

JOHN C. HOLMES, Editor. THURSDAY, SEPT. 17, 1891.

Harry H. Francis, the wide awake editor of the Michigan City Dispatch, died suddenly Tuesday afternoon.

The unquietness of European rivals was increased Sunday morning, by the report that a company of marines from a British man-of-war had taken possession, forcibly, of the island of Milylene, a short distance south of the mouth of the Dardanelles.

A Michigan milling company is preparing to ship flour to Cuba under the new reciprocity treaty.

The Springfield Republican says that McKinley's successor, from the Sixteenth Ohio Congressional District, J. G. Warwick, chose a competent committee to examine candidates for West Point.

To Make Tin Plate.

INDIANAPOLIS, Sept. 16.—The American Tin plate company, organized for the purpose of manufacturing tin plate and sheet iron near Elwood, Ind., has been incorporated under the laws of the state.

A Tariff Catechism.

The editor of one of the local Democratic papers, the standard, had expended a vast amount of gray matter in propounding a series of questions to McKinley.

The second question was: "Is it not true that the founders of our federal government regarded a tariff as a means of raising revenue for the support of the federal government."

McKinley's answer was: "A revenue tariff such as the party of this editor advocates, is always paid by the consumer, because if you put a tariff on a non-competing foreign product, a product we cannot sell in our own country, then the price of that product to us is the foreign price with the American tariff added, and that is paid by the American consumer."

Another question was: "Is it not true that the taxing powers of the government are exhausted when it has raised an amount of money sufficient for the administration of the government?"

McKinley's answer to this question was the advertising columns of the Standard itself, which announced that suits of men's clothing can now be bought in Coshocton at from \$3.50 to \$5.50.

A Canard. The New York Herald, which has been making a specialty of printing "important bills," has published a bill for the increase of Per Capita Circulation.

The article directed to the New York Press giving the rounds of the papers, in which it is alleged that the action has been taken to give New York Legislature against the Royal Baking Powder, proves to have been a canard, gotten up and circulated by opposition baking powder makers for purposes quite apparent to every one.

The New York Press in exposing the fraud, says: "No such legislation as that stated in this article has ever been had in this state or in the legislation to our knowledge."

The latest returns from threshers received by the secretary of state indicate that Michigan's total wheat crop will exceed 25,000,000 bushels instead of less than 27,000,000 bushels, as estimated two weeks ago.

Increase of Per Capita Circulation.

The Treasury Department has prepared a statement of the currency circulation, total and per capita, for the past thirty-one years; which constitutes an emphatic reply to the misrepresentations of the 'Gold Standard' and the ignorant claims of unstar-up financial financiers.

Table with 3 columns: Year, Amount in Circulation, Per Capita. Data from 1860 to 1891.

Shakespeare's Sonnets. Says a literary man of some note: "It took me a long time to appreciate the beauties of Shakespeare's sonnets. On the first reading I found little in them to attract, but on the advice of a friend I returned to them with a desire to read a score of readings I was able to see new meanings, and soon I became fascinated. I procured a small 'vest pocket' edition and carried it with me wherever I went, reading the sonnets in the street cars or between trains. They are really wonderful. Some of them I have read hundreds of times, and have made them my own so far as memory can appropriate the thoughts and ideas. I can understand the enthusiasm of my friend, who says that if he had to give up either Shakespeare's sonnets or Shakespeare's plays, it would be the plays that he would have to give up. I can think of no literature that is so full of human interest and that reads so easily and so naturally as Shakespeare's sonnets."—New York Tribune.

The Egyptian water elevator is a form of water elevator which has been in use from time immemorial, not only in Egypt, but almost all over the world. It consists of a trough pivoted at one end above the level of the water, the free end being alternately dipped in the water and raised, so as to cause it to discharge into a tank leading away from the machine.

The pendulum water elevator is a curious modification of the swinging gutter. A number of gutters arranged in two series are secured to opposite sides of a swinging frame, each series of gutters being arranged on a zigzag line, and the two series of gutters are oppositely arranged with respect to each other.

MR. AND MRS. THEO. THOMAS have gone to Brandon, Vt., to attend the reunion of the Second Battery, Vermont light artillery, the first reunion held by the battery since their discharge. They will also visit in Massachusetts, Maine and other points before returning. The reunion will occur September 25th.

The Michigan Central will, on Sept. 19 and 20, sell tickets from Buchanan to St. Louis, Mo., and return, at the rate of one first-class limited fare, good going only on date of sale and returning not later than Sept. 28, on account of Sovereign Grand Lodge, I. O. O. F.

