When the rocket finally emerges from the laboratories, it will make modern bombers look as old-fashioned as the Wright brothers' first plane. The new missile will have a range of 5,000 miles—as far as from Berlin to New Orleans. It will span this distance in less than two hours, moving at 3,000 miles an hour. It will, presumably, have an atomic war-head of indescribably destructive force.

At its peak, such a plane would be supersonic—faster than sound. It would probably have a speed of close to 1,500 miles per hour, a rate-of-climb-of-100,000-feet-per-minute, and could fly at heights well above 100,000-feet.

Passengers may arrange for use of personal automobiles when purchasing railroad tickets. The railroad then reserves an automobile at the destination, it can be delivered to the passenger at the station upon arrival. Week-day rates average about \$5 a day, plus 7 cents a mile, Mr Siddall estimated.

Rev. Wayne Martin
Gives Description
Conditions in Siam

Some time back the Record
printed an account of a voyage
from San Francisco to Bangkok,
Siam, by Rev. and Mrs. Wayne
Martin, bound to Siam for mission
work.

Wayne Martin is the son of Mr.
and Mrs. O. H. Martin of the Red
Bud Trail. Mrs. Martin is the for-
mer Etoule Ross, daughter of Mr.
and Mrs. Roy Ross, 204 South Oak.
A subsequent letter describing
conditions in Siam is herewith re-
produced by request.

75 Phya Thai Road
Bangkok, Siam
January 8, 1947

Dear Folks
Since there will not be a plane
leaving from here until the 10th
I'll try to give you a few more
details of our reactions to Siam.
Read in the paper just this evening
of a cold wave which is sweeping
the U. S. It hardly seems possible
by the feeling of the weather here.
It has been 95° most of the day,
and goes down to perhaps 70° at
night. A couple of nights last week
it went down to 62° and everyone
was talking about the cold
weather. We had a sheet and two
blankets on our bed and even then
Etoule said she was cold. Down-
town one of the men asked us
how cold it had to get before it
would snow. It does seem hot but
quite often there is a nice breeze
which makes it bearable. We have
to remember, however, that this is
winter.

We are still living with the Ritzes
here. They had a house saved for
us but it took us so long in getting
here that they finally quit paying
rent on it. We hope that we will
be able to find a nice house before
long. I am sure you would like
the homes here. Those which the
higher class of people rent are
large mansion-like affairs with a
nice yard around it, sometimes
pretty good sized, and a fence or
wall. Besides the gate of the
driveway is usually a little house
where a watchman can live or per-
haps a gardener who will keep
watch of the place and shut the
gate at night. The houses are
made of brick covered with a flat

coat of cement on the outside and
usually painted cream, trimmed in
brown, green, etc., in pastel shades.
I have seen some houses finished
in powder blue which looked nice.
Their style is modernistic after
the American pattern with a sort
of southern California look to
them. The artistic talent of the
Siamese is also displayed on the
inside as well. The door casings,
etc., may be of teak or a similar
wood. The floors are tongued and
grooved by hand and sometimes
laid in beautiful patterns. After
the floor is laid it is planed down
by hand and polished to a beautiful
finish with beeswax and kerosene.
All modern conveniences are in-
cluded but because the power and
water plants were bombed during
the war, water pressure is too low
to be of much value during the
day and at night electric voltage is
quite low. When we can get water
we store a supply ahead in large
earthen urns. In order to use an
electric stove we use a transformer
to step up the voltage.

The next day after we arrived
here we began work at the cus-
toms to get out the things we had
shipped. It took us two days chas-
ing from office to office, showing
our passport, etc., before we got
the things released and then still
spent another day before all the
duty was settled. When I opened
a trunk and they saw my photo-
graphic enlarger, at first they
had quite a time machine gun. I
thought it was a machine gun. I
tried to get them to understand
what it was and they had to
hear to coin a word so they could
enter it in their papers. Then they
weighed it in order to estimate its
value. Such queer ways!

We haven't had a place to un-
pack the boxes to see what con-
dition our things are in. I know
there are a few dishes broken. One
box of canned goods was broken
but most of the contents were
there. Another box was delibera-
tely opened and I think an album
of records and perhaps a few
dishes broken. One box of canned
dishes are gone. Our box of linens
was completely lost. As near as
we can tell it contained our table-
cloths, dish towels, bath towels,
sheets, etc. In another box, which
came through all right, was some
bedding, a lace tablecloth and our
silver. For this we are indeed
grateful. The washing machine,
which was only crated, apparently
came through without a scratch.

