unnecessarily?"

He or she is going to lift the finger, the arm, the feet, bend the body, walk home hundreds of yards at least daily because they know that as far as they are concerned the exercise they take is necessary work.

We all have sense enough to know what would happen to our heart muscle, our lungs, our muscles, our blood vessels, our digestion, our skin, if we loafed or sat down all the time. Every physician knows that he must not let the middle aged or the elderly loaf or take to bed. They would soon become bedridden.

Simple everyday exercise such as walking, housework, noncompetitive golf, or swimming, stimulates heart action, keeps blood vessels elastic, stimulates flow of blood through all the organs and working processes, maintains the appetite and prevents constipation.

What these physicians who advised "no exercise" are really telling us is that, as we grow older, we must get rid of the idea that we "need" regular strenuous exercise to keep ourselves healthy. This strenuous exercise may lessen our reserve strength.

HEALTH BRIEFS

The term Diabetes Mellitus comes from the Greek words that mean "Passing through of honey."

Diabetes is a condition in which the body cannot make use of all the sugar which enters the bloodstream from digested food. The symptoms are increased thirst and desire for food; loss of weight, weakness, pains in the legs and general irritability. Diabetes can be controlled. Consult your family physician at once if all means.

Home Front Volunteers Start Today To Put Over Third War Loan Campaign For World's Greatest Financing Drive

With the Slogan "Back the Attack—With War Bonds," Every American Citizen Is Asked to Buy at Least One Additional \$100 Bond in September

WASHINGTON, D. C., September 9.—America's Third Army marched forth today to capture the most important immediate objective on the home front.

As 2,000,000 volunteers swung into line to put over the Third War Loan campaign, they were met with helping hands from millions of workers in the home front production battle, and cheers of encouragement from men on the fighting fronts—to whom the success of the Third War Loan is literally a matter of life and death.

To "Back the attack—with War Bonds"—every American who can do so will be asked to buy at least an extra \$100 War Bond. The quota for those who are able to invest more from income or accumulated funds will be much higher.

Speaking of the great drive to raise \$15 billion—a major portion to come from individuals—Secretary of the Treasury Henry Morgenthau, Jr., said: "The United Nations are on the march. The first rumblings of the big offensive are being heard in all the Axis nations. Thousands of our men have stormed Sicily. Tons upon tons of bombs are dropping on Germany. We are attacking Jap-held territory as never before. This is a great day for us. But it means that the time has come for us to really tighten our belts here on the home front. We have come to a most crucial period in the war, and the success that we will have on the fighting fronts, will depend to a considerable extent upon the degree to which we here at home are willing to work and sacrifice for ultimate victory."

"It's going to be a costly victory. We have said that before, but we must repeat it again and again. The real war has only now begun. Billions of dollars more must be spent to keep the material of war going to our men at the fronts. Your Government must call upon you, the American people, for that money. 'Remember! It is up to all of us here at home to 'Back the Attack'—and to do it more enthusiastically, more thoroughly and with greater sacrifice than any attack has ever been backed by any home front in all history. Everything is at stake. Everyone must help to the very limit of his ability."

The drive, continuing throughout September, will offer to investors in addition to Series E, F and G United States Savings Bonds, the following securities: Treasury Savings Notes, Series C, 2 1/2 percent Treasury Bonds of 1964-69, 2 percent Treasury Bonds of 1951-53, 3/4 percent Certificates of Indebtedness.

By the way, I saw my first rain in Texas in 11 weeks last Friday. We were so glad to see it we went out in a thunder shower just to get wet. Temperatures of 100-110 degrees Fahrenheit have been very common here and we had one day of 114. They claim it to be one of the hottest and driest summers Texas has ever had. I must close now. Sincerely, Norma MacLean

Magnesium Developed Recently The English scientist, Davy, first discovered magnesium in 1808, but it was not until 1830, in France, that Bussy produced the element in metallic form. Commercial exploitation of magnesium did not occur in Europe until the early years of the 20th century, and it was 1915 before the industry had its beginning in this country.

