

BUCHANAN RECORD.

VOLUME XXXV.

BUCHANAN, BERRIEN CO., MICH., THURSDAY, JUNE 13, 1901.

NUMBER 19.

REJECTS THIRD TERM

President McKinley Regrets That the Suggestion Has Been Brought Forward.

WOULD DECLINE A NOMINATION.

Mrs. McKinley Visited by Members of the Cabinet—In Much Better Condition.

Washington, June 11.—The following statement has been given out at the White House:

"I regret that the suggestion of a third term has been made. I doubt whether I am called upon to give it notice. But there are now questions

WILLIAM MCKINLEY.

of the gravest importance before the administration and the country, and their just consideration should not be prejudiced in the public mind by even the suspicion of the thought of a third term.

Would Decline Nomination.

"In view therefore of the reiteration of the suggestion of it, I will say now, once for all, expressing a long settled conviction, that I not only am not and will not be a candidate for a third term, but would not accept a nomination for it, if it were tendered me.

"My only ambition is to serve through my second term to the acceptance of my countrymen, whose generous confidence I so deeply appreciate and then with them to do my duty in the ranks of private citizenship.

"WILLIAM MCKINLEY."
"Executive Mansion, June 10, 1901."

MRS. MCKINLEY RECEIVES.

Members of the Cabinet Visit Mistress of White House.

Washington, June 11.—One of the prettiest functions that have been held in the White House in a long time was the unexpected visit of all of the members of the cabinet who are in Washington to the executive mansion and their subsequent visit to the chamber where Mrs. McKinley has been confined since her return from the Pacific coast. The president during the past two days had communicated to the various members of his cabinet the reports of the attending physicians that Mrs. McKinley was apparently on the road to recovery.

At night after dinner the members of the cabinet began to arrive at the White House. By 9 o'clock Secretaries Gage, Long and Wilson and Attorney General Knox and Postmaster General Smith were in the cabinet room chatting pleasantly with the president. They expressed a desire to see Mrs. McKinley if her condition was such that the invasion of the sick room would not be dangerous. The president assured them that, on the contrary, Mrs. McKinley expected their visit. The president, with more sympathy of manner than has characterized his conduct for weeks, conducted the members of the cabinet to Mrs. McKinley's room.

They found the mistress of the White House carefully propped up with pillows and, though looking wan and wasted, in very much better condition than they had hoped to find her. She smiled and spoke a few words to the president's companions. She said she expected to be as well as ever in a few days. The president is so pleased with the progress Mrs. McKinley is making that he is already talking about his summer vacation. The morning bulletin of the physicians was more hopeful than for weeks past.

Federal Appointments.

Washington, June 11.—The president has signed the commission of Gideon C. D. Bantz to be assistant United States treasurer, and of John H. Roys and Daniel W. Wurtsbach to be lieutenants, junior grade, United States navy.

Freight Trains Come Together.

Ottawa, Kans., June 10.—Two Missouri Pacific freight trains collided head-on at Lane, wrecking both engines and a number of cars. One crew jumped and was saved. Engineer Bunnigarden was killed instantly, his fireman, George Davis, had his skull fractured and was injured internally, and the head brakeman was badly hurt. All live at Osawatimie, Kan.

Got \$5 for Their Work.

Utica, Mich., June 10.—Burglars visited J. A. Crissman's roller mill about 1 a. m. and began work on the safe in the office. After the outer door had been blown open, the robbers became frightened and left hurriedly. They secured only \$5, taken from a traveler.

STATE RESTS ITS CASE

In the Kennedy Murder Trial, but Will Present More Evidence Later.

Kansas City, June 11.—The state, in the case of Lulu Prince-Kennedy, on trial for murdering her husband, rested yesterday, and court adjourned for the day. The state yesterday adduced additional evidence to prove its claim that Kennedy was forced to marry Lulu Prince at the point of a revolver; that Will Prince furnished the weapon; and that the Princes conspired to kill Kennedy, and predicted the murder days before it occurred, and that the woman's claim that she was in a delicate condition and shot her husband in a fit of temporary insanity produced by this condition was untrue. The defense will try to show that Mrs. Kennedy inherited insanity; that Kennedy had ruined her, and that his refusal to acknowledge her as his wife temporarily deprived her of her reason. Following this the state will offer evidence to show that she was not a good woman before she met Philip Kennedy. One witness yesterday swore that Will Prince told him that there had been no intimacy between his sister and Kennedy.

JEALOUSY LEADS TO TRAGEDY

Spurned Farm Hand Murders a Widow and Kills Himself.