We hired a servant to take care
of Judy during the day. She costs
about \$10 U. S. They say it isn't
good to take Judy to church be-
cause so many people want to
handle her and it's hard to tell
what disease they might give her.
At first Judy didn't like to be away
from us but she is getting along

pretty well now. She likes some
of the native fruits but still does
not like bananas unless mixed with
some other fruit. We have ban-
anas and pineapples, the year
around as well as papaya. We also
have chicos, about as big around
as hen's eggs, russet brown on the
outside and black seeds inside,
shaped like lima beans, they are
quite good. Fomulos are quite
plentiful and are something like a
grapefruit only much sweeter and
easier to eat. There are fresh peas
and tomatoes on the market but
a bit expensive. Lots of small
watermelons which are fairly
sweet and taste good on a hot day.
(Every day is hot.) Peanuts are
easily obtained as are sweet
potatoes. Irish potatoes are small
and expensive, really there is
nothing that is cheap. American
canned goods are available but ex-
pensive. No ration stamps are re-
quired for sugar but it costs 25c to
30c per pound U. S., is slightly
dirty and of poor quality. I should
have mentioned that limeade is
delicious; you can also get orange
crush of American quality, and
"sassy" which is made from sarsa-
parilla and tastes very much like
root beer and refrigerator has not
yet arrived but we hope it will be
here before long. Elder Ritz has
been worrying along with an old
'37 Dodge that has really been
through the war. We have to push
it every morning to start it and
then sometimes it won't run. To-
day it stalled downtown so we left
it at the garage for a complete
overhaul job. The car also has
a '41 Ford (also went through the
war) but in a little better condi-
tion. I have a motor on my bi-
cycle now and it gets me around
very well. I'm sure it will be very
handy and Elder Ritz mentioned it
is much more dignified than pedal-
ing a bicycle. Gasoline costs about
25c U. S. per gallon.

We have a language book com-
ing next Monday so we can begin
studying Siamese. Really it is
surprising how much one can say
with his hands when he gets into
language difficulties. As it is we
tell Ritz what we want our serv-
ant to do for us, etc., and they
translate for us.

New Year's day we spent in
visiting some of the temples
around here, of which there are an
abundance. I took some pictures
and will explain more about them
when you can see them. New
Year's night we, together with the
Ritzes, Waddells and the Milnes
(Mrs. Milne is teaching church
school here and her husband hap-
pened to be here also, from Singa-
pore), were invited to a Chinese
feast. Etoule and I enjoy rice and
curry, but didn't care for the deli-
cacies served to us at this ban-
quet. We were served only about
ten courses although they tell us
that sometimes there are as many
as thirty. Among the things they

served were two kinds of soup—
shark fins and bird nest. The
shark fins are self-explanatory,
they looked like long strings of
jelly-like stuff without much
flavor. Bird nest soup is actually
made from the bird nest of a cer-
tain kind of bird, who takes ma-
terials for the nest and chews it,
mixes it with saliva and places it
with her bill. Although it is very
expensive there is little taste to
it. I would just as soon forego the
expense. Among other things
were pigeon duck, and a few
vegetables finishing off with a rare
trout from southern China which
wasn't too bad but didn't have a
great deal of flavor. Between the
courses you could sit and crack
watermelon seeds with your teeth
and eat the centers. These are
from a special kind of melon
grown only for their seeds. We
had all of the orange crush we
could drink, and every two or three
courses a water brought a small
towel to each person to wipe his
hands on. These had been hung out
in hot water perfumed with
jasmine. Luckily we survived
everything without any ill-effects.
The Ritzes said sometimes our folks
get diarrhea from such feasts.

Must close for this time but hope
to be hearing from you soon. Mail
service to Siam is rather poor but
if you write us at the address given
at the beginning of the letter we
will probably get it sooner or
later.

Lots of love and best
wishes to all,
The Martins

Books for Blind.
Congress has authorized \$1,125,000
a year for books which are dis-
tributed to adult blind persons by
the Library of Congress through 27
regional libraries. Of this amount,
\$200,000 is for the publication of
books in braille and other raised
types, the rest is for talking books
and the maintenance and replace-
ment of government-owned talking
book machines. One of these costs
\$60, but a blind person may bor-
row one free.

Washing Hint
Don't overcrowd your washing
machine since too many clothes re-
duce washing efficiency and prevent
water from circulating freely. Thick
suds should be maintained during
the entire washing period.