Wagner News Mrs. Gertrude Harroff is nursing in a hospital at South Bend. She drives back and forth from her home. Charles Dickow, Jr. returned to camp somewhere in Alabama Wednesday after a visit with his parents, Mr. and Mrs. Charles Dickow, Sr.

Mr. and Mrs. Tom Quirk of Chicago spent the Labor day week end with relatives and friends in and around Galien.

The Wagner school opened Tuesday with Mrs. Betty Christener. The enrollment will be reported later.

Mr. and Mrs. Charles Hess, Sr., called on the former's sister, Mrs. John Elsie, Tuesday.

Mrs. Danny Demman, the former Betty Jochem, will soon join her husband, who is stationed in the navy in Oregon.

Mr. and Mrs. Sherman Davis and son, Edgar, of Niles, spent Monday with Mr. and Mrs. Dee Davis.

"I Lost 52 Lbs.!" WEAR "ZE 14 AGAIN!" Mrs. C. D. Wells, Ft. Worth, Tex. As Pictured Here? You may lose pounds and have a more slender, graceful figure. No exercise. No drugs. No laxatives. Eat meat, potatoes, gravy, butter. The experience of Mrs. Wells may or may not be different than yours, but why not try the Ayds Plan? Look at these results.

Keith Bunker in Airplane Fire Fighters

Keith Bunker writes as follows from Baton Rouge, La., to his parents, Mr and Mrs Tenny Bunker Harding Field Aug 17, 1943

Dear Mother and Dad

Have been going to write to you but have been busy with my basic training.

Arrived here Monday afternoon and today took a long hike and carried a rifle on my shoulder. My boots were very much with pickley heat and am losing weight.

Well, here is what I am doing I am in the air corps engineers as a fire fighter I have three weeks basic at this place, then move to Hammond, La. for 1 week to five on the range, then 5 weeks to New Orleans and then they give me a rating from a Pfc to a sergeant.

Then we go back to Harding Field to await orders to go across to some air base that will be 25 miles from the front lines. Our job is to take charge of crash wagons as the army calls them and try to save the pilot if we can.

Our training at New Orleans is where we put on these asbestos suits and go through flame 500 feet high and save some dummies in a plane that is burning.

I am enclosing a booklet that they gave us for dad to look at. This is a new outfit that just started up.

How is everything in good old Buchanan?

Put it in the Record what I am doing and just say that you have received word from me that I am with the air corps engineers and am stationed at Harding Field, Baton Rouge, La. as a fire fighter. Then send me a clipping.

I am going to try and get around and send all my friends a card in Buchanan. Say hello to everybody that you know that I know.

Is dad still working seven days a week? I am and getting darn little pay for it but I have to make the best of it. I don't know for sure yet but it is rumored around that there will be no furloughs for home. If there is it will cost me \$25 or \$30 a round trip to come home. Hope I get my pay in time, I sure seemed good to talk to you over the phone from Chicago. Glad that I had the chance.

I sure was pretty darn blue Sunday just laying around railroad stations.

We traveled in high class though, in Pullman cars, ate in diners, slept in Pullmans and had colored porters wait on us. Not back to the government's expense. All day and all night long.

We go to these USO, they give you free eats, free Coca Cola, cigarettes and really try to be good to you.

Boy, oh boy, you ought to hear the people talk here in the south. We meet up with southern people and just talk to them to hear them say "you all" and all such and reckon as how" and all such stuff as that.

All my love to you and dad, as ever,

Your son, Pvt. Keith E Bunker

Corp. Robert Wesner of Camp Claiborne, La., came Thursday to spend a week's furlough with his parents, Mr and Mrs Edward Wesner, Main street.