Belvidere, Ills., June 10.—Insanely jealous because she scorned his offer of marriage and made desperate by imaginary grievances against members of her family, Nels Nelson, a Swedish farm hand, shot and instantly killed Mrs. John Ludig. He then turned the weapon on her sister, Mrs. Peter Wing, and sent a bullet at her head, and later, when cornered by a crowd of farmers anxious to lynch him, he ended his own life.

The tragedy occurred near the village of Kingston, twelve miles south of Belvidere. Mrs. Ludig and Mrs. Wing and two children of the latter were driving to the village, when they met Nelson on the road. Nelson had started for the Ludig farm house, and it is believed he intended to kill the old folks. He was formerly employed as farm hand on the place. Mrs. Ludig's husband died last March and within two weeks after the funeral Nelson proposed marriage to the widow. His attentions became so offensive that he was told to leave.

DR. DALY KILLS HIMSELF

Was One of the Witnesses in the "Embalmed Beef" Scandal.

Pittsburg, June 11.—Long continued brooding over the official criticism of his course in the "embalmed beef" scandal after the close of the Spanish war caused the suicide of Dr. William Hudson Daly, formerly major and chief surgeon in the United States volunteers, in this city. He shot himself in the right temple and died immediately.

Dr. Daly was severely criticized by the United States board of inquiry for statements he had made before the board supporting General Miles' charges against the commissary department. The criticisms he thought so unjust that he could not cease to think of them. His wife's death shortly after brought him to a state of confirmed melancholia. He lost all interest in his practice and all pleasure in his life, and so was driven to suicide.

Deadly Street Fight at Houston.

Dallas, Texas, June 10.—A four-handed duel with pistols took place in the streets of Houston, and all of the participants are reported dead. The men instantly killed were: James Perkins, ex-deputy chief of police; Tom Payne, farmer and stockman; Lew Reels, farmer. Mortally wounded: Dave Eckols, butcher. The shooting was all done at close range, and was the result of a dispute over a case thrown out of the criminal district court. It involved the character of relatives of the duelists on one side, and, according to the Texas code of honor, could only be settled by blood.

Keene's Horse Captures the Oaks.

London, June 8.—Another of Britain's great racing trophies has been captured by an American, Foxhall P. Keene having won the Oaks with Cap and Bells II, ridden by Milton Henry. The owner, horse and jockey are all thoroughbred Americans, so the victory was not diluted, as it was in the case of the Derby. At first long odds were obtainable against the American horse, but the odds shortened until Cap and Bells II stood at the head of the list and started at 9 to 4 against. The hollowness of the victory detracted from the interest in the race.

Uncle Sam Wants Arbitration.

Washington, June 10.—The United States government has again appealed to the powers to submit the issues at Peking over the indemnity propositions to the arbitration of the Hague tribunal. Mr. Rockhill, who has been watching for an opportunity called Secretary Hay for permission to make a proposition and the secretary cabled him authority to do so. It is believed that the ministers at Peking have become involved beyond extrication in the present issues and this proposition may be the only way out.

Michigan Minutes.

Saginaw—All the blacksmiths and boiler-makers and their helpers in the Pere Marquette shops here have joined the strikers.

Vandalia—F. J. Zerby, of this village, was struck by a freight train three miles from Buchanan, and instantly killed.

Cassopolis—Mrs. Viola Conner, who was shot by her husband a week ago, is dead of her wound.

Standish—While sitting on his doorstep Jacob Moore was struck in the groin by a stray bullet.

EXPLODING COLLISION

Impact and Detonation Combine to Destroy Human Life and Property on the Rail.

DYNAMITE CAUSES THE BLOW UP

In Which Five Persons Die Horribly—Other Railway Fatalities—Storm Kills Three Oklahomans.

Binghamton, N. Y., June 10.—While a freight train on the Lackawanna was taking water at Vestal, ten miles west of here, at 9:45 p. m. Saturday it was run into from behind by a double-header wildcat freight. In the second car from the caboose of the stationary train was a large quantity of dynamite, which was exploded by the impact. Five men were killed and seven injured by the explosion. The dead are: John P. Kelly, head brakeman of wildcat train; S. R. Polhamus, conductor of freight; Elmer Coulter, fireman of the first engine of the wildcat; Fred Witherby, fireman of the second engine of the wildcat. Seven others, all but two of them trainmen, were injured; several thought to be fatally hurt recovered from the concussion and figure in the list of slightly hurt.

Blow One Victim 440 Yards. The explosion completely demolished four freight cars. Much damage was done by the concussion, most of the windows in Vestal and Union, across the river from Vestal, being shattered. Binghamton's plate glass fronts did not escape, many of the largest glasses in the center of the city being broken. The shock was felt at a distance of thirty miles. All through the early morning hours the rescuers toiled about and among the burning freight cars at the scene of the explosion, but it was not until late yesterday afternoon that portions of the last dismembered body to be accounted for were discovered a quarter of a mile from where the explosion occurred.