Plan To Transmit Million Words Per Minute Via Radio

The National Broadcasting Co. announced that the laboratories of the Radio Corp. of America have been working on a "revolutionary" system of high speed communications which has a potential for handling more than a million words a minute.

Niles Trammell, NBC president, made the announcement in testi-
mony before a Senate Commerce subcommittee holding hearings on a bill to rewrite the Federal Communications Act.

Mr. Trammell said that the new system, tentatively referred to as Ultrafax, is an outgrowth of television. Employing microwave radio relays, the system treats each printed page as a frame of a television picture and each page is flashed in rapid succession. At the receiving end, the pages are reproduced by new high speed photographic processes.

The NBC president said that letters, business documents, checks, photographs, newspapers, magazines and books can be handled by the system and that in addition the microwave circuits can simultaneously carry ordinary telephone speech and telegrams and also provide intercity network for television as well as standard and FM broadcast programs.

RCA expects to demonstrate the system publicly this summer, Mr. Trammell said. "World wide radio and domestic telegraphic communica-
tions," he added, "as we know them today will, in the light of this development, make present day communications appear as slow as the ox cart compared with a straitoliner."

Floor Finish
An ideal floor finish is one that
is non-porous, smooth, hard enough
to resist dirt brought in by coarse
work shoes and which remains at-
tractive for several years under nor-
mal wear and care. An ideal finish
protects the floor from dirt, mois-
ture and discoloration.

Handy Hint
Slip a cotton bag over the broom
head and you have a handy tool for
sweeping down walls and ceilings.
When the bag becomes soiled simply
soak in hot soapy water and wash
in the regular way. These bags are
very useful, keep two or three of
them on hand.

AIR POWER IS PEACE POWER

HELP BUILD AMERICA'S AIR POWER
on AIR FORCE DAY, AUGUST 1ST

No one today questions the fact that the whole future of the United States may rest in the very clouds over your head. And the new, reorganized Air Forces give thousands of eligible young men an opportunity to take an active part in building America's air power on the ground as well as in the sky.

You may, for example, enlist in the Air Forces for three years. If you have a specialty which will qualify you, you may also be able to enlist in a grade at higher pay.

If you have had Air Forces experience, you may join the Air Reserve and continue your military aviation training outside of business hours.

Or, you may join the Air National Guard and perhaps become eligible for advanced technical training at special Air National Guard schools.

On Air Force Day, make a point of finding out everything about your Air Forces—especially the new Aviation Career Plan described below. Full details can be obtained at your U. S. Army Recruiting Station.

NQW—THE WORLD'S GREATEST OPPORTUNITY FOR A CAREER IN AVIATION

Today the Army Air Forces offer high school graduates an unprecedented opportunity to get the finest aviation schooling on earth—and select your school or course before you enlist.

The AAF Career Plan is unlike anything ever offered before. It permits selected high school graduates to apply and qualify for AAF specialized courses of their own choice. Simply go to your U. S. Army Recruiting Station, advise the Recruiting Officer the kind of aviation training you want and he will provide you with an application blank and a complete list of available courses.

When you are selected to attend the course of your choice, you enlist in the Army Air Forces for 3, 4 or 5 years. After your basic training period you are guaranteed the education you have selected to make you a specialist in the type of work you want.

Get a list of all the schools and courses open to you under the AAF Aviation Career Plan at your U. S. Army Recruiting Station.

TOE OF JAPAN—Congressman Walter H. Judd, a former medical missionary in China, who is commonly called America's Christian statesman, will tell of events leading up to the Pacific war when he appears Friday night, August 8, at Crystal Springs campground, six miles north of Niles.

Dry Cleaning Odor—Garments which have a strong cleaning, fume odor when returned from the cleaner have undoubtedly been put through an insufficiently cleaned solvent. A really good dry cleaning leaves no undesirable odor.

Public Vandals Smash Property In State Parks

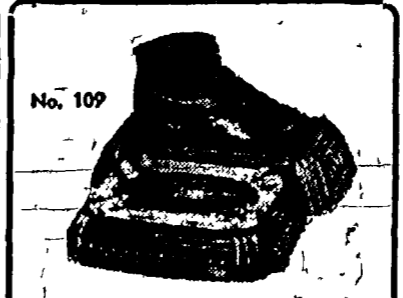

Persons who break doors off park buildings to put under cars mired in mud and chop up picnic tables, to roast weiners probably are psychiatric cases, but they can expect only court action and no sympathy in state parks and recreation areas this summer.

