

BINNS, OPPOSITE HOTEL, BUCHANAN.

SUNDAY SCHOOL EVANGEL. REV. O. J. ROBERTS.

Normal Sunday School Lesson. APRIL 5, 1896. Luke 12:32-30. Central text, Verse 30. Topic, Spiritual Herosim.

Lesson points: 1. The Jewish mind had been accustomed to the thought of a limited salvation; 'Salvation is of the Jews', was a national tenet. Jesus in his teachings, broadened the conception of divine love, showing that Jerusalem was no holier than Gerizem. The kingdom is spiritual.

2. The Master did not answer the question directly, but rather showed the importance of each one striving to enter in at the strait gate. Salvation is a personal matter. It is not for us to know what are God's purposes towards the world, but it is for us to determine purpose to be within the Kingdom.

3. A place in the Kingdom is important, because of the value of the soul. If men realized the value of the soul, they would see sin in a different light and would appreciate the worth of a salvation; saves the soul from sin. It is said that a diamond field was discovered in this wise. A traveler one day entered a valley and drew near to a settler's door, at which a boy was amusing himself by throwing stones. One of the stones fell at the stranger's feet, who picked it up, and was in the act of laughingly returning it, when something flashed from it which stopped his hand and made his heart beat fast. It was a diamond. How men trifle with the priceless gem—the soul.

4. The soul that enters the strait gate is truly heroic. He must needs leave all behind and expect many difficulties, ahead. The gate to life is narrow and difficult to enter. This is but the application of a law that obtains in all human experience. There is but one way hence, mark well the words, 'I am the way, the truth, the life; no man cometh unto the Father but by me.'

5. Many fall of entering. Will you be one of the number? Though the gate be strait and the way narrow, yet we may enter if we will. We ought to hasten to the city of refuge. Delays are dangerous. 'There is a tide in the affairs of men which, taken at the home flood, leads on to fortune; omitted, all the voyage of their life is bowled in shadow and miseries.'

6. Galien S. S. Convention. Galien township Sunday School Convention was held Sunday, March 23, at the M. E. church, Galien, Rev. S. L. Eorr, Vice President, presiding. We were not able to be present in the morning session, but a very interesting session was held, and many very practical questions discussed by the workers present.

7. The Field Secretary, accompanied by Mr. N. H. Culver, were present at the afternoon and evening sessions and took part in the work of the Convention. The fact that two brethren walked eight miles in order to be present at the Convention, has caused some Buchanan people to be very much 'exercised.' We have only this to say, that if some Christian people that we know of would go out of a Sunday afternoon, and help some weak school by their presence, and in other ways, they would not be so troubled with indignation.

8. Normal Study. Nature—Normal study gives us the elementary principles, an outline of facts, and shows how to apply this in a practical way. This study as applied to the Bible gives us an analysis of its contents and shows the best methods in teaching.

9. Purpose—To make intelligent, broad, well-grounded, logical teachers. There is nothing we know of more needed today, than Normal training for teachers.

Business Directory

CHRISTIAN CHURCH.—Sunday services: Preaching at 10:30 a. m. and 7:30 p. m.; Junior U. S. at 3:30 p. m.; Senior U. S. at 4:30 p. m. and 5:30 p. m. at 12:30 p. m. CEDAR POSTS

Now is a good time to make fences. The ground is soft. We have a nice lot of 7 ft. CEDAR POSTS that we are selling cheap.

Easter Kid Gloves and Millinery

WE ARE SELLING AGENTS FOR THE CELEBRATED P. D. GORSETS.

The best fitting Corset in the world. We always have in stock all styles of the FERRIS MAKE: GOOD SERVICE WAISTS for ladies and children. "P. D." Corsets and a full line of Warner's 444 and 323. We claim to sell you the best \$1.00, 75c and \$1 Corset in the market.

QUESTIONS

"Is that always a misfortune?" "Possibly not; but it seems so to me. It implies a surrender on the part of the husband, and that's a pitiable thing to contemplate."

"Do you think so? I should say that snuggler might be very noble under some circumstances."

