

Berrien Co. Record.

THURSDAY, MARCH 6, 1879.

To Advertisers. The "Record" is the best Advertising Medium in South-western Michigan, and the largest circulation of any paper in this part of the State.

Agents. Geo. P. Rowell & Co., 41 Park Row, N. Y., S. M. Pettibone, 27 Park Row, N. Y., and Rowell & Cheesman, St. Louis, Missouri, are authorized agents to contract for advertising at our lowest rates, for the columns of the Berrien County Record.

NOBLE

Will close out his entire line of

BOOTS & SHOES,

Hats and Caps,

CLOTHING

AND

GENTS' FURNISHING GOODS,

FOR THE

NEXT THIRTY DAYS.

NOTICE.—Mr. R. R. Moon is an authorized agent for collections and the solicitation of new subscribers for the Record, and any money paid him by our subscribers will be accounted for the same as if paid at this office.

Village Election Notice.

Notice is hereby given that the regular Annual Election of the Village of Buchanan will be held at Eagle House No. 1, in said village, on Tuesday, March 11, 1879, at which election the following officers are to be elected: One President, one Recorder, one Marshal, one Treasurer, one Assessor and three Trustees for full term.

Dated Feb. 27, 1879.

Registration Notice.

Notice is hereby given that the Village Board of Registration for the Village of Buchanan will be in session on Saturday, March 8, 1879, from 9 o'clock a. m. to 4 o'clock p. m. of said day, at the Recorder's office, in Room 100, for the purpose of receiving and completing the list of qualified voters entitled to vote at the Village Election to be held March 11, 1879. During said session of the Board of Registration it shall be the right of any person then actually residing in said village who may be a qualified voter at the election, March 11, 1879, and whose name is not already registered on the Village Register, to have his name entered in the said Register. The name of any person who is entitled to vote in said village at said election, will be registered by the Recorder at any time previous to the closing of the polls at the election on March 11, 1879.

Dated Feb. 27, 1879.

Election next Tuesday.

The first month of Spring.

The St. Michas has been held good

ABOUT four inches of snow fell Sunday.

QUERY.—What is "Maphone?"

The doctors want to know.

It is a girl that Horace Compton

brags about this time.

Mr. W. A. SEVERSON has one of the

finest soda fountains ever brought to

Buchanan.

BERRIES were the only county not

represented at the Democratic convention.

THERE will be an adjourned meeting

of the Common Council to-morrow

evening.

FOR hundreds of dollars have been

subscribed for the purpose of erecting a

public hall at Eau Claire.

At the meeting of the Common Council,

Dr. A. N. Van Riper was appointed

village physician.

Mrs. VAN KIRKENDALL will sell

her personal property at auction, on

Saturday, March 15.

The legislature has made provision

for the reassignment and collection of

certain uncollected drain taxes in this

county.

PHILIP HOLLER, formerly of this

place, has been having a seizure of the

diphtheria. He lives at Crum's Point,

Ind.

NEXT Saturday will be registration

day for the village election. If your

name is not on the list, attend to it

then.

DIED, March 2, after an illness of

thirteen weeks, Susan, wife of E. H.

Beardsley of this place, aged 70 years

and 10 days.

The Editor of the Record started

last evening for Lansing, to attend the

Republican State Convention, which is

in session to-day.

The Lake Shore Daily News is to

be run a weekly short time, when it

will be enlarged and resume its daily

issue once more.

A BRAND new boat is to be on the

river between Berrien Springs and St.

Joseph, next summer. The hull is

completed.

The bill for the incorporation of the

village of Gallen has passed the House

and is in the hands of the Senate

committee on cities and villages.

A. J. BYCHANEY will preach in Bu-

chanan, in the Old Advent Church, on

Sunday, the 9th inst., at 10½ o'clock

A. M.

BOYSTON, the traveling editor, is in

Three Oaks again. Now in the em-

ploy of J. R. Hill, of the Michigan In-

dependent.

SULLIVAN'S "Mirror of Ireland" drew

good houses Tuesday and Wednesday

evenings, and their exhibition gave

perfect satisfaction. Mr. Sullivan, an

"Muldoon, the solid man," was simply

immense and drew round after round

of applause.

SELECT good men for the village officers. It is just as essential that village affairs be attended to properly as it is for any other.

THE necessary papers for a Lodge of Odd Fellows, at Berrien Springs, have been received, and the Lodge will be instituted on Monday, the 17th inst.

