Prattifying Number One.

An Arab widow who has a chance to marry again visits her first husband's grave the night before the second marriage takes place.

DON'T LET MOTHER DO IT.

Daughter, don't let mother do it! Do not let her slave and toil, waiting for you to be married.

Fearing your soft hands would daily she is wont to bear, bring the lines upon her forehead—Spare your sister in her lot!

Daughter, don't let mother do it! Do not let her bake and broil; Through the long, bright summer hours Share with her the heavy toil.

See, her new hat she has bought; And from her neck she glows; And the spot that once was browned Now is feeble, weak and old!

Daughter, don't let mother do it! She has cared for you so long To fight the weeds and briars;—Should be tilling for the strong! Walk on your listless legs and brood; Seek her side to cheer and bless; When the soles above her press.

Daughter, don't let mother do it! You will never know What was home without a mother—But let mother do it for you! Low beneath the budding daisies, Free from earthly care or pain, To the home so sad without her, Never to return again.

"I could not part from my little ones," she said, wistfully.

"You had conquered him—CONQUERED HIM FOR EVER."

"You are ordered about now," she said.

"Oh, that's different!" insisted the saleswoman.

"You are utterly absurd," was the impatient reply.

"I should be more than glad," she said.

Scratched Him Back Into the Street.

Judge Gary is very fond of a good joke, and in no department of his office does he find a more ample field for enjoying one than in the examination of depositions.

On one occasion, it is said, a juror asked to be excused from jury duty, which he did not wish to state publicly.

"State your grounds in open court," said the judge.

"Well, your honor, it is a very serious matter, but I'll have to ask you to allow me to state my reasons in private," urged the applicant.

The judge, of course, declined, and so the juror had to make a clean breast of it.

"Well, then, your honor, I've got the itch," he said.

Judge Gary paused a moment and then, leaning over to Clerk Doyle, exclaimed: "Well, I guess you had better scratch him off."—Chicago News.

Now the Corset Will Go.

I am told by an eavesdropper that a prominent actor recently in St. Paul was asked to give a lecture on the subject of the corset.

That settled it, and the embrace was an artistic success.—St. Paul Pioneer Press.

As considerable was said during the last part of the campaign regarding a certain Donahoe woman claim, in which the Democrats virtually accused Hon. J. C. Burrows of stealing the bounty money of a soldiers' widow.

In regard to Widow Donahoe's matter, I have this to say: She came to our office and made claims, and they were collected and paid over, and she received for them, and the files in Washington show this to be the case.

As so many years have elapsed, I cannot remember all the minutiae of the case, but I know I had to do with the making of both claims, and I settled every dollar with her before we went to the ministry.

THIS SCENE, ON LAKE ERIE, ENTITLED "THE PERIL and THE RESCUE"

We have chosen as our Trade-Mark because it so aptly illustrates a woman sinking under disease and weakness, who, when all else has failed, is finally rescued by Zoa-Phora, a sure remedy for all complaints peculiar to the sex.

year by year, month by month, she is succumbing to disorders that, unchecked, will finally overpower her. She is convinced that Zoa-Phora is the truest means of rescue, yet she either does nothing, or else clings to treatment that never has helped her and never will.

Would a drowning person cling to drift wood and disregard the staunch boat?

Many a woman realizes that

CHARLES HORTON did a sewing machine and notion business in Berrien Springs last year, and by his oily tongue, managed to induce an old farmer to place his means in the business, when Horton tried to appropriate it to his own use. O. E. ALESHIRE. See here! You two gentlemen who are quarreling over the Tallman want to let up. If you have anything to settle we will donate the use of our back alley and hold your hats and neck-ties while you fight it out. While you may both be telling the truth when you call each other liars, you are not using language becoming good Christian gentlemen, and members in good standing in the Methodist church; besides if you were quarreling about something that ever amounted to anything it would be different. So stop your quarreling, or the next time we conduct quarterly meeting we will church both of you.

Those who are acquainted with the writer of the above, will smile at his second recommendation.—Ed.

