BUCHANAN RECORD.

VOLUME XXX.

BUCHANAN, BERRIE COUNTY, MICHIGAN, THURSDAY, JANUARY 21, 1897.

NUMBER 52.

On the Death of an Infant.

Alas, the child is dead! Oh, sorrow for the dainty head That used to keep his mother's breast And bow the smiling mother's arms And now the chilling earth instead Must hide, for he is dead.

THE LOST EMERALD.

Madame always wore it upon the third finger of her right hand—a large emerald set round with pearls. She used to say it had a snakey look, and she hated it. The stone had once belonged to some member of a royal house and was well known to connoisseurs. It had been bought by her father, and she had worn it with pride.

NEWS OF THE STATE.

REFORM LEGISLATION IN KANSAS.

Topeka, Kas., Jan. 19.—The present legislature, which is strongly Populist in its make-up, is being fed with a flood of bills touching innumerable subjects. A bill to mark convict-made articles has been introduced, and will be followed by others providing that inmates of the penitentiary be divided into lots, a large number to be taken to western Kansas to dig irrigation ditches, others to be assigned to eastern Kansas to build roads; others to raise farm products for the state institutions, and the vicious ones to break stock in the penitentiary, to be used in building state macadamized roads.

RECALLING IN AN INDIANA COUNTY.

Recalled by the Recent Whitecap Threats Near Chesterfield. Chesterfield, Ind., Jan. 19.—The post and signs of "fire signs" written in red ink and signed by "John Doe" and "John Smith" recalls the depredations committed by the whitecaps in this vicinity until Stinson and Davis, the alleged leaders, were sentenced to prison two years ago. The offenses ranged from the killing of a man, to the burning of a house, and to the illustration of the barbarous cruelty and inhumanity, two men were riding in an open vehicle on the Middletown road, when they were seized by a gang of outlaws were sentenced it was hoped that this community would be permanently rid of such lawlessness.

ATTEMPT TO ABDUCT A GIRL.

Dastards Who Would Look Well Behind Prison Bars. Indianapolis, Jan. 19.—The Misses Cora and Ollie Offenbacher, highly respected young women near Mount Carmel, Hancock county, have been anxiously watching for a girl named Cora, who has been missing since she was last seen in the city. The girls were taken to a place near the town of Mount Carmel, and were held there for several days. The girls were taken to a place near the town of Mount Carmel, and were held there for several days.

NEGRO LYNCHING IN MISSISSIPPI.

Columbus, Miss., Jan. 19.—Meagre particulars of a lynching which occurred here on Saturday night, Jan. 17, reached here yesterday. One day last week Peter Henderson, colored porter at the Hotel Hamilton, was taken to a place near the town of Mount Carmel, and were held there for several days. The girls were taken to a place near the town of Mount Carmel, and were held there for several days.

ALLEGED MURDERER ARRESTED.

Terre Haute, Ind., Jan. 19.—William Gaynor, arrested at Paducah as one of two men who had been accused of the murder of a woman, was brought here Sunday. At first he said his name was Miller, and that he had been in the city for some time. He was taken to a place near the town of Mount Carmel, and were held there for several days.

REPORT OF A RAILROAD RECEIVER.

Indianapolis, Jan. 19.—George T. Jarvis, receiver of the Louisville, Evansville and Nashville railroad, filed a report of the business of the road up to May 1, 1896, in the federal court yesterday. The total liabilities of the road were \$560,000, and the assets were \$1,078,825, the calculated cost of the road, and \$1,215,254.84, the cost of the equipment, leaving an excess of liabilities over assets amounting to \$537,474.74.

HE WAS TRAINING.

One of the oddest little recollections of training which come to mind at this moment is that concerned with Henry J. Jivins, who was training for a long time in the city of Little Rock, Ark. He lived at Little Hooping, O. on the Short Line. The Short Line only ran one real, true blue and bona fide passenger train a day on that division, and it was the last train to be run by the company. The train was run by the company, and it was the last train to be run by the company.

STARTLING TUNOR ABOUT THE CZAR.

London, Jan. 19.—The Daily Mail's dispatch from Vienna says that starting rumors are current that the czar and his family are suffering from indications of poisoning, but the only ground for them seems to be that extensive work has been done in the kitchen of the winter palace.

