# NEW SUPPLY OF

SICK HEADAC

A STUDY IN SCARLET. "Why, it is just such a chance as you have been longing for."

By A. CONAN DOYLE. PART ONE.

[Being a reprint from the reminiscences of John H. Watson, M. D., late of the army medical department.]

[CONTINUED.] Sherlock Holmes sniffed sardonically. 'Lecoq was a miserable bungler," he said in an augry voice. "He had only one thing to recommend him, and that was his energy. That book made me positively ill. The question was how to identify an unknown prisoner. I could have done it in 24 hours. Lecog took six

months or so. It might be made a textbook for detectives to teach them what to avoid."

I felt rather indignant at having two characters whom I had admired treated in this cavalier style. I walked over to the window and stood looking out into the busy street. "This fellow may be very clever," I said to myself, "but he

is certainly very conceited." "There are no crimes and no criminals in these days," he said querulously. What is the use of having brains in our profession? I know well that I have it in me to make my name famous. No man lives or has ever lived who has

> brought the same amount of study and of natural talent to the detection of crime which I have done. And what is the result? There is no crime to detect, or at most some bungling villainy, with

a motive so transparent that even a Scotland Yard official can see through it." 1 was still annoyed at his bumptions

style of conversation. I thought it best to change the topic. "I wonder what that fellow is looking for?" I asked, pointing to a stalwart,

plainly dressed individual who was walking slowly down the other side of the street, looking anxiously at the numbers. He had a large blue envelope in his hand and was evidently the bearer

of a message. "You mean the retired sergeant of marines," said Sherlock Holmes. "Brag and bounce!" thought I to myself. "He knows that I cannot verify his guess."

The thought had hardly passed through my mind when the man whom we were watching caught sight of the number on our door and ran rapidly across the roadway. We heard a loud knock, a deep voice below and heavy

straction.

that?" I asked.

of marines."

marines?"

"No, indeed."

"How in the world did you deduce

"Deduce what?" said he petulantly.

which he held his head and swung his

"Wonderful!" I ejaculated.

"Why, that he was a retired sergeant

steps ascending the stairs. "For Mr. Sherlock Holmes," he said, stepping into the room and handing my friend the letter.

Here was an opportunity of taking the conceit out of him. He little thought of this when he made that random shot. May I ask, my lad," I said blandly "what your trade may be?" BERRIEN SPRINCS MICH. When I looked at him, he had finished reading the note, and his eyes had assumed the vacant, lackluster expression which showed mental ab-

"My dear fellow, what does it matter"to me? Supposing I unravel the whole matter, you may be sure that Gregson, Lestrade & Co. will pocket all

the credit. That comes of being an unofficial personage." "But he begs you to help him." "Yes. He knows that I am his superior and acknowledges it to me, but he would out his tongue out before he would own it to any third person. However, we may as well go and have a look. I shall work it out on my own hook. I

may have a laugh at them, if I have nothing else. Come on!" He hustled on his overcoat and bustled about in a way that showed that an

energetic fit had superseded the apathetic one. "Get your hat," he said.

"You wish me to come?"

"Yes, if you have nothing better to do." A minute later we were both in a hansom, driving furiously for the Brixton road.

It was a foggy, cloudy morning, and a dun colored veil hung over the housetops, looking like the reflection of the and colored streets beneath. My com-panion was in the best of spirits and prattled away about Cremona fiddles and the difference between a Stradivarius and an Amati. As for myself, I was silent, for the dull weather and the melancholy business upon which we

were engaged depressed my spirits. "You don't seem to give much thought to the matter in hand," I said at last, interrupting Holmes' musical disquisi-

"No data yet," he answered. "It is a capital mistake to theorize before you have all the evidence. It biases the judgment.

"You will have your data soon," I remarked, pointing with my finger. "This is the Brixton road, and that is the house, if I am not very much mistaken. ' "So it is. Stop, driver, stop!" We were still a hundred yards or so from it, but he insisted upon our alighting, and we finished our journey upon foot.

No. 3 Lauriston Gardens wore an ill omened and minatory look. It was one of four which stood back some little way from the street, two being occupied and two empty. The latter looked out with three tiers of vacant, melancholy windows, which were blank and dreary, save that here and there a "To let" card had developed like a cataract upon the bleared panes. A small garden, sprinkled over with a scattered eruption of sickly plants, separated each of these houses from the street and was traversed by a narrow pathway, yellowish in color and consisting apparently of a mix-

ture of clay and gravel. The whole place was very sloppy from the rain which had fallen through the night. The garden was bounded by a three foot brick wall, with a fringe o

coat, with light colored trousers and immaculate collar and cuffs. A top hat, well brushed and trim, was placed upon the floor beside him. His hands were clinched and his arms thrown abroad, while his lower limbs were interlocked as though his death struggle had been a grievous one. On his rigid face there stood an expression of horror and, as it seemed to me, of hatred such as I have

never seen upon human features. This malignant and terrible contortion, combined with the low forehead, blunt nose and prognathous jaw, gave the dead man a singularly simious and apelike appearance, which was increased by his writhing, unnatural posture. I have seen death in many forms, but never has it appeared to me in a more feartery. I have not had time to examine some aspect than in that dark, grimy apartment, which looked out upon one this room yet, but with your permission I shall do so now." of the main arteries of suburban London.

Lestrade, lean and ferretlike as ever. was standing by the doorway and greeted my companion and myself.