Both funds and labor for southeastern Michigan parks are limited this season. Conservation department park men have police authority, and they expect to use it to check the vandalism the parks cannot afford to repair. The mentality of persons who bring garbage to dump in the parks also interests park men, but they have no time to puzzle over that either.

Deliberate vandalism, like the three night attacks in Ortonville state recreation area that smashed \$100 worth of signs, and theft are the park men's primary concern. They have stopped a visitor leaving the park with a picnic table roped to the top of his car, a truck driver departing with 18 cedar trees carefully dug from a landscape planting, persons carrying picnic stoves, with the dug-up concrete block which anchors them attached.

Much of the difficulty with vandals has been in the newly-acquired areas in southeastern Michigan. When the worth of the parks as

local attractions is better understood, park men believe popular pride in the places will help keep vandalism to a minimum.

Kroger

Close to Cost!

Now and then someone comes up with the idea that Kroger makes 10% or 15% or even 20% per dollar sale. Actually, Kroger's net income last year was less than 1%. That's not even 2c on each dollar of sales. No business shows a smaller profit margin than the retail food business. Kroger prices are always close to cost.

Zing, comes the swing to your sweetheart

HOW'S that Buick sweetheart of yours? Still giving out with that eager Fireball power surge at a toe-touch? Still answering every light finger-touch on the wheel?

Most likely you'll answer, "It's doing very nicely, thank you." But years have a way of whittling away at performance—sometimes so slowly you don't notice it!

So you can be in for a whopping surprise.

Just wheel your car into our shop and treat it to some real Buick care. The kind of care that comes from men who are truly fond of Buicks—who know what they can do and like to bring out all their oomph and go.

Let these men of ours test and tune your Buick with their special Buick tools. Let them replace anything that's worn with the right Buick-engineered part. Then, ZING, back comes the swing to your sweetheart.

Job for job, Buick car care costs no more than ordinary service. So, what's to lose? Come in to us whether it's for a tune-up, major or minor repair or regular lubrication. Your car rates it.

GEOMETRY? Ugh! But here it means Extra Comfort

Buicks take turns without swing or sway. This means more comfort and less fatigue every mile you travel. And you can credit that to the geometry of Buick front-wheel suspension.

The wheels are designed to bank slightly on curves—the inside wheel turns a degree or two sharper than the outside one. And they're hinged at an angle that lets them give slightly to cushion road shocks.

So good Buick front-wheel service is a job for men who know Buick front-wheel action—who have Buick-approved checking equipment—who have at hand any needed Buick-engineered parts.

Another example of why Buick care keeps Buicks best. Whether it's for wheel alignment or any other attention, take your car to your Buick dealer. We'll show you the difference between ordinary service and Buick car care.

Buchanan Council Of Church Women Elect Officers

Mrs. L. Bradley was hostess to members of the Buchanan Council of Church Women Thursday afternoon when organizational plans were discussed and activities for the 1947-48 year were outlined.

New officers for the organization are as follows: president, Mrs. Bradley, who was named by the Council of Churches, first vice-president, Mrs. George Evner, second vice-president, Mrs. William S. Munsterker, secretary, Mrs. Allen Prince, treasurer, Miss Florence Mackway, co-chairmen of the social action committee, Mrs. John Chene and Mrs. Archie Moulcy, chairman of the World Church Service clothing drive, Mrs. Haulagh W. Riley.

Mrs. Bradley presented her report on the 17th annual convention of the Michigan Council of Church Women in Kalamazoo in June. The local Council voted to co-operate with the Michigan Council in concentrating on migrant welfare work this year. There are over 9,000 migrant workers in Berrien county.

Plans were discussed for a missionary institute to be held in the fall. Mrs. Manspeaker read a letter from a German family thanking the Council for the lot of baby clothing sent last November. A number of these letters were received here.

It was reported that five gallons of waste fat has been sent to Millsburg, Ind., where the Church of the Brethren make it into soap, which is sent overseas. The Council is collecting this fat and have another five-gallon can newly ready to send. Anyone wishing to donate waste fat may leave it at Mrs. Bradley's home, 312 Whitman Court.

Hold Farewell Party For Rev. M. Martin

Thursday evening Rev. Melvin M. Martin and his family were honored when more than 80 members and friends of the Church of Christ gathered in the church parlors for a farewell party which was sponsored by the Ladies Aid Society.

Miss Alene Arney planned the program of talks, readings and musical numbers. Farewell talks were presented by Wilber Kohn, who talked for the church, and Miss Florence Ferris, who represented the young people. Duet numbers were sung by Mr. and Mrs. Fred Franklin and Mrs. Homer Cooper sang a duo number and the Longworth trio, Donald, Virginia, and Joy, sang Miss Virginia Morelock gave a reading.