EDWIN D. H. MANSFIELD will preach in the Oak Street Advent Chapel next Sunday, morning and evening. The public is cordially invited.

MALDEN JOHN HAN had a misstep, a few days since, and fell, striking one of his front teeth against the floor and broke it square off next to the gum.

SALMA BARBONE displayed about twice the usual amount of sense last Thursday. He had been working out in the cold that morning and had it frozen.

If your roof leaks about the chimney or at any joints, or if you have a boat to calk, get some of that Flexible Cement of George Churchill. It is just the thing, and is cheap.

REV. MR. BOGGS, the Presiding Elder of the M. E. Conference of Niles District, was in town Thursday getting acquainted with the members of the dock and others. Come often.

THERE have passed several years since we have had so great a depth of snow as we have had this winter. In the winter of 1871-2 there was a great depth, but not so great as this year.

Three Oaks has no tailor, but probably the editor can fill the bill.—J. H. PILLBURN.

IMPOSSIBLE. He can't sit cross-legged, owing to the enormous size of his pedal extremities.

CHRIS. HEBERMAN and JAKE LONG are on the anxious seat. Their names are on Henry Schaefer's liquor bond, and are called upon to pay the judgment and costs in the case of Mrs. Boyce vs. Schaefer.

MICHAEL MATTHEWS has bought the Wm. Neis farm, near the Gitchell distillery. There are one hundred acres of the farm, and the price is \$3,000. The papers were executed Monday.

THE editor of the St. Joseph Republican gets very emphatic on the Chinese question, and unwittingly acknowledges the supremacy of the "Heathen Chinese" over the white race.

MASQUERADE.—There will be a Mask Ball in Rough's hall next Tuesday evening, March 11. There will be no need to be him. Music by Scholme & Powers, assisted by the Buchanan Cornet Band.

NOTICE.—There will be a meeting of the Republican Club at Justice J. V. R. Lister's office to-morrow evening. Let every Republican in the township be present as there will be important business to attend to.

THE attention of our music-loving readers is called to the advertisement of Pelton & Pomeroi, of Chicago, Ill. in another column. Their agent, Mr. Wright, is now stopping at the Dunbar House.

D. B. COOK attempted to be allowed to cast the twelve votes of this county in the Democratic convention at Lansing, but so long as there was no county convention and no delegates appointed, he was granted the privilege of casting one vote if he wanted to.

TRE DEMOCRAT says that some of the Niles ladies are contemplating bringing suit against some of the solemn keepers of that place for selling liquor to their husbands. The case of Mrs. Boyce vs. Henry Schaefer, formerly of this place, will be a sort of encouragement to them and others.

AN effort is being made to combine the two villages at the mouth of the river under one city charter, and with a name different from that of either. Whether such an arrangement would be beneficial to either is a matter of doubt.

WE are anxiously awaiting to see what course will be pursued by the Berrien Springs Journal and Niles Democrat regarding the new ticket. They will probably take a complete back track on everything they said on the currency question last fall, and go in an exactly opposite direction. Nice, isn't it?

LAST Saturday there was a string of teams on Oak street, about twenty rods long, all loaded with saw logs and awaiting their turn to unload. Several years have passed since so many logs have been in the place at any one time as this winter. This will make work more plenty during the entire year.

ACCIDENT.—While at work at the Buchanan Manufacturing Company's shop, Saturday, Mr. James DeVinney was struck by a bolt that was being unloaded from a wagon and somewhat bruised about the hips. It might have been considerably worse, but it was a narrow escape.

THE March number of the American Agriculturist has an extended article regarding the mining interests of the Upper Peninsula of this State. An engraving of the famous Tilden mine is given. They have a special correspondent looking after the curiosities of this State.

WE have accidentally learned what kind of provender the Oneida county editors have for dessert. On opening one of their papers as it came to us through the mail, we stalked a big fat bed-bug, as proud as Pompey. Now don't ask which one of them it was let the creek out, for we exchange with nearly all of them.

THE Prosecuting Attorney, J. J. Van Riper, attended the case of Sarah E. Tyler vs. Allen, a school teacher in Inagay, for assault and battery. Miss Tyler was attending Allen's school and in punishing her he struck her with his fists. Allen was convicted and fined \$10 and costs. He has appealed to the Circuit Court.