SON TO THE CONTESTANT CASTLE.

Paris, Jan. 19.—The Countess Castiglioni, formerly Miss Anna Gould, gave birth to a son at noon Monday. Mother and child are doing well. Miss Gould was married to Count Castiglioni on March 4, 1885.

FIVE BOYS BURNED.

Dallas, Tex., Jan. 18.—A portion of the Buckner's orphan home, in the suburbs of Dallas, was burned to the ground by a fire which broke out on Monday night. Five boys were burned to death and a number of others injured.

FOUR YEARS FOR POSTMASTERS.

Washington, Jan. 19.—The senate committee on judiciary has reported favorably the bill introduced by Senator Hill fixing the term of postmasters for four years.

PARIS ADMIRES HER.

The French Capital Reverses the Newport Verdict on an American Woman. Mrs. De La Mar is said to be the most admired American woman in Paris. The Frenchmen simply rave over her. Captain and Mrs. De La Mar have secured a fine hotel at 89 Avenue Niel, in Paris, where they will live during the ensuing year. Mrs. De La Mar is now 22 years old, has a profession, is a fair hair, regular features and a perfect complexion.

CONFERENCE OPENED.

Resque Scenes Attend the Formal Ceremonies.

BIG CROWDS WITNESS THE EVENT.

"Beef Eaters" Attired in Quaint Costumes with Elizabethan Collars. Go Through the Formality of Searching for Gunpowder Mines. Common Summons Amid Clanging of Bells to Hear the Queen's Speech.

London, Jan. 19.—(Copyright, 1937, by the Associated Press.)—The third session of the Fourteenth parliament was formally opened by royal commission at 2 o'clock Tuesday afternoon. The function was observed with all due and customary ceremony. Early in the morning a strong detachment of police moved down White hall and stationed themselves at various points in the route to the house of parliament. Early in the morning a large crowd had already assembled. The people filled the space between Westminster bridge and the abbey, hung in groups about the stone railings surrounding the abbey and on the street facing it. Shortly after 9 o'clock a body of yeomen of the guard, commonly known as "beef eaters," attired in their quaint costumes of bonnet, leather jerkin, and sword and halberd, carrying short swords and halberds, arrived at the door of the house. They were accompanied by a police band and went through the formality observed ever since 1605 of searching for a gunpowder mine in the vaults of the house.

At 10 o'clock the speaker, Lord Bessborough, and 12 o'clock the corridors were filled with groups of members and their constituents and a scene of great animation. Most of the Irish members took place on the cross-benches. John Dillon took the lead in the debate on the bill for the gangway. Shortly before 3 o'clock the speaker came in and was cordially greeted by numerous friends. The speaker then read the queen's speech. The speaker then read the queen's speech. The speaker then read the queen's speech.

THE SOOTY PETREL.

A Fish Eating Bird That Is Deemed a Delicacy In Australia.

Tastes differ in different latitudes, even among English speaking people. Imagine Caucasians dining on salted petrel, and with a relish, too, as though fish eating sea birds were a luxury. Of all the birds of the sea, the sooty petrel is considered quite so worthless as the sooty petrel. Even the sea gull has his usefulness as a scavenger on the bays along the coast, but the petrel is truly a delicacy in Australia.

It is different in Australia. In it the cold winds that blow up from the antarctic regions or the hot air that sweeps down from the equator? No matter what the cause, the fact is that the appetites of Australia are radically different. The sooty petrel is there an edible fowl, with a decided market value, and a number of men and small craft are employed each year in catching, salting, packing and carrying it in great quantities from the rocky coasts of Trefolli island and other adjoining islands on the north coast of Tasmania to Stanley and Melbourne.

Mutton birds is the general name given to the mutton birds, the men and ships engaged in the business are known as mutton birders. To Americans this is quite a novel industry, and the fact that such common sea birds as the petrel are packed and salted down like so much goods is always a matter of surprise to strangers who go there. But the best of the pudding is in the eating of it, and those who have dined off mutton birds instead of land mutton pronounce the one every bit as good as the other.

Two Ballots Taken in the Republican Caucus Without Result.