How It Works. A few weeks since we took the liberty to repeat the remark of our worthy Village President, Mr. J. E. Barnes, that the Prohibition law in Kansas not only did not prohibit the sale of liquor nor in any way decrease it, but that on the other hand it made liars and perjurers of the people who want it. Of course this was in the eyes of some of the leading Prohibitionists. A tremendous statement to make, but judging from that and the following, which appeared in the Chicago Tribune Monday, it is natural to infer that a Prohibition law to be in any manner effective must be built and operated on a different plan than in Kansas:

Kansas City Times (Dem.), Nev. 11.—Col. Thomas Moonlight, of Leavenworth, who, as the Democratic nominee for Governor, made such a gallant fight in the over-looked and neglected Republican state of Kansas, was in the city yesterday. Col. Moonlight spoke laughingly of the scare he had caused the Republicans. Speaking of the "There were two causes which made a Democratic victory impossible. In the first place, it was the first general election after the National Government had been wrested from the Republicans, and they took Martin under protest because they felt they had to stand by their party. They felt that a Democratic victory would be a blow to their party, and they felt that the party could ill afford, and which would place state affairs in bad shape for the next Presidential election. It was this feeling that the election was a test of loyalty to the party, and that the state in the way of a Democratic victory.

The second cause, which was scarcely less potent, was the drug store monopoly. To understand this let me explain how prohibition in Kansas does not prohibit. Under the law passed two years ago drug stores are permitted to sell liquor to any person wanting it upon the mere signing of a blank check. This way is for them to use for medicinal, scientific, or mechanical purposes. Of course most of them want it for medicinal purposes. All that is necessary for drug stores to sell liquor is this way is for them to get a permit from the Probate Judge, and as the Probate Judge gets a nickel for every sale, as shown by the statements, he is naturally not loath to issue permits. Now there are 200 legally recognized drug stores in Kansas. What I mean by legally recognized drug stores is drug stores which sell liquor openly under Government licenses and permits from the Probate Judge. It is a small thing for each druggist to pay \$100 to help keep the party in power which is protecting him, and this makes a campaign fund of 150,000 dollars. Any one who has this has. Besides, 400 of these druggists are Democrats, who are as much interested as Republicans in keeping the Republican party in power, and each of them can influence a very large number of Democratic voters. This is what I mean when I say that the drug store monopoly was a powerful factor in the election. It furnished a mammoth campaign fund for the Republicans, and none of the contributors felt it much.

"This drug store monopoly," continued Col. Moonlight, "is a curse, pure and simple. It does not prohibit; it leads to hypocrisy and lies. Any one who gets all the liquor he wants, and the state derives no revenue. Rich men can send to Kansas City to get their liquor, but poor men have to pay two dollars for it. Let us have no more saloons are running openly, without the city, state or county deriving a cent of revenue from them. I visited three-quarters of the counties in the state and found only two druggists who had refused to take out permits from the Probate Judge. The reason is plain. It is impossible to run a legitimate drug store in Kansas. A good old Deacon goes in to a drug store and asks for a box of pills. He gets them, and then leans over the counter and whispers: 'And I'd like to have a pint of whiskey with them.' 'I am sorry, but I can't give it to you. I don't do that kind of business here.' 'Well, then,' he replies, 'take your pills. I will go to some drug store that does,' and off he goes. A druggist cannot be honest if he wants to do business. 'Well, then,' he replies, 'take your pills. I will go to some drug store that does,' and off he goes. A druggist cannot be honest if he wants to do business.

THE buffalo paths and wallows can be seen in every direction, and it appears as if it had been only a short time since this section had been inhabited by them. This is a beautiful country, with a level surface and fertile soil. The water is good; the air pure and dry; the weather about as warm as in Michigan. In the latter part of March or fore part of April, the sun shines most of the time. The people are mostly from the Eastern states and are well educated and refined. Many of them are broken down bankers, merchants, preachers and teachers, who have come West to regain their fortunes and health. Buying and selling land appears to be the main and principal business here. All the desirable claims have been already taken up here, and sell to second party prices of \$100 to \$1200 each. These great prairies, when I look out upon them and cannot see a tree nor shrub, seem much like being out on the ocean sailing when we cannot see the land in any direction.

