ONLY A NEWSBOY.

The dust of evening had settled down.

They took him there doctor and nurse.

With voice low and soft as he did stir.

Softly broke upon his water ears.

From Waverley Magazine.

RUTH'S TEMPTATION.

Any woman's letters are entitled to no

honest man's consideration.

He said, "I will tell you the whole story."

They were soon in a boat, and

Leigh's vigorous strokes sent them

skimming over the surface of the

water like a cork.

He drew the boat into a little cove

on the shore of the lake.

With the sunset, the most innocent

face in the world, Charlie, did stake

his life on her truthfulness and in-

nocence; and yet, Charlie, there is

something in that woman's letter-

son's words that makes me shudder.

It is a woman's letter, and I know

of its power to do mischief.

It is a woman's letter, and I know

of its power to do mischief.

It is a woman's letter, and I know

"I wouldn't do it for anybody but

you, Leigh," Charlie was saying,

as they parted at the door of Leigh's

room.

"I have your consent, then," said

Leigh, eagerly.

The next afternoon Mr. Jarvis again

crossed the lake.

"This time he sought the

Harden mansion.

The ladies were in the

cool north parlor.

They were sitting on the

lawn, and the sun was

shining brightly.

They were sitting on the

lawn, and the sun was

shining brightly.

They were sitting on the

lawn, and the sun was

shining brightly.

They were sitting on the

lawn, and the sun was

shining brightly.

They were sitting on the

lawn, and the sun was

longer to see a rare word than a

common word, or a word in a foreign

language than in our native tongue.

It even takes longer to see some letters

than others.

"Will time," or time taken

up in choosing, can be measured.

It takes 1-13 second to judge between

blue and red.

To recall the name of a

marked picture 1-4 second takes

less time to remember the name of a

familiar word than of a letter, though

it takes less time to see the letter.

The time of remembering can be meas-

ured in fractions of seconds to trans-

late a word from one language to an-

other when you are familiar with both.

It takes 1-20 second longer to trans-

late a word from a foreign language to

your native tongue than it does to do

the other direction.

We can think of the name of the

name of the month in half of the

time we can think of the last month.

It has been demonstrated that sen-

sation does not travel through the nerves

the brain so fast as it is generally

supposed. Its speed is not much greater

than sixty miles an hour.

Light and Heat.

The Horses that Draw the Water Ho-

Drinks.

The sagacity exhibited by some of

the horses employed by the fire depart-

ment in this city is very remarkable.

Their exploits have been recently

described in our daily newspapers.

But for the first time we read in one

of our evening contemporaries of a

horse in the service of our ambulance

corps, which is not far from being

any engine horse we have read of

point of intelligence.

The horse pulled in search of patients

for the New York Hospital, and dur-

ing the whole period of his plan-

ting, he was not far from being

any engine horse we have read of

point of intelligence.

Full Weight Pure Baking Powder. Most Perfect Made. Price's Cream Baking Powder.

Ho Also Bit. "The second day after my arrival..."

"So There!". It is sometimes hard to tell whether...

Leap-Year Dangers. "Charlie, didn't you leave Miss Smith..."

Fuellerion. The New York Sun says that Sheridan...

An unfortunate Maine baby that happened to be born on the day...

Seven engagements were made at a leap year party at Woodland, Cal.

At Newcastle, Cal., there is a famous fig tree.

Can men fly?—Boston Globe. A Boston girl approached one of them...

The United States has \$240,000,000 invested in Mexico in mines, railroads...

There is only one pin a day made for such inhabitants of the United States...

The most trying position a faithful clergyman can be in is to be preaching the funeral service of a man who died rich and mean.

The sod houses of farmers in Dakota were found to be much warmer during the recent cold spell than houses made of wood or brick.

A San Francisco girl slept twelve days, during which time she partook of no nourishment, but she was ready for her breakfast when she awoke.