Fatal Accident in Kansas. The explosion completely demolished four freight cars. Much damage was done by the concussion, most of the windows in Vestal and Union, across the river from Vestal, being shattered. Binghamton's plate glass fronts did not escape, many of the largest glasses in the center of the city being broken. The shock was felt at a distance of thirty miles. All through the early morning hours the rescuers toiled about and among the burning freight cars at the scene of the explosion, but it was not until late yesterday afternoon that portions of the last dismembered body to be accounted for were discovered a quarter of a mile from where the explosion occurred.

Fatal Accident in Kansas. Wichita, Kan., June 10.—The east-bound "Prisco" passenger train No. 108, which left here Saturday afternoon, was wrecked at Greenwood, a station sixty miles east of here, injuring ten persons, two of whom will die. The fatally injured are Mrs. H. W. Smith, of New Kirk, O. T., and Conductor L. A. Bekers. The train was going at the rate of thirty miles an hour, and at an abrupt turn near Greenwood station the dining car and a sleeper jumped the track. A range in the dining car was upset and the live coals from the range set fire to the dining car, and within thirty minutes both of the derailed cars were consumed.

Fierce Wind Plays Much Havoc. Wichita, Kan., June 10.—A correspondent who arrived here last night from the scene of storm devastation in Kay county, O. T., says that the storm of Friday night ruined the wheat crop of 400 farms west and northwest of Blackwell. These farms are all in one body of territory. The farmers, who had purchased twine and harvest machinery are asking the local dealers to take them back, and the dealers have referred the matter to the factories. The loss of crops will cause no distress, as the farmers are in good condition financially, owing to a succession of good crops during the past five seasons.

The storm did not confine its havoc to inanimate things, however. Three persons were killed and a number wounded at Eddy. The storm covered a stretch of country ten miles wide and thirty-six miles long, destroying towns, farm houses and crops. The three persons killed at Eddy are: Mrs. Maude McGathay, Louis McGathay and Robert McGiffin; injured, Charles Goldsmith, skull fractured; John McBrain, leg broken; Hugh Prather, nose broken; Judd McWilliams, head crushed; Howard Hamagan, head badly crushed; Ruby Higginbotham, face crushed and internal injuries; A. D. Evans, leg broken.

The rain simply fell in torrents from early in the evening until midnight. The fury of the storm centered at about 6:30 p. m. at a point near the Kansas state line, and just on the county lines of Kay and Grant, O. T. In the little town of Eddy of twelve or fifteen buildings in the place all were leveled to the ground except the railroad station and elevator. The track of the cyclone between this point and Tonkawa, a distance of eight miles, was laid waste. Five farm houses, with barns and outbuildings, were blown away, but the occupants escaped unharmed. The tail end of the storm fell upon Tonkawa. Thirty dwellings and business houses were scattered like so much loose lumber. The citizens of the town had been watching the advance of the storm, and had sought shelter in caves and cellars. No fatalities are reported at this point.

Drowned While on Pleasure Boat. Philadelphia, Pa., June 10.—A party of six persons—three men and three girls—while sailing on the Delaware river yesterday afternoon off North Esington, a few miles below this city, were thrown into the water by the swamping of their skiff during a squall, and the three girls were drowned. The names of the girls are: Rosie Koons, aged 17 years; Mary Koons, 19; Mamie Taylor, 22. The girls were guests of the Federal Boat club.

ASSYRIAN ON THE ROCKS

Big Leyland Liner Strikes Cape Race at Full Speed.

St. Johns, N. F., June 8.—The Leyland steamer Assyrian from Antwerp for Montreal, with 2,000 tons of cargo, went ashore off Cape Race during the night. She has eleven feet of water in her forehold and is likely to prove a total wreck. Her crew had great difficulty in escaping and reaching the shore. The Assyrian was running at full speed through the fog when she struck Cape Race, and she now lies almost a hulk on the coast. For three days Captain Dingle had been navigating by the log, and he had calculated upon a course rounding Cape Race thirty miles south of land. This plan, however, was frustrated by northerly currents.

The Assyrian struck at 1:40 o'clock. Land had been sighted only a minute before. The fog was dense and there was no time to reduce speed. She struck the face of the cliff and was forced upon the outlying rocks. The impact tore out the bottom of the two forward holds. She heeled over to the starboard when her side glanced against the cliff. The crew at first were panic-stricken, but after a time comparative calm was restored, and all precautions were taken to secure the safety of all on board. When the extent of the vessel's injuries was disclosed it was seen that she was badly damaged, but would outlast any except a severe storm. The arrival of daylight enabled Captain Dingle to land the mate, who climbed the cliffs, proceeded to Cape Race station and telegraphed the news of the disaster.