THIS name of Bert. Worthington we hear mentioned in connection with the candidacy for Township Clerk, subject to the decision of the Republican caucus. He will make a good officer.

WILL. CURTIS returned from his trip among the lumber camps of the north, last week, feeling well satisfied with his trip. It's a good thing to get away and see what is being done, once in a while.

TWO youngsters from South Bend, aged ten and twelve years, started one day last week for the Black Hills. They were stopped at New Carlisle and sent back to their mothers for a while longer.

SOME one from this place has a long article in the Niles Advertiser in reply to Commissioner Jerome's letter on the fish raising question. The correspondent uses some strong language to prove that the whole business is a humbug on the people of the State, and benefit to none but the Commissioners.

TWO colored barbers in St. Joseph had a pitch battle, one evening last week, in which stones, bricks and bats and some heads took an active part. The fight originated from a ruler rough joke on one of the daddies that was more than he could stand, and he showed fight.

Saturday President Hayes returned the anti-Chinese bill to the House of Representatives, where it originated, accompanied with his message of veto, giving as his reason that the abrogation of the two sections of the treaty by this act will release the Chinese from the provision of the entire treaty.

List of Letters.

Remaining in the Post Office at Buchanan, Wednesday, March 5, 1879.

Mrs. M. E. Palmer, Mr. Elias

This list is published for the information

of the readers of the Record, therefore

there is no charge for delivery of letters ad-

vertised herein. Persons will, however, in

the case of the above, call for "advertis-

ed letters." L. P. ALEXANDER, P. M.

MARRIAGES.—From a late Missouri

paper we learn that two former Bu-

chanan boys, who are now living at West-

on, Mo., have recently each taken a

life partner. Wm. G. Evans, better

known as "Dutton," was married to

Miss Annie Ellen Crawford, of West-

on, and John Baughman was married to

Miss Stella Madison, in Iowa. We

wish our friends a long and happy life

in the matrimonial harness.

RECEPTION.—The brilliant social

event of the season was the reception

of Mr. and Mrs. R. B. Dick, at the

residence of Chas. S. Black, Tues-

day evening. About one hundred in-

vited guests were present, and enjoyed

the hospitality of Mr. and Mrs. Black.

The following is a list of the many

and valuable presents given the newly

married couple on this brilliant occa-

sion:

Gold stud, bridge, silver cake dish,

U. S. Black; pickle dish, Misses Hat-

tie, Tute and Katie Richards; set of

silver knives, Mr. and Mrs. H. C. Storm;

set of silver knives and forks, E. E. Plim-

pton; set of silver teaspoons, Mr. and

Mrs. Geo. Robinson, Hinsdale, N. H.;

silver nut cracker and picks, Mr. and

Mrs. M. A. Thompson, Sedalia, Mo.;

butter knife and pickle fork, Mr. and

Mrs. W. L. Dainton; fruit knife, Miss

Mattie Brown; silver pickle dish and

card receiver, Mr. and Mrs. John Graham,

Mr. and Mrs. Scott Whitman, Mr. and

Mrs. Hoag, Mr. and Mrs. J. H. Rose,

Mr. and Mrs. C. O. High, Mr. Geo. W.

Sampson and Sisters; pair of napkin

holders, Mr. Frank Marsh, Detroit; sil-

ver ice pitcher, Mr. and Mrs. E. M. Plim-

pton; gold pen and holder, clock, gold

watch and chain and walnut

chamber set, C. S. Black; carving

knife, fork and set, Geo. H. Black; lamp,

iceberg and Emma Smith; fruit

dish, Mr. F. T. Plimpton; silk gro-

cery cloth, Mrs. C. S. Black; Dol-

man vases, Mrs. W. O. Hamilton; pair

vases, Mr. and Mrs. Wilbur Smith;

toilet set and accompaniment, Dr. E. S.

and Mr. and Mrs. L. H. Deane; bouquet

holder, Miss Lou Van Riper; cologne

bottle, Mrs. and Mrs. H. H. Kinyon;

glass pitcher, rolling pin and

ironing board, Mrs. and Mrs. Horace

Black; tidy, Miss Rose White; tidy,

Miss Annette Dainton; brackets, Miss

Mary Dainton; pair of napkin holders,

Jennie E. Black, Minneapolis, Minn.;

slipper holder, Dr. and Mrs. DeLanap,

Niles; linen table spread, Mr. and

Mrs. P. N. Weaver; pair linen towels,

Miss Minnie Hamilton; point lace

barbs, Miss Nellie Post; Willow and

East Lake camp rockers, house of Mr.