James M. Bunker, a son of the Siamese twins, Ben and Chung, is an inmate of the Kansas penitentiary for perjury in seeking a divorce from his wife.

Miss Van Wart, granddaughter of the late Marshall O. Roberts, is believed to be the richest woman in America.

Governor Hill, of New York, is something of an athlete, and practices with Indian clubs and gloves every day.

A young lady and gentleman were married on the top of the Blue Mountains in Pennsylvania the other day.

They had a marriage license from the county of Schuylkill County and were in Bucks county.

The nearest point where the two mountains meet is on the top of the mountains between the two counties.

New York City educates about three hundred thousand children annually, in one hundred and thirty-four school buildings.

Covering an area of thirty-five acres, these buildings employ two hundred and forty thousand teachers.

The annual expense of these schools is about four million dollars.

Senator Palmer, of Michigan, not long ago sent a special envoy to Asia to purchase Arabian horses.

He is in receipt of a letter from his emissary dated at Jerusalem which says that the Sultan has issued a firm prohibiting further exportations of Arabian horses.

Senator Palmer has laid his case before Congressman S. C. Cox, who will try to get the Michigan statesman out of his dilemma.

The dispute between the two architects became warm.

"Do you suppose I don't know whether I've got the measles or not?"

"No, I don't think I can't tell measles when I see 'em? You hadn't got measles no more'n my hat has."

"Get you a two dollar bill." "Done."

The matter was referred to a physician.

"You will have to wash yourself, sir, before I can decide," said the man of pills.

"I wash myself to win \$2? See you in thunder first! Give him the money!"

The committee has decided to hold the Democratic National Convention in St. Louis, and the date fixed on Tuesday, June 5.

Hatzke, a Chicago brute who whipped his little step-son to death has been sentenced to hang for his brutality. A just punishment.

Phil Sheridan has quitted the quarrel about where he was born, by declining to be considered a candidate for the presidency. He prefers being General to being President.

President Cleveland and party have just returned from a junketing tour to Florida, where he went for a few days just to remind those Southerners that he is still in mortal form. Their enthusiasm was unbounded.

The condition of the German crown prince is steadily becoming more critical, and there is likely to be an almost even race as to which shall live the longest, he or his father, who is over ninety years old.

It is a conundrum to many American citizens just how Gov. Swineford, who was appointed by Cleveland to govern Alaska, gets so much time to look after campaign work in nearly every part of the country excepting Alaska.

The new fish treaty concluded at Washington is being about equally criticised by the Massachusetts fishermen and by the Canucks. This would seem to indicate that it has some merit. It is not every treaty committee that succeeds in making both parties to the treaty mad at once.

John J. Enright, superintendent of the money order building, gave John B. Lynch notice of his dismissal as watchman in the building, Thursday. Lynch simply went home, brought forth his credentials, showing that he had served with honor as private, wounded at Antietam, and being disabled was made an orderly to Secretary Stanton, and was intrusted with important papers to General Grant, when he had not been heard from for several days in the wilderness, and brought back the famous message containing the words, "I will fight it out on this line if it takes all summer." When Mr. Enright read these credentials he concluded that dismissal would not be a very nice thing to place before the veterans when asking for their votes next fall, and within an hour Lynch was back in his old place.

With a view to evading the county prohibitory law, adopted in a number of counties in this state, clubs are being formed and paying the government tax for the sale of liquor, with evident intention of drawing attention to the local authorities. It is in this that the danger rests in the prohibitory law. Unless these club rooms be promptly and unceremoniously pulled the state will be far worse off with prohibition than without it. A case of this character has just come up at Mt. Gilead, Ohio, where a liquor dealer incorporated a club, and filed articles of incorporation with the Secretary of State for a club for social and literary improvement. He was arrested and set up this improvement plan, but the judge could not see that social and literary improvement depended in any way upon the sale of liquor and the club man was found guilty. There is no use being delicate about such things. If a municipality is to derive any benefit from its newly acquired law it must be by enforcing it.