TERRIBLE MINE ACCIDENT

Seventeen Men Entombed With No Hope of Rescue.

West Newton, Pa., June 11.—Time only adds horror to the disastrous mine explosion which occurred late in the evening at No. 2 mine of the Pittsburg Coal company at Port Royal. Three men were rescued and seventeen others are imprisoned in the burning mine. The mine was reported at the offices of the company here to be on fire, and Division Superintendent William McCune and W. F. Allison of this place, started for the scene. They entered the mine with Fireboss John Kock, who carried an open lamp. Three explosions followed at intervals of a few moments, the large fan being inadequate to counteract the rush of fire damp.

Many of the miners escaped but latest reports state that Superintendent McCune and Foreman Allison, with fifteen miners are beyond reach of rescue. The men are located over a mile from the bottom of the pit. Since the efforts of the third rescuing party, which like previous attempts, was disastrous, no effort has been made to reach the men and no further attempt will be made until Mine Inspector Callaghan arrives from Connelville. The wives and children of the missing are gathered about the mine shaft waiting for some news of their loved ones and every few minutes appeal to some men to try to rescue them.

DR. TUTTLE IS DEAD

President of Wabash College for Thirty Years Is at Rest.

Crawfordsville, Ind., June 10.—Joseph Farrand Tuttle, D. D., who for thirty years was president of Wabash college, died Saturday afternoon from heart failure. He was confined to his bed but one week, although he had been in ill health since his retirement from the presidency in 1892. His wife and children were with him at his death.

Dr. Tuttle was born in Bloomfield, N. J. March 12, 1828. His parents moved to Ohio. At the age of 18 years he entered Marietta college, being graduated four years later. In September, 1843, he became a tutor at Marietta college, which position he held one year. In 1844 he was licensed a minister of the Presbyterian denomination. He continued preaching until his election to the presidency of Wabash college, in 1861, and the institution saw great progress during his incumbency. Dr. Tuttle resigned in 1892 and was succeeded by Dr. George S. Burroughs, of Amherst.

Noted Surgeon Kills Himself.

London, June 7.—Dr. Thomas Bond, a well-known surgeon and analyst, committed suicide by throwing himself from a third story window of his residence. He had been suffering from melancholia for some time. Dr. Bond, besides being the late Mr. Gladstone's surgeon, was noted in connection with investigations and discoveries in the cases of several sensational crimes, notably the Lefroy, Lamson and Camp murders.

Lord Kitchener Reports Progress.

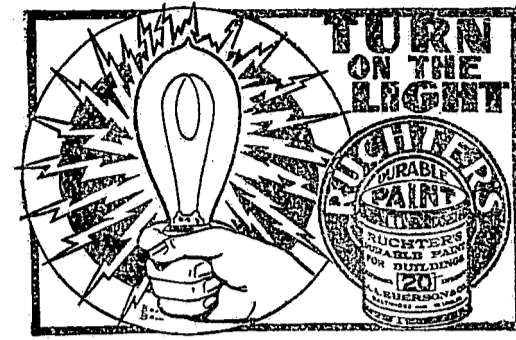

London, June 11.—Lord Kitchener in a dispatch from Pretoria, says the number of Boers killed, imprisoned or surrendered during the last month totaled 640. From June 1 to June 9, twenty-six Boers were killed, four wounded, 409 were made prisoners and thirty-three surrendered, and 651 rifles, 115,530 rounds of ammunition, 120 wagons and 4,000 horses were captured.

Two Well-Known Writers Dead.

London, June 11.—Sir Walter Besant, the novelist, and Robert William Buchanan, poet and prose writer, are dead. Sir Walter had been sick in Hampstead for two weeks with influenza. Buchanan was stricken with paralysis and had been an imbecile as well as an invalid for a year.

Found Guilty of Fraud.

Chicago, June 11.—Dr. August M. Unger and F. Wayland Brown were found guilty of insurance fraud in the Deffenbach case by the jury yesterday, and sentenced to the penitentiary.

Will Any Of your friends Be on the list of Graduates this year?

If so you will find in our assortment of new Books, Stationery, and Jewelry many appropriate remembrances for the happy young folks who are just starting on their practical voyage of life.

You will find our line of Art and Toilet Goods Complete and worthy of inspection.

Binns' Magnet Store BUCHANAN, MICHIGAN

FOR MICHIGAN PEOPLE.

State Items Which Will Be of General Interest.

Principal Events of the Past Few Days Which Have Occurred in Our Great State.