"This case will make a stir, sir," he remarked. "It beats anything I have seen, and I am no chicken." "There is no clew?" said Gregson. "None at all," chimed in Lestrade.

Sherlock Holmes approached the body, and kneeling down examined it intent ly. "You are sure that there is no wound?" he asked, pointing to numerous gouts and splashes of blood which lay all around.

"Positivei" cried both detectives. "Then of course this blood belongs to a second individual, presumably the murderer, if murder has been committed. It reminds me of the circumstances attendant on the death of Van Jansen in Utrecht in the year '34. Do you re-

member the case, Gregson?" "No. sir." "Read it up, you really should. There is nothing new under the sun. It has

all been done before." As he spoke his nimble fingers were flying here, there-and everywhere, feeling, pressing, unbuttoning, examining, while his eyes wore the same faraway expression which I have already remarked upon. So swiftly was the examination made that one would hardly have guessed the minuteness with which it

was conducted. Finally he sniffed the dead man's lips and then glanced at the soles of his patent leather boots. "He has not been moved at all?" he work." asked.

"No more than was necessary for the purpose of our examination."

"You can take him to the mortuary now," he said. "There is nothing more to be learned." Gregson had a stretcher and four men ward some definite and practical end. at hand. At his call they entered the room, and the stranger was lifted and both asked.. carried out. As they raised him, a ring tinkled down and rolled across the floor.

"It would be robbing you of the credit of the case if I was to presume to help Lestrade grabbed it and stared at it you, " remarked my friend. "You are

This done, he appeared to be Now, a real German invariably prints in satisfied, for he replaced his tape and the Latin character, so that we may safely say that this was not written by "They say that genius is an infinite one, but by a clumsy imitator, who overdid his part. It was simply a ruse capacity for taking pains," he remarked, with a smile. "It's a very bad defito divert inquiry into a wrong channel. I'm not going to tell you much more of nition, but it does apply to detective the case, doctor. You know a conjurer Gregson and Lottrade had watched gets no credit when once he has explainthe maneavers of their amateur comed his trick, and if I show you too much panion with considerable curiosity and of my method of working you will come to the conclusion that I am a very orsome contempt. They evidently failed to appreciate the fact, which I had bedinary individual, after all." 'gun to realize, that Sherlock Holmes' "I shall never do that," I answered. smallest actions were all directed to-

'You have brought detection as near an exact science as it will ever be brought in this world." My companion flushed up with pleasure at my words and the earnest way in

exciting than fishing to come before the day was ended. At noon the ladies of our party came by wagon to join us at luncheon, and they accompanied us in the afternoon's fishing. Toward night, when we had worked well up toward

the mountains, some cattle came down

to the stream to drink, and without ap-

parent provocation a lively young bull

began to paw the ground and bellow un-

pleasantly and followed these demon-

strations up by charging upon our party.

Looking up from my fishing at this

juncture, I saw that it was the red plaid

shawl of one of the ladies that had ex-

cited the animal's hostility. Calling to

her to throw down the shawl and for

them all to run, I threw stones at the

ball to divert his attention, while the

other gentlemen of the party helped

them up the steep bank, where the bull

could not follow. The bull stopped at

the shawl, tossed it about in an ugly

manner, and then, turning his attention

to me, gave me a sharp run across the

sands to the bank. I got there all right,

carrying my rod, with the line and

leader flying behind, but just as I struck

the top of the bank I felt a sudden jerk

of the rod's tip, and turning saw that

one of my fly hooks had caught the bull

imagine that ever a fisherman made,

and I literally played that bull with a

fly rod for a quarter of an hour. I owed

him no good will, and besides I wanted

to save my tackle. The nostril of a bull,

as you probably know, is exquisitely

sensitive to pain, and with my strong,

flexible split bamboo rod, duplicating

reel and stout gut leader at the end of a

hundred fect of braided silk I managed

to hold the big creature under control.

He couldn't seem to make out what had

got him by the nose, but he knew that

it hurt him worse whenever he tried to

break away, and to increase the mystery

there was all the time dangling and

switching before his eyes a big, bright

red bass fly that I had left on my leader

as an experiment in trout fishing. He

would strike at it with his horns, and

his rage at finding he couldn't hit it,

and that it came back at him every time,

was comical to witness-from a place of

"From time to time the bull would

charge upon the shawl and toss that

about, and then I had to work the reel

and tip for all they were worth to save

all my tackle from going by the board.

At last, in one of these furious charges,

as he lifted the shawl on his horns Ifelt

something give away, and at the same

moment the shawl went up into the air.

The hook had torn loose from his nostril.

and two of the hooks on the leader

were fast in the shawl. I dropped the

rod and pulled line and shawl in, hand

over hand, like a Cape Cod fisherman

hauling pollock. The bull didn't tumble

to the situation until I had got the

shawl nearly to the bank, and then he

came for it, but it was too late. I whip-

ped the shawl up to where we were

standing just as his head butted the per-

pendioular bank with a thud that

sand and had some holes in it, but there

was no disposition to complain on the

part of its owner. We thought we had

enough fishing for one day, and leaving

our enemy down in the river bed pawing

sand and bellowing his anger we took

onr wagon thankfully for the hotel."-

LIVELY EPISODE OF A DAY'S FISHING IN CALIFORNÍA.

"And the florid face?" I asked. "Ah, that was a more daring shot,

"The second was the river that we forded shortly before arriving at Los Olivos. It was a type of water course common in California, with a wide, deep bed, perfectly dry, except where a clear little stream rippled its way along a narrow channel through sand and gravel, winding and eddying round bars and bowlders. A man might leap across it in many places, and the water did not come nearly to the wheel hubs as the stage rolled through it.