Gael Pierce, V-12 student at the U S Naval school, Washob college Crawfordsville, Ind., was a guest of his parents, Mr and Mrs Allen Pierce, over the week end.

Corp. William Zachman left Wednesday for Camp Hood, Texas, after spending a 10-day furlough with his parents, Mr and Mrs Theodore Zachman.

Aviation Cadet Richard Pierce, son of Mr and Mrs Allen Pierce, has been transferred from Nashville, Tenn., to Maxwell Field, Montgomery, Ala.

"Little Buchanan" at Great Lakes. In one corner of the Great Lakes Naval Training Station, now a large city, is a "little Buchanan," according to Wendall Hall, seaman second class, who is here on a visit with his parents, Mr and Mrs Fred Hall. With him were two Buchanan buddies, Randall Couchman and Clayburn Couch. All three boys had completed their boot training and were home on the usual furlough granted at the end of that training. They were in the same unit, the same barracks, and slept in ad-

Church Services

ST. ANDREW'S MISSION (Episcopal) Rev. H. L. Nicholson, Priest-in-Charge Holy Communion, 8 a. m., last Sunday of every month. Presbyterian Church, Buchanan, Mich.

CHRISTIAN SCIENCE SOCIETY Sunday service at 11 00 a. m. Subject, "Substance" Sunday school at 9:45 a. m. Wednesday evening meeting, 7:45.

The reading room in the church is open each Wednesday afternoon from 2 until 4 o'clock. "Substance" will be the subject of the lesson-sermon in all Christian Science churches throughout the world on Sunday, Sept. 12.

The Golden Text (1 Cor 10 26) is "The earth is the Lord's, and the fulness thereof." Among the Bible citations is this passage (Hebrews 11.1-3). "Now faith is the substance of things hoped for, the evidence of things not seen. Through faith we understand that the world were framed by the word of God, so that things which are seen were not made of things which do appear."

Correlative passages to be read from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, includes the following (p 468) "Question.—What is substance? Answer.—Substance is that which is eternal and incapable of discord and decay. Truth, Life, and Love are substance, as the Scriptures use this word in Hebrews "The substance of things hoped for, the evidence of things not seen." Spirit, the synonym of Mind, Soul, or God, is the only real substance."

Kassel Built Locomotives... Tens of thousands of locomotives, traveling Old World lines of varied gauge, have been built at Kassel, Germany, since 1848.

Tree Weed... Balsam is described as a "tree weed," growing wild and seldom occurring in thick stands. Some plantation growth is found in Ecuador. The tree is commercially mature at from five to seven years and continues in its prime to about 12 years of age, after which it tends to solidify and hence become too heavy for its unique usefulness. The trees are felled in the forests of the most lowlands and the logs floated in rafts to sawmills.

Peach Canning In Full Swing... A. & P. Says Commercially Canned Peaches Scarcer This Coming Year

Sportsmen's Club Finish Paying On Recreation Park... Establish Foundation For Perpetual Development of Scenic Tract

Grand Rapids, Mich. — This is the week to can peaches. This suggestion, coming from one of the nation's largest food distributors, was coupled with a warning that the supply of commercially canned peaches for civilian use in 1944 will be far below that of last year.

Recent reports indicate certain canned items, including this fruit, will be very hard to get next year, said C. Wall, A. & P. Tea company vice president. "Any housewife can alleviate this shortage, however, by canning peaches in her own kitchen. Now is the time, as the Michigan harvest is at its peak this week, although the supply should continue good through next week."

Describing the quality of the crop as excellent, he termed the peach "the ideal home-canning fruit." A bushel should turn out about 20 quarts, he added. Agricultural experts estimate the Michigan crop to be considerably above last year with total United States production showing a serious decline. Pointing out that home canning suggestions are part of his company's new consumer information service, Wall said the A. & P. is informing housewives locally throughout the country when supplies of any fruit or vegetable suitable for canning reach the retail market.