Grand Rapids, Mich., June 8.—Judge Emanuel L. Doyle, of the police court, who issued warrants for the arrest of Garman and Cameron, the New York promoters whom the grand jury and county prosecutor had promised protection, was before the grand jury with William E. Grove, representing Mayor Perry in the prosecution of the promoters. They were examined as to the motive for the interference with the jury's investigation of alleged hoodlums.

Jeremiah Boynton, a railroad contractor, told of negotiations by water promoters for the right of way from the mains along his electric line to Grand Haven. Charles B. Kelsey, cashier of the People's Savings bank, furnished additional particulars as to deposits of certain persons suspected. Engineer Louis K. Davis, who endeavored to interest the city in a sand filtration scheme, was also examined. He was brought here by Mayor Perry from Indianapolis, and it is believed his evidence was designed to discredit the testimony of Garman and Cameron.

Grand Rapids, Mich., June 8.—Mrs. Ima Burns, now living in Benzie county, has filed a sensational bill for divorce against her husband, Representative D. E. Burns, of this city, in which she charges him with infidelity, cruelty, desertion and many other things. The couple were married at Olivet on Oct. 12, 1884. They lived at Ann Arbor while Burns took a law course at the university, and later came to Grand Rapids. One of the sensational features of the suit is that C. G. Turner, the pardon board member, whom Burns opposed in Murderer Wright's case, is the attorney for Mrs. Burns.

FOR HER'S A JOLLY GOOD FELLOW.

And Will Give a Banquet to the Genesee Bar Association. Flint, Mich., June 11.—Hon. John J. Carton, lawyer, farmer, politician and all-round good fellow, is sometimes given to facetiousness, as is amply demonstrated in the invitations just issued for the annual banquet of the Genesee County Bar association, to be held at his farm in Clayton township on Saturday, June 22.

Those bidden to the feast, and they include the supreme court justices and prominent attorneys of the state, are "humbly notified" that the speaker of the "ripper" legislature will have charge of the gavel on the occasion, and the table decorations will consist principally of "cut glass and solid silverware."

Mortgages Off the Tax List. Lansing, Mich., June 7.—A decision which will materially affect the tax rate, especially in the city of Detroit, has been made by the supreme court. The Detroit assessors placed on the assessment rolls all real estate mortgages held by trust companies in trust. The state tax commission removed these mortgages from the rolls and the city applied to the supreme court for a mandamus to compel their reinstatement. The mandamus was denied. This keeps fully \$6,000,000 off the tax rolls in Detroit alone.

Punishment Didn't Fit the Crime. Lansing, Mich., June 10.—Edward Maher and George Carrol have been pardoned by Governor Bliss. Last October these men were sentenced to two years' imprisonment. The governor learned that the two men were tramping and had secured a cabbage from a field. They then opened an unlocked door of a vacant house and helped themselves to an old tin can in which they cooked the cabbage. This constituted their entire offense.

Flagged the Train With His Hat. Buchanan, Mich., June 11.—William Troutfetter, section foreman on the Michigan Central, saved a loaded excursion train on the Milwaukee, Benton Harbor and Columbus branch

from a wreck Sunday morning. He was walking home over the track and discovered a broken switch. The train was thundering down the track, and he flagged it with his hat. Had the train reached the switch it would have gone down an embankment.

Correct List of Arnell's Victims. Beaverton, Mich., June 8.—The correct list of the dead and wounded in the wholesale shooting Wednesday afternoon is as follows: Dead—Reah Arnell, aged 4 years. Wounded—Mrs. William Arnell, slightly; Frank Arnell, slightly; Velma Ross, slightly; Guy Doak, slightly; Tyler Bliss, slightly; Mary Moller, slightly; William Arnell, Jr., slightly.

New Sort of Class Memorial. Ann Arbor, Mich., June 7.—A unique class memorial will be left by the graduating literary seniors of the University of Michigan at commencement. It will be a class bench of red sandstone, elaborately carved. It is probable that the precedent will be followed by future classes and that the campus will be furnished with seats for the coming generation of students.

Made no Fuss at Adjournment. Lansing, Mich., June 8.—Both houses of the legislature were adjourned sine die without incident at high noon Thursday. A small number of members were present in each house when the proceedings ended. The governor has issued a proclamation naming June 14 as flag day.

Will Give the Girls a Show. Olivet, Mich., June 11.—Charles E. Stowell and wife, of Hudson, who have for many years been donors to Olivet college, have announced to the authorities that they will hereafter provide for all of the expenses of the ladies' physical training department.

They Rode Out of Town. Ypsilanti, Mich., June 7.—A valuable horse was stolen from the farm of J. L. Hunter, ex-chairman of the board of supervisors, and was hitched to a carriage stolen from George Slayton.