"At Los Olivos, which we reached at 5 o'clock p. m., one of the dishes served at our excellent supper was trout, caught, as we learned, in the pretty, clear stream we had crossed. That determined us to stay over a day at the station to try the fishing. We got out our tackle and had a day of great sport. To reach the water we had to get down the steep river banks and follow the dry bed through which the little stream seemed to pick its way. The trout we caught were of the black spotted mountain variety, ranging from 6 to 14 inches in length and averaging about three to the pound. Smaller ones we put back in the

water. "But there was an experience more which I uttered them. I had already observed that he was sensitive to flattery

305 Day Street,

been a bad business during the night at 3 Lauriston Gardens, off the Brixton road. Our man on the beat saw a light there about 2 in the morning, and as the house was an empty one suspected something amiss. He found the door open and in the front room, which is have of open and in the front room, which is bare of furniture, discovered the body of a gentleman, well dressed and having cards in his pocket bearing the name of "Enoch J. Drebber, Cleve-land, Ohio, U. S. A." There had been no rob-bery, nor is there any evidence as to how the man met his death. There are marks of blood in the room but there is no wound upon bis

a sergeant."

had brought.

it. "this is terrible!"

in the room, but there is no wound upon his person. We are at a loss as to how he came into the empty house. Indeed the whole affair is a puzzler. If you can come round to the house any time before 12, you will find me there. I

have left everything in statu que until I hear from you. If you are unable to come, I shall give you fuller details and would esteem it a great kindness if you would fayor me with your opinion. Yours faithfully, TOBIAS GREGSON. "Gregson is the smartest of the Scot-

wood rails upon the top, and against this wall was leaning a stalwart police constable, surrounded by a small knot of loafers, who craned their necks and strained their eyes in the vain hope of catching some glimpse of the proceedings within.

I had imagined that Sherlock Holmes would at once have hurried into the house and plunged into a study of the mystery. Nothing appeared to be farther from his intention. With an air of nonchalance, which, under the circum-

stances, seemed to me to border upon affectation, he lounged up and down the payement and gazed vacantly at the ground, the sky, the opposite houses and the line of railings. Having finished his scrutiny, he proceeded slowly down the path, or rather down the fringe of grass which flanked the path, keeping his eyes riveted upon the ground. Twice he stopped, and once I saw him smile. and heard him utter an exclamation of satisfaction. There were many marks of footsteps upon the wet, clayey soil, but since the police bad been coming and going over it I was unable to see how my companion could hope to learn anything from it. Still I had had such extraordinary evidence of the quickness of his perceptive faculties that I had no doubt that he could see a great deal

"I have no time for trifles," he rewhich was hidden from me. plied brusquely; then, with a smile:

At the door of the house we were met 'Excuse my rudeness. You broke the by a tall, white faced, flaxen haired thread of my thoughts, but perhaps it is man, with a notebook in his hand, who as well. So you actually were not able rushed forward and wrung my companto see that that man was a sergeant of ion's hand with effusion. "It is indeed kinds of you to come," he said. "I have had everything left untouched."

"It was easier to know it than to ex-"Except that!" my friend answered. plain why I know it. If you were asked pointing to the pathway. Gregson rubbed his hauds in a self satisfied way. "I think we have done "Commonplace," said Holmes, though all that can be done," he answered. I thought from his expression that he "It's a queer case, though, and I knew was pleased at my evident surprise and your taste for such things." admiration. "I said just now that there "You did not come here in a cab?" were no criminals. It appears that I am

asked Sherlock Holmes. "No, sir."

"It does seem to be a little out of the common," he remarked calmly. "Would you mind reading it to me aloud?"

that subdued feeling at my heart which

the presence of death inspires. It was a large, square room, looking all the larger for the absence of all furniture. A vulgar, flaring paper adorned the walls, but it was blotched in places with mildew, and here and there great strips had become detached and hung down, exposing the yellow plaster beneath. Opposite the door was a showy fireplace, surmounted by a mantelpiece

'There's been a woman here!'' he cried. "It's a woman's wedding ring." He held it out as he spoke upon the palm of his hand. We all gathered around him and gazed at it. There could be no doubt that that circle of plain gold had once adorned the finger of a bride.

with mystified eyes.

"This complicates matters," said Gregson. "Heaven knows they were complicated enough before!"

"You're sure it doesn't simplify them?" observed Holmes. "There's nothing to be learned by staring at it. What did you find in his pockets?"

"We have it all here," said Gregson, pointing to a litter of objects upon one of the bottom steps of the stairs. "A gold watch, No. 97,163, by Barraud of London; gold Albert chain, very heavy and solid; gold ring, with Masonic device; gold pin, bulldog's head, with rubies as eyes; Russian leather cardcase, with cards of Enoch J. Drebber of Cleveland, corresponding with the E. J. D. upon the linen; no purse, but loose money to the extent of £7 13s.; pocket edition of Boccaccio's 'Decameron. with name of Joseph Stangerson upon the fly leaf; two letters, one addressed to E. J. Drebber and one to Joseph Stan-

gerson." "At what address?"

"American Exchange, Strand, to be left till called for. They are both from the Guion Steamship company and refer to the sailing of their boats from Liverpool. It is clear that this unfortunate man was about to return to New York." "Have you made any inquiries as to

the door. "''Rache' is the German for 'revenge,' so don't lose your time lookthis man Stangerson?" ing for Miss Rachel." "I did it at once, sir," said Gregson.

