

Lady Wilde (Speranza), the patriotic mother of Oscar, writes: "No Irishman returns would offend the monarch. On the contrary, he laughs at old bonds of servile feudalism, with all its superstitions of class worship, and his opinions soon gain many followers. The American flag holds the place of honor at all popular demonstrations in Ireland, and is always greeted with enthusiastic cheers, while the flag of England is nowhere seen."

The anti-polygamy bill is now law. China and Japan are talking strongly of a fight.

An enterprising Chicago clothing house has employed Sergeant Mason as a salesman.

The decrease of the public debt for March reaches the enormous sum of \$16,462,940.

The consolidation of New York and Brooklyn under one city government, is under contemplation.

Sterling P. Rounds, of Chicago, has been nominated public printer by the President. A good choice.

The Andre monument at Tappan, New York, was recently blown up with dynamite. Monuments to the greatest traitors of the land are not profitable investments.

Colfax will probably be elected to Congress whether he wills or not. The movement in favor of his nomination is assuming dimensions of a full-sized boom, already.

Cornelius H. Vanderbilt committed suicide by shooting, at Glenham hotel, on 5th Avenue, N. Y., Saturday afternoon. Epileptic fits are supposed to have led to the act.

The steamer Golden City, with Stowe's circus on board, was recently burned on the Mississippi near Memphis. A number of lives and the circus-outfit were lost.

Large quantities of dead codfish are found off the coast of Newfoundland that will seriously injure the fishing business in that quarter. The cause of their death is a mystery.

Drs. Boynton and Bliss are now in a quarrel about who shall have been in charge of the Garfield case. Boynton accuses Bliss of lying to him and to Mrs. Garfield, in order to retain charge of the case. That he and Mrs. Garfield have but recently compared notes and detected the deceit practiced upon them. Had this been commenced a little earlier it might have had some influence on the committee who granted Dr. Bliss such a handsome fee for his services.

A Pennsylvania member of Congress called upon President Arthur and proposed to have a certain postmaster in his district appointed forthwith, as his constituents were becoming of the opinion that he did not have very heavy influence with the President, and it was hurting him at home. The President very kindly told him that in the future he should be guided in his appointments by the merits of the case, and should consider recommendations of Congressmen the same as those of other public men.

President Arthur has vetoed the anti Chinese bill, giving as his reason that it is in direct conflict with the agreement of the United States in her last treaty with China, in which there was a special stipulation that the Chinese immigration should not be prohibited, although it might be suspended for a reasonable length of time. He holds that a suspension for twenty years amounts to a practical prohibition. The talk in Washington is that this veto will place the next congress under the control of the democrats by its influence on the Pacific coast. This may be, nevertheless we are of the opinion the veto was right and should be supported.

Congressman Lacey, of this State, has secured a favorable report of the committee on post offices, on a bill to change the postal exchange business. His bill provides for postal notes for sums under \$5, payable to bearer; these notes shall be good at any time under three months from date of issue. After that they will be irredeemable and void; a fee of three cents is to be charged for each note; the holder of the note, if not able to present it in person, must send it for collection and payment through a money order office, for which a fee of three cents must be paid; the charge on money orders under \$10 is reduced from 10 to 8 cents; the maximum sum for which orders may be issued is increased from \$50 to \$100. There is serious objection to the first provision, in that there is to be a short life to the notes that is liable to lead to the loss of amounts invested in them, yet an unlimited time for redemption, if the notes were to be used as currency, would lead to a dangerous inflation. To the other provisions of the bill there appears to be no serious objection.

Consistency is not a part of the makeup of the human family. It has for years been the wish that a successful attack might be made upon the James boys. Every inducement, even to the reward of \$50,000 was offered for Jesse James' body, dead or alive, and many a good officer, who had the audacity to attempt to earn his reward, has fallen a victim to Jesse's unerring aim, and since a young boy has been found who would bring him down, everybody cries for the boy's punishment as a murderer, and all because he was not an officer. What appears more proper is for the State to pay over the reward and let Ford go his way rejoicing, unless there be need of protecting him from the vengeance of the remaining brother. It is true Ford's method was not to be commended as a common practice for the capture of criminals, but the experience of the James boys has shown that to justify any means to the end, and to punish Ford as a murderer would be a poor inducement to others to lend any assistance in the capture of the remaining out-law.