Max Regis Is Wounded. Paris, June 10.—The duel with swords which was begun yesterday in the Parc des Princes, between Max Regis, the anti-semitic mayor of Algiers, and M. Laberdesque, an Algerian journalist, and which was adjourned after nineteen rounds without result had been fought, was resumed in the morning. M. Regis was seriously wounded in the forearm, a copious flow of blood resulting, and the duel was thereupon stopped.

Mrs. McKinley Decidedly Improves. Washington, June 11.—Dr. Rixey, when he left the White House at 10:15 last night, said: "Everything is encouraging. Mrs. McKinley is going very nicely. She is gaining steadily. She sat up in a rolling chair several times today, aggregating probably an hour. We are very much encouraged by the steady improvement."

Not Fitzhugh Lee, Jr. Manila, June 11.—The officer named Lee, who was killed, not wounded, in the recent battle with insurgents at Lipa, province of Batangas, was Lieutenant Lee, of the engineers, not Lieutenant Fitzhugh Lee, Jr., as previously cabled. Lieutenant Springer and Captain Wilcox of the Twenty-first regiment were killed in the battle.

Disastrous Hailstorm. Denver, June 11.—A special from Greeley, Colo., says that vicinity was visited by the third disastrous hailstorm of the season. It covered a larger scope than either of the others, and has practically destroyed all the fruit, alfalfa and wheat. It is impossible to estimate the damage at this time. All of northeastern Colorado is more or less affected.

Cubans Postpone Action. Havana, June 11.—Owing to the absence of Senor Capote, president of the Cuban constitutional convention, the secret session that was to have been held yesterday was postponed.

More Honor for Hanna. Cleveland, June 7.—Senator M. A. Hanna has been appointed a colonel on the official staff of General Rastieur, commander-in-chief of the Grand Army of the Republic. Senator Hanna was recently mustered into the Grand Army of the Republic as a member of Memorial post in this city.

Berries and Fruit.

Now that the fruit season has opened by the appearance of strawberries, and will be continued for many months through varied and luscious stages of succession as the berries and fruits came to maturity at their appointed time, it will be taking opportunity by the forelock, as it were, if we give a few recipes for using the rich gifts of nature to the best advantage.

Let us begin with strawberries. To make strawberry cream, rub one pint of strawberries through a sieve, and add to them six ounces of powdered sugar and the juice of one lemon. Dissolve half a box of Cox's gelatine in half a pint of water; mix all well together, strain through a flannel bag, and set the mixture on ice, still stirring it till it begins to set. Whip nearly a pint of cream to a light froth and stir it into the strawberries; mix well, pour it into a mould, and let it cool on ice. This can also be made with raspberry syrup or raspberry juice, the addition of a little currant juice.

A strawberry whip is an Italian dish, and is very delicious for an afternoon tea or for dessert. Whip a quart of cream and sweeten it well; take two quarts of large strawberries, hull and pick them over carefully; then place on a large dish alternate layers of strawberries and whipped cream, taking care to have more cream than strawberries. Make it in the form of a pyramid, cover the outside with a layer of the cream; decorate it with figures by squeezing some of the cream through a paper cornucopia, and, at different intervals, stick over it some of the handsomest strawberries.

For those who like the flavor of pineapple, a fruit jelly is very nice. Put about one-third of a box of Cox's gelatine into two-thirds of a cupful of water, to soak. Peel and cut into mouthfuls three good tart oranges, and put them into a deep glass dish; cover the oranges with a layer of sugar. Slice over that three large bananas, and add more sugar. For the top layer, use slices of pineapple and more sugar, or, if preferred, half a can of grated pineapple; but the fresh fruit has of course a more delicious flavor. Set all in a cold place for about an hour; then pour off the juice and, together with the strained gelatine, bring it gently to a boil. When cool, pour the liquid over the fruit, make openings here and there for the juice to run through. Set in a cold place, or on ice, to become jelly. Serve with whipped cream.

A very nice dish for tea is a fruit salad. Take sliced pineapples, strawberries, oranges peeled and sliced; arrange these in layers in a glass dish, with sugar between. Set it aside for half an hour, and then, just before serving, add some sliced bananas.

I want to give a very choice old English recipe for making raspberry syrup. Put 12 pounds of raspberries into a stone jar with two quarts of water, in which five ounces of tartaric

acid have been dissolved. Let the whole stand 24 hours in a cold place; then strain it, taking care not to bruise the fruit. To each pint of liquor add 1 1/2 pounds of granulated sugar; stir often until dissolved, which may require a day or two. The syrup must then be bottled and tied over with a piece of thin muslin, and kept in the ice chest, or a very cold place; the whole process is cold. After some weeks it will be safe to put corks into the bottles. Two table-spoonfuls of this syrup in a tumblerful of cold water will make a most refreshing drink. This rule will make about eight quarts.