With which Parthian shot he walked "I have had advertisements sent to all away, leaving the two rivals open the newspapers, and one of my men has mouthed behind him. gone to the American Exchange, but he

has not returned yet." "Have you sent to Cleveland?"

"We telegraphed this morning." riston Gardens. Sherlock Holmes led "How did you word your inquiries?" me to the nearest telegraph office, whence "We simply detailed the circumhe dispatched a long telegram. > [TO BE CONTINUED.] A WONDERFUL MOTOR.

About 20 years ago a Mr. Paine had an electro-magnetic engine in Newark, in which many persons whose names are not unknown to fame, and who certainly ought to have known better, "took much stock" in the literal as well as figurative sense. Being in Newark on some other business, I was waited upon by Mr. Paine and invited to see the machine. I accepted the invitation and went with him. The apparatus was shown off with great success, starting with full velocity the moment a connection was made with a little battery of four cells, driving lathes, sawing wood, etc., in a way that demonstrated several horsepower at least. I need hardly say that I was not convinced that perpetual motion had been discovered, but

only looked out for the trick. Nothing, however, could be demonstrat "There is nothing like first hand evied without taking the ponderous machine dence," he remarked. "'As a matter of ery to pieces. Near the end of my visit, fact, my m nd is entirely made up on however, in connection with a pseudo exthe case, but still we may as well learn planation of some point, Mr. Paine once more connected the battery, whereupon "You amaze me, Holmes," said I. the machine, in place of starting promptly "Surely you are not as sure as you preas before, made a few turns and stopped. tend to be of all those particulars which This was of course accounted for by the inventor as caused by some derangement of parts, but as, a few minutes later, I went "There's no room for a mistake," he down stairs, I looked at my watch and answered. "The very first thing which found that it was five minutes after 6 I observed on arriving there was that a o'clock. The building at large contained cab had made two ruts with its wheels a steam engine, and power was confessedclose to the curb. Now up to last night ly used in all other parts except those ocwe had no rain for a week. so that those cupied by Mr. Paine. This remarkable failure to start at just about 6 o'clock, wheels, which left such a deep imprestherefore, revealed the actual source of ension, must have been there during the ergy. The little battery without doubt operated either a belt shafter in a room below or signaled a confederate similarly located for a like purpose.

Not long after Mr. Paine and his electric engine were unsuccessfully sought for by some of his stockholders, and all that was found was a portion of an iron framo of the machine, showing an interior passage for a belt to act on its axle from the room below. The connection between the carrival of 6 o'clock and the stoppage of the motor which I had noticed in my visit, and had, of course, referred to its true "That seems simple enough," said I;

A short passage, bare planked and dusty, led to the kitchen and offices. Two doors opened out of it to the left and to the right. One of these had obviously been closed for many weeks. The other belonged to the dining room, which was the apartment in which the mysterious affair had occurred. Holmes walked in, and I followed him with

ago than in February, and most of the industries show a somewhat better front, though their gain is not large. Money markets continue undisturbed, the operations of syndicate still prevent exports of gold, and withdrawals from the Treasury have of late practically ceased. There is not much enthusiasm about the situation, however, because the gain is slow, and business is yet a long way from what was once considered a prosperous condition. Further, the gain is in some cases due of obviously tomporary causes, and in some cases which do not make for prosperity.

## The Proposed Salary Amendment.

The following is the proposed amendment to the constitution of Michigan relative to the salaries of State Officers. to be voted on at the general election to be held on Monday, April first next.

to be held on Monday, April first next. Resolved by the Senatejand House of Represen-tatives of the State of Michigan, That an amend-nent to section one of article nine of the constitu-tion of this State be and the same is hereby pro-posed to read as follows: SECTION 1. The Governor shall receive an an-mual salary of four thousand dollars; the Judges of the Circuit Court shall each receive an annual salary of two thousand five hundred dollars; the State Treasurer shall receive an annual salary of two thousand five hundred dollars; the Secterary of State shall receive an annual salary of two thousand five hundred dollars; the Secterary of state shall receive an annual salary of two thousand five hundred dollars; the Super-intendent of Public Instruction shall receive an annual salary of two thousand dollars; the Super-intendent of Public Instruction shall receive an annual salary of two thousand dollars; the super-intendent of Public Instruction shall receive an annual salary of two thousand dollars; the super-ceive no fees or perquisites whatever for the per-formance of any duties connected with their office, and they shall personally attend to the duties of their office. It shall not be competent for the Leg-sile office. It shall not be competent for the Leg-sile office. It shall not be competent for the Leg-sile office. It shall not be competent for the Leg-sile office. It shall not be competent for the Leg-sile office. It shall not be competent for the set the office. It shall not be competent for the set and they shall personally attend to the duties of their office. It shall not be competent for the set Be it further Resolved. That said amendment shall be sub-

Be it further Resolved, That said amendment shall be sub-mitted to the people of this State at the next spring election, on the first Monday in April in the year one thousand eight hundred and ninety-five, and the Secretary of State is hereby required

five, and the Secretary of State is hereby required to give notice of the same to the sheriffs of the several counties of this State, at least fifteen days prior to said election. The ballots ior and against this amendment shall be printed at the foot of the general ticket as provided by law, and designated as follows: Amendment to the Constitution relative to sala-ies of State officers,—"Yes." Amendment to the Constitution relative to State officers,—"No." Said ballots in all respects to be canvassed and re-turn made as in elections of Justices of the Su-preme Court.

