There! I have made you remember all that trouble, and I ought not tonight," said Miss Snow, remorsefully. "But do not worry, dear; it can't help you if she is dead, and I can't help you if she is alive."

A RAILROAD meeting was held in Berrien Springs, Saturday, and it is reported here that the action taken was to resolve to ask the legislature to pass a special act to allow Oronoko township to bond herself for \$30,000 to invest in public improvements, such as railroads &c. This looks very much as if Oronoko fully realizes the gravity of the situation, and there is but little doubt that such an amount will secure for them a railroad before long. Hope it may.

JOHN C. QUINN, one of the oldest citizens of this township, died at his home in the northern part of the township, Saturday, Jan. 26, 1889, aged 80 years, 2 months, and 23 days. Deceased was born in Anson, Somerset county, Maine, Nov. 3, 1799; was married to Abigail Nickford, Nov. 15, 1818; came to Michigan in May, 1854, and has resided on the farm where he died thirty-two years. He leaves an aged widow, three sons and three daughters. The sons and one daughter are in the West, and were not present at the funeral. The remains were brought to Oak Ridge cemetery, in this place, Sunday for interment.

WHAT SHALL BE DONE ABOUT IT? - Spencer & Barnes have been running a successful business in the manufacture of furniture in this place for a number of years. They now have this proposition to make. In case the citizens of Buchanan will raise for them \$3,000 they will erect a three-story brick factory, 84 by 132 feet, on Portage street, with two dry kilns, 16 by 30; shavings room, 8 by 30; boiler room, 20 by 30; engine room, 19 by 22, each one story; and an addition to the finishing room, the old rink, 48 by 100, two-stories, giving them the capacity of operating 150 men. They will also put in two new steel boilers, a 100-horse power Corliss engine, and hold their present quarters and power in readiness to be occupied by any new enterprise that may be discovered, and use their best endeavors to locate them here. The estimated cost of the contemplated improvements is about \$16,000, and when made will give steady employment to as many men as were employed in Buchanan before the burning of the "big shop", in a business that is no experiment and about which there will be no quibble. One of the objections raised is that when their business demands it, they will do this improving anyway. This may be true and may not. They have not enough room for their business now, but there is no certainty that the change will leave them in Buchanan. They now have an offer of \$12,000 cash and land on which to build, in Battle Creek. Another excuse is that if money is to be given for such a purpose it would be better to use it to induce some stranger to locate here. We know these gentlemen, and that there is no experiment about their business, and if that amount will induce them to bring 100 men to this place and give them employment, it is better to give it to them than to some stranger. They do not say that without the \$3,000 they will not do the building at all, but not in 1889, and that means an uncertainty for the future. Now is the time that we want something of the kind done.