What! new states let into the Union before the November election? Well, we reckon not.—New York Sun, Dem.

Georgia has a population of 1,542,180, and has 151 newspapers. Massachusetts has a population of 1,582,085, and has 581 newspapers. Kansas has a population of 996,000, and has 695 newspapers. Louisiana has a population of 699,044, and has 140 newspapers. California has a population of 864,004, and has 414 newspapers. While Illinois has more newspapers than are published in Virginia, the Carolinas, Georgia, Florida, Tennessee, Mississippi, Alabama, Louisiana, and Arkansas.—Inter-Ocean.

When the South is ready to welcome Northern men, and extend to them all the rights which they are accorded unquestioned in the North; when it removes the shot-gun from its politics, and guarantees to every man a free ballot and a fair count, its hills will be made to give up their hidden wealth; its pine barren to blossom like a rose, and to enter on a era of prosperity such as it has never yet known. Until this is done, it is not to do this it does not deserve to prosper, and will not.—Omaha Republican.

FACTS FOR WAGE-EARNERS. Weekly Wages in Nearly a Hundred Industries in England and the United States.

New York figures reliable. The following wage figures are reliable. The statements in regard to the wages paid in England are compiled from the latest returns made by the Board of Trade in London and other official documents for 1887. They give in every detail the wages of British wages according to free-trade authorities. The figures for the American side of the table come from fifty different sources, and have been arranged under the supervision of Alfred R. Whitney, who they have been obtained by correspondence and through the city staff of the Press. They are as nearly accurate as possible. If any of our readers are able to furnish or correct it for future publication the Press will be grateful if they will at once communicate to Mr. A. R. Whitney, No. 17 Broadway, or to the editor of the Press.

American wage-earners, look in the right-hand column and look in the left-hand column, and decide which wages you would rather have. Remember also that official figures show that the cost of living is about 10 per cent higher here than in England.

But what does it profit a man if he does gain 17 cents per day by reduced cost of living and the same time loses \$1 per day in wages?

Table with 3 columns: Industry, England, and United States. Lists various professions and their corresponding wages in both countries.

Table with 3 columns: Industry, England, and United States. Lists various professions and their corresponding wages in both countries.

Table with 3 columns: Industry, England, and United States. Lists various professions and their corresponding wages in both countries.

Below is a table showing the average weekly rate of wages paid in woolen factories in the United States (Massachusetts, Connecticut, Rhode Island, and Vermont) and in Great Britain (Lancashire, Yorkshire, and West of England).

Thus we see, according to official authority, wages are 100 per cent higher in the woolen and worsted industry in the United States than in any of the European countries. No one claims that the duty on wool and woollens costs more than 100 per cent.

Relative actual cost of labor in a woolen mill of 221 hands in Providence and of a similar mill in Bradford, England, according to Mr. Charles Fletcher:

Table with 3 columns: Item, Providence, and Bradford. Compares costs of various items between Providence and Bradford.

Now, 100 per cent is under, rather than over, the average difference between the wage lists of the two countries. It is not to be wondered at, then, that our Democratic free trade laboring men to paste this table in their hats and in their memory and go and brood a while.

Will those interested in the tariff cut the above figures out and give them a wide circulation? In the aggregate they make a pretty loud tariff talk.

IMPRESSIONS OF NASSAU. An Island of Trembling Summer Not Far from the Land of the Living.

Nassau is one of the smallest of the Bahama islands, covering a length of twenty miles by an average of five miles. It is a beautiful island, facing the north, upon the slope of a ridge running west to east, and nearly 100 feet at its highest. The soil is thin, the island consisting of an old coral reef, elevated gradually from the sea during the long period subjected to the action of the waves, leaving it honeycombed and pockmarked. This rock is compact, and made from disintegrated corals, yellowish in color and soft in texture, so that it is quarried by sawing and chiseling, becoming considerably harder by exposure. The surface of the rock is covered with loose pieces, exceedingly irregular in form. Over this is a very little soil.

