Poetry.

Here, at the gate, let us stand and wait Till the grand procession pass; The marshal first, in marvellous state;

But you and I, my Harry and Bess, Will turn from these well-meant words Apart through the woodland silences...

Did I promise? Well, there is nothing new, But the joy and the pain are one. Sit down by the hearth here, Bess, and you, Lie here on the grass, my son.

A sudden and terrible call had come For an army of volunteers; And the tidings brought to our happy home, Hard struggles and boiling fears.

He carried you up to your crib that night, And watched with you till you slept; Then, praying that God would guide him aright, I found him weeping and left him there.

And then he came forth and sold me all, He could not bear to see me here, He would follow his suffering country's call, Who should dare to forbid? Not I.

My Neighbor.

"Love thy Neighbor," we are told, "As thou thyself; That creed I hold: But love her more a thousand fold!

My lovely neighbor; oft we meet In my lonely room or crowded street; I know the music of her feet.

She little thinks how, on a day, She must have missed her usual way, And walked into my heart for aye.

Or how the rustle of her dress Thrills through me like a soft caress, With trembles of deliciousness.

Wee woman, with her smiling mien, And soul celestially serene, She passed me, unconscious Queen!

Her face so most innocently good, Where ah!ly peeps the sweet red blood, Her form a nest of womanhood!

Like Raleigh, for her handmaid's tread When asks are mine—"Oh could I read! My clasp, but there's my heart instead.

Oh Neighbor, you will never know Why 'tis my step is quickened so: Nor what the prayer I murmur low.

I see you 'mid your flowers at morn, Fresh as the rosebud newly born; I wonder, can you have a thorn?

If so, 'twere sweet to learn one's breast Against it, and to learn its best, Sing like the Bird that Fair has been.

You know not, dear, how dear you be; And how I love to see you free; Nothing and yet a world to me!

A Shocking Asylum Story. Mrs. Berry, a former matron of the Protestant Asylum in Patterson, N. J., publishes a statement in which she charges the present matron with shocking cruelties perpetrated on the children of that institution.

But it don't matter so much now, I thought I "she will be more delighted, poor little girl!"

And then a cold chill seemed to creep through all my veins. Clara had heard nothing of me for nearly fifteen months—what might have happened in that time?

But here is a picture you never saw— On this side Mother and Bess, Hal on the other; the little boy, In the dunt of a ball, I guess.

Miscellaneous.

The Earth opens and Engulphs a Team. The community in the neighborhood of Joseph Boor's, in Snake Spring Valley, about two miles above town, was thrown into a fever of excitement on Friday by the report that the earth had suddenly opened and swallowed two horses belonging to Mr. B.

Several of the neighbors repaired to the spot, only to find the story too true. It seems that the sons of Mr. Boor were engaged in hauling rails from a piece of woodland, and as they were driving along at a certain point, without any warning the ground suddenly gave way under one of the horses and he disappeared dragging the other animal after him.

The rupture through which they passed was barely large enough to admit of their bodies. The boys were terribly frightened, and gave the alarm. Ropes were procured, and several gentlemen descended into the cavern. One horse was found lodged about 20 feet from the surface, at a point where the cavern changed direction, but the other one was nowhere to be seen. The first animal was lifted from his position, and search made for the other, the body of which was found about 35 feet further under ground. The extent of the opening has not been ascertained, but from the indications it seems almost bottomless. The fact that the same spot has been driven over for years, and no sign of such an extensive opening discovered until now is most strange.—Bedford Co. (Pa.) Press.

Unjustly Imprisoned. A man in State prison sent word to a Justice of the Peace yesterday, in order to make a statement under oath that he was the cause of a fellow prisoner being confined in jail on a sentence of twenty-seven years, for beating and entering an office of which the man is entirely innocent. These people are Germans, and, as far as their statements are concerned, it appears that this man through the officers was persuaded to plead guilty, without knowing the effect of any such plea, but under the general idea and assurance that it would be much better for him. The stunning sentence of twenty-seven years, ten years for each of the indictments, and seven on a third, on a man who had committed no offense, but who was at work in another man's shop at the time the burglary was committed, and who was inveigled into the affair because, as it appears, he had purchased from the thief, who now makes the disclosure, some articles said to have been stolen—such a sentence, under the circumstances, must have fallen like a death knell on the poor German when he came to understand it.—Toronto Gazette.