Springfield, Ills., Jan. 19.—After taking two ballots without choosing a nominee for United States senator, the Republican joint caucus in the city of Springfield, Ill., adjourned to 8 o'clock Tuesday evening. The first ballot resulted: Mason, 48; Corcoran, 39; Hill, 12; Hays, 10; Cannon, 10; Allerton, 1; Adams, 2; Cannon, 10; necessary to a choice, 61.

Book Thief Searched.

Boston, Jan. 19.—Carl E. Christensen, who claims to be a professor at Waterloo college, Waterloo, City, Ia., has been sentenced to serve three months in the state penitentiary for stealing books from the Boston public library. Christensen was arrested here Sunday, and in his apartment was found a large number of books bearing the stamp of the public library of Hartford, Conn.

Money Convention's Plan.

Maintain Gold Standard, Retire Notes, and Enlarge Banking System.

Indianapolis, Jan. 15.—The monetary convention adjourned Wednesday afternoon after laying down as general principles of currency and banking reform that:

1. The present gold standard should be maintained.

2. Steps should be taken for the gradual and steady retirement of all United States bonds.

3. Banking system should be provided which will furnish the means of circulation of the country and supply an elastic circulating medium.

They occupied the seats opposite me in the railway station. There were four men and one little woman and one very little sick baby. It was not hard to see where the interest of the group centered itself. The young father himself was scarcely more solicitous for the infant than was each of the other three brothers. It was quite evident that the heart strings of five people lay loosely in the thin, nervous hand of that young one.

They were going west. So the pincers said which were pasted on the forehead of the baby. The baby lay motionless upon a pillow. It was evidently just snatched from the jaws of death. The eyes were closed, the face emaciated and the hair matted. The young father himself was very pretty, despite the dark circles under her eyes, and very young—about 18. The baby on his very lap lay upon his knees.

DIED FAR FROM HOME.

MINISTER WILLIS PASSES AWAY AT HONOLULU.

All Flags in Honolulu Hoisted at Half-Mast and the Citizens Mourn for the United States Minister—The Remains to Be Brought to This Country for Interment.

San Francisco, Jan. 18.—The steamer Monowai, which arrived at midnight, brought advices from Honolulu to the effect that United States Minister Albert S. Willis died at 9:30 a. m. on Jan. 6, after an illness covering several months, resulting from an attack of pneumonia he suffered while on his vacation to the United States. In April

last the minister and family left Hawaii for a visit to their old home at Louisville. While in San Francisco on the return trip the minister contracted a severe cold, which settled upon his chest. This was the immediate cause of his death. Soon after the death of the minister all the consular, government and shipping flags were lowered at halfmast. Expressions of regret were general, and the wife and son have the sympathy of the whole community.

Funeral services were held at the Central Union church at 3 p. m. on Jan. 7. Rev. N. P. Biernis, pastor of the church, officiated. The funeral was held at 10 o'clock on Friday morning. Captain Maland, of the McKinley household, met him at the station.

ISLAND OF JAMAICA.

THE COLORED PEOPLE GREATLY OUTNUMBER THE WHITES.

The latter, Are Being Rapidly Crowded Out—Tropical Fruits and Vegetables. Character in a Barber Shop—Signs of Progress from the United States.

I found myself in a great, shadowy, rosy hotel, with hard wood floors and furlongs of veranda, giving on a garden which had great lawns, to seed, but containing many trees and an assortment of lizards, green and brown, in agreeable confirmation of the propriety of the equator. Roundabout this hotel and its environment we wandered all day. There were oranges, bananas and several other fruits which I do not specify only because I am still unable to recollect their names. As to their flavor, I can only say that I do not care much for it as yet. There was one that tasted like butter and another that had the consistency of cream cheese and the taste of strawberry jam.

On the whole, the flavor of these oranges is not so good as that of the visitor as insipid and too sweet and makes one understand why Englishmen always hanker after curries and the like sharp condiments in the tropics, but no doubt we are sophisticated and wrong in our opinion. Meanwhile the oranges, bananas and pineapples are all much better here than they ever are after enduring export.