An Important Find in Egypt.

A large number of inscriptions have been discovered in hitherto unopened Egyptian pyramids, which throw great light upon the little known early dynasties of the Pharaohs, and reveal to the world the names of the Pharaohs. Herr Brugsch, a younger brother of the famous Brugsch Pasha, the advocate of the theory that Israel's pursuers were drowned in the Mediterranean and not in the Red Sea, has discovered a very hardly less important. The sale of various relics of some Arabs led him to suspect that they had found some new treasures, and following up the clue he came upon the carefully hidden subterranean burying places of many distinguished representatives of the Theban Royal line. The place of sepulture was a gorge not far from ancient Thebes, and the names of about thirty kings and members of the Royal family, including those of Aahmes (the Greek Amasis), of the eighteenth dynasty, who reigned about 1700 years before Christ; of his successors Amenhotep and Thothmes, first, second and third, reigning between B. C. 1666 and 1600; of Rameses, first and second, and Sati first, who came between them—these last being represented by the greenish druse—of several other potentates. Their sarcophagi had previously been undisturbed, and even the enormous ceremonial wigs of frizzled hair which they wore had not been touched. The Royal sleepers have all been transported to the museum at Boulak.

When their coffins shall be fully examined, and moreover, when four very long papyrus shall be unrolled, very important information may be given. Each of the papyrus is not far from 100 feet in length, and from a foot to sixteen inches in width, the writing being very close. As most of the previously deciphered Egyptian documents relating to Egypt are quite fragmentary, there are great hopes that the present discovery may fill many gaps. Should this expectation not be realized, it will still be very satisfactory to look upon the faces of a dozen or more men who were the greatest sovereigns in the world before Greece had fought against Troy, and centuries before Romulus had built the first wall at Rome. Archaeological research has already unearthed many very fine spun theories of the learned, and it may be that our ideas regarding Egypt are to undergo serious modifications.—Cincinnati Gazette.

Mexican Coinage.

We are indebted to an invaluable publication upon the history of the coinage of the mints of Mexico, in the columns of El Minerio Mexicana, for the facts which we have tabulated below to show the amount of gold and silver thus coined during the five years ended 30th June, 1879.

Table with columns for Year, Gold, Silver, Total, and other financial data.

During the same period the money value of the total copper coinage was \$11,906,601, or more than three times greater than the value of the gold coined during the same period.

The desperado, Jesse James, was shot and instantly killed by a young man about twenty years of age, named Robert Ford, at St. Joseph, Mo., Monday forenoon. Ford had been following Jesse, under direction of Governor Crittenden for several months, but this was the first time he could get the "drop" on him. Ford immediately gave himself up to the authorities, and was placed in jail under a strong guard. He was after the \$50,000 reward offered by the State for Jesse's body, dead or alive.

Reading Notices.

What Shall the Harvest Be? This is What is Behind it? Dr. David Kennedy, Rondout, N. Y., proprietor of the great medicine, called "Favorite Remedy," would have little confidence to recommend the public to buy and use it, if his own were not behind it. But the fact that he has staked his reputation upon it ought to be, and is, better than a thousand cheap certificates—in the opinion of the people. If you are sick with any complaint of the blood, kidneys or liver, invest One Dollar in the opinion of the "Favorite Remedy" and it will speak for itself.

Endorsed by the Clergy. We take pleasure in recommending Dr. Warner's White Wine of Tar Syrup to the public, and especially to any public speaker that may be troubled with throat or lung difficulty. Rev. M. L. Bollen, Pastor, Presbyterian church, Reading, Mich. Rev. T. J. Idings, Albion, Mich. Rev. V. L. Lockwood, Ann Arbor, Mich.

Money for a Italian Day. "For six years my daughter was sick from kidney and other disorders. We had used up our savings on doctors, when our dominie advised us to try Parker's Ginger Tonic. Four bottles effected a cure, and for thirty days has kept our family over a year, we have been able to lay up money again for a rainy day."—A Poor Man's Wife.

The Distinguishing Charm. A delightful fragrance of fresh gathered flowers and spices is the distinguishing charm of Floreston Cologne.