name tails in electrons of Justices of the Su-preme Courts. Resolved further That the Joint resolution en-titled, "Joint resolution proposing an amend-ment to section one of article nine of the consti-tution of this State, relative to salaries," which was passed at the present session of the Legisla-ture, be and the same is herby repealed. This joint resolution is ordered to take immedi-

# BENEATH THE ROUGE

A woman sat at her dressing table, in was awake and knew her. They weren't front of the mirror, and dabbed cheeks angry; they were kind; they let her that were livid with patches to pink hold her close, let her stay to nurso her, color. Her maid folded and put away let her soothe her only as a mother, some drapery that had been flung down even the most degraded, can. Charles on the bed and watched her mistress forgave for the baby's sake and let her furtively. Down stairs there were prepstay just till she got well. arations for a big party, and the daylight shone on the silver and orchids on the to leave the room. In all her dreams she dinner table much as it shone on the never saw a sad picture, save that it face of the master of the house, with was sad to see the child suffer. Of the odd pucker of discontent between course she was certain to get well. his brows, ready and waiting in the pretty drawing room. It shone on those when up stairs she asked carelessly: obstinate blotches of color, which had to be renewed so often, in order to hide the wife's ashen skin.

Mrs. Marston had run away from her first husband and been the subject for a famous divorce case. The companion of her flight, Lewis Marston, had married her directly the divorce was made, and a certain less particular section of socicty consented to overlook her lack of morals so long as she had a good chef and gave amusing parties.

There was one child of her first marriage left in its father's care, and this little girl of ten summers was lying dangerously ill. The glass reflected eyes that were stained and wild. She penciled a black line under the lower lid, and she thought as she did so:

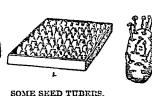

ing's guests. "They ought at least to let me see her. much of her, will take my place." The whole place swam before her She blackened one eyebrow, and a eyes. She was struck numb. Only subtear fell splash on to one of the silver

The Treatment of the Seed a Big Factor In Earliness, Size and Quantity.

The weak point in the management of the average potato grower is the soed. Fully nine-tenths of all the potatoes which people plant are unfit for seed purposes. A tuber which is in its prime for the table is also in its prime for seed. It should be fresh and plump and all eyes dormant. Such potatoes are not found in the inside of a big heap or bin in ordinary house cellar at this season of the year. Those that we now dig out of the middle of the bin look somewhat like the specimen shown at No. 1. Often we find much longer sprouts. The energy put into this now growth has surely weakened the potato for seed. A large number of eyes have become autive and will remain active, no matter whether the sprouts already started are left to grow or are rubbed off by accident or design. The sure re-

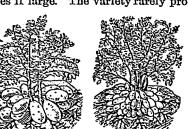

Lady Lane acted in it, so that makes the sult is a large number of spronts, a whole thing so eminently respectable. weak, spindling growth of all and a She died of dullness, poor old dowd. large number of small potatoes in the Her husband's a nice boy-he got me

2.6 👁

The plant shown at No. 4 in the second cut gives an illustration of this fact. A writer for American Gardening says in this connection:

The kind of seed I wish to plant is shown at No. 2 in the first cut and the resulting crop at No. 5 in the second cut. To secure such seed we spread the potatoes, long before they have had a chance to start into growth, under the benches in the greenhouse or in a light frostproof garret in single layer or at most two high. A portion of our Ohios and Freemans are placed in shallow flats, seed cud up, as shown at Fig. 3. Gradually under the influence of light and warmth a shoot as stout as one's little finger appears on the seed end of the tuber. This a little later is surmounted by a crown of leaflets, while rootlets begin to start from its base. In early spring when the ground is ready for planting the sets are carefully removed and placed in the ground, scrupulously avoiding injury to the shoots. Growth follows with marvelous rapidity, none of the pristine vigor of the tu-

ber having been wasted. The size of seed pieces is decided by variety, condition and price of seed. Whole tubers, if treated as previously set forth, will seldom produce more stalks than cut seed. I invariably plant whole tubers of Early Ohio if of medium size or less, and cut them in halves if large. The variety rarely pro-

to success in potato growing.

The Onion Crop.

onion crop of this country, though the

market may not indicate this, as the im-

portations are enormous even in good

years. This country imports large quan-

tities from abroad-from Cuba and the

Bermudas, from Spain and other Euro-

pean countries, and even from the an-

cient land of Egypt. In this country the

onion is successfully grown from the

Florida keys to the Canada border.

With the "new onion culture" and the

improved old onion culture and a lati-

tude wide enough to give fresh onions

every month in the year there is no

good reason why this country should

send abroad annually millions of dollars

for a product that can be profitably

grown at home. Farm and Fireside

says, after a careful study of the im-

proved methods of culture and a good

selection of soil and varieties, growers

in every part of the Union could safely

and profitably enlarge the home produc-

tion of onions, not so much by enlarg-

ing the acreage as by increasing the

yield from the acreage already devoted

Farmer to This Strange Question. The question at the head of this article may seem rather a strange one, but the writer has an increasingly strong belief that the time has come when a multitude of farmers on fertile, easily worked, corn growing lands may wisely abandon the growth of timothy hay, certainly so far as growing it to be fed on their own farms is concerned. He is equally convinced that on very many farms it is a mistake to

sow timothy alone on lands designed for pasturage. In the great corn growing states no other crop will ordinarily give so much food for live stock or so cheap food as will corn. This is true so far as the grain is concerned. The value of the stalks and leaves is being the better appreciated year by year. Corn is the one almost exclusive crop for ensilage. With all the admitted difficulties in handling the crop. it is doubtful whether any other forage of equal value can be so cheaply produced and fed as can corn stover. The value of out strow is still often underestimated. Fed in indicious combination this may often wisely be substituted for timothy hay as food for farm horses.

