bill is 75 cents per head. Before the assage of that law was 20 per cent. The cause for Canada lambs being quoted higher than domestic is the fact that they raise wholly large breeds, such as Shropshires and the Downs, and have no mixtures of Merinos, and consequently have larger lambs. In this case the democrats will insist that the Canadian importer does not pay the tax but we mistrust it would be uphill

work to convince him of the statement. ADDITIONAL LOCALS. FROCK DAVIS has been keeping Cass county officials busy the past few months. About three weeks since be was sentenced to confinement in jail

at Cassopolis, but he soon gave the sheriff the slip, and the last his friends here heard from him he was having a good time in Laporte, while the Cass sheriff is trying to keep the escape a profound secret. The effect upon a reelection would not have been less damaging if Mr. Sheriff had hustled around and caught Mr. Davis, which is not a difficult task for a good officer.

FIRE.-Mr. Godfrey Boyle's bara, on his farm four miles north of this place, was barned, with all of its contents, including a lot of wheat, hav, oats, harness, and other articles of value, and a spring colt, Friday evening. The property was insured in the Home insurance Company of New York, with Mr. Frank Stryker's agency. The neighbors assisted Mr. Boyle in fighting the fire, and by hard and determined work, succeeded in saving another barn, which stood so near that the siding was charred through to the

law, and is finding the stock of dogs materailly decreased, and the tax receipts from that source materially increased. That is the way it worked here last May. But few dogs were slaughtered, but the income was much more healthy. Our law provides that dogs shall wear a tag with the number stamped thereon, but we mistrust it would be no very difficult task to find them on the streets at any time now without this necessary ornament. The dog catcher has resigned, and his successor in office has not been ap-

pointed. SOME ONE reported to the State Board of Health that there had been two or three hundred cases of scarlet feyer and three deaths in this place during the past three years, and that the health officer was not attending to business. This brought a letter to President Rough, asking him to call a physician from some other town to see about it. Accordingly Dr. Belknap, of Niles, was here yesterday and visit-

A FEW ADVANTAGES OF THE SAME.

It will not burn up, blow over or down, shelter weeds, shrubs, or briers; injure animals, persons or clothing; waste wool from sheep, or shade growing crops. It can be made close or open; can be put up and kept in repair at one half the cost of the best board fences. It is made from No. 8 wire, giving great strength. Easily built by any farmer, and will last a lifetime with very little repairs. The crimp in the wires will prevent breaking in winter and sagging in summer. Heat or cold, sleet, snow or floods will not injure it; snow drifts will not bank up behind it and block up roads and lanes. Having great strength without much surface it will stand erect where board, rail or slat and wire fence would be level with the ground.

LEASING CONVICTS.

DEMOCRATS INDIFFERENT TO THE RIGHTS OF WORKINGMEN.

Conditions in States Where They Have Absolute Control Shows Absolute Indifference to Rights of Labor-The Convict Lease System in the South.

[Special Correspondence.] WASHINGTON, Oct. 10 .- The workingmen of the country are finding in the recent labor trouble in the south a beautiful opportunity to judge of the real animus of the two political parties toward labor and laboring people. That the Democratic party has been the foe of free labor is a recognized feature of the earlier history of this country, and that it is still indifferent to the interests of the laboring element must be apparent to anybody who stops to study the situation as brought sharply into notice by the present condition of affairs in the south. Word comes from Tennessee that in spite of the promises of the governor the conditions in regard to the use of convict labor in competition with free labor have not at all improved.

Absolute Control Shows Real Sentiment. It is only in the states or localities in which a party has absolute and undisputed control for a long period that its real attitude toward any element of society is clearly shown. Where the majority is slender it is often necessary for party leaders to hide their real sentiments in order to continue their control. But in the southern states, where they have had enormous majorities and held them constantly by their own peculiar methods, they have shown their entire disregard of the interests of free labor and to the laboring element generally. Convict Labor Leased in the "Safe Dem-ocratic" States.