Free to all Ministers of Churches. I will send one bottle of the White Wine of Tar Syrup, gratis, to any minister that will recommend it to his friends, after giving it a fair test, and it proves satisfactory for colds, throat or lung diseases. Respectfully, DR. C. D. WARNER, Reading, Mich.

Rescued From Death. William J. Coughlin, of Somerville, Mass. says: "In the fall of 1879 I was taken with a violent bleeding of the lungs, followed by a severe cough. I was so weak at one time that I could not leave my bed. In the summer of 1877 I was admitted to the City Hospital, where the doctors said I had a hole in my left lung as big as a half dollar. I was so far gone at one time a report went around that I was dead. I gave up hope, but a friend of mine, Dr. Wm. Hall's Balsam, for the lungs, I got a bottle, when to my surprise and gratification, I commenced to feel better, and to-day I feel in better spirits than I have in the past three years. I write this hoping every one afflicted with Diseased Lungs will be induced to take Dr. Wm. Hall's Balsam for the lungs, and be convinced that Consumption can be cured. Sold by druggists. 183

THE Odd Fellows' celebration at New Buffalo, on the 63d anniversary of the Order, (April 26) promises to be a fine affair and to be well attended. Arrangements have been made with the M. C. R. R. and C. & W. M. R. R. to carry passengers to and from New Buffalo, on that day, for one and one-third fare, and with the hotels of that place to furnish meals at 25 cents each at two of them and 40 cents at the other. The programme will be out in a few days.

To the Tax-payers of Buchanan Township.

The time has come for taking an assessment of 1882. That it may be just and equal, and to avoid any appearance of being officious, I earnestly request that when called upon for this purpose, you will state frankly the amount of property in your possession subject to taxation. That in particular, which is not in sight. I assure you that I will use my utmost ability to make an impartial assessment.

ALFRED RICHARDS, Supervisor

H. H. KINYON and O. E. Woods had their wives returned from Florida Saturday evening, having had a pleasant trip and enjoyed themselves, while the readers of the RECORD have enjoyed the fine letters by Mr. Kinyon, descriptive of the sights he saw.

ATTORNEY GENERAL VAN RIPER recently received notice from Secretary of State, Frelingheysen, that the British minister complained that only Her Majesty's subjects were illegally confined at Detroit. Mr. Van Ripper found the fellow being tried, and is was convicted and on his way to the penitentiary before word could be returned to Washington. He was convicted of attempting to murder another Britisher, with a view to getting possession of his widow when he was safe in the bottom of Detroit river.

WONDER why it is that the Mirror is so enthusiastic over the election of the first Democratic Supervisor in Berrien township in twenty years, while it not even so much as calls the attention of its readers to the fact that Bertrand elected the first Republican Supervisor in nearly twice that many years. We don't blame him at all for feeling good over the Berrien victory, but cannot comprehend the benefit to be derived from lying about it. Berrien re-elects the supervisor of last year.

MICHIGAN people who have the Dakota fever to a dangerous extent should not fail to learn about the species of storm common to that country known as a "blizzard." For our part, we do not care to emigrate to a country, where, as late in the season as March 25, we should be subject to storms in which people are frozen to death as sure as they ventured out. There are a few in Buchanan who, we learn, are contemplating a move to that country, and it is the advice of the RECORD that they fully investigate this phase of Dakota climate before permanently settling there.

At the election on Monday it was voted to raise the following amounts for the several township funds:

Township fund.....\$ 500
Highway ".....2,500
Poor ".....500
Library ".....200

Total township tax.....\$4,000.
These funds last year were: Township \$400; Highway \$2,000; Poor \$700; Library \$500. There was considerable contest over the funds for library and highway purposes, an attempt, being made to keep each at a low amount, the former at \$50 or less, and the latter at \$1,000. These are the funds most apt to be neglected, but thanks to the voters who seldom attend that part of the election, they are both well provided for this year.

TESTIMONY was taken in this place Tuesday in the case now pending between L. A. Williams, of Syracuse, N. Y., and W. H. Talbot of this place, concerning an invention that Mr. Talbot prepared and is trying to have patented, but which Williams is trying to get possession of and patent in his own name. The device is an end gate to one of the wheel scrapers, such as were used in grading on the St. Joseph Valley railroad, to hold the dirt in the scraper after it is filled, and is automatic in its action. When Williams was here he tried to make such an attachment, but failed, and afterwards Mr. Talbot succeeded; and now Williams claims to be the inventor and demands a patent in his name. To those who are acquainted with the case it appears that his invention consists in simply suggesting that something of the kind would be an excellent thing, but concluded, after considerable trying, that it could not be done.

