"All this seems strange to you." continued Holmes, "because you failed at the beginning of the inquiry to grasp the importance of the single real clew which was presented to you. I had the good fortune to seize upon that, and everything which has occurred since then has served to confirm my original supposition and indeed was the logical sequence of it. Hence things which have perplexed you and made the case more obscure have served to enlighten me and to strengthen my conclusions. It is a mistake to confound strangeness with mystery. The most commonplace crime is often the most mysterious because it presents no new or special features from which deductions may be drawn. This murder would have been infinitely more difficult to unravel had the body of the victim seen simply found lying in the roadway without any of those outre and sensational accompaniments which have rendered it remarkable. "Blest if I know," answered Hugh, wading his way out of a mudhole and shaking himself like a huge Newfoundland dog.

"Gents, I can guide you to a place of shelter," said a deep, hollow voice beside us. We both sprang back, for there, but a few feet away, steed a horse and his rider, the dark mass being partially distinguishable from the darkness of the night around.

That a herseman should be in a place where it was difficult for a pedestrian to get a seenre footing was strange enough in all conscience, but that he should have apparently risen up among us without any warning whatsoever was stranger still.

"Hew did you ever steer your horse down here?" I queried in a tone that I tried to make one of surprised pleasure, but miscrably failed in the attempt. "I have lived on the borders of this

moor all my life," replied the voice, "and my herse knows every foot of the way since he was a feal."

This explanation was satisfactory enough for men in desperate circumstances. Hugh and I thanked him for his proffered services and requested him to lead the way. We sought to obtain a glimpse of his features, but they were wrapped in the invulnerable gloom of the night.

As he passed I noticed that his horse was a very tall one and that its eyes shone through the darkness like the eyes of a gigantic cat, but with a far more uncarthly and ferocious light than that of the docile grimalkin curled up before the fire, speculating profoundly on the rise and fall of stock in the

> of the room a pillar of light seemed to descend from the roof to the floor. In the midst of the pillar was the upright form of a venerable old man. His head was thrown back, his long, white hair falling in a mass over his shoulders. His great beard covered his entire chest.

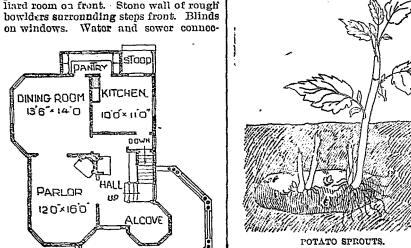

He was clad in an ox's skin, fastened by a hempen girdle. His bare arms, powerful and sinewy, were bound behind him to a shadowy stake, and his naked feet-merciful heavens!-were resting upon live coals of fire. On looking closer at the face I saw a look of hopeless, unspeakable anguish thereon. but not a moan escaped from the writhing lips. As I stood horror stricken, a sweet female voice roso and swelled in a weird wild chant of heart piercing sadness. The words were Gallic, but

the tones in which they floated through the silence of the room were the tones of a soul to whom hope is lost forever. As it ended, a mocking laugh rang loud cutside the window and was followed by a horse's neigh. We knew from the cold blast that rushed in that some one had opened the door. Simultaneously the specter disappeared. I felt an awe-

Diamonds are imported, as a rule, from South Africa, where as large and as fine stones are found as in all of the East Indies and Brazil, although many of the African diamonds are off color. They come to this country in the rough in all sorts of shapes and almost always uneven in shape. These lack entirely that luster which is the beauty of the brilliant and attaches to the name so closely, for it is the brilliancy and luster which make the diamond-most valuable, added, of course, to the fact of its hardness and consequent ability to take and keep a very high polish. By the process of "cleaving" the irregularities of the rough stones are chipped off, and

necessarily reducing to take the blemish out of, and thus increased its brilliancy

Less than 15 years ago two diamond cutters cut and finished all the rough diamonds which came to this market. In fact, there was not a sufficiency of work oven for these two workmen, for the brilliants were nearly all imported in a finished state, ready for sotting in any shape for the wearers. But the duties upon these became an important matter, as there was nothing to pay upon the rough stone, at least nothing to speak of, and the finished article cost high because of the demands of Uncle Sam. He argued that people who could

every step we sank above our boot tops and often almost to our knees.

A vivid flash of lightning shot across our way. For an instant the features of our mysterious guide and the form of his steed were revealed. He was half turned in his saddle and was glancing back at where we were floundering behind. His face was like the face of a skeleton covered over with tightly drawn skin, through which two malicious cyes gleamed with a vindictiveness that was startling in its intensity. Over his form and over that of his horse were cast some long robes that looked like the trappings of a funeral car, the horse's head being also enveloped, save for two eyelets, through which it surveyed us with the blazing eyes of an unbroken mustang. The rider wore a tall hat like those worn by our forefathers 100 years ago and with something fastened around the brim that I could

have sworn was a bow of crape. "For God's sake, stop, Hugh!" I cried, holding his arm. "Did you see that fellow's face? I do believe he is no living man. Not of our world anyhow." Hugh McClure was as practical a

Scotchman as ever failed to appreciate a joke or pass an examination in Edinburgh university.