The clovers stand on a different basis. Grass has much value in a rotation, but clover has much more. On soils and in climates adapted to it clover will not only give a larger yield of either pasturage or hay, but a larger food value per acre. It is to be admitted freely that thero are greater difficulties in properly curing clover for hay, and that it is often seriously damaged in the process. The very great value to the soil of the clover or other leguminous crop, in a rotation, added to the special fitness of these crops for being fed in connection with corn-cither the grain or the stover -or with the straw of other grains, gives clover a decided superiority over timothy or most other true grasses as a

hay crop. Whether it may not be wise to sow timothy or some other grass; perhaps orchard grass, with clover, for either pasture or hay, is a question which may often be answered in the affirmative. In many cases the yield is considerably increased by having a mixture of clover and grass. Sometimes the hay crop is the more easily cured, and many prefer the mixed hay to hay of either kind alone.

Where there is a good market for timothy hay it may be profitable to grow it for sale, but making this a prominent feature of the farming system for a series of years is bad for the fertility of the soil, and where the crop must be drawn some miles to a shipping point or local market a profit is doubtful.

Without assuming to lay down rules for others, it is the present expectation of the writer that limothy will have a very subordinate place on his own farm, and that pure timothy hay will have no place in the foods used on that farm.

Professor Henry of the Wisconsin station several seasons ago conducted a series of experiments in the preparation of seed potatoes. The experiments included seed of thin paring, one eye to a piece; thick paring, one eye to a piece; cutting to single eyes, whole potatoes, seed ends and stem ends. All received the same culture. The results with the thin parings aro interesting as showing how good a yield of potatoes may be obtained by planting parings. When potatoes

### GOOD ROADS ARE COMING,

General Interest In the Subject Sure to Produce Results.

It is generally accented that good roads have the same effect as shortening the distance to be traveled. Therefore the man who has shortened the distance to his market has gained a great advantage. Good roads mean quicker and easier transportation and a bigger haul. They also mean a good deal more for sovial, moral and financial reasons. They also mean that the farmer can come to town and get into quicker intercourse and interchange with men. Farmers can visit each other, and there will be intercourse between communities centered in agricultural districts:

What is needed in roadbuilding is not more expense or going into details and management, but an improved system. Highway building at present in most sections of the country is in short sections under men who are not road experts, who pass out from year to year and give place to others. They cannot accomplish anything permanent. It is estimated that at least three-quarters of the money that has been expended in working out taxes on roads has been practically thrown away because the people do not know how to build roads. Careful estimates place the sum annual-

ly expended on roads outside of the large cities at about \$60,000,000, nearly \$45,000,000 of which is sunk in the mud and dust, caused by inexperienced roadbuilders. This enormous sum if judiciously and wisely expended under the supervision of competent roadbuilders would result in thousands of miles of splendid roadways, which, once acquired, could easily be kept in repair-a source of pride and convenience to the fortunate community possessing its share.

That this will be the ultimate result of the widespread desire for better highways there can be no doubt. The whole country is becoming aroused to the necessity of smooth and firm roads, which may safely and easily be traveled at all seasons of the year. Farmers, wheel-

men, merchants and mechanics are beginning to see that what is good for one class of citizens cannot fail to he of benefit to all. A few years ago good roads agitation was almost unknown. Now one can hardly pick up a newspaper that does not contain a report of the meeting of some good roads league or chronicle the introduction of a bill for the im-

provement of highways in one of the state legislatures. This means something. It means that we are to have better roads.

Many methods are discussed and tried in various sections, usually with success as to expenditures and results, but the main thing is that the public is alive to the situation and is bound to have good roads at the smallest cost.

and no matter what the cost they will be cheap in the end. W. H. BALLINGER.

NOVEL ROAD MENDING.

Each Farmer Does His Share, and the Roads Are In Good Condition. A farmer of Hamilton, Minn., says

of the roads in his neighborhood: "About 15 years ago we began the improvement of the foads in this township. The farmers turned out in the fall, and we all worked nearly two weeks in grading them up and bridging the little brooks and rivulets. We pledged one another to keep them in repair voluntarily. Next spring we made cheap scrapers

"When Neighbor Jones, living at the

east end of the road, has occasion to go

over it, he hitches a scraper behind his

wagon and drags it the distance he goes

in such a way that it throws the dirt

from, say, the south side of the road to

the center, filling up ruts and bumps.

Neighbor Smith, going in an opposite di-

rection, comes along with his wagon,

picks up the scraper where Jones cast it

off and drags it along the north side of

the road. throwing the dirt to the cen-

ter. The straw, hay and other substances

mix with the dirt, and are pressed down

in the center, and the sun converts the

mass into adobe. We have as good roads

as any in the country, and they are kept

up in this way. No tax, no working the

roads. Only voluntary labor. Every

man is ashamed not to do his part. I do

not see why other communities cannot

do what we have done."-St. Paul Pio-

Wisconsin Farmers Fear Taxes.

Wisconsin farmers are afraid of an

increased tax if the agitation for good

roads is successful, and they are show-

ing a deep interest in the question.