And in my estimation, the great drawback to this country is the lack of timber and rain, and the wind which constantly blows here, which are not always pleasant zephyrs either. If there were more timber and less wind, this would be a much more desirable part of the country in which to live. But notwithstanding these things, it will only be a short time before nearly every quarter section here will have a family living upon it. It is said that "Uncle Sam has land enough to give us all a farm," and it may be true at present, but at the rate our public lands are being taken up by capitalists, foreigners and others, it will not be the case long.

Mr. McCUMBER says our reporter was wrongly informed about his neighbor and a corn. The same reporter mentioned a cider barrel that was drained of its contents, one night recently. Perhaps that, too, was a mistake, and we will not mention it. We have always supposed that to be a first-class neighborhood.

'Well, then,' he replies, 'take your pills. I will go to some drug store that does,' and off he goes. A druggist cannot be honest if he wants to do business.

THE buffalo paths and wallows can be seen in every direction, and it appears as if it had been only a short time since this section had been inhabited by them. This is a beautiful country, with a level surface and fertile soil. The water is good; the air pure and dry; the weather about as warm as in Michigan. In the latter part of March or fore part of April, the sun shines most of the time. The people are mostly from the Eastern states and are well educated and refined. Many of them are broken down bankers, merchants, preachers and teachers, who have come West to regain their fortunes and health. Buying and selling land appears to be the main and principal business here. All the desirable claims have been already taken up here, and sell to second party prices of \$100 to \$1200 each. These great prairies, when I look out upon them and cannot see a tree nor shrub, seem much like being out on the ocean sailing when we cannot see the land in any direction.

And in my estimation, the great drawback to this country is the lack of timber and rain, and the wind which constantly blows here, which are not always pleasant zephyrs either. If there were more timber and less wind, this would be a much more desirable part of the country in which to live. But notwithstanding these things, it will only be a short time before nearly every quarter section here will have a family living upon it. It is said that "Uncle Sam has land enough to give us all a farm," and it may be true at present, but at the rate our public lands are being taken up by capitalists, foreigners and others, it will not be the case long.

During the past two or three years several farmers in this vicinity have experimented in peppermint raising and the result has proved so satisfactory that under the leadership of Mr. Hoeltzel, of Burlington, a number of farmers will go into the business. Mr. Hoeltzel was engaged for many years in peppermint raising in New York State, and consequently understands all the in's and out's of the pursuit. If a sufficient number go into it Mr. Hoeltzel will build a still for extracting the oil. He expects to go to Berrien county in a week or two to make arrangements for procuring plants to set out in the spring, and all who wish to engage in the business should call at once. He is willing to answer all questions as to the manner of raising the plants and the care required.—Tribune News.

Frank Leslie's Sunday Magazine. The December number of this favorite family magazine closes the Twentieth Volume. The opening article is "A Moravian Village," by Lieut. H. H. Lemly U. S. A. who was fully instructed in the village of Salem, N. C. Mr. Powell's fifth number of "Leaves from My Life" deals with Lord Bacon's field, "Barry Cornwall" and Alfred Dobson's story by Mrs. Angeline E. Alexander; and "Some Famous Paintings by Raphael" shows three of the great master's works in outline. "The Gems of the West" is continued. There is plenty of miscellany in the shape of short articles and sketches, and several very beautiful full-page reproductions of paintings by well-known artists.

PETERSON'S MAGAZINE for December, that old favorite, is before us ahead of all others. It may be called a "prize number." It has two splendid steel engravings: one, "Meadow-sweet," as lovely as we ever saw, and a title-page with a beautiful scene, also unvarnished. There is also a mammoth colored fashion-plate, likewise engraved on steel, and colored by hand—a "perfect work of art," as the ladies would say. And, besides, there are some fifty wood-cuts of fashion, embroidery and crochet patterns, etc. The literary contents more than maintain the long-established reputation of "Peterson" as giving the best original stories. The price is but two dollars a year. To clubs, it is cheaper yet: four copies for six dollars and forty cents, with an extra copy to the blanketing up the club. For larger clubs, costly premiums are given in addition. Specimens sent gratis, if written for, so that there may be no deception. Now is the time to get up clubs. Address CHARLES J. PETERSON, 516 Chestnut St., Philadelphia, Pa. Subscriptions received at this office.