Through the opaque night I could feel his withering glance of scorn as he made answer, "If you want to talk of ghosts in the middle of this God forsaken spot in this heaven condemned weather, you can do so, Percy, but you shan't have me for an audience." and he forged on, calling to our guide:

"In the name of the first pilot, how long will it he before you can steer us to the world again?"

The hollow voice came echoing back: "One mile to the right is a cottage where we can find shelter. Come on!" "A mile of this!" wailed Hugh. "Oh.

my sins have been many, but what I suffer tonight should atone for all!" We had, however, passed the worst portion of our journeying, and the foot-

ing now became more secure. Still the rain descended in sheets, and the wind blew with a force that ofttimes threatened to sweep ns off our feet.

Like a far distant star we at length saw a light ahead. It appeared, then disappeared, then appeared again.

"There is the cottage," said our guide. "We will reach it soon now." "What a mean fellow not to offer ns a lift on his horse!" grumbled Hugh.

"I certainly have enough trouble to keep my own footing not to have to guide a horse over these bottomless holes, but he might have been civi! enough to make the offer anyway."

We were now proceeding over the soft, damp turf of the moor, and I had frequently stopped from time to time to feel if the horse left any tracks behind him. Not the trace of a track could I find.

"Hugh," I whispered, "that horse is heaving no tracks behind him." "Do stop your ghost stories," said

Hugh impatiently. "Anyhow, restrain them until we get out of this lost part of Scotland." After half an hour's trudging we

stood before the cabin from whence the light had proceeded. It was a small, mad walled concern covered with a thick roof of thatch. Two little windows on either side of the narrow door had their shutters up, and through the jagged chinks the rays of a strong illumination within shone brightly.

"Go right in and make yourselves at home, while I take my horse to stable." said our mysterious guide as he turned off to the rear of the hut. We pushed open the door. The apart-

MET A BAD MAN IN TEXAS.

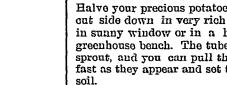

An Army Officer's Experience, Which Included a Drink of Poor Whisky. "Only on one occasion in my life have

I felt the need of a weapon," said an officer of the United States army. "I have never carried a gun, bat it has sometimes occurred to me that no man ought ever to be without one. One cannot be sure but that some time the weapon would save one's life. For instance, I will recite to you a little experience of my own. It was in a wild mountain region of Texas. I was riding along a lonely path, mounted on a government mule. Not a thing did I have on my person which could have been regarded by the most impoverished citizen as of value. Whistling as I went, I approached a large rock, about which

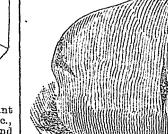

t e path ran to avoid a sharp ascent. Just as I reached it a fierce looking man rose out of the bushes and cried 'Halt!' "What could I do? Perhaps you will say that I ought to have charged upon him with my government mule, over-

powered him, taken away his arms and demanded why he should thus obstruct what was the best substitute available for a public highway. I did nothing of the kind. The only reason I can allege is that I was afraid. Such a method of dealing with highwaymen does well enough in story books, but in real life it is dangerous. Accordingly I obeyed the suggestion of the hold bandit and halted. For a moment my heart jnmped into my throat as I saw him thrust a hand

into his hip pocket. He drew from it something and pointed i at me point blank. I perceived that . . . something was not a pistol; it was a bottle-a large black bottle. Said the highwayman,

One house, bigger, barer and uglies than the others, was the voluntary prison of an old woman, who for five years had not allowed a human being to cross the threshold. Nobody thought her conduct odd or remarkable. I saw her once at the gate, and sho poured out a flood of meaningless babble in delight at the possession of a listener. Her words were inarticulate, just as sour beer runs, choking itself, escaping from an uncork-

tion is credited with the following: It is not advisable to sow white clover alone on land for hog pasture, but a mixture of several grasses, such as two bushels of blue grass, one bushel of orchard grass, one peck of timothy and four pounds of white clover seed. Sow this on three acres of ground, with a very light seeding of oats or barley, or, better still, without any grain at all. It is suggested that the land be not pastured until the sod is well formed, and if the grass runs up tall that it may be cut for hay. No stock should be turned in on the field until the second season,

the ground is dry. Thick seeding is urged.

The Indian Games.

The editor of Farm Poultry believes that the Indian Game, with the same care and attention, is just as hardy a fowl as a Plymonth Rock or Wyandotte could be, and more hardy than any other variety of Games. He says: Our experience with the Game family generally has been that they very readily caught colds, and were easy prey to roup. What little experience, however, we have had with the Indian variety has been to their credit in this particular. But, like all breeds, they must be properly cared for, or they will not remain in a healthy state. As layers they cannot, as a rule, equal the American birds.

For Better Roads.

The city fathers of Three Rivers, Que, have passed a bylaw obliging all dray teams to have tires 31/2 inches wide, instead of the 2 inches now in use. This bylaw will come into force in the spring of 1897. In the meantime any carter conforming to this rule will have his carter's tax remitted to him.