"I can't imagine the circumstances. What are they?"

"His frank question drew him rather deep into the subject than he had meant to go, but he laid hold of his courage and spoke the thought that was in him."

"I mean when a man has been fortunate enough to find the one woman in the world whom he wishes to share all things."

"He did not reply at once, and when she did there was no sign that she had taken his answer in any sense other than as an abstract statement of fact."

"Even then I think you are wrong," she said. "It doesn't seem possible to me that any woman could accept such a sacrifice and retain her respect for the man who made it; don't it to you?"

"I had never thought of it as being a sacrifice. It is more like a part of the homage which a loyal subject would give freely to the one whom he had endeavored to love."

"She looked at him in doubt. 'I can never tell when you are in earnest and when you are trying to be satirical.'"

"Oh, I beg you to believe I wouldn't jest upon such a serious subject," he hastened to say.

"Then I can't understand your position at all. You—you write about women, and you don't understand them better than that?"

"I'm not sure about that. I think I can understand them better than you do. You don't understand—how much sectional feeling there is in the south."

"I know there used to be, but I thought it was a thing of the past, since the war."

"It is, in some senses, I suppose, and in others I think it is as strong as ever. My father fought for the south; and if you could know how strongly my sympathies are enlisted upon the side of some of the things which you speak of as dead issues, there would be only one word in your vocabulary that would fit me—an ugly little word of five letters."

"I hope I am broad enough not to repeat it," she said. "I think I can put myself in your place sufficiently to understand that there may be many and honest differences of opinion."

"It's right kind of you to say that—especially as you speak of the letter of the argument; though I'm not so sure about that either. It's one thing to starve people into submission and quite another to subjugate them."

"I believe I can appreciate that, too." "Neither of them spoke again for a few moments, and then Hester called his attention to a jutting crag projecting far out from the cliff-line at their feet. "Do you see that point over yonder to the right?" she asked.

"It has a name," and I was going to ask you if it has a name."

"It has; and it is called 'Tom's Jump.' It's not a very poetic name, and it could hardly be called a 'Lover's Leap,' although the story is a dreadful enough."

"It's short and quite prosaic. There used to be a moonshiner's still somewhere in this neighborhood, and one of the men was young Tom Cragin, the son of the moonshiner who owned the still. One day the revenue men were trying to arrest the party, and they chased young Cragin out into this road. He ran down that way, and two more officers came out into the road ahead of him. When he saw he was surrounded, he climbed out to the point of that rock and flung himself down."

"Ringbrand looked surprised. 'I didn't know the penalties were severe enough to warrant a man in doing that,' he said."

"I'm not sure that they are," replied the girl, "though a long term in the penitentiary is hard enough after the free life of the mountain. But in Cragin's case I think there were other things; there was a long story of bloodshed and violence leading up to the tragedy, and perhaps he had reason for fear something worse than a prison. You don't know anything about the early history of these mountains, do you?"

"Ringbrand, she added, turning her horse's head homeward. 'Nearly every family in the neighborhood is or has been mixed up in some dreadful trouble; even our own has not escaped.' She did not offer any further explanations as they rode back to the 'Laurels,' and Ringbrand felt instinctively that it was a matter about which he could not ask questions. What she had said, however, made him thoughtful."

"I'm not so sure about that. I think it would be better to accept them as equals, without regard to class, whether we want to or not."

Michigan Melange

Important Happenings of the Past Few Days Reported by Telegraph and placed in Type for the Convenience of Our Own People—State News Notes.

ANN ARBOR, Mich., March 28.—The first intercollegiate debate between the universities of Michigan and Chicago was witnessed by about 600 people, and resulted in favor of the three representatives of the University of Michigan. General Russell A. Alger presided. The judges were P. E. Ballentine, of Oberlin college; H. W. Compton, superintendent of the Toledo schools, and Judge McClain, of Ann Arbor, Ind. The question was "Is the principle of a graduated property tax one which should be adopted by the states?"