The streets are graded through this natural rock, with natural gutters and drains, and the right angles to the water front cross the ridge generally through deep cuts in the natural rock in order to lessen the grade. The dwellings of the better sort are square or oblong with a porch, and the roofs are high, with low ceilings and low pyramidal roofs. These houses are always surrounded on at least two sides with broad verandas, closed in with slats to keep out the light and rain. The houses appear larger than they are. Dormer windows abound. The house colors are stone, light yellow, cream, the blinds are brown or green. High stone walls with small windows and iron gates to the ridges, inclose the houses and gardens; ornamented openwork gateways afford a glimpse within.

The cocoanut, the royal the palmetto and the silver leaf palmetto after the giant Cuba, or silk cotton tree, oleanders of large size, enormous amarillids, with the many species of the citrus family, and the orange tree, are the most characteristic plants. The Russel jopollia just coming into fullness adds a special charm to its background of dark green waxy leaves. The vegetation seems rather sub-tropical than temperately tropical. This results not from want of heat, but, as need of soil.

The city of Nassau is extremely picturesque with the quaint narrow streets, and the one chief was fast asleep in his chair, and I felt him undisturbed. The blacks, seemingly twenty to one of the whites, sit lounging, gabbling, and talking in a loud, laughing, but I have not seen one at work. The English majesty of law is thoroughly respected here. The principal crimes—profruity, jarning and slandering are among the most common. The law is at once communicated to Mr. A. R. Whitney, No. 17 Broadway, or to the editor of the Press.

with one or may be two rooms, of rose or coral, palmetto thatched. The gardens are large, honeycombed coral rock, and covered with crows of figs, coconuts or maize is planted. They are unkempt, unthrifty, dirty; but every where kind mother nature covers the garden walls with lichens and the convolvulus, and the green, and the bread fruit, the alumna and the palms give to the eye an ever varying, an ever entirely satisfying picture.

These cabins of the colored people (our inheritance from Spanish cruelty) literally swarm with children. The traditional stain of fire to twelve little blackheads is found in every child. A class, give me copper for bread? They are inveterate beggars. They say they can't get work, or if they do get any but little is paid—twenty-five to fifty cents a day. Truth is, there is no desire, perhaps no incentive, to work, no ambition to succeed. Lumber is easily satisfied by fruit, sweet potato, yams and fish. This little fruit is exported, and the peach the cauliflower, the melon, from Long Spunge fishing is the one industry which here is active.

For the climate, I would judge we had in the United States no spot so good for wintering summer. For people advanced in life who desire to avoid our winters, for tired brain workers, for those of long travel, for the beginning of throat and lung troubles, I should say Nassau is the place.—Fred Stearns in Detroit Free Press.

Self Massage for Dyspepsia. This treatment requires much perseverance and practice, otherwise it may to some extent prove a failure; but revere vigor will always be in proportion to the practice. Do not discontinue. First thing in the morning and last thing at night rub the abdomen down the left side and up the right in a round circle, also rub down the breast; now place the hands on the chest, and with the fingers of the right hand, grasp the lower limbs, like a whip lash, for exercise. Now twist the lower limbs, first on one side, then on the other, and rock up on the toes. Now the chest, and abdomen; first, take in a half breath, then exhale at the air possible, then fill the lungs to their full capacity, walk across the room and back, at the same time throwing the arms forward and back, half bend over and every part of air fill you see the abdomen working like a bellows, and you will soon become a deep breather. For more extended practice in deep breathing, before rising in the morning, and at the end of the day, use the following: First, take in a half breath, then exhale at the air possible, then fill the lungs to their full capacity, walk across the room and back, at the same time throwing the arms forward and back, half bend over and every part of air fill you see the abdomen working like a bellows, and you will soon become a deep breather. For more extended practice in deep breathing, before rising in the morning, and at the end of the day, use the following: First, take in a half breath, then exhale at the air possible, then fill the lungs to their full capacity, walk across the room and back, at the same time throwing the arms forward and back, half bend over and every part of air fill you see the abdomen working like a bellows, and you will soon become a deep breather.