Ostrich Farms. The raising of the ostrich in a tame state for its feathers is now carried extensively in Africa. The birds are kept in inclosure, and fed on lucerne, with which the enclosure is planted. Every eight months they are plucked, some extracting the quill at once, and others cutting above its insertion, and then removing the roots a couple of months later. The latter method is said to give better results, and is more costly. The yield is about fifty dollars per annum for each bird. In breeding it is found to be best to allow one female to each male, though in the wild state five females are often attached to a single male. There are often two broods in a year, and the male and females sit on the eggs by turns, the male taking the largest share of his duty. The female takes chief charge of the brood after it is hatched. The young are reared on chopped lucerne, and as they get older a little grain is given them; they also require abundance of water, and a liberal supply of pulverized quartz and bones. When grown no food suits them better than chopped lucerne or trefoil, with an occasional supply of cabbage, fruit and grain.—Scribner's for June.

A Narrow Escape. During a class meeting held several years since by the Methodist brethren of a Southern village, Brother Jones went among the colored portion of the congregation. Finding there an old man notorious for his endeavor to serve God on the Sabbath and Satan the rest of the week, he said: "Well, Brother Dick, I'm glad to see you here. Haven't stole any turkeys since I saw you last, Brother Dick?" "No, no, Brudder Jones; no turkeys." "Nor any chickens, Brother Dick?" "No, no, Brudder Jones; no chickens." "Thank the Lord, Brother Dick! That's doing well, my brother!" said Brother Jones, leaving Brother Dick, who immediately relieved his over-burdened conscience by saying to a near neighbor, with an immense sigh of relief: "Bif he'd said ducks he'd a had me."

The Woman who Killed a Man for Kissing his Wife. Mrs. Fair appeared in court early yesterday. She was looking pale and worn, but seemed in unusually good spirits. She was escorted to a seat between her counsel, and at once entered into an animated conversation with Mr. Curtis. She wore a magnificent black silk walking suit, elaborately trimmed with silk fringe and satin piping, laid on in rows and fastened with small satin buttons. Her hat was a black straw, very fine, and handsomely trimmed with jet and spray, the whole being covered with a black illusion veil, thrown over her face and caught behind with an elegant jet pin. Black kid gloves and a pair of jet bracelets completed her attire. She laughed and chatted gaily with her counsel, and toyed with her little black fan in the easiest and most graceful way.—San Francisco Chronicle.

The Striped Bug. The Germantown Telegraph has the following: "Every gardener knows that this is a most destructive insect among melon, cucumber and other young vines, sometimes damaging the crop seriously. Many remedies have been suggested, some of them, no doubt, good in their way, but troublesome. Now we have tried for several years a remedy which has proved, with us, a complete success. Instead of aiming to drive away the insect by soot, snuff, etc., we put it with food better than the young melon and cucumber plants. We sow around each hill, at the time of each planting, a few radish seed, and coming up about the same time, the tops supply the pasture for the bug, which it much prefers to the vines. Lettuce will also answer, but the radish is rather liked the best. While our vines are untouched by making this little provision for it, the radish tops are completely perforated. Should this fail, which is seldom the case, and has never been with us, sprinkle the vines with a solution of whale oil soap and water. No insect but the curculion can stand this. When this preparation is unobtainable a weak solution of carbolic disinfectant soap will answer as well."

CONGRESSIONAL CONVENTION.—The Republican Convention to nominate a candidate for Congress from this District is to be held at Decatur on the 7th of August.

RESUMED.—Regular meetings have been resumed in the Christian Church. The hour of meeting is at 2 1/2 P. M. every Lord's day.