Charles J. Vert, of Morristown, N. Y.; Edmund Block and Paul Y. Allright, spoke in the affirmative for Michigan's cause. James P. Whyte, Wesley C. Mitchell and L. B. Vaughan contested for Chicago in the negative, and Vert closed for Michigan. The debate lasted about twenty minutes and their markings gave Michigan the victory with thirty-five points to Chicago twenty-seven.

ICE BOAT WRECKED. A Number of Actors and Actresses Narrowly Escaped Drowning.

ST. IGNACE, Mich., March 26.—A party of Joseph Stappins' Company spent last Sunday morning on the water straits in order that they might attend the iceboat regatta at Mackinac Island. They were accompanied by their band, and engaged the big iceboat O. E. J. W. A favoring wind sent them along with great rapidity for about a mile, when the left runner of the iceboat struck an open crack. In a minute the boat was smashed to kindling wood and the crack in the ice, opened a deep chasm into which the boat and the passengers on board.

With their heavy winter wraps the party was powerless in the chilling water, and had but a few minutes to wait before other boats and St. Ignace's majority of the party would have been rescued. It was a half score of them were bruised and battered and many of them so chilled by being in the icy water nearly ten minutes that doctors' services were required. The iceboat was totally wrecked, and the miracle is that any escaped from the disaster alive.

MISS SPARROW COMMITTED. The Examining Commission Decides She Is a Paranoiac.

LANSING, Mich., March 28.—The commission appointed to examine into the mental condition of Miss Henrietta Sparrow, sister of Edward Sparrow, the millionaire, was held today at the residence of this city, Wednesday certified she was a paranoiac and should be restrained. Acting on this certification Probate Judge Cowles ordered Miss Sparrow committed to the Michigan asylum. Notice of appeal was given at Lansing.

YOUNG COLLEGE STUDENT DROWNED. Whole Party Comes Near Death While Skating on a Michigan Lake.

OLIVET, March 23.—A party of Olivet college students was skating on a Michigan lake, when the ice broke and led them into the icy water. A. M. Finney, of Chicago, was drowned. Miss Albin Chapman, of Port Huron, was taken from the water after floating nearly an hour fastened to a rail. A dozen of the party plunged in at different times in vain efforts to help their drowning companions, but were obliged to give it up because of the cold. At last a boat was secured and pushed out to the stragglers, who were rescued within two hours of the time when the murder was committed; and while the distance from the head of the cove to Tregarthen by the road leading past the 'Laurels' is only three miles, it is six by the water, but the party managed to avoid meeting the searching party. This, and other facts, might have been brought out in a trial, but the Byrnans were unpopular and their feud with the Laurels was well known. The news of the squire's death spread rapidly through the valley during the day, and at night an armed mob broke into the jail and secured the hapless prisoner, who was hurried to the scene of the murder and hanged to the nearest convenient tree.

With the death of John Byrnun the feud smoldered for several years. His only brother, Jed, who was absent at the time of the lynching, moved to the Laurels, and the Byrnans, and there were left only the widow and her four children on the small farm in the cove. It is to be supposed that the woman, who was a Byrnun by blood was a devoted mother, and she would teach her children the catechism of vengeance; but, however this may be, hostilities were renewed as soon as the boys were old enough to follow in the footsteps of their elders.

Robbed by Masked Men. NILES, Mich., March 30.—Masked thieves Friday night entered the home of N. L. Sardin, aged 90 years, who lives near Paw Paw, and after binding and gagging him and his son, ransacked the house, securing \$400. The thieves left their victims helpless, in which condition they were found in the morning by neighbors. Sardin was robbed several years ago in a similar manner.

Intercollegiate Debate. ANN ARBOR, Mich., March 30.—The first intercollegiate debate between the Universities of Michigan and Chicago Friday was witnessed by about 600 people, and resulted in favor of the three representatives of the University of Michigan. General Alger presided. The question was "Is the principle of a graduated property tax one which should be adopted by the states?"

Big Strike of Shipbuilders. WEST BAY CITY, Mich., March 30.—Four hundred men employed in the shipyard of Wheeler & Co. went on strike Saturday morning against the check system of payment. The firm gave as their reason for raising the system the increased wages and danger of transporting \$3,000 every day. The strikers are now holding a meeting to discuss the situation.