A VICTIM OF COCAINE. Gives His Experience with the Fascinating Drug—Nursed Back to Health.

Dr. Charles D. Bradley's name first came into unobtrusive prominence in New York when he was given a testimonial for curing a man who had been addicted to the use of cocaine. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Water Changed to Blood. There is an animalcule, sometimes called the englema sanguinea, or the blood red englema, which multiplies so rapidly in the blood of a person who has been addicted to the use of cocaine, that the blood soon resembles a great clot of blood, to the wonder of those who see it for the first time, and do not suspect the cause. The little creature seems to be abundant only in the blood of those who have been addicted to the use of cocaine. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Curse of Deceit in Steel. It has recently been discovered by a board of naval architects at the United States navy yard, Mare's Island, Cal., that the cause of the sudden delinquency in the steel used in building the new cruisers was the use of a certain kind of steel. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Wild Silkworms of India. For a number of years the deficiency in the production of mulberry silk has been the topic of conversation in all the rearing of the wild silkworms of India, China, Japan, America and other parts, and a great many reports have been published on these wild silkworms, some of which are entirely untrue. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Florida's Opium Industry. Florida promises to become a large producer of opium. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Consumption of Tobacco. M. Paul Leroy-Beaulieu gives figures showing the different countries of Europe, and the amount of tobacco consumed in each. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

A Distinguished Clergymen's Testimony. Rev. B. M. Piquery, President of the Methodist Protestant Church of South Carolina, writes from Greenville: "About four years ago I was attacked with what the physicians pronounced neuralgic rheumatism, accompanied by nervous prostration, and I was confined to my bed for several months. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

A RELIGIOUS CEREMONY. Customs in the Russian Highlands. In the Russian Highlands at the village of Capiliano the highest feast on the 8th of August in memory of Saint Aurore and Saint Irenaus, whose bones lie in the village church. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

PHYSIC AND PHYSIC. Most boarding-house keepers are philanthropic. They would like to see consumption cured. Happiness depends very much on the condition of the liver and kidneys. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

James Albert Cathcart, the champion pedestrian, ate twelve quarts of ice cream during the great walk last week. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Don't Experiment.—You cannot afford to waste time in experimenting when your lungs are in danger. Consumption always seems at first only a cough. Do not permit any ailment to get beyond the first stage. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Don't Judge by Appearances. A brand new coat may cover a wire dummy. E. Bainbridge Munday, Esq., County Attorney, says: "I have used Dr. King's New Discovery for many years. My brother also was very low with malaria fever and jaundice, but was cured by timely use of this medicine. I can testify to its efficacy. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Modern Miracle. Mrs. J. W. Wentworth, of Elkridge, Md., writes: "I was long subject to pain in the side, shortness of breath, weakness, slight cough, swelling of the ankles, and other symptoms of serious heart disease. She was expected to die at the age of thirty. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Good Advice. If you are subject to nervousness, headache, morphia or opium habit, sleeplessness, neuralgia, backache, monthly pains, sexual weakness, St. Vitus dance, or other similar affections, you should use Dr. King's Restorative Nerve, a valuable nerve food and the latest and most scientific of remedies. It is guaranteed to give relief; \$5.00 is freely offered for a better Nerve Food. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

