WORK has commenced on the ditch near Pike lake, about sixty or eighty rods below the lake. It is to be run from that point in the creek, in a north-westerly direction, direct to the Egbert lake, thus saving in distance several rods, and giving a greater fall than to follow the original creek.

WHEN you want to buy goods, always look-over your local paper and ascertain which of your merchants advertise, and which do not. Then if you will compare the prices of the two you will find, in nineteen cases out of twenty, that the one who advertises will make you the lowest figure on goods. This test will scarce-ly ever fail.

[Niles Mirror.] Benj. Toney lost by thieves who entered his barn on Wednesday night eighteen bushels of wheat, all he had left but about two bushels....Mr. John Metzger, wife, daughter and two grand-children, left for Texas on Wednesday, this week, to remain during the winter, and after the harvest there. Nor long since one of the Bulla Bros. who had been out to the farm, started home with a cow, and as he was afraid that she would run if she had a chance, he tied her to the back of the buggy, giving her a pretty good length of rope. On the way to town the cow seemed to think that they were going too slow and started on ahead. Bulla smiled to think how that cow would feel when she got to the end of her rope, but the animal kept right on until she came to the end of the rope, and then, turning across the street in front of the horse, upset horse, buggy and all, breaking a bulley wheel and doing other damage. Bulla doesn't laugh when they say cow to him.—South Bend Register.

EDITOR RECORD.—Dear Sir: School is steadily increasing in numbers, and seems to be doing as well in the interest taken in school duties.

Number attending the High School department last month, 54. Average daily attendance, 34.2 per cent, 24 having been present every day.

Number attending the Primary department, 64. Average daily attendance, 76.6 per cent, 20 having been present every day.

We are sorry to record a little negligence on the part of the patrons of the school in regard to visiting us. Now this ought not to be. Visiting schools is a duty; and the more imperative is the duty in proportion as you value an education.

Hoping to see more of the patrons of the school in the future than we have in the past, we remain, as ever, Yours respectfully, J. S. PARDEE, Teachers.

LOCALS. Renovation, not Prostration. Did any enfeebled human being ever become strong under the operation of powerful cathartics or salivators? It is sometimes necessary to regulate the bowels, but that cannot be done by active purgatives, which excite vital forces and serves no good purpose whatever.

The only true way to promote health and vigor, or which are essential to regularity of the organic functions, is to invigorate, discipline and purify the system at the same time. The extraordinary efficacy of Hostetter's Stomachic Bitters in cases of debility or irregularity of the organs of digestion, assimilation, secretion and discharge, is universally admitted.

Appetite, good digestion, a regular habit of body, active circulation of the blood, and purity of all the animal fluids are induced by this superb tonic and corrective. It has no equals, moreover, as a preventive of chills and fever, and other types of malarial disease. Travelers and travelers it is particularly serviceable as a medicinal safeguard.

A FINE Microscope for a Few Cents.

A will made, genuine Microscope—not a bit of molded glass in a paper or metal ring, or tube—but one with triple Lenses, Diaphragm, Stand, etc., is not only useful in every family, but is very interesting. Such instruments have hitherto been too costly for the general public. The Editors of the American Agriculturist, in connection with an Optical Manufacturing Company, have, after many experiments and much invention, succeeded in producing a genuine Microscope with three fine Lenses, Stand, etc., which, by use of machinery, and very large manufacture, is now made at far less cost than has ever before been done. Scientific men, and others, say it is decidedly superior to anything ever before offered so low as \$2.50; but this one is sold for \$1.50. But one is given to every Subscriber to the American Agriculturist, who simply adds 40 cents to the regular subscription price—that is, the paper is sent one year, with the \$1.50 Microscope, for only \$2.00. It is to be delivered free to any part of the country, 15 cents extra to be added. A full description and all particulars can be had by sending your address on a Postal Card to OLIVER JENN COMPANY, New York; or better still, send them 10 cents (half-price) for a post-paid sample copy of the paper, which will give a full description of the Microscope, and also much valuable reading and engravings, etc., and be richly worth for more than its cost.