Although blueberries are still hidden from view in the distance, they will make their appearance at the appointed time, and it may therefore not be inappropriate to remember them as a future possibility, now that we are making out our fruit receipts. The best blueberry pudding I know of is very simple to make. Steep one quart of blueberries and sweeten them to taste; cut fine thin slices of bread, butter them, and place one in the bottom of a pudding dish; pour over it some of the stewed blueberries; then continue to add a slice of bread and some of the stewed blueberries, in alternation, until they have all been used. Set it aside and let stand in a cool place. It is to be eaten cold in a foamy pudding-sauce, which is made in the following way: Take the yolks of three eggs and a large cupful of confectioners' XXX sugar, and beat them to a light cream add the grated rind of one lemon; add to this three whites of the eggs beaten to a stiff froth, and the juice of the lemon. Turn it into the sauce boat and serve without cooking. It is a very delicious sauce.—J. W. FARLAND, in *The Country Gentleman*.

An Envelope Cook-Book.

Ever since the "card catalog" system was invented and became known to the public through libraries, business men have been adapting this convenient device to their varied requirements. One of its modifications is the "envelope scrap book," the required headings being alphabetically arranged on a set of envelopes, and placed in drawers or boxes as the cards are in a library catalog.

It is almost a year since I made—or rather began making, for a catalog is never complete, as librarians know to their sorrow—an envelope cook-book after this fashion; and the plan has proved so thoroughly satisfactory that I want to recommend it to others. Many of the best and newest receipts appear in daily and weekly newspapers, and they are either lost or accumulate to the confusion of the housekeeper; if turned loose in the family cook-book, they soon become unmanageable; if pasted into a blank book, a comprehensive index is quickly needed. Then there are the "favorite receipts" donated by your aunt, second cousin and neighborly friend; these also tend to multiply alarmingly, and yet new add a "spice" to the table that we cannot afford to disregard.

All that is needed for an envelope cook-book is one or two packages of

stout envelopes, a little larger than postal card size. The headings—"Bread," "Cake," "Desserts," "Eggs," "Fish," "Meats," "Omelets," "Pastry," "Salads," "Vegetables," etc.—should be written near the upper left-hand corner. If you have many clippings on hand, or as your stock accumulates, new envelopes are introduced, with such subdivisions as "Desserts—gelatine," "Fish—shell fish," "Sauces—sweet." Cake receipts are always numerous, and I have several sub-headings, as "Sponge-cakes," "Loaf-cakes," and "Small Cakes and Cookies."

The envelopes are arranged alphabetically, and stand on edge in a roomy pasteboard box. It takes only a moment to put your hand on any given receipt, or to look over all your rules for cooking oysters, if you happen to have those bivalves for dinner. New acquisitions are as quickly slipped into their appropriate envelopes. Where there are many small clippings on one subject, it is a good plan to paste them on an old postal card, in order to handle.

FUNNY GRAPHS.

Carrie (in her new bonnet)—"How do you like my hat, Bertha?" Bertha—"Why, I think it is splendid. No one would know it wasn't brand new."—Boston Transcript.

"I am almost discouraged," said the reformer. "About what?" "The future of this world. Every time I devise some new idea for suppressing iniquity the sinners sharpen their wits and invent a new swindle."—Washington Star.

Wife—"I wish you would give me some money to buy my Easter bonnet." Husband—"Why, I gave you the money for it two weeks ago." Wife—"I know, but I used that all up in car fare going to the various 'millinery openings.'"—Philadelphia Press.

Willie Boerum (entertaining his sister's caller)—"Do you like baseball very much, Mr. Jamaica?" Mr. Jamaica—"I never played ball much, Willie. I enjoy golf." Willie Boerum (disappointed)—"Why, I heard pa tell Susan you were a great catch."—Brooklyn Eagle.

A Detroit street railway magnate has neglected to provide his street cars with a certain safety appliance, and for this neglect is liable to imprisonment for 3,039 years. This seems like quite a period, but, of course, he could cut it down some by good behavior.—Cleveland Plain Dealer.

INFERENCE.

Small Boy—"Say, mister, are you goin' to build a house this spring?" Poet—"No, my son. Why do you ask?" Small Boy—"Oh, I thought mebbe you was savin' your hair 'to put in the plaster."

RISEN FROM ITS RUINS.

Galveston Forming Plans for Future Safety of Island.