New Base Ball League Organized. JACKSON, Mich., March 28.—An interstate base ball league, consisting of clubs in Jackson, Saginaw, Port Huron, Toledo, Port Wayne and Terre Haute, was organized this city last night. The organization was adopted and organization completed. The season will open May 4. A meeting of directors will be held in Detroit, April 1.

Lost His Money Speculating. DETROIT, March 21.—William B. Streibinger, a commission merchant, whose place of business is at 29 Euclid avenue, Cleveland, committed suicide in this city. He was found dead in a room in the Reuvelo hotel. Mr. Streibinger was a well-to-do man, and his death was a great loss to the community. He had a note addressed to his wife at 1045 Superior street, Cleveland, in which he had his family goodby, after stating that he had spent all his money in speculation.

Shipyard Strikers Declared Off. BAY CITY, Mich., March 31.—The strike at Wheeler's shipyard has been declared off, the men finding that Wheeler & Co.'s checks were just as good as cash everywhere.

State Notes. William Robinson, aged 30 years, slotted through an ice hole near Potoskey, Mich., and was drowned.

Francis Johnson, a school teacher at Washington, Mich., gave Frank Aubrey, a business man, Wheeler's ride on one of the principal streets. It was the way she earned 25 cents for an experience ride.

Charles Northrup of Saginaw, Mich., was sentenced to four and one-half years in the Ionia state house of correction by Judge Kendrick for a murderous assault upon Fred Treatwell with a shotgun early last fall.

A List That Might Be Extended. A Skates That Never Laureate, nor Milton, nor Pope, nor Crabbe, nor Burns, nor Byron, nor Shelley, nor Coleridge, nor Keats.—Edinburgh Scotsman.

"The centipede is happy quite, Until the frog, for fun, Said, 'Frog, which leg comes after this?' The frog lay stretched in the ditch, Considering how to run."

QUESTIONS

"Is that always a misfortune?" "Possibly not; but it seems so to me. It implies a surrender on the part of the husband, and that's a pitiable thing to contemplate."

"Do you think so? I should say that snuggler might be very noble under some circumstances."

"I can't imagine the circumstances. What are they?"

"His frank question drew him rather deep into the subject than he had meant to go, but he laid hold of his courage and spoke the thought that was in him."

"I mean when a man has been fortunate enough to find the one woman in the world whom he wishes to share all things."

"He did not reply at once, and when she did there was no sign that she had taken his answer in any sense other than as an abstract statement of fact."

"Even then I think you are wrong," she said. "It doesn't seem possible to me that any woman could accept such a sacrifice and retain her respect for the man who made it; don't it to you?"

"I had never thought of it as being a sacrifice. It is more like a part of the homage which a loyal subject would give freely to the one whom he had endeavored to love."

"She looked at him in doubt. 'I can never tell when you are in earnest and when you are trying to be satirical.'"

"Oh, I beg you to believe I wouldn't jest upon such a serious subject," he hastened to say.

"Then I can't understand your position at all. You—you write about women, and you don't understand them better than that?"

"I'm not sure about that. I think I can understand them better than you do. You don't understand—how much sectional feeling there is in the south."

"I know there used to be, but I thought it was a thing of the past, since the war."

"It is, in some senses, I suppose, and in others I think it is as strong as ever. ABSOLUTELY PURE

ESTATES PAY WAR TAX

The Cuban Censeros, Issues a Proclamation.

INSURGENTS STRONG IN MEMBERS.

No Bandits or Outlaws Have Any Connection with the Cuban-Spanish War.

WASHINGTON, March 31.—An opinion was rendered by the supreme court Monday in the case known as the "Cuba and short haul case," involving the validity of the provision of the interstate commerce act prohibiting a higher charge for a short haul than for a long haul, applied to the decision of the circuit court of appeals for the fifth. The appeal was taken by the railroad.

TERRIBLE REVENGE.

ATTEMPT TO SLAY AN ENTIRE FAMILY IN OHIO.