Take the "safe" Democratic states of the country at large as an example. There are perhaps a dozen which have been considered absolutely safe to the Democracy under all circumstances, located of course in the south. In ten of these twelve states they have

put convict labor into direct competition with the workingmen of the state. In only two of the safe Democratic states has the party omitted to show its hostility to labor by failing to put convicts in striped clothing into open competition with the workingmen. Scattered all over these "safe Democratic" states are camps of convicts, worked upon plantations or in the mines in competition with the laboring men of those states, and if the laboring people dare protest, that favorite argument of the southern Democracy, the rifle, is turned against them.

Brutal Treatment of Prisoners. The tales of horror which come from these convict camps are shocking, not only in the matter of their cruelty to the convicts themselves, but to the working people at large whose interests are overridden by a party which thus shows its absolute contempt for their interest and appeals. Prisoners are beaten, starved, threatened with death in order to force them to perform heavy tasks and thus increase the competition which their labor produces against the free labor with which they are brought into competition. These questions have been brought to the attention of the authorities time after time, but with no avail. Labor leased for forty cents per day, and driven to its utmost tension with floggings and threats of death, is calmly put into competition with the working people at large, and they are held in subjection by the use of rifles and Gatling guns, while Democratic governors and legislators refuse them relief. Compare This with Republican Methods. This could not happen in any but a solidly Democratic community. At least it does not happen in any other. There are twice as many "safe Republican" states at the north as there are "safe Democratic" states at the south. Yet there is scarcely a single one of the certainly Republican states which permits convict labor to be brought in any way into competition with the laboring element. Convicts are worked in prisons, and care is taken to select for them employment in the occupations which will bring them as little as possible into competition with free labor or skilled workmen, and prevent their personal contact with any. Convict camps and convict compati-tion with the laborer are things unknown in Republican states, and only prevail in states where the Democracy shows its true colors by the enjoyment of an enormous and absolutely safe majority. And the more absolute the majority the more absolute in this regard of the rights of the laboring man. In ten-twelfths of the solidly Democratic states leased convict labor is put into competition with the workingmen of the communities. Ten-twelfths of the states of the Union which lease their convict labor are solidly Democratic states, for there are but two states outside of the solidly Democratic south that have even a modified form of convict lease system.

dodging planks which was intended to mean, and did mean, anything to anybody. Mr. Randall stumped New York saying that it meant protection; Mr. Hurd stumped Ohio saying that it meant free trade; Mr. Mills stumped Texas say-

ing that it meant an income tax; Mr. Watterson stumped Kentucky saying that it was exactly in line with the views of the star eyed goddess of reform.

1892, when this identical plank was presented to it by its platform committee, overwhelmingly threw it out, and by a vote of 546 to 342 the convention declared itself for free trade pure and simple. To have regard for any other purpose, it said, in devising a tariff, than the one purpose of raising revenue, was unconstitutional. In dealing with this plank Mr. Cleveland has twisted in evident distress. He means what the plank ' means, but does not dare to say so. Instead he says he believes what he always believed, and that everybody knows what he has always believed, and that that ought to be enough. Finally he says the people cannot be frightened by the specter of impossible free trade, which means, if it means anything, that the people must have confidence in him and his party, because they do not really mean what they say, and have not the

courage of their convictions. which to appeal to intelligent people for their suffrages. The Democratic convention declared at Chicago in favor of the repeal of the 10 per cent. tax on state bank issues. This has excited the profound alarm of every believer in a stable currency the country over. Those of our people who lived before the war will remember the condition of congress and affairs when everybody was permitted to start a bank and print slips of paper called money to the extent of his inclination. Millions on millions of more or less worthless money floated around the country, nobody knowing precisely what the bills he had in his pocket would be received for at the bank, nor indeed

feit. The Republican party is fighting in this campaign for protection to American industries and American labor. The Democratic party is fighting for free trade. Mr. Cleveland dodges the issue. The Republican party is fighting in this campaign for honest money-dollars of equal value, and that value 100 cents on the dollar. The Democratic party is fighting for wildcat money-an unlimited issue of meaningless paper. On this issue Mr. Cleveland is silent.