President Blackstock of the Good Roads

league said recently: "We do not de-

sire to interfere with the wishes of the

farmer on the subject. All we intend to

do is to encourage the building of better

roads. Let me give you an example: In

Sheboygan county we have 15 towns.

These towns have been spending on an

average \$3,000 a year a town on the

roads, or \$45,000 altogether. This has

been going on for at least 35 years,

showing the total expenditure by each

town during that time has been some-thing like \$100,000. The mileage of

each town is about 50, and nearly \$2,-

000 a mile has been spent. Yet they are

not one bit better today than they were

30 years ago, except here and there a

patch. Now, I can gravel or place

crushed stone on the roads for between

neer Press.

### COST OF IMPROVED HIGHWAYS.

Arguments Which Show That Farmers Can Afford Good Roads.

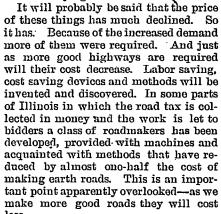

Farmers have been content to have for alleged highways strips of mud, sometimes frozen, sometimes dried, sometimes liquid and never good highway, and the rest of the world would never disturb the screnity of the farmers if the farmers alone were abused and injured by these strips of mud, says John M. Stahl in Good Roads.

It is also true that farmers have to a certain extent rightfully asked for a higher plane of living, and it has been given to them to the extent to which they asked. In the township in which I lived 25 years ago—a very rich, purely agricultural region-there were only two carriages, and when one of those carriages passed along the road I and the other youngsters climbed on the fence to gaze at it. Then we went to church in two horse farm wagons, but now if a resident of that neighborhood

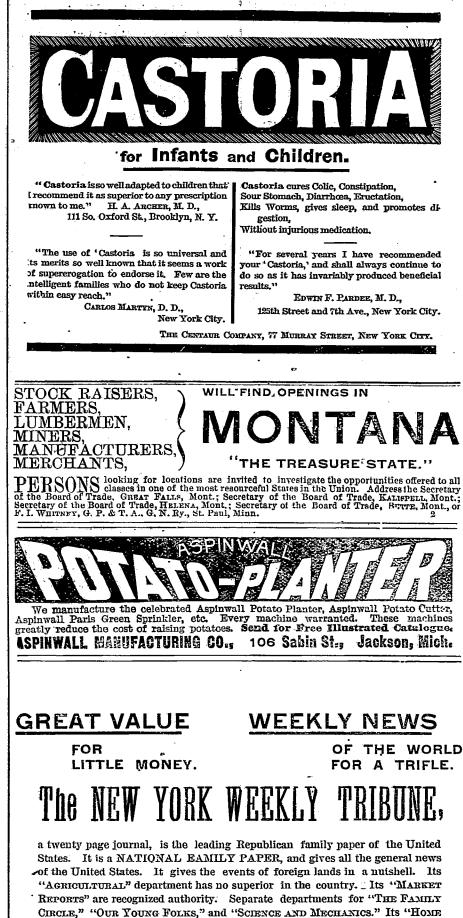

COUNTRY ROAD IN WET WEATHER. took his family to church in a farm wagon the youngsters would certainly stop to look at him. Practically every farmer in the township has a carriage.

I do not think that there was an organ in that township 25 years ago. Now half the farmhouses contain very good organs indeed, and the organ is hardly good enough now. The talk is of pianos. It is within 25 years that the chromo reached that neighborhood, and it was better than the bare walls! But it has gone, and in its place are steel engravings and enjoyable pictures, some of them painted by farmers' daughters, and some real etchings. And with these things have come "store carpet," and lace curtains, and beautiful lawns, and magazines, and patent leather shoes, all practically unknown there a quarter of a century ago.

less It should not escape consideration that, while buggies, carpets, organs and pictures are not money makers, not even the bitterest opponent of good roads has been able to make it appear that good highways will not pay a fair income on the investment. The capital put into them will not be dead capital. It will be productive. Good roads will at the least help to pay for themselves. In fact, they will pay back all their cost

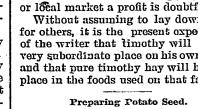

and exhaustive. A SPECIAL CONTRACT enables us to offer this splendid journal and THE BU-CHANAN RECORD for

AND SOCIETY" columns command the admiration of wives and daughters. Its

general political news, editorials and discussions are comprehensive, brilliant

lime pity could have forced him to visit brushes.

"Only just to have seen her for one minute-crept in like a stranger and looked at her face. Three years ago! Only three years since she saw me, and yet they will have taught her to forget. My darling little girl, my own little girl! O God, help me!"

She began on the other eyebrow, but her hand shook.

"What a fright I shall look tonight! Marie, bring me all my diamonds. I can't do without them, my eyes look so dull. Bother this rouge; it won't stick on. There, I'll make it somehow."

She thought as the maid fastened a glittering tiara in her hair that if the child died that night she could have no means of hearing, and she suddenly started up and sat down at a writing table. She wrote to an old friend, a man who had stuck to her first husband and cut her dead when she passed him in the street, and the letter ran thus:

DEAR SIR JOHN-For pity's sake, let me know how Daisy is. I am half mad with anx-iety. Please let the pain I am suffering excuse the liberty I take in troubling you. DOROTHY MARSTON.

She sent the maid with the letter at once, with a command to find Sir John Deane and get an answer if possible. Then, with a walk like a queen, in a dress from Worth, with her bediamonded head and the roses on her cheeks, she descended to the drawing room to receive her guests.