Pears; oil painting, Miss Ella and

Hattie Hahn; two oil panel paintings,

THE Republican County Convention, to choose delegates to the State Con-

vention at Lansing to-day, was held in Berrien Springs Monday. The following persons were chosen delegates:

L. A. Duncan, Wm. H. Harrison, R. D. Dix, H. P. Kellogg, W. H. Tryon, John G. Holmes, L. J. Morehead, L. A. C. Fyfe, L. E. H. Dodd, Alonzo Plummer, G. P. Brown, Niles, Thomas Adams, R. M. Goodwin.

A vote was taken giving such as attended the Convention the power to cast the full vote of the county.

A MAN named Craig, of South Bend, has commenced suit against that city for \$10,000 damages. Craig claims to have been driving along the street, when his buggy ran into an excavation that was left unguarded and he was thrown from his buggy and his leg so badly broken as to render amputation necessary. Copeland is his attorney.

SOME rag peddlers are operating in this county, and this is their game: They get your rags packed, and start to the wagon with them, leaving the peddler under the impression that they will give her an opportunity to choose her pay from a stock of five-cent articles. After the rags are loaded, the peddler throws the lady a stick of gum, or a box of stove-black, or some like article, and then dashes rapidly away, leaving the poor victim to mourn for her rags.—Berrien Springs News.

CARELESS.—At the time of the last dance in Rough's Hall, as is the usual custom a table for the ticket seller, and with a loose lamp standing upon it, was placed at the second light of stairs. During the evening some drunken chaps struck the lamp and knocked it on the table down the steps, spilling the oil over the hempen matting. Luckily the oil did not ignite, and no serious accident occurred. Had the oil taken fire the fate of the greater portion of the crowd in the hall would have been sealed, as exit through the hall, and that all ablaze, would have been next to impossible. The lights in that place should be placed on the side of the entrance, and high enough to be out of reach of all such cases as the last night, before the accident. We learn that this is the second time a lamp has been overturned in that place. The accident may be repeated a dozen times with no serious damage, and it may lay the town in ashes the next time. An ounce of caution is worth a ton of cure.

RECEPTION.—The brilliant social event of the season was the reception of Mr. and Mrs. R. B. Dick, at the residence of Chas. S. Black, Tuesday evening. About one hundred invited guests were present, and enjoyed the hospitality of Mr. and Mrs. Black. The following is a list of the many and valuable presents given the newly married couple on this brilliant occasion:

Gold stud, bridge, silver cake dish, U. S. Black; pickle dish, Misses Hat-

tie, Tute and Katie Richards; set of

silver knives, Mr. and Mrs. H. C. Storm;

set of silver knives and forks, E. E. Plim-

pton; set of silver teaspoons, Mr. and

Mrs. Geo. Robinson, Hinsdale, N. H.;

silver nut cracker and picks, Mr. and

Mrs. M. A. Thompson, Sedalia, Mo.;

butter knife and pickle fork, Mr. and

Mrs. W. L. Dainton; fruit knife, Miss

Mattie Brown; silver pickle dish and

card receiver, Mr. and Mrs. John Graham,

Mr. and Mrs. Scott Whitman, Mr. and

Mrs. Hoag, Mr. and Mrs. J. H. Rose,

Mr. and Mrs. C. O. High, Mr. Geo. W.

Sampson and Sisters; pair of napkin

holders, Mr. Frank Marsh, Detroit; sil-

ver ice pitcher, Mr. and Mrs. E. M. Plim-

pton; gold pen and holder, clock, gold

A New Way of Repairing Teeth.