Alvin M. Stone and Wife Murdered in Their Beds, Recently by a Man Whose Name Was Instrumental in Sending to Prison-Colored Woman at Springfield, O., Murder Her Husband.

AKRON, O., March 30.—A double murder of a man and his wife, who were the parents of the country for atrocious brutality, was committed near the village of Tallmadge, six miles from here, early Sunday morning. Oliver M. Stone, a wealthy farmer, and his wife, Serena, aged 60, were backed to death by some unknown assassin. Mrs. Stone's daughter, an employe of Stone, lies at the point of death as the result of injuries received at the same time. The assassin's daughter, the father of the farmer, were also attacked and two of them seriously injured.

She awoke and screamed. This brought her sister, Marie, to the scene and she was the only one who escaped. She was in bed with a hatchet. He turned to the upper floor, he attacked Wilson in his sleep and passed on to the chamber occupied by Ramon, the husband of the murdered woman.

REED DELEGATES CHOSEN.

Republican Territorial Convention at Oklahoma City, O.

OKLAHOMA CITY, March 30.—The Republican territorial convention which met here to elect delegates to the St. Louis convention brought to a bitter struggle here the Reed and McKelney factions. The Reed men are claiming a victory. However, Reed was not endorsed for the presidency in the platform adopted, and the Reed victory is limited to the voting down of resolutions endorsing McKelney as a delegate to St. Louis, and the election of McKelney as a delegate to the national convention.

MURDERED HER HUSBAND.

Bloody Work of a Colored Woman at Springfield, O.

SPRINGFIELD, O., March 30.—Arthur Wilson, a well-known and highly respected colored man, was murdered by his wife Sunday evening. The only witness to the deed was Mrs. Blain. About 9 o'clock, according to Wilson's auto-mortem statement, he told his wife that he would not be home until 11 o'clock. She then went to bed. She then wrapped herself in a blanket, climbed out of the window and ran to a neighbor's house. When the murderer came back to the house, she had done and had killed her husband.

SPANIARDS FIRED UPON AN AMERICAN SCHOONER WITHOUT CAUSE.

JAMAICA, March 30.—The American schooner William P. Hunt, carrying 150 miles south of the Isle of Pines, her captain reports to United States Consul Eckford, when she was fired on by Spanish gunboats. Captain Campbell, her master, did not at first realize the importance of the incident and only reported the outrage when the vessel was on her way to Cuba in the last of the month.

SPANIARDS ON THE DEFENSIVE.

NEW YORK, March 31.—Robert Rappley, the Cuban war correspondent of The Mail and Express, who was recently expelled from Havana, arrived in New York Monday on the steamer Yucatan. Rappley said: "The Spanish are now on the defensive. Every battle fought in Cuba in the last thirty days has been won by the rebels. The rebels have more ammunition now than they ever had and if they can maintain a source of supply they will be able to continue to prevent them from winning. General Vejer has been Spain's greatest mistake in the war."

WRECKER ASKS FOR MORE TROOPS.

MADRID, March 30.—A dispatch from Havana to the Associated Press says that Vejer has asked for 40,000 more troops, and that he has also asked for more money. The dispatch says that the Spaniards have defeated the rebels under Masco at Tenacious Gunnes, killing several of the latter and capturing several of the latter's arms.

RANK OF LIEUTENANT GENERAL.

WASHINGTON, March 31.—The letter of Secretary Lamont to General Hawley, chairman of the committee on military affairs, disapproving the bill to revive the rank of lieutenant general of the army was made public Monday. The bill was known as intended to confer the rank on General Hawley, who is commanding the army, though his name is not mentioned in the correspondence. He says: "Noting that the grade of lieutenant general has only been conferred on a few of the great military geniuses and most conspicuous leadership the conclusion is reached that whatever the merits and promise of any general, it is not an honor who as yet have had no opportunity to demonstrate their genius and capacity as commanders in the field, by the measure heretofore required, the existing conditions do not demand its revival at this time."

CONSIDERATION FOR HIS MOTHER.