CHATTERSON & FRIDEL keep constantly on hand a well selected stock of general hardware. They will guarantee to suit in goods and prices.

REMOVED.—Our townsmen, Mr. R. A. DeMont and Mr. Samuel Miller, have removed with their families to Richardson, St. Jo. County, Ind.

ALL FULL.—There is a perfect scarcity of houses to rent. We do not know of a single empty house in Buchanan; and many of the houses contain two families.

WOOL.—We notice quite a large quantity of wool coming into market. The prices paid range from 50 to 60 cents.

NEW FIRM.—A co-partnership has been formed between Warner Bros. & A. Bliss, under the firm name of Warner, Bliss & Co., for the manufacture of Sash, Doors, Blinds, Moulding, Brackets, &c.

COOLING.—A trip to Kinyon's "Lapland Soda Fountain" these warm days. If you desire a rich treat should stay away.

IOE CREAM.—THANKS.—The entire Record office join in thanks to E. H. Kinyon for that splendid Ice Cream served up to the Editors and employees, at his Lunch Rooms the other day.

GREAT BARGAINS IN SUMMER GOODS.—Young & Son at Dayton, have just received a large stock of Dress goods, Hats & Caps, Boots & Shoes, &c., for their summer trade.

THE CIRCUS AND MENAGERIE.—Well do we remember, when we were a boy, how the day of the show was looked forward to with anxiety and delight.

JULY FOURTH.—Arrangements have been fully consummated whereby Buchanan is to have an old-fashioned celebration of Independence Day.

CAUTION.—As there will be a large crowd here on Monday, show day, it will become every one to look out for pick-pockets and robbers.

THE ASSESSMENT has been completed by Supervisor Alexander, and the Road Warrants will now issue.

D. E. BEARDSLEY & Co. have a fresh lot of Rakes, just arrived. They have given good satisfaction, and are selling rapidly.

4th of July! A T BUCHANAN Grand Basket Pic Nic and Old Fashioned CELEBRATION!

Officers of the Day. President—George H. Richards. Vice Presidents—Samuel French, Joseph Stephens, Hon. Henry Chamberlain, R. W. Montross, C. J. Ingersoll, Maj. Graves, W. Howe, M. Hand, Orator—Orville M. Colledge.

The Farmers' Cornet Band will discourse music on the occasion. For Order of the Day see posters and small bills.

THE PEAKS.—It is not necessary for us to say a single word of praise in favor of the Peak Family's entertainments. It is well known in Buchanan, as well as in hundreds of other places, that the Peaks never fail of a good house, and of giving so much amusement and enjoyment, to all who go to hear them.

DISCARD your "newspaper bustles" and purchase one of those nice patent ones of Mrs. R. A. Hinman. She has also some fine braids on hand.

THE LAST CHANCE.—The success which has attended our enterprise from the commencement is very gratifying, and the returns and number of tickets sold is fully up to our expectations.

LONGINGS.

The flowers languish for the blessed light; For brilliant stars still languish at night; The parched sun languishes for rain; The sick man longs for a relief from pain; The orphan child longs for a mother's breast; The evening languishes for soothing rest; The morning, impatient, longs to see the sun; The soldier longs to see the battle won; The silent harp longs for the songs of choirs; And thus I languish for affection's words; They are to me what light is to the flowers, My heart refreshing, as soft rain the bowers; And for my hopes are as the morning sun, As for the soldier is the battle won, As is a brilliant star in gloomy night, As to the wanderer his cottage light; A sweet release for my prolonged unrest, And for my orphan heart a mother's breast; For my soul's sorrow a sweet lullaby, And for its love a heavenly harmony.

Overboard!