Ready For Development... With the final debt paid off, the club is now free to go ahead and plan for the development of the tract. Secretary-Treasurer J. L. McOmber, of Niles, announced the club still had a balance of some \$300 in the treasury.

The foundation consists of a board of trustees of seven members. Charles L. Miller, of St. Joseph, is president, and other members of the board include, Dr. J. E. Bachelder, of St. Joseph, J. J. Theisen, St. Joseph, Clair Miller, St. Joseph, Robert Ludwig, St. Joseph, H. R. Ross, Benton Harbor, and J. L. McOmber of Niles. The term of the foundation is perpetual. Its purpose is to receive and administer funds and property, to preserve the natural beauty of the tract, and to stimulate public interest in conservation and promote game and fish propagation.

Improvements already have been started, with some \$500 spent by the ride club in having thrown up a dirt back stop for the proposed rifle and pistol range, and there still is approximately \$315 in this special fund. The total membership of the club to date is 1,374, including 1,335 annual memberships and 39 life memberships. Nine new life memberships were added this year, Secretary McOmber reported.

The executive committee, headed by President Robert Ludwig, voted to hold the annual club banquet as usual on the second Wednesday in December. It was voted, however, to have the award of the fishing prizes, heretofore made at the banquet,

at the November meeting instead this year. The 1944 membership drive of the club will be started on Oct. 1.

Indies Industry... In Java the domestic manufacture of sarongs was encouraged by the Netherlands government, and weaving schools and small factories were even set up in the prisons so that convicts could be rehabilitated and made experienced workers. The manufacturers of Holland moved on to the Indies and, as a result, in recent years a more or less important textile industry grew up there.

Oil Enriches Land... The nearly worthless lands as signed Indians in Oklahoma years ago have since made the Indian fabulously wealthy through oil discoveries.

Prune Plantings to Stem Tomato blights... Tomato plants are pruned to single stem by nipping out the side branches which appear in the axils of the leaves. These are broken off with the fingers when they are about 1 1/2 to 3 inches long, taking care not to remove or damage the leaves. Use of a knife or shears is not good because if mosaic or virus disease is present it is readily carried in this way from plant to plant.

Invalid Pensions... Invalid pensions, which are based on the old age pensions system, have been paid since 1919 in Australia. At first, total incapacitation was the only qualification for an invalid pension, but now the act has been liberalized so that persons classified as 85 per cent incapacitated are entitled to qualify. Under the conditions of the act, persons over 16 can receive the pension, and permanently-blind persons are eligible. In April, 1941, the pension rate became \$181.68 per annum.

Age Limits... As to age limits for marriages, in New Hampshire the boy must be at least 20 and the girl 18, in Missouri both parties need be only 15, and elsewhere this varies from 14 for common law marriages to 18 for the boy, and from 12 for common law marriages to 16 for the girl. Common law marriages are valid in 23 states.

Devises New Coffee Tablet... Coffee tablets that work have been devised by a Brazilian chemist, it is reported in Rio de Janeiro. He has developed a method of removing the oil and salts from coffee and concentrating the remainder into tablets that can be dissolved in hot water and served. Experiments with powdered coffee showed that it absorbed moisture and lost much flavor. These disadvantages, it is said, have been overcome in the coffee tablet.

Bid the Boys Goodby... Young folks in New Hampshire will receive a "royal sendoff" from their home towns upon their induction into the armed forces, under terms of a new law enacted recently by the state legislature. Municipalities of the state, under the law, may appropriate funds for entertainment for men of the town at the time of their induction into the armed forces of the United States in time of war.

Need No Phosphorus... Milking cows fed a good grain mixture and getting legumes grown on land that has been fertilized with superphosphate need no special phosphorus supplement, if bonemeal or di-calcium phosphate is not available during the wartime emergency.

End of an Era... New York city closed its last "little red schoolhouse." The 15 pupils in the two-room wooden building erected in 1807 on Staten Island were transferred to a school with better facilities.