A paper under the above title, from M. Magitot, has just been presented to the Academy of Sciences by M. Gosselin, chief of the dental service in the French navy. In 1899, Dr. Magitot conceived the possibility of extracting a tooth affected by abscess or caries, removing the sound part, and replacing it in the socket with a rubber plug. The rubber plug was made of the portion of the system from which it had been detached, and he succeeded perfectly. The matter attracted but little attention, and was apparently forgotten until M. Magitot took it up and made a serious study of it. He now states that the grafting of the dental organ is divided into several varieties. The first category comprises the teeth drawn from the sockets and replaced at once or after a certain time. That he calls grafting by restitution. In a second group are classed the cases where a tooth is drawn from one individual and placed in the mouth of another. We need not refer to the others, as the present paper only concerns the first class of operations. The painful affections known as toothache, periodontitis, caries—abscess at the root of the tooth, caries of the bone, inflammation of the membrane surrounding the organ, diseases of the gum tissue, such as the extraction of the tooth and the removal of the diseased portion is quite practicable, and experience has proved beyond question that the organ can be replaced in its original position. The rubber plug with the tissues to which it was originally attached. M. Magitot bases his assertions on sixty-two operations, of which fifty-seven were perfectly successful. The operation is performed as follows: While the action of retraction is going on, some local anesthetic is caused, which, however, scarcely affects the general system; small bolts or abscesses form, which, when they have run their course, lead to the consolidation complete in a period of from a week to a fortnight. When the operation does not succeed, the inflammation affects the tooth in a day or two. The age of the patient has no influence on the results, and all sorts of teeth may be drawn, excised, and reimplanted.

Silent Men, like Gen. Grant, are sometimes very trying, but they are only so to those who come to bore them. An old friend says that the general is a very much like the eternal clatter of a mill, but those who converse magnetically are like the drum that responds to the skillful tap of the player, or the piano that replies to the delicate touch of the artist. Dr. Oliver Wendell Holmes once declared that a certain incessant gabbler induced a fit of suppressed articulation, and Sydney Smith expressed a blatant hypocrite who asked him if he had any doubts about his piety. "Well, sir, I have no doubt about your mag-piety." I witnessed a very amusing scene once at Cape May. A prominent public speaker, who had been at his work at Washington to visit the seaside, was quietly enjoying the delicious sea air, when a tattling politician seized him and began a perfect torrent of pestering inquiries. I saw the pained wrinkles on the brow of the surprised statesman as he languidly listened to the rapping torrent of the thoughtless intruder. In the midst of the operation the servant handed a sealed envelope to the intruder. He seized it, saying with unconscious apology: "Excuse me; when I have read this I will return." Opening the note, there dropped out a small card, which he put in a pocket, with another standing over him, and below the line: "Talked to Death." Sequel—the flight of the furious bore in search of his correspondent and the rescue of the distressed statesman.—Progress.

No Tramps in the South.

The tramps do not take kindly to the Southern States, and they are not so numerous in the North. In the regions do not take kindly to them. In that region colored people have charge of the kitchens and larders, and they are not inclined to showing mendicants favors. This probably is the reason why the tramps are to be found in the South. Another reason is that the South does not afford the same advantages for plunder and easy living that are to be found in the North. There are no orchards and poultry roosts to offer an easy dinner to the wayfarer who prefers pilfering to working. There was an eruption of tramps from Louisiana during the winter season. They pretended to be in search of work, but when furnished with employment, they soon showed they were not interested in it. They were wandering from one plantation to another, and became as much disgusted with the country as the country was with them. The negroes showed them no favor, and the planters closed their doors against them. They were found to be an undesirable accession to the population, and the New Orleans Democrat advised that "if there is more colored labor than can be picked by our own people, it is better to let it rot away than to bring down this visitation of tramps upon us under the delusion that they will do any work."

Bayard Taylor.

Edmund C. Steadman, speaking of Bayard Taylor, says: "No man in the country could do so much work, so long, and do it so well in a given time, as could Mr. Taylor. He was remarkable in brilliant off-hand flashes of literary criticism. As an illustration he mentions that about a year ago two large columns of poetry were written by Victor Hugo, in the French, received by steamer and were placed in Mr. Taylor's hands on Thursday evening. For some reason it was impossible for him to get to the printer's office until the following Saturday, and of course the copy had to be in the printer's hands early on Friday night. Mr. Taylor's health was bad at the time, and he was in the meantime to deliver a lecture in Brooklyn and another in New York. He finished his review in time on Friday morning, and it appeared in the Tribune the following morning, covering not less than two-thirds of a page. It was equal," says Mr. Steadman, "to any of his literary criticism, and surpassed any analysis of Hugo's genius that I have ever seen. The remarkable feature of the review was over a column of translation into English poetry from the original, including several lyrics and idylls so beautifully done in the English."