One Bottle Cured Him. A. H. Thompson, Rockford, Ill., writes: "I have been troubled with Catarrh for years, nothing helped me until I tried Papillon Catarrh Cure. I followed directions, and with less than one bottle, I am cured. Papillon Catarrh Cure is a permanent cure for Catarrh, Acute or Chronic Catarrh, also Gonorrhea and Hay Fever. Large bottles \$1.00, for sale by W. F. Runner. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Best Discovery of the Nineteenth Century. Can truly be said of Papillon (extract of flax) Skin Cure. Thousands testify to its wonderful curative powers in seemingly hopeless cases of Eczema, Salt Rheum, Erysipelas and every kind of skin disease. Mr. O. P. Algier, of Hartford, Ohio, tried everything he heard of or saw recommended, and suffered five years with Eczema of the face, which was cured by Papillon, which cured him. Large bottles only \$1.00, at W. F. Runner's Drug Store. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

Sleepy Hollow.—'Good night!' over the telephone. Indigestion results from a partial paralysis of the stomach and is the primary cause of a very large majority of the nervous diseases of the day. The man, who had been in the hospital for several months, was cured by the use of Dr. Bradley's medicine.

From the top of Mount Whitefish, in the Adirondacks, sixty lakes can be counted. This mountain is over 5,000 feet high. Why don't you use Johnston's Kidney Cure? Only \$1.00 per quart bottle, at W. F. Runner's. 4311

From the top of Mount Whitefish, in the Adirondacks, sixty lakes can be counted. This mountain is over 5,000 feet high. Why don't you use Johnston's Kidney Cure? Only \$1.00 per quart bottle, at W. F. Runner's. 4311

The Buchanan Literary Society will meet at Miss Helen Weaver's tomorrow, Friday, evening.

Hon. Thomas Mays, Master of the State Grange, is lecturing before the Grange in various parts of the state.

Persons granted Friday include John E. Eidsen, of Berrien Springs, Richard M. Wells, of Benton Harbor.

Mr. T. C. Elston returned Saturday from his visit to Auburn, Ind., accompanied by his brother.

Once more the family of Frank Mead is in sore affliction with diphtheria, his youngest child being quite sick.

The Zerega's Royal Spanish Troubadours have been engaged for one entertainment, in Rough's Opera House, Wednesday evening, March 7.

It may be well for the balance of the county to keep a close watch on the city of Niles and see that none of the great calamities predicted befall here.

MARRIAGE.—A wedding event of fall interest took place on the evening of the 22nd of February, at the home of Mr. John Redden.

REGULAR teachers' examination, at Berrien Springs, today. The next special will be held in this place the last Friday in this month—March.

A State Sunday School Convention is being held in the first Baptist church in Niles to day and to-morrow with an interesting program.

APPLICANTS for houses to rent are numerous this spring, and vacant houses not so plenty. Some families are going to Niles, where they find plenty of them.

At the meeting of the Common Council, Friday evening, it was voted that the members of the Council to be elected March 13 should be paid a salary.

THE Salvation Army will have a special demonstration Friday night. Officers and soldiers from Niles will be present.

LAST spring Niles City gave 408 majority against the amendment. The two Democratic papers and Star of that place lent their powerful influence against the local option act.

LEW HOFFMAN has been heard from once more. This time for carrying off a horn belonging to the Jonesville band.

THE shooting of Volkhardt, in South Bend, is a queer case. A .22 caliber bullet entered just near the right temple severed the optic nerve of the right eye, destroying that entirely.

WE find it necessary to have more power for running our machinery, and consequently offer a four-horse vertical Boiler and Engine for sale at a bargain.

THE Perry, New York, Weekly News of February 22, announces the death of Mr. Abel E. Eastwood, of Congession of the lungs, which occurred in that place February 11.

THE concert by the Apollo Quartet, Saturday evening, attracted a hall full, and there was general satisfaction with the entertainment.

OUR balmy spring weather took a severe cold Saturday night, and one of the worst storms of the winter blowing.

WONDER if it might not be a good idea for some one in authority to make a tour of inspection of the brick block between Oak and Main streets, on north side of Front street?