The first entry made on the Earl register Tuesday morning, was a Scandinavian to those who have examined the book since. It was made by an Arabian, who was here with two ladies, written in his native language, beginning at the right hand side of the page. The landlord is supposed to have the man's full address, should he care to write him later.

JOHN FINCH, nephew of James Finch, of Niles, formerly of Dayton, fell under the cars on the Joliet division, Tuesday afternoon, and had both legs cut off, one at the ankle and the other at the hip. He was brought to James Finch's home, in Niles, and died soon after reaching there. The remains will be taken to Bakerstown grave yard for burial, this afternoon.

BENTON HARBOR had what was evidently intended for a murder, Saturday, in which Harry Johnson had his head pounded up and his ankle broken, by a club in the hands of Lafayette Singleton. Johnson tried to stop Singleton from pounding his wife, and afterwards was assaulted from behind by Singleton with a club and left by the roadside for dead. He will recover and Singleton stand punishment.

YESTERDAY Judge O'Hara filed his decision in the Benton Harbor bond case. The opinion comprises a number of pages, the gist of which is that while the bonds have been voted for, for public improvements, he decides that they may be used for legitimate municipal improvements, but must not be loaned to the Improvement Assn., or in any way hypothecated or used for any unlawful purpose.

BERRIEN SPRINGS and Niles have each contracted for a lecture course for the coming winter. Niles furnishes five entertainments for \$1.50. Buchanan Chautauque circle tried that last winter and it cost the members over six dollars each, besides a great amount of trouble and anxiety for their part of the entertainment. If we have a lecture course this year, it will be managed by some other organization than the Chautauque.

The present Council has been very urgent about having new sidewalks made of cement, and this is right. Now what the RECORD wants to suggest is, that they be just as urgent about building the cross walks of the same material. A half mile string of good cement walk looks very badly with a half dozen or more plank breaks in it, and there is just as much reason in making all walks of plank and renewing them every twenty years, as there is in making the cross walks of plank and renewing them every three years, which is about the life of a plank crossing.

The manner of conducting the election next Monday will be new to all. No tickets will be peddled about town. No one will be allowed to display his ticket, showing how he is going to vote, and then vote that ticket or any other. No one will be allowed to carry any ticket away from the polls, whether spoiled or not. Each ticket will bear the initials of the inspector who hands it to the voter, and the voter must fold the ticket so that the initials shall be in sight, or it will not be received for deposit in the ballot box. These and a few other points provided by the new election law will be strictly followed. The council propose to conduct this election in such a manner that it cannot be knocked out, excepting by having too many of the ballots marked "No" before being put into the box.

THERE was a double funeral at Olive Branch church in Gallien township, Tuesday, being that of Nathaniel Bryant, aged 75 years, and one of the oldest settlers of Gallien township, and of William Swank, aged 26 years, son of William and Bethal Swank, who died in his infancy, since which time he had been a member of the family of his uncle, Richard Swank. A long sickness of consumption was the cause of his death. The two persons mentioned above were nearly related, and while the two deaths were at different homes they were from one family, and the remains of both buried on the same lot. The funeral services of Mr. Swank were conducted by Rev. J. F. Bartmess, of this place, and that of Mr. Bryant by Rev. Mr. Cloud, of Olive Branch church, and the burial ritual jointly by the two.

THERE was a lively bicycle race here Tuesday afternoon, starting and finishing at the junction of Front and West streets, the track being laid out past Bartmess' to D. S. Patton's, north to A. Brocous', east to Lake street, south to Front, east 3/4 of a mile. Distance 3 3/4 miles. Jake Rough was the first in, and took the medal. Time 18 minutes. The others returned in the following order: Meaker, time 20 minutes; Bishop, 14 minutes 18 seconds; Eaton, 18 minutes 5 seconds; Merrill, 18 minutes 5 seconds. Merrill was making such rapid time that he caused a hot box in his machine, and he returned without going over the course. Rough will wear the medal until he loses a race over the same course. Next meeting will be next Thursday, weather permitting.

Bro. Ross, of the Niles Recorder, undertakes to correct the Mirror for trying to build political capital out of the slightly increased taxes of Niles, because of a Republican administration. When the Mirror knows there was no politics in the matter. We are glad to note the conscientious notice of the Recorder, and to notify that if we undertake to keep the Mirror corrected in all of its misrepresentations of that character, it will have time for little else. The Recorder will find the Mirror's entire stock of politics based upon exactly such misrepresentations as the one in question.
