BOB'S COMPLAINT.

BY GLADYS WATY.

Oh! dear, whatever can I do?

It's just "the careful" all day long.

No matter if you work or play

It's the very same old song.

"Be careful, be careful there,"

"Until it really seems to me

This queer old world is full of care

It couldn't any taller be.

"Be careful, Bob, don't slam the door.

Look out, or else you'll split that tea.

You must not trudge up my clean floor.

Don't throw that ball so carelessly."

And if ever chance to drop

My book, or slate, or toy

They say "Oh! Bob, why don't you stop?"

You're such a careless boy.

When I am big and own a house

I'll let my children make a noise.

No chaps for me still as a mouse

My boys shall be careless boys.

It prefers to tax the produce at home, and the price of which the foreigner enjoys absolutely to the American consumer, a tax which benefits no American interest and which is paid wholly by the American consumer. officers are very often misled by false statements, and sometimes are unable to capture the criminal. It is reported here that Landon was out on Horse Lake boating with a lady companion when Hall approached the shore and commenced using abusive language to Landon and partner. Landon told him to stop and go away and let him alone. Whereupon Hall picked up a half brick and threw it and hit Landon on the side of the head. Landon immediately arose and a fight ensued. During the struggle Hall's neck was broken. There are several conflicting stories regarding the crime.

One day Billy attended a sale which most of the toughs and thugs the country congregated. During the day two opposing bullies and their friends raised a row and a general fight ensued. Although a man of serene and unflappable temperament Billy could fight if it became necessary. Seeing that his efforts at keeping the peace were unavailing he took sides and entered the general melee. The row progressed finely for

The Hebrews, when they tilled the soil in the time of Moses, had a plow made of the same way. Intelligent Peruvian Indians contented that they do not need to plow more than two or three inches deep—any more enough to loosen the soil so as to enable the seed to take root.

The water used in irrigating is said to be rich in plant food, further obviating the necessity of deep plowing. It may also be added that improved plows made suitable for this country, are now manufactured in Europe and the United States, but it goes without saying that these are very different from the plows used by an American farmer. They are light and small, having a close

It is always a pleasure to the RECORD to chronicle the success of former Berrien county boys.

THE RECORD is informed that the bill of Mr. Lambert to have two terms of court in Niles failed to pass in the Senate. MR. FREEMAN FRANKLIN has been studying the smutty wheat question, and the more he studies the more smutty it becomes. THE Board of Supervisors at their meeting this week elected a new Board of School Examiners, in accordance with the new school law passed by the legislature now in session. The new members are John C. Lawrence, of Benton Harbor, county commissioner; Frank Stryker, of Buchanan, examiner two years; James Knight, of St. Joseph, examiner one year. Mr. Lawrence takes the place of Miss Rachel Tate, who has held the office of county secretary during the past year, and will have a salary of \$1,200. The Board appointed Alex. Halladay, Supervisor of Lincoln, as representative to the State board of equalization. The assessed valuation of the county amounts to \$108,000 more in the aggregate than last year. In the equalization New Buffalo was lowered one per cent and Hagar two per cent. Pipestone was raised three per cent and St. Joseph one per cent. No change was made in the assessment of the other townships.

THE Board of Supervisors closed up our dam question with dispatch, and Buchanan was notified Tuesday morning that the question had been favorably reported upon by the committee to whom it was referred, and then was passed by the board without opposition. At this stage of the game all who have been legally interested in the matter have said that the dam may be built. It will now devolve upon the village of Buchanan to say that it shall be built. There ought and probably will be no more question of how that will be decided. In the improvement of the water power of the St. Joseph river lies the only source of inducement that Buchanan has for material growth and advancement.

IT was a jolly party of thirteen that took the Kalamazoo accommodation train for Pokagon, Saturday evening, where they were met by Messrs. They are unanimous in voting the Silver and Weller homes the best places in Michigan to go and have a good visit. "The crowd" consisted of Mrs. Mary Straw, Misses Mattie Brown, Edie Perry, Mary, Minnie and Emma Grover, Elsie Kingery, Mattie Straw, Little Fox, Frances Brown and Messrs. B. D. Harper, Herb. Schock and Fred. Tichenor. Miss Tot Howe joined the party at Niles. All returned Monday morning except Misses Elsie Kingery and Mattie Straw who will stay for a week's visit.

While we humbly bow to the will of our Great Creator, and while we know our loss is his gain, we linger in sadness over the memory of one who has been a true Brother to us in the Grange; careful, energetic, and a man of unsullied integrity; one who had a heart in every good work. Therefore, Resolved, That in the death of Bro. Norris this community loses one of its best citizens; the church and Sunday school one of its best workers; the Grange a true patron; and his family a kind husband and father; Resolved, That the Grange feeling the loss and appreciating his worth, do extend to the family of the deceased our sincere sympathy.

MR. W. H. ALDRICH, of this city, whose farm is on Sumpion Prairie, reports a strange disease affecting his and other clover fields in that section of the country. The farmers there have been surprised that the clover did not blossom freely. At last Mr. Aldrich investigated and found that the clover heads were all white with a small white worm which seemed to be feeding on the heads and preventing blossoms. His fields show that not more than one-third of the clover is in blossom. The heads look and feel like the second growth, which is cut for seed. The heads are hard, and in their green state resemble a burdock burr. Mr. Aldrich says his horses refused to eat the clover so affected.—South Bend Tribune.