VAULT TAX.
The vault tax vote is reported from all the townships but Sodus and Pipestone, and these show a majority of 470 in favor of the tax, and we are informed that the vote in Pipestone was in favor of the tax, so it is fair to conclude that the vault will be built. The figures reported are as follows:

The following appeared in the Evening Telegram of March 14, of Portland, Oregon, concerning an old resident of Buchanan:

"About 11 o'clock Saturday morning, while J. L. Smith was painting a house at the corner of Sixth and Caruthers streets, the scaffold upon which he was standing fell to the ground, a distance of twenty-five feet. Mr. Smith struck on his head and back and was picked up senseless. It was at first supposed that he was killed, but such was found not to be the case. He was taken to his home on Third street, near Jefferson, and Dr. Blaney was called. He discovered that Mr. Smith was badly bruised about the back and shoulders but could not detect any broken bones. The shock loosened several teeth in Mr. Smith's jaw. He was seen at his residence this morning by a Telegram reporter, where he was found to be suffering great agony. He has not quite recovered from the shock, yet, but his physician thinks his injuries are not of a dangerous character. Mr. Smith is a painter, 55 years old, and is well known as a prominent member of the A. O. U. W."

ATTEMPTED SUICIDE.
Jacob Hanser, a Swede, with left arm gone, was found about three miles west of here on railroad ground, on Monday afternoon, with about 12 feet of his bowels out on the dirt, sticks, gravel, &c. He had been lying in this position for the hot sun about four hours. A physician was sent for and Dr. Simpson went out at once and found him as above described. He administered chloroform, carefully washed his bowels, cut the sticks, dirt, &c. possible, and placed them back and sewed up the orifice. He was then brought to this city and a bed provided in the engine house. Our reporter called about 9 p. m. and elicited through Dr. Greenmeyer and the German minister, who acted as interpreter, the following: His name is Jacob Hanser; he came to this country about three years since, from Switzerland, where he left a wife and two children. His object was here to get money, yet his wife and children over. The following was found in his pocket:

"To the generous public: This is to certify that Jacob Hanser has lost his arm in Albert Barts' saw mill at Port Huron, Mich., and has no way of support here and would like to raise means enough to take him back to Switzerland, in Germany, where he has friends, a wife and two children. Any charity given him will be well prized by said Hanser."

HE has been in the county poor house of this county some time and started out on Sunday in search of work. He feels no better, and is now employed as an armed man. He got disheartened, lost his reason, and in a moment of desperation, took his razor, which he carried with him, and ripped himself open from the breast bone to the navel. It is not believed that he will recover, yet on Tuesday forenoon he was quite comfortable, with only a slight fever, and appears quite well. He says he is 30 years old. Everything will be done to make him comfortable which can be effected consist of a wallet, and 5 cents, a pocket knife, razor, and a few papers.—Niles Mirror.

THE STARS IN THE NATIONAL FLAG.

How They Are, or Should Be, Arranged: The Revolutionary Flag. Col. G. M. C. McCall, commander of the marine corps, requires that regulations of the War Department...

The national flag adopted by Congress in 1777, with thirteen stars and thirteen stripes, representing the thirteen States.

The first of these has its star in a circle; the second they are arranged in a parallelogram with one star in the center, thus:

and in the third in three horizontal lines of five each (this latter flag has fifteen stripes). Neither the set of June 14, 1777, creating the flag (stars and stripes), that of Jan. 13, 1792, changing the stars to fifteen stars and thirteen stripes, nor the set of April 14, 1818, defines the manner of arranging the stars in the blue field.

The weight of all these authorities is on the side of parallel lines, and this, coupled with the fact that the flag has been the accepted custom to make the unions for many years past, may be regarded as establishing this form of arranging these stars as firmly as it can be established in the law itself.

It was in the usual quantity, but has accumulated in the bladder, and he had heard of "Kennedy's Favorite Remedy" and he had tried it in his case, and it had done him good.