General Beers, formerly of a DOROTHY'S GOBLETS. New York regiment, and a lifelong Democrat, has announced his unwillingness to support Cleveland and Stevenson. SHE MAKES SOME INVESTIGATIONS A prominent colored citizen-an exconsul-who has heretofore co-operated with the Democrats, in a long letter to American Cut Glass—Its History and Chairman Harrity tells him why he cannot support the Democratic nominee, who has shown himself unfriendly to the colored race. Hon. George Ticknor Curtis, a distinguished Democrat and a lawyer of great prominence, has announced his withdrawal from the Democratic party and his determination to

support Harrison on a tariff and other grounds. Colonel Cohen, who was a Democratic candidate for state senator two years ago, has announced his with drawal from the Democracy. Florien Grosjean, the proprietor of an immense manufacturing establishment on Long Island, and a warm personal friend of Mr. Cleveland, announces his withdrawal from the Democracy on tariff grounds and a determination to vote with the Republicans. Mr. Glover, a prominent manufacturer of Glovers ville, N. Y., announces that his experience with the McKinley tariff has led him to decide to transfer his allegiance from the Democracy to Republicanism. Colonel Cockerill, of the New York

Commercial Advertiser, for many years a prominent Democrat, is working actively for Republican success. And there are hundreds, yes, thousands, of others all over the state and all over the great manufacturing sections, where a change in the policy of the nation toward manu-factures would prove disastrous.

Our commercial rivals in Europe do not regard this reciprocity policy as a "sham," but as a serious threat to a trade supremacy they have long enjoyed.—Harrison's Letter of Acceptance.

Hundreds of Millions of Dollars' Worth Pressed for Payment by Democrats. The committee on war claims have reported in favor of more than \$70,000,000 worth of claims for damages caused by the devastation of war. If there is any thing settled in law it is that no nation ever undertakes to repair the damages of war. Where the accident of destruction falls, there it rests. But there is grave danger at this very moment that we shall at this late day be cajoled into vast payments in that behalf. These claims come to us under the sanction of religious societies, to pay for rent of churches, to pay for damages to schools and colleges. Each is for a small amount, but the aggregate will appall the country. In addition to the \$70,000,000 already reported by the committee on war claims \$100,000,000 and perhaps \$600,000,-000 of such claims have been referred to the court of claims.-Ex-Speaker Reed.

Seen in National Affairs. Not only has the Democratic party

shown its indifference to the rights of labor under slavery and under the convict lease system, but also by the words and votes of its officials at Washington. When the Mills bill was before congress a Republican amendment proposing to exclude from the United States goods manufactured by convict labor was defeated by Democratic votes. A similar section in the McKinley bill was almost solidly opposed in the vote by the Democratic members of the house. Mr. Cleveland while governor of New York vetoed the bill abolishing convict labor in prisons, and while president vetoed the anticonvict labor bill in 1886 and again in 1888, and in his message to congress in 1888 recommended the employment of government prisoners in the manufacture of such articles as are needed for use by the government, thus proposing to put them in competition with the workingmen of the country. CLEVELAND'S LETTER.

Chairman Carter Dissects It in an Interesting and Vigorous Way.