Overboard! A man overboard! The people near the shore run to the water's edge, and the dirty looking women, with their unwashed children in their arms, find their way out of deep cellars, the dingy rooms, and from their neighbors' houses, where they have been gossiping, to know the end of it. The public houses are emptied of their customers, and even the barmaid ventures from behind her enclosure, to see, if possible without being seen, the issue of it. A man overboard! What excitement there is! Some brave fellow throws off his cap, jumps into a deep spring, and strikes out his strong, brawny arms, clearing his way through the depths till he reaches the spot where the head is seen bobbing for a moment above the stream. What anxiety is felt on shore! Every one is still, or preparing instinctively to render what help they may when the two reach the strand. And when the hero delivers his burden to the people there, and staggers away exhausted, to have his clothes changed, how he is cheered! A man has been saved? A life has been rescued! The waters have been battled with, and they gave up their prey!

How many thousands are lost annually in the great sea of intemperance! How many husbands, brothers, and sons, sink to rise no more! There are brave men and women trying to ward off the danger, and to rescue those who do fall in; but still the victims sink by thousands. The worst feature of the fact is, that it is the interest of vast numbers that persons should persistently and perseveringly wade in these waters. Though they see their companions perpetually get out of their depths and disappear, still incitements are made and inducements offered to effect ruin, disorder and death. He thrives on ruin. His speedily furnished house means the poor man's bare cellar and his wretched garret. His son's education and his daughter's accomplishments are acquired at the expense of the poor, wretched laborer, whose boys, in many instances, have but the prospect of the prison, and his girls the alternative of the streets. The wide areas purchased by the publican who retires into the charmed country is purchased with the blood-money wrung from the deluded victims of the crowded town.

Whenever we see a poor woman, with a babe in her arms, reeling out of a gin palace, we should think that a woman is overboard. Whenever we see a young man with a pipe in his mouth to make him thirsty, and a pot of beer before him to make him thirstier still, we should think that a young man is overboard. When we look upon a poor fellow throwing his money into the landlord's till for stuff that is physically and morally poisonous, we should consider that a fellow creature with an immortal soul is overboard. If we so considered, what would we do? We should do in this instance, what we would impulsively perform were we to see a brother or a sister struggling in the river or the sea; we should consider an effort too great, no sacrifice too considerable, to snatch the victim from the awful consequences which seem inevitable.

Two Sidedness. Ruskin thus pleasantly meditates upon it: All rivers, small or large, agree in one characteristic: they like to lean on one side; they cannot bear to have their channels deepest in the middle, but will always, if they can have one bank to sun themselves upon, and another to get cool under; one shingly shore to play over, where they may be shallow and shore-foolish, and child-like; another steep under which they can pause, and purify themselves and get their strength of waves full together for due occasion.

Rivers in this way are just like wise men, who keep one side of their life for play and another for work, and can be brilliant, and chattering, and transparent when they are at ease, and yet take deep counsel on the other side when they set themselves to their main business. And rivers are just in this divided, also like wicked and good men; the good rivers have servicable, deep places all along their banks, that ships can sail in; but the wicked rivers go scooping irregularly under their banks, until they get full of struggling eddies, which no boat can row over without being tossed against the rocks, and pool-like wells, which no one can get out of but the water-kelpie that lives at the bottom. But wicked or good, the rivers all agree in having two kinds of sides.

Religious Speculation. It is pleasant to speculate upon matters of belief. It stirs the mind to launch out upon the unknown sea of new opinions. It is easy to cavil at old beliefs and to invent new ones. But it is dangerous business. It ruins souls. Rationalism gathers a few cultivated people in the parlors for an intellectual or intellectual discussion; or in a hall for an hour's entertainment with intellectual bomboms. It writes learned and graceful essays for the papers. But is never lifted up one soul into the glorious liberty of the sons of God; it never goes out to seek and to save that which is lost; it falls even to carry out those "sweet humilities" of which it continually talks. It is the very Anti-Christ himself. - W. H. Coleman, in Golden Age.

Explanation of High Numbers.

The number of tickets to be sold is limited to 37,000, still, we have a great many tickets of higher numbers out. As we were unfortunate in the Chicago fair, and some of our agents lost property, or returned our tickets, and we cannot have two tickets of one number, therefore have to commence numbering over \$3,000. The first 37,000 tickets sold to be put in the wheel.