To make shoe pegs enough for American use consumes annually 100,000 cords of timber, and to make our lumber matches 300,000 cords of wood are consumed each year. Lasts and boot trees take 500,000 cords of birch, beech, and maple and the handles of tools 600,000 cords. The barking of our backs consumes 2,000,000 cords of wood or bark that would cover with forest about 60,000 acres of land. Telegraph poles already represent 800,000 trees, and their annual repairs consume 200,000 more. The ties of our railroads consume annually thirty-three growth of 75,000 acres, and to fence all our railroads would cost \$45,000,000 with a yearly expenditure of \$15,000,000 for repairs. The wood of our ships, the ways which American forest are going. There are others, our packing-boxes, for instance; cost in 1874 \$12,000,000, while the timber used each year in the various wagon and truck bodies and platforms is valued at more than \$10,000,000.

Sleep is a most wonderful power, often stronger than the will, as in the case of the sleeping soldier, and more mighty than pain, as when sick persons and tortured prisoners sleep in the midst of their suffering. No torture, it is said, has been found equal to the prevention of sleep. The amount of sleep needed differs according to the age and health of the individual, and persons who work hard and brain labor need a large amount of sleep. Children need more sleep than grown people, because construction is more active than decay in their brains.

Last year the State of Nebraska raised 15,000,000 bushels of wheat, 48,000,000 of corn, and 12,000,000 of oats, barley and rye. There are now living in the State 1,800,000 people, and the wheat and corn raised was constructed during the year. The roads have done much to encourage immigration, and are yet working in this direction with great zeal.

A Boy's Appreciation of Dogs.

A lad entered the city office yesterday and presented an order calling for the payment of \$25 cents for a dog. The order was for a dog named "Buddy," and the boy said that he had been taking care of it for a long time. The clerk asked him how long he had had the dog, and the boy replied that he had had it for a year. The clerk then asked him how much he had paid for it, and the boy replied that he had paid nothing. The clerk then asked him how he had taken care of it, and the boy replied that he had taken care of it by feeding it and giving it a good home. The clerk then asked him how he had taken care of it, and the boy replied that he had taken care of it by feeding it and giving it a good home.

The wife of the late Prof. Agassiz rose one morning and proceeded according to custom, to put on her stockings and shoes. As she was doing so, she noticed a small, round, white object on the floor. She picked it up and examined it. It was a small, round, white object, and she recognized it as a dog's bone. She then remembered that she had been told that a dog had been in the house, and she had been told that it was a very good dog. She then remembered that she had been told that a dog had been in the house, and she had been told that it was a very good dog.

An intelligent writer calls the attention of all consumers of kerosene oil to the fact that the kerosene oil which is sold in the city of New York is of a very poor quality. He says that the kerosene oil which is sold in the city of New York is of a very poor quality, and that it is not fit for use. He says that the kerosene oil which is sold in the city of New York is of a very poor quality, and that it is not fit for use. He says that the kerosene oil which is sold in the city of New York is of a very poor quality, and that it is not fit for use.

Water for Sheep.

Every wool grower knows that his flock can get along very well with little water. No farm animal can thrive on so little. Yet it is quite certain that the dew alone does not furnish all the water that a flock of sheep needs, and at times when little moisture is deposited on the herbage there must be great suffering among sheep that do not have access to water. Mr. Mechi, the well-known English authority on farm matters, gives his ideas on this subject in a letter to the Mark Lane Express. "What an unprofitable mistake it is to suppose that sheep can do without water," he writes. "They need it as much as we do, and they will suffer if they do not get it. I have seen many a flock of sheep that have been driven to the water, and I have seen many a flock of sheep that have been driven to the water."

Gaslight and the Eyes.

An official report lately made to the Prussian Government, by medical experts on the effect of gaslight in living, states some facts of interest in that connection. According to the previous experience of ophthalmologists, the effect of gaslight upon the eyes of pupils has been observed, when it has been used properly, and especially where arrangements are present to protect the eyes from the direct rays of the light. In general, it is said, the effect of gaslight is to produce a certain amount of irritation, and this irritation is more pronounced when the light is used in a room where there is a large amount of furniture. The effect of gaslight is to produce a certain amount of irritation, and this irritation is more pronounced when the light is used in a room where there is a large amount of furniture.