Mr. Cleveland's letter of acceptance is conceded to be the weakest document that he has given the public. It was generally criticised as a pitiful attempt to straddle all the doub!f i issues of the campaign and make energies of nobody. Here is what Chairman Carter of the Republican committee said of it:

It is rather difficult to figure out from Mr. Cleveland's letter of acceptance precisely what he believes about anything. He starts out by saying that he is more than ever confirmed in the belief that all the things which he has heretofore believed are true and excellent. I suppose that nobody will doubt Mr. Cleveland's regard for his opinions. Still in the present situation, the Republican party having declared plainly and explicitly in a tariff so devised as to protect American industries while raising the revenues necessary to support the gov ernment. and the Democratic party having explicitly declared that such an arrangement of the tariff is unconstitu tional, it would have been interesting to know whether Mr. Cleveland agreed with the Republican or Democratic the-

DEMOCRATS LEAVING THEIR PARTY IN LARGE NUMBERS. upon them this legend:

Thousands of Democrats Announce Their Conversion to Republicanism - The Tariff, the National Bank Law and Other Features Drive Them Out.

[Special Correspondence.] NEW YORK, Oct. 10.-According to the Democratic national committee Great Britain has grown tired of her free trade and is about to put a tariff on certain American products upon the American protective theory. The literary bureau of the Democratic headquarters announces that the English parliament will as soon as it meets pass an act placing a tariff on American wheat, for the double purpose of getting even with the United States for our high tariff duties and at the same time protecting British colonists and British interests in wheat growing Australia, Canada and India. Thus it seems that the British are actively co-operating with the Democrats of this country to try to scare the farmers of the United States into voting against Republican doctrines of protec-

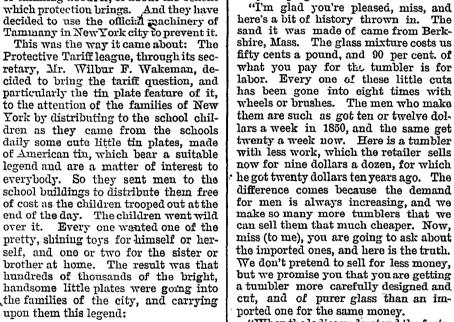

tion, while at the same time they are admitting their value by proposing to adopt them for the benefit of British colonists whom they propose to protect against United States farmers. It is not believed that this joint attempt of the British and the Democratic party to bluff the farmers into voting the Democratic ticket will be a success.

Democrats Badly Alarmed. The fact is the Democrats have be-

situation. They have received reports from the west which convince them that the stories of prospective Democratic success in the western states are the merest moonshine. They have lost hope of carrying Illinois, Wisconsin and others of the western states which a month ago they were claiming with great persistency. Their only hope lies now in the "assistant Democratic party," as the People's party has recently been denominated. If they can get enough Republicans to vote with that party in Kansas, Nebraska and the Dakotas to carry the electoral votes against the Republicans they will thus accomplish all that they now expect. But there is little prospect of that. The Republicans of those states are seeing clearly that they are being made game of and that the Democrats are attempting to use them as a cat's paw to pull their chestnuts out of the fire. They see that a vote for Weaver and Field is indirectly a vote for Cleveland and Stevenson. The South and the Soldiers.

While upon this subject of the attitude of southern Democrats toward Union soldiers, it may be interesting to quote something from the Lynchburg (Va.) News as an evidence of the real feeling of the southern Democrats toward the old soldiers. Speaking of the

American Tin Plate.

Official reports from the treasury department present some hard nuts for free traders to crack in regard to the tin plate industry. Special Agent Ayer has just made public another report. In it he brings down the tin plate industry to June 30, 1892, and a wonderful showing it is. During the first quarter of the year only five persons were engaged in the business, in the second quarter eleven firms were engaged, in the third quarter twenty were engaged, and at the close of the fourth quarter twentysix concerns were making tin plate, with a probability of at least eight new names to be added to the list by the close of the present quarter.

In the same way the product is rapidly increasing and the amount for the year will not be far short of 20,000,000 pounds. Less than 1,000,000 pounds of tin and terne plates were made in the first quarter of the last fiscal year, and more than 8,000,000 pounds in the last quarter. This is a showing that should make the tin plate liar hang his head for shame.