MR. BEACHAMP resigned agency of Cincinnati, Washab & Michigan railway, at Benton Harbor, to accept a new place in Missouri.

OUR balmy spring weather took a severe cold Saturday night, and one of the worst storms of the winter blowing.

THERE may be a time when the Niles Democratic papers will be ashamed of the abuse they have been heaping upon Tom O'Hara.

Editor Record:—I noticed last week in the columns of the Record the following article. A sad case of destitution was discovered by the G. A. R. of this place.

That the facts of the case may be known to the public, I wish to make the following statement: The first knowledge received of the sickness and needs of the family was obtained through the mail.

Arranged with a neighbor to secure provisions and carry them to the afflicted family. I was informed later in the day, that Mr. World and family had been subjects of care and aid to friends for nearly three weeks.

THE success that follows the treatment of Dr. Brewer has in part been the result of his peculiar practice, as well as his devoted and devoted so much to the exclusive treatment of chronic disease.

Mrs. Grant has already received \$2000 as her share of the profits from the General's book, and it is still having a large sale.

The success that follows the treatment of Dr. Brewer has in part been the result of his peculiar practice, as well as his devoted and devoted so much to the exclusive treatment of chronic disease.

There are said to be more than 60,000 Northern visitors in Florida this winter.

Prof. Foster, the Iowa weather prophet, says that tornadoes will increase from the beginning of 1888 to the close of 1892.

Martin Irons, the great head and front of the St. Louis strike two years ago, is now on trial in that city on a charge of destroying telegraph wires.

The Gale plow works talk of moving from Albion. And some enterprising town will capture the prize.

A vein of anthracite coal was struck Friday on the farm of Charles Cushman, four miles east of Marshall.

Iraora Murray was Tuesday convicted at Kalamazoo, of assaulting the 8 year old daughter of his uncle, and was sentenced to fifty years in the Jackson penitentiary.

ALger clubs are being formed in the eastern part of the state, and there is going to be an effort made to have a Michigan man elected president of the United States this year.

THE Eaton Rapids Herald is advertised for sale for a year. It is not because the proprietor is musically inclined either.

The Detroit Evening News has been enlarged by the addition of one column of each page. This required the purchase of an entirely new outfit of machinery.

THE Blissfield gas well grows more promising with every foot the drill descends. At present it is about 2,900 feet deep and has reached a blue shale so saturated with oil that it burns like soft coal when thrown upon the fire.

The amiable young lady who edits the Oconto Enquirer, in speaking of the Adrian anti-corset club of young men, says a girl must have something to prefer to a fool who doesn't know that the best girls are the ones who like to be squeezed the hardest.

A young German boy was pounded over the head with the butt of a whip, near Kingsley, Wednesday, by a young man named Peter Manigold, who then flung the boy into the snow and left him there senseless. He was found nearly dead, and was restored after several hours work by the doctors sufficiently to tell the story, but is likely to die.

A. G. BEACHAMP resigned agency of Cincinnati, Washab & Michigan railway, at Benton Harbor, to accept a new place in Missouri.

FACTS ABOUT TORNADES.

THEIR HISTORY REVIEWED FOR THE LAST 100 YEARS.

They are as frequent now as they ever were—Why they are common to some regions—A tornado is not a cyclone. Preventions for saving life.

HERE are three points regarding tornadoes mentioned upon by Lieut. Finley, the tornado authority. Here they are, and they are the result of the interest in view of the recent storm that devastated Alton, Ill.

1. That the tornado is indigenous to the United States, because there are no reports of them elsewhere. They are common to some regions—A tornado is not a cyclone. Preventions for saving life.

2. A tornado can be foreseen from a few minutes to a few hours in advance. It is necessary to take steps to reduce the danger to a minimum.

3. The tornado, hurricane and cyclone are really different, though confused in the popular mind.

The only cyclones known to the United States originate in the ocean southeast; they travel first northward, then change gradually to north and westward, whirling as they go.