Next time you get sore — — grab your pencil... FIGURE IT OUT YOURSELF

Next time you're sore at the Nazis or Japs, just sit down for a minute. And if there's a pencil handy, do a little figuring—something like this: Sure, taxes are higher. You're paying more than you used to. And the cost of living hasn't gone down any either. That's costing you more. But...

Chances are, you're making more, too. And maybe somebody else in the family's working. Maybe one of the girls is bringing home a pay envelope every week—and pretty good pay at that. Chances are, there's more cash coming into your

homeright now than there has been for a long, long time. What's more: Maybe you were going to get a new bus this year. Every year, you know, millions of people did get new ones. Or radios. Or refrigerators. Anyway, it's a cinch you'd have spent some money this year on things you can't buy now. So what? So maybe you can put more of your family earnings into War Bonds! Not 10% or 12% or 15% or 20%—but all you can! If you and every other American who has an income will sharpen up your pencils and figure out how you can save an extra dollar here and another there—that can go into War Bonds—if you'll keep on figuring and saving—you'll provide a weight of metal that will snap the Axis' spine like a rotten stick! Let's pour it on! And keep pouring it on till the murderous fools who have defiled our soil, butchered our sons, broken up our homes—who have refused to let us live and work in peace—are smashed utterly to dust! Get out that pencil! See charts below!

Here's what comes in... Here's what goes out. Includes a chart for family income and expenses, and a section for U.S. War Bonds.

Battlefront of Sacrifice Is Urged Upon U. S. Women to Aid 3rd War Loan Drive

WASHINGTON, D. C.—The women of America are going all-out to make a success of the Third War Loan Drive—to "Back the Attack" to the limit. For weeks they have been organizing to do their share toward raising the Treasury's unprecedented goal of 15 billion dollars in War Bond sales to non-banking investors.

In order to lay the groundwork for this intensive organization far enough in advance of the drive, Miss Harriet Elliott, Associate Field Director of the War Finance Division, in charge of women's activities, made a swing around the country during July. Regional conferences were held in Atlanta, Dallas, San Francisco, Denver, Cleveland and Boston.

"Women have been called to the battlefront of sacrifice at a time when their brains, energies and money are most needed," says Miss Elliott. "Buy Bonds—by sacrifice, is the order of the day. If every woman in America would pledge herself to do without everything she possibly can, and carry out that pledge faithfully, she would make a genuine contribution to victory."

All groups of women are active in the drive. Many cities and counties are conducting door-knocker canvasses and carrying

out other promotional campaigns to see that every individual in these United States is reached to buy an extra \$100 Bond in September. "It takes bench-to-bench, desk-to-desk, house-to-house, person-to-person contact to get over the job," Miss Elliott believes. United in this tremendous effort are women belonging to foreign origin groups of every nationality, Negro women, college girls, farm women, war workers, club women—professional, religious, industrial, cultural, educational, patriotic and social groups—in fact, women of every age, from every walk of life.

Legion Introduces A New Department For Field Service

The September meeting of the Fourth District Association will be held at Benton Harbor, Saturday, September 11, at 7:00 p. m., with the installation of the new district officers the main order of business. Past Department Commander Ray C. Conlon will be the installing officer. Refreshments and get-together between 6:00 and 7:00.

In the afternoon, starting at 3:00 p. m. there will be a special meeting with the new Department Field Service Officer, Ray C. Conlon, of Grand Rapids, who has been assigned to this area. This meeting has been called in order that the service officers from posts throughout the district, and all other Legionnaires interested in rehabilitation and welfare work, may be able to present their problems and become acquainted with the new welfare set-up of the Department.

The American Legion is vitally interested in rendering all possible assistance to the families of the veterans now in the service and the welfare and rehabilitation of the veteran after he returns. This meeting will give interested Legionnaires the opportunity of learning something of the task before them and as many as can possibly do so are urged to be present.