As for the breadfruit and yams, of which we also had specimens, they are a mixture of the potato and the sweet potato and are less captivating than either. I should suppose that one finally weary of the whole community, would not so soon after killing to have lost its toughness. But one does not expect to eat breadfruit in the tropics, but rather in their element in the tropics, especially that superior order of them who favor that part of the vegetable kingdom which grows above ground. The country women, who walk 15 to 25 miles a day in the sun with burdens on their heads, eat breadfruit, and who are never in the least tired—these ladies, it appears, live on fruit and yams only and find them all sufficient diet.

After dinner I went into a barber shop and had my hair cut. The barber, who was a colored man, was very friendly and showed me a number of photographs of his friends. He was very friendly and showed me a number of photographs of his friends. He was very friendly and showed me a number of photographs of his friends.

WINTER HEAVING.

Early Plants Injured by Alternate Freezing and Thawing—The Remedy.

In the accompanying sketches from American Gardening, A represents a young perennial plant at the beginning of its first winter in the open ground. The line A may represent a substance that serves as a winter protection to the young plant, but that substance snow or some cover supplied artificially. If the cover be snow, that is the most perfect of all substances for plant protection. Covered continuously from the first fall of the feathery substance after summer until it clears away the following spring or early summer, the root comes through safely, defying the severest cold. But in sections provided with no winter covering except snow at varying periods how is the hardy plant here placed in jeopardy? This is shown by B and C, which set forth the process of plant injury by the heaving of the soil.

In the figure B is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure C is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure D is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure E is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure F is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure G is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure H is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure I is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure J is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure K is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure L is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure M is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure N is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure O is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure P is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure Q is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure R is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

In the figure S is supposed to show how the soil and plant of A is raised by the heaving of the soil. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it. The soil is raised, and the plant is raised with it.

FEEDING NEW CORN.

As for Rubinstein's "Ivan the Terrible," I am sure that the real trouble lay in the introduction of Ivan on the stage.

So common are outbreaks of disease among swine after the feeding of new corn begins that many claim this as one of the chief causes of hog cholera. All admit, writes a contributor to the "Breeder's Gazette," that derangement of the digestion is a prolific source of disease. The careful feeder makes changes in feed very gradually. It is not uncommon for farmers to feed out the last ear of old corn and then haul in a load or more of new corn and begin to feed it in the same quantities. The stock never refuses it. They like the change. But colic or indigestion follows such radical changes. Before the old corn is gone is the time to begin to feed new.

If one finds his stock of old corn getting low, he may safely supplement it with the new, provided that when he begins first to use new corn the major part of the feed is old corn. Where we have made the change gradually, taking the new corn in small quantities, we have never found that any trouble followed.

There is one precaution, however, that is necessary. The new corn must not be thrown into a pile so as to heat. It should be stored in a well-ventilated place that upsets the digestion of even a hog. When hay, oats or corn has passed through the sweat that occurs after it is put in bulk, the feed seems to be more wholesome. Just why, we hope some chemist will tell us. If swine growers must feed new corn early, we have never found any trouble in changing from clover to corn when we began by cutting up the corn and feeding the entire plant. The feeding may thus safely begin when the ear is in the milk stage, provided there is a moderate amount feed at the start. Nor is this time of beginning on the green corn objectionable or wasteful. Usually the clover makes a good start, and the leaves and stalks become scarce. The hogs eat the ear, cob and stalk at first. As the corn hardens and the stalks become more fibrous the quantity of corn must be increased. By the time the ears are small the hogs will have come to gradually from clover to corn rations that they can safely be fed all they will eat up clean.

Feeding new corn on the stalk at the start is the safest and most economical way to begin unless one is ready to "hog down" the corn. This, however, should not begin until the corn is mature, as the waste will be so great while in the roasting ear that it pays to cut the corn at that stage and feed it on the clover pasture in such quantities that they will eat up clean. After the stalk is too dry to eat and the grain is out of the milk, or will shell, hogs will harvest the crop more economically than it can be done by hand or by the improved corn hunker. With corn so cheap and the weather not so wet as to injure the land or destroy the corn by tramping in the mud "hogging down" corn is not a wasteful way of harvesting the crop. It is more economical to have small fields or to fence off a portion of a large field so that the hogs can be changed to fresh corn as the fattening advances and let the store pigs and sows clean up after the feeders. Hogs on corn require an abundance of water conversely, and will not do well if they are "off" corn without abundant and good water.