"My dear, you're late," said her husband.

She had long ceased to expect any companionship or sympathy from him, so she answered carelessly:

"Am I? It doesn't matter, as no one has arrived." "But it does matter" --- he began, when

the door opened to admit a guest. There was a young guardsman with

a fair face who thought Mrs. Marston a "good sort" and flirted with her desperately in an elementary fashion. There was a society doctor, with a plausible manner, gray hairs and keen enjoyment of the sympathy and interest of pretty women. He sat next a stout lady with a contented smile and placid blue eyes. She was Mrs. Marston's best friend and a little deaf. Most of the women were fast, and most of the men were horsy, and they all agreed at dinner that they had never seen their host-ess looking so well.

"We shall meet at Hurlingham tomorrow," whispered the guardsman. He was a nice boy, and he defended Dorothy Marston when her own sex reviled her.

She thought, "To Hurlingham and Daisy perhaps dying." Alond she said: "I'll come. I can drive you down, if you like. You had better lunch here first.'

"Charmed, of course," he murmured. The man on her right asked her if she had won money on the Derby. She fancied she heard her maid's voice in the hall, and she wondered if she had returned with any news as she answered:

"I made a little. Lewis was horribly unlucky. He insisted on backing some beastly outsider."

Then she laughed, sipped her champagne and glanced at an old admirer. half way down the table. A timid little woman at the other end caught the look and hated her for it. The recipient was the girl's husband.

'And now tell me some delightfully naughty scandal," Mrs. Marston said to the horsy man. "The latest and best you know "

- "Mrs Graham?"

As he paused she thought: "Marie can't have found Sir John. I wonder if

her again. Daisy dead! She had read it in the trouble in his face. Daisy dead, dead! Her own little baby cold and dead, and she not there to hold her in her arms, to kiss her just once more, to weep over her, to-Her friend was speaking. She strug-

gled back to consciousness, to hear her say in her loud, blatant voice: "Fancy Sir John coming to visit you again, Dolly! What a triumph for you to-

night has been." The whole roomful of people heard, and they looked at Mrs. Marston. She smiled faintly; the color in her cheeks did not vary, nor were her eyes dim, but her lips, for some strange reason, had turned blue, and her voice when she answered had a ghastly sound: "How funny you are, dear! 'What a triumph,' did you say? 'What a triumph tonight has been!' "

They took leave of her one by one and left her there face to face with her triumph alone.—Sketch.

### The Telephone In Korea.

In his work, "Korea," Mr. Henry Savage Landor tells a tale of the telephone. Some months before he arrived in Seconl a foreigner had visited the king, soliciting orders for installations of telephones. The king, being much astonished and pleased at the wonderful invention, immediately, at great expense, set about connecting by telephone the tomb of the queen dowager with the royal palace. Many hours a day were afterward spent by his majesty and his sait in listening at their end of the tele-

phone, and a watchman was kept all night in case the queen dowager should wake up from her eternal sleep. But not a message, or a sound, or a murmur. even, was heard. The king was disgusted, and the telephone was condemned as

a fraud by his majesty of Cho sen. WHY THE MAMMOTHS FROZE

### Howorth's Theory With Regard to the Remains Found In Siberia.

In Howorth's book, entitled "The Mammoth and the Elood," the author advances a unique theory with regard to the remains of the mammoth, or hairy elephant, which is found in such immense numbers in Siberia. These creatures were so plentiful at one-time in that country that ivory hunters found it more profitable to go there in search of that valuable article than to South Africa, where elephants are supposed to be as numerous as boodlers in New York city. Howorth says that they are inva-

riably found under conditions which make it certain that they could not have lived unless the surroundings and climate had been entirely different from those existing at present. The remains of plants upon which they fed and the southern contemporary shells which are also frequently found with the remains point to a sudden and wonderful change of climatic conditions.

If Professor Howorth's argument is to be given any weight, the Siberian plateau is one of the most recent fea-

tures in the known physical geography of the world. He figures that the plateau was suddenly raised to its present height, and that, prior to its sudden elevation, it was a warm stretch of lowland furnishing pasturage to thousands of mammoth brutes. The rapid elevation, according to his deductions, sud-

denly congealed the waters and froze the gigantic animal bodies through and through, thus preserving them intact until the present day. He says that unless these animals had been frozen im-

ALIGNMENT OF ROADS. Permanent Highways Should Confer the Most Good on the Largest Number.

No work looking to permanency should under any circumstances be done upon existing roads until the same have been newly aligned with due reference to grades, distances and drainage, straightening them whore deemed necessary, etc. This might probably lead to some trouble because of the opposition of citizens along the roads whose direction it is proposed to change. They of course have certain rights which the proper authorities would be bound to consider before ordering the change, but even if small amounts for damages should be incurred occasionally it is immeasurably better that the alignment should be most advantageously made, rather than that by reason of a bad location a constant tax be levied upon every traveler upon the road for all future time. Roads once located and improved be-

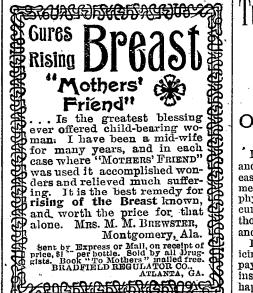

come to a degree permanent, and with every passing year become the more so by reason of residences and improvements that will certainly follow a good highway. Radical changes of large sections of existing roads will seldom be needed, and minor changes can be effected without undue cost.