The fact that the new Department Field Service Officer is also a Past Department Commander, and his record in the Legion, gives assurance that the meeting will be an interesting one.

76 Attend Reunion of Batchelor Family

The 27th annual reunion of descendants of ASA and Jane Batchelor, pioneers of the Bend of the River district, who settled there in 1854, was held Sunday on the adjoining lawns of the Elita and Claude Denno homes. There were 76 members of the clan and guests present.

Tables for the basket dinner were placed under a large maple tree planted in 1877 by Mrs. Frances Batchelor and the late George Batchelor. This overlooked the original home site of the Batchelor family.

Charles Batchelor of Ovid, Mich., was elected president of the 1944 reunion which will be held at his home. Clare Batche-

Jor, Owosso, was elected vice-president and Mrs. Lena Batchelor, Ovid, secretary-treasurer. Benjamin Davis, Buchanan, 86, was the oldest person present and Douglas, seven-month old son of Mr. and Mrs. Herbert N. Batchelor was the youngest. The family has 20 men serving in the country's armed forces.

Attending from away were, Mr. and Mrs. William Rinehart, Jonesboro, Ind., Arthur Rinehart and Mrs. Addie Van Alstone of Elkhart, Ind., Mrs. Kate Corp, Mrs. Minnie Hiller and Mrs. Mayme Beecher, Henderson, Mich., Eugene Reese, Mishawaka, Mr. and Mrs. Lester Head, Granger, Ind., Mrs. Susie Tarbut, Cassopolis, and Mr. and Mrs. Robert Davis, and Mr. and Mrs. Paul Davis, Berrien Springs.

Perfumes Have Wide Use
Perfumes enter into our daily lives to a far greater extent than most of us realize. For every ounce of scented sold as such, thousands of gallons are supplied to soap and cosmetic manufacturers. Lipstick, cold creams and toilet goods rely on chemically produced, pleasant odors. There is no difference between perfumes and synthetic flavors for foodstuffs and those for medicinals except a difference in use.

Yangtze Basin
The vast Yangtze Basin, from the regions around Chungking to river outlet, covers some 700,000 square miles—or roughly four times the area of prewar Germany. It supports about 200,000,000 people, nearly half the population of all China. This broad, central band of China, with its fertile soil, its moderate climate, and adequate rainfall, is extremely valuable for its normally rich production of wheat, corn, peanuts, rice, tea and cotton.

Gas Taxes Drop
In calendar year 1942 revenues from gasoline taxes decreased 11 per cent below 1941 and 8 per cent below 1940. January, February and March decreases this year below corresponding months of 1942 amounted to 34.2, 38 and 29.5 per cent, indicating steeply declining revenues. Figures from 45 states show Tennessee and Kansas were the only states with slight increases—about 2 per cent above March, 1941, in each case.

Cure Hay In Field
Salting of hay, although long considered helpful, cannot be relied upon as a safeguard against spontaneous ignition in the mow, and it should not be considered a substitute for sufficient curing of hay in the field.

THE OLD JUDGE SAYS...

"Your tires are in good shape, Judge...ought to last you at least another 5,000 miles."
"I've been very careful of them, Jim, since I learned how much the government needs rubber. Only drive when I have to...keep her under 35 an hour and have the tires switched around every 1,000 miles."
"Me, too, Judge. Pretty tough spot we were put in gettin' our supply of rubber cut off just when we needed it most. But, we'll be gettin' plenty of synthetic rubber real soon. Say, is it true, Judge, that the beverage distilling industry has a part in producing it?"
"Yes, a very important part, Jim. That industry's facilities for producing grain alcohol make it possible to include 200,000 tons of rubber from grain in the government's 870,000-ton synthetic rubber program. Pretty important contribution to our war effort, isn't it Jim?"
"It certainly is, Judge. Wonder how many people really realize it?"
