"The plate glass in Redden Bros' new building cost about \$100 each. Before that kind of glass was manufactured in this country they would have cost from \$500 to \$700 each. Then none but the most wealthy could use plate glass, now but few build without it. The difference may be credited to the protective tariff.

THE first meeting of the new school board was held Friday afternoon. Robert H. Rogers was elected Director, Leroy H. Dodd Moderator, and Wm. Pears Assessor. The amount of tax for school purposes was decided upon. As there was not a sufficient amount raised last year to bear the expense of the school the deficiency must be made up this year, which will materially increase the amount of tax. The items voted at the annual school meeting are: For bonds and interest, \$3,250; for building repairs, \$300; to pay Director's salary, \$200; to pay \$100 for the board, \$100; for janitors, \$450; fuel, \$400; incidental expenses, \$150; total \$5,700 or about \$1,000 more than was raised last year, which is made up of the deficiency in teachers' fund and director's salary.

EDITOR RECORD.—I would like to correct a statement in the last Record in regard to "one prominent Greenbacker's platform." Your statement of what my platform is, is correct, and also that in order to get it I shall vote for Tappan for congress, is true. But your mistake is, that I consider this platform the most important question of the campaign. I consider the tariff plank in any platform a great deal less important than the financial plank. It is not the 20 cents a bushel protection on wheat that makes it sell for 70 cents a bushel; neither is it the fear that the Democrats will repeal the 20 cent protection. But the trouble is scarce and dear money. J. M. ROR, G. B.

The Doctor has one more plank in his platform that he considers quite important. It might be stated on the plan of the advice of the father to his son when the young man was starting out for himself. "Beat the republican party. Beat it fairly if possible, but beat it." It is this plank that causes the Doctor to endorse the various combinations in state, county and congressional canvass.

EDITOR RECORD.—Is there no law for regulating the adoption of textbooks here? Under what authority are they changed? In other places an arrangement is made with the publishers whereby their publications are introduced by exchange, and adopted for a term of years, and no change can be made till this term has expired. Here books are changed once or twice a year, and when no promotion is made.

After the holidays last winter new arithmetics were put in at least one room, with the distinct promise that no other would be required while the pupils are in school. Now, a change is to be made, and that not back into the lower book which they formerly used, but to one of a different series. If the pupils were not prepared for the advanced book why was the change allowed last year? And why, when they have a good book, should change be made to one no better, to say the least? If Robinson's Series is not good enough, why is a change made in one room only? Has the school board no responsibility in this matter, or are they determined that the cost of education shall be greater in Buchanan than in neighboring towns, while the teachers are less well paid?

For the information of "A," we will say there is a State law requiring books once adopted to remain in the school not less than five years. The book the correspondent undoubtedly refers to is White's New Elementary Arithmetic, which was introduced last year, not to take the place of either of Robinson's, but to fill the gap between Robinson's Primary and Robinson's Complete. Small scholars coming from the Primary school into the Intermediate used to be compelled to take Robinson's Complete Arithmetic, which is altogether too complicated for them to master. The new Elementary makes an easy stepping stone from the Primary to the Complete, which they will take up when they advance into the next grade.

The band will dispense martial music to the listening ear on all appropriate occasions. They are free for all, and their name is "Seek no Farther."

If Mr. A. T. Hall will carefully read the copy of school laws furnished him for that purpose, he will learn the reason why his district did not obtain a share of the library money. It was simply because the Town Clerk did his duty as prescribed by law.

SAWDUST.

The Evening News of Saturday contained the following biographical sketch of one of our prominent citizens. The biographer has omitted to mention what is to Mr. Fox the most prominent event of his life. He now holds a Notary's commission issued by the great and good Governor Bagole.

Teacher P. Fox, familiarly known as "Perry," was born in Henry county, Ind., in 1828. Was duly graduated at the South Bend academy, learned the shoemaker's trade, and settled at Buchanan in 1848. Fixed people's soles 15 years—became partner in a hardware business and made money—went into the lumber trade and made more money. Owned and conducted a boot, shoe and clothing business—owned five or six farms. Was prime mover in working up the St. Joseph Valley railroad scheme—became superintendent of the company and constructed the road—dropped it again at the proper time and concentrated his capital in a large flouring mill, which he is now conducting. Mr. Fox has been interested in all public institutions of the village—has been a member of the school board several terms—constable—township treasurer—superintendent of the Adams church, and takes a lively interest in temperance work. Has built and owned several brick buildings in Buchanan, including his fine residence. In politics was first an old-time Whig, then a Republican, and is now a Greenbacker and a "Butler man, and don't you forget it."

When "Perry" was the Greenback supervisor the First National bank of Buchanan went out of business there, it was alleged because he assessed it so unmercifully. He has materially aided whatever party he belonged to, by speech, money and songs. Sung in Lincoln's first campaign, from the wigwag in Chicago, when the Democrats were in power. Composes his own songs, and rivals the best "endmen" in provoking laughter in his rendition of them. In stature he is below the medium height, and a light weight at that, but is chock full of shrewdness, wit and hard work. He has never been to the legislature, but thinks he is going there yet.

[St. Joseph Republican.]

The Benton Harbor canning factory gives employment to 300 hands. ... Between Berrien Springs and this place the St. Joseph river has a fall of 18 feet. ... The steamer City of St. Joseph brought over from Chicago Wednesday morning 3,100 sacks of flour, weighing 140 pounds per sack. The flour is shipped from Minneapolis, Minn., to Chicago, where it is transferred and brought across the lake, and from Benton Harbor sent direct to Berrien and other towns there it is taken direct to Glasgow, Scotland. It is reported that a large amount of flour will be shipped over this route this fall, which will make business lively for the G. & M. steamers.