SIoux CITY, Ia., March 31.—That his mother might not be compelled during his trial to hear the story of his life, William P. Royce, who murdered Neville Patten in a resort in this city last November, changed his plea of not guilty to guilty of murder in the second degree. The county attorney having consented to the change in the charge, which was originally murder in the first degree, the jury is expected to show that he was temporarily insane. They protested against his admission of guilt. Sentence will be passed April 8.

ASSAULTED AN AGED WOMAN.

ST. JOSEPH, Mo., March 31.—Louis Keller and wife are under arrest on the charge of assaulting the aged grandmother of Mrs. Keller, knocking her down and breaking several of her bones. The injured woman is Mrs. Mary Beupers, aged 81, and wealthy. She says the couple assaulted her without cause, and the physician believes that Mrs. Beupers' injuries will prove fatal. The Kellers deny the charges and say the injuries occurred through a fall. They are held to consider the matter of Mrs. Beupers' property.

TRIED TO MURDER HER.

Nicholas Haan of Crown Point, Ind., becomes a suspect in the murder of his wife. Crown Point, Ind., March 30.—This city is worked up to a fever heat over the brutal attempt to murder Mrs. Nicholas Haan, made by Albert Knuss, a farm hand. The crime was witnessed by the 65-year-old husband, who is supposed to be the instigator of it. Both men are under arrest and the jail is being closely watched to prevent mob violence. Mrs. Haan is considerably the junior of her husband and married him five years ago for his money. Knuss scoured her in Chicago and was given \$300 for the job. She is in a precarious condition and will probably die.

SHOT BY HIS WIFE.

SAN FRANCISCO, March 31.—As John Martin, driver of a patrol wagon, was sitting in the wagon in front of police headquarters Monday, his wife came up with a pistol. He will probably die. Mrs. Martin gave as a reason for the shooting that Martin had not been home for several nights and was drinking hard. She added she was tired of his neglect and determined to punish him. She shows no regret for the shooting.

OXFORD WINS THE RACE.

FURBER, Eng., March 30.—The Oxford crew, the victors of almost every body ashore and about Saturday won the fifty-third boat race between the universities of Oxford and Cambridge by about a third of a length and after a most exciting finish. Thus Oxford has won thirty races of the series to twenty-two won by Cambridge, the best heat of 1877 making up the total number of races pulled. This is the seventh year in succession that Oxford has defeated Cambridge.

FRENCH MINISTER RESIGNS.

PARIS, March 30.—M. Barthole, minister for foreign affairs, has resigned on the ground of ill health and family reasons. The premier, M. Bourgeois, has succeeded M. Barthole as minister of foreign affairs, and M. Doumer, the minister of finance, will take the place of M. Barthole as minister of the interior, previously held by M. Bourgeois.

LONG AND SHORT HAUL.

Validity of the Interstate Commerce Clause Upheld by the Supreme Court. WASHINGTON, March 31.—An opinion was rendered by the supreme court Monday in the case known as the "Cuba and short haul case," involving the validity of the provision of the interstate commerce act prohibiting a higher charge for a short haul than for a long haul, applied to the decision of the circuit court of appeals for the fifth. The appeal was taken by the railroad.

FLATS AND BOXES.

For Starting Seedlings—The Compartment Flat and How to Make It.

Most gardeners understand the convenience of the common flats used for starting all kinds of seedlings, also much used for transplanting and growing the plants until ready to go in open ground. A gardener who has given the compartment or divided flat a thorough trial tells in American Gardening that he has greatly reduced errors in many passages by preferring it to the ordinary tray, or even pots. He says:

You can purchase lumber, inch and half thick, and make entirely new, or you can use old boxes and make an assortment of boxes at any store (soap boxes are good); take their inside measurements, in order to cut various sizes to advantage. Mark around box depth of pot desired with pencil and straight edge, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom and divisions. The bottom, Fig. 2, should be of one or two pieces, and saw carefully to make a knock off lid and bottom, and you have simply a frame of ends and sides as in Fig. 1. Across the bottom, at each end, nail inch pieces, in from the ends, and you have a frame (see Fig. 2) in which you can slip fingers under ends when lifting. Use half inch stuff for bottom