SOME NEW HOUSES.

GETTING RID OF THE FLAT FRONT AND SHARP CORNER.

The Colonial, Utilitarian and Crazy Pedicors of American House Building.

Out of the chaos of ugliness and uncertainty as to what they really wanted the American people are at length evolving some beautiful homes.

After that came the utilitarian period in our architecture. A house was a place to eat and sleep in and to be protected from the weather in.

After that came the crazy period in our architecture. A house was a place to do that people had no time to think of anything else.

The picture of the Boston mansion shows what American houses have grown to in recent times.

Part of a double row of houses is shown in the illustration. The whole building is constructed in a way worth noting here.

Two well-to-do citizens wish to make homes on adjacent lots. The houses are built in a "block" of houses so alike that one may easily mistake his neighbor's door for his own.

They try their heads together, and consult skilled architects. They plan and build a sort of co-operative structure.

On the outside it looks like a castle—large, stately, and imposing as a castle. Inside it is separated into two complete homes, more thoroughly separate even than the ugly old "block" houses.

Dark rooms all through the center, will some day quite disappear from American cities. In New York architects are making a surprising flight in recent years.

That quarter of the city which is now growing most rapidly is the West side, so called. In the second illustration are shown the attempts of the Yankee intellect to adorn and disguise the flat front of honored times.

The attempt is not half a bad stagger either. The plan of the building in the first picture is the best, however, for connected houses.

The house is extremely pleasing to the eye, as the same time it is a double front decoration of the old dark room blocks that these themselves did.

These houses can thus be very well constructed to meet more than that, would there perhaps be a difficulty, though not an insurmountable one.

For semi-detached homes, where a little strip of side yard will do, the plan of the double front and three houses together will be both picturesque and convenient for people who are not rich enough to build a house all to themselves.

Such clusters add to the pleasing effect of the half country landscape, relieving the dull flatness. For houses in cities for presence of small or moderate means, hardly a doubt the newest fashion of apartment houses, sometimes called "French flats," is best.

Some of these New York city models are grand and are occupied by a hundred families. They are a village in one house. To a few best of them there is only one central front entrance, through this all pass.

The halls run parallel with the street, which is much the better way for so large a building. There need thus be no dark rooms.

museum they learned of the success of the Japanese village which was traveling through the country exhibiting the customs of the people.

Some Mexican articles were written with the one used in Japan. Their pottery, their wood and ivory carvers learned the art away back in the days of the Aztecs and Mayas.

Japs. Beside this, in appearance many of the Mexicans would pass for natives of the "Land of the Rising Sun."

The average Mexican is a mixture of about 75 per cent. Aztec. When the Spaniards conquered the country they gave them their language, and, strange to say, they have retained it.

whom distinguished himself as a jockey. He always rode the best horses and was obliged to ride other than a good horse. Of late years he had his choice, which accounts largely for his success.

Mr. Lorrain presented him with \$1,000 on the occasion of his winning the Digby on Inroquois in 1881. Archer was 5 feet 8 inches tall and weighed 115 pounds; his legs were remarkably supple and wiry; he could wind them around a horse's body when it was impossible to unseat him.

But then he possessed remarkable nerve and a quick judgment, which with his calliper legs would have been of no avail.

But the shanty printing office was burned down last week, and the Atlanta Constitution when he wrote the first Uncle Remus sketch. It struck the note of success.

It is pleasant to know, too, that he did not invent the plantation stories and sketches, but that they are genuinely what they are.

Mr. Harris has gathered up the negro folk lore of the South and preserved it in permanent form. Only for him many choice words and quaint phrases of literature would have been lost.

The best known of the sketches is the strange and striking legend of "Bear Rex and the Tar Baby and Ever Rabbit." Mr. Harris is 40 years old, a delightful friend and a hard worker in literature and journalism.