But even near the center of the belt there are limited sections which enjoy a peculiar exemption. The people long ago came to the conclusion that a safe bluff on the east side of a river had a tendency to "blow" the storm away and make it safer for a few miles eastward, and Lieut. Finley's map confirms it.

West Virginia, for instance, has entirely escaped, and now is widely known as the "Tornadoless State." But even on the hills some startling phenomena have occurred. Some dozen years ago two tornadoes, each sweeping a narrow track and coming from the west and east respectively, crossed each other in western Indiana; the result was a terrific and destructive "swirl" in a limited area, in which both were dissipated, but the timber in that area was reduced to splinters.

But even near the center of the belt there are limited sections which enjoy a peculiar exemption. as it frequently happens that a man tolls for many years to accomplish results without being widely known among his fellow men, until some special work, either by itself or coupled with some practical event, causes his name to become familiar. Such was the case with Mr. Corliss. For more than forty years he labored in the work of perfecting and constructing steam engines, practically revolutionizing their construction, but it was not till he erected the great Corliss engine at the Centennial exposition in Philadelphia that his name became generally known.

Mr. Corliss was born at Easton, New York, on June 2, 1817. In 1835 he moved to Greenwich, N. Y., where he attended school and afterward opened a country store. His first mechanical work was done in the construction of a temporary bridge over the Hudson river, which had been washed away by a freshet, and after such a success he was employed by the Erie Canal Company, where he was promoted to the position of chief engineer.

Mr. Corliss received numerous testimonials of the appreciation of different governments and associations for the benefits conferred by his inventions. At the exposition at Paris in 1855 he was awarded the Grand Prix, and at Vienna in 1859 he received the gold medal, and the Grand Prix of the American Academy of Arts and Sciences in 1874. In 1878 he was the French Academy prize for that year, the highest honor for mechanical achievements. He made no exhibit, but was awarded the prize because of his services to the world.

by putting every one not a cripple in the ranks of the German army, and regarding the rest of the German people as a vast reservoir from which to draw military supplies. Youth has usually been looked upon as a blessing, but in Germany youth simply means army service for the men and separation from the women. It is the period in the life of a man in which he is most useful to the state, and it is the period in which he is most likely to be killed.

Then came little Italy, where there is more poverty to the acre than in any country in the world. It is the land of the "Dolci," where the farm laborer is said to "contend with every species of privation from the cradle to the grave." To join the alliance of Italy with the rest of the world, Italy is liable to military duty from 30 to 33. They cast lots for the privilege of serving a term of 200 or 300 days.

Children Cry For Pitcher's Compound. A Practically Perfect Preparation for Children's Complaints.

A Confidential Letter, Dated Oct. 1, 1887, Which We Publish by Permission Under Later Letter, Dated Oct. 12, 1887.

DR. BREWER. Respectfully calls your attention to the following cured or materially benefited by his method of treating Chronic Diseases.

Some months ago I received your letter of inquiry, my daughter has been taking your syrup for months, now using the seventh bottle; has been on her feet back for six months with liver constipation. Since using your remedy, she has had two large abscesses of the liver which have been cured by using your syrup.

DR. BREWER. I have had best medical skill, also traveled extensively for her good, but in all never found its equal. I have prescribed it to my patients and have in every case had the most desired effect.

Very respectfully, DR. A. E. CHAPMAN.

UNACQUAINTED WITH THE GEOGRAPHY OF THE COUNTRY, WILL OBTAIN MUCH VALUABLE INFORMATION FROM A STUDY OF THIS MAP OF THE CHICAGO, ROCK ISLAND & PACIFIC RY.

SULPHUR BITTERS. The Greatest Blood Purifier KNOWN.

CHICAGO, ROCK ISLAND & PACIFIC RY. Its central position and close connection with Eastern Lines at Chicago make it the favorite route to the Northwest.