A French engineer, named Duponchel, has made a report on the project of a railway across the desert of Sahara. The projected railway would run from Algiers to Timbuktu, a distance of about 1,000 miles. Mr. Duponchel stated that the principal portion of the line would rest on layers of sand, and toward the end on volcanic rocks, granite, and gneiss. No mountains or hills would have to be encountered. The average heat does not appear to exceed seventy-three to seventy-five degrees Fahrenheit, but according to his calculations the temperature would be about 100 degrees Fahrenheit. For instance, a five-day night would be a temperature of one hundred and four degrees Fahrenheit in the day time. The great difficulty to be overcome would be the want of water, which is not to be procured in that region. Mr. Duponchel estimates that for three trains daily, the amount of water required would be about 100,000 gallons. The water would be carried in tanks on the trains, and the engineering science of the day is quite sufficient to supply even a much greater quantity at the required points.

The Number of the Indians.

There seems to be a great difference in the estimates as to the number of Indians in this country. Gen. Sherman in his testimony before the commission considering the question of the transfer of Indian lands to the States, put the total number at 225,000, while Colonel Meacham sets the figures at 265,000. In the report of the Commissioner on Indian Affairs for 1879 the number is set down at 271,822. In the census report of 1870 the number is estimated at 318,712, while the census of 1880 fixed the number at 493,784. Schoolcraft, in 1820, set the number at 225,000, and in 1825 at 294,000. Various other estimates have been made, ranging from 417,036 by Morse, in his report on Indian Affairs in 1820, to 1,000,000 by the Secretary of War in 1825. An average of all the estimates at hand since 1820 makes the number 308,884, which is probably quite nearly correct. It is probable that efforts will be made to ascertain the exact number as nearly as possible the exact number.

An Improved Level.

J. B. Dancer, of Manchester, England, has invented a new level, which he calls the "Improved Level." It is a simple device, and it is said to be very accurate. It is made of brass, and it is said to be very accurate. It is made of brass, and it is said to be very accurate. It is made of brass, and it is said to be very accurate. It is made of brass, and it is said to be very accurate. It is made of brass, and it is said to be very accurate.

Chemical analysis discloses the fact that among the many articles used as food for the human body, the most important are the cereals, the fruits, and the vegetables. These articles are the most important, and they are the most important. They are the most important, and they are the most important. They are the most important, and they are the most important. They are the most important, and they are the most important. They are the most important, and they are the most important.

According to the Pharmacopoeia, a link that cannot be erased even with acids is obtained by the following receipt: To a solution of 100 parts of sulphuric acid, add 10 parts of potassium dichromate, and 10 parts of potassium permanganate. The solution is then allowed to stand for 24 hours, and then it is filtered. The residue is then washed with water, and the filtrate is then evaporated to dryness. The residue is then washed with water, and the filtrate is then evaporated to dryness. The residue is then washed with water, and the filtrate is then evaporated to dryness.

A Singular Tree.

In the island of Goa, near Bombay there is a singular vegetable—the "sorrowful tree," because it only flourishes at night. At sunset, no flowers are to be seen, and yet, half an hour later, it is quite full of them. They yield a sweet smell, but the sun no sooner begins to shine than the flowers close up, and others close up; and thus it continues flowering in the night during the whole year.

A discovery has been made in the convent of Santa Maria la Nuova, at Rome, which formerly belonged to the Franciscan monks. It consisted of a number of small, round, white objects, which were found in the walls of the convent. They were found in the walls of the convent, and they were found in the walls of the convent. They were found in the walls of the convent, and they were found in the walls of the convent. They were found in the walls of the convent, and they were found in the walls of the convent.

Seven years since, there was not a vision in the State of New York, in which the service of the Catholic Church were regularly performed. At the present writing, with the exception of some reforms, which were made in the year 1870, the service of the Mass is offered once a month in the prisons and penitentiaries under the control of the State, and the local priests are allowed access to the Catholic prisoners with certain limitations.

Only thirty or forty miles distant from the City of Mexico are two of the best wheat-producing valleys in the world, and they are the best wheat-producing valleys in the world. They are the best wheat-producing valleys in the world, and they are the best wheat-producing valleys in the world. They are the best wheat-producing valleys in the world, and they are the best wheat-producing valleys in the world. They are the best wheat-producing valleys in the world, and they are the best wheat-producing valleys in the world.

Mr. I. Fish, formerly curator of the New Gardens, England, now an old man, has devoted fifty years of his life to the study and classification of ferns, and he is now a very old man. He is now a very old man, and he is now a very old man. He is now a very old man, and he is now a very old man. He is now a very old man, and he is now a very old man. He is now a very old man, and he is now a very old man.

MORTGAGE SALE.