Rev. Martin, who came here from Granger, Ind., in 1943, resigned recently to accept a call to the First Church of Christ in Piquette, O., a much larger pastorate. The family will move to Piquette August 5.

Then many friends here wish the pastor success in his new work.

Boron Deficiencies Thirty-one states in the U. S. and six provinces in Canada have reported boron deficiencies in over 40 different crops.

R. N. A. To Be Host To Berrien Springs And Niles Aug. 12

Members of the Royal Neighbors club met last Tuesday evening in the R. N. A. hall and discussed plans for a guest night cooperative dinner and auction for the August 12 meeting, at which time the club will entertain members of the Niles and Berrien Springs R. N. A. camps. Miss William Keller conducted the business session, after which games were played and prizes were won by Mrs. Russell Bishop, Mrs. Ray Headley, Mrs. Earl Beck, Mrs. Carrie Smith, Mrs. Floyd Antidel, Mrs. Carl Harbaugh, Mrs. Alta Bunker, Mrs. Charles Stewart, Mrs. Edward Padden, Mrs. Lester Mitchell, Miss Mabel Miles, Mrs. Warren Boist and Mrs. John Bowman.

Relieves Boredom Boring work can be made pleasant by conscientiously feigning an interest in a monotonous job. Tests also have established that boredom is inhibited whenever rhythm can be introduced into the work. For this reason, as industrial surveys attest, workers are much less subject to boredom when music accompanies their work.

Find Infantile Paralysis To Be Spread By Flies

A release by Iowa State College, Ames, Ia., which is championing Iowa's state-wide fly-eradication campaign, states:

Iowans who thumb back through the worrisome days of last summer, when the dreaded infantile paralysis was sweeping through many communities, will have an added incentive for taking part in fly control this spring.

Harold Gunderson, Iowa State College entomologist, says there is so much evidence pointing to the fact that flies spread "polio" that we can no longer afford to take a chance. In recent experiments flies (1)

have been shown to carry the poliovirus, (2) have infected experimental animals with the disease, and (3) have contaminated food which in turn produced polio in experimental animals. The only positive proof now lacking is that flies also do the same for humans.

In addition to being possible carriers of infantile paralysis, flies are known carriers of 20 other diseases including typhoid, tuberculosis, dysentery and summer complaint in infants. Now that it has been proved in Iowa that we can get rid of flies with little more time, effort and expense than normally expended in trying to combat the pests through outmoded means, it seems foolish to put up with flies this summer, Gunderson says.

Clean Clothespins Keep clothespins in a clean place and wash them occasionally. Otherwise they may soil the clothes when pinned to the line.

1937 telephone rates won't work in 1947

THERE have been a lot of changes moneywise since 1937. Wages have gone up. Taxes have gone up. Prices of most things have advanced. But during this time, telephone rates haven't budged an inch ahead.

The last rate increase, in fact, was in 1926—21 years ago! From then until 1937 telephone rates went down substantially. Since 1937, there have been even further local reductions in a number of exchanges, and toll rates have come down too. But, in general, the 1937 rates prevail today.

Looking at the other side of the ledger, post-war wage adjustments alone, including settlements reached during the recent strike, have boosted our costs \$11,000,000 a year. All our other costs have risen, too.

But our income hasn't gone up nearly as fast as our costs. In the ten years since 1937, income has increased 141%. Costs have gone up 193%. Our return on investment has dropped more than a third.

We've held the line on rates just as long as possible. Now we have to ask for an increase in order to protect our customers' service.

We still have a lot of additions to make to the telephone system before we can give service to those who are waiting, and give better service to everybody. This will take a lot of money . . . money which must come from investors. Investors will put up the money only if they are assured a fair return, which we cannot provide under our present rates. A growing business, especially, has to earn a good return in order to attract the capital needed for growth.

So the future of Michigan's telephone service depends on raising rates enough to assure the financial stability of your telephone company.

That's why we're going to ask the Michigan Public Service Commission for a public hearing to review our proposed new schedule of rates. (The Public Service Commission is the body established by State law and appointed by the Governor to regulate utility rates.) During the week of August 3, we'll publish details of the proposed rates throughout Michigan Bell territory. After that, we'll file the petition with the Commission.

We feel the same way you do about raising rates. We'd rather not have to do it. But, when the quality of your service is in question, we have no alternative.