Perhaps no more remarkable instance of rapid recovery from almost total wreck was ever known than that of Galveston, destroyed in the terrible flood of last September. Its dwelling houses had been swept away, and many of its most substantial commercial buildings were injured beyond repair. Seventeen million dollars' worth of its property was wasted at a stroke, and six thousand of its inhabitants were slain. Yet the hapless island town found courage after the storm, and determined to live. In seven days the railway bridge to the mainland, broken by the furious sea, was repaired and open to travel, and less than six months after the disaster not only all the railway tracks, but the wharves, elevators and warehouses had been rebuilt, larger and better and more in number than before; and the surviving islanders are housed in more than a thousand comfortable dwellings. The terrible relics of the September tragedy have been cleared away, and industry, trade and hopeful activity of every kind are once more making busy days. A nation's sympathy and contributions have helped the people, but no less the brave, swift rally of this stricken city is a notable example of American recuperative energy and pluck. It gives the lie to the proverbial inertia of southlanders. Plans for the future safety of the island are already forming, and will be put into effect as soon as the more immediate needs are provided for. A sea-wall may be built or more probably, a general filling in of the land, raising the surface five or six feet, will place the new city beyond the reach of a flood from the gulf. One of its local newspapers courageously says: "Difficulties present the opportunities for great achievements, and out of the depths Galveston is struggling to her former position, and learning strength.—Youth's Companion.

ODD CAUSES OF FIRES.

Peaceful Crawling of an Insect Sets Building Ablaze.

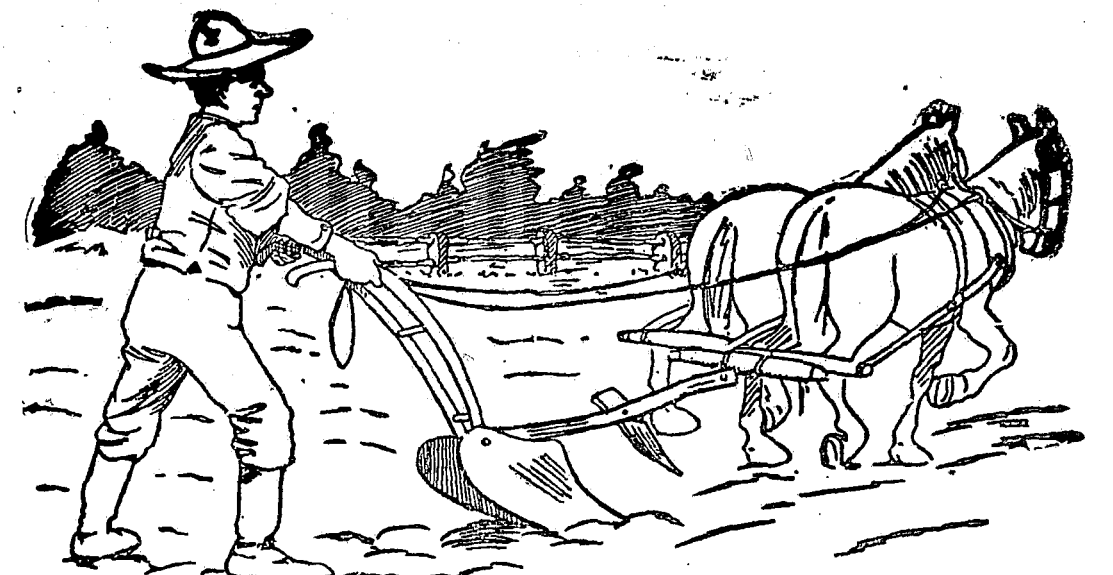

It seems almost a wonder that the world is not burned up, when one realizes what strange circumstances may cause a disastrous fire. In one case the peaceful crawling of an insect set a building on fire. Some cotton waste had been used with mineral oil, and then thrown away. An unlucky insect crawled through that oil-saturated waste, and came out again with some of the oily fibers adhering to its body. Then it perambulated round the building, coming at last to the gas-jet to meet its fate. The cotton fibers, still adhering to its body, caught fire, and the unfortunate insect dropped blazing to the floor, setting the pace on fire. Cotton waste was also partly responsible for another curious fire. This time an electric spark did the mischief, passing from a belt to some conducting substance near it and communicating with the cotton. The Railway and Engineering Review, borrowing from an English exchange, gives two instances of fire caused by water. In the first case a flood caused the water to rise inside a factory until it reached a pile of iron filings. When they came in contact with the water, they oxidized so rapidly that they became intensely hot, and at last set fire to woodwork near them, and the building was destroyed. In the other case the water from the engines during a fire found its way into a shed containing quicklime. The heat caused by the slacking of the lime set fire to the shed, and this to other buildings. Glass globes, which act as lenses, often cause fire, and it has recently been said that the convex glasses used in pavement lights are dangerous, and should be abandoned in favor of lights with flat tops.—Youth's Companion.

A SLIGHT MISTAKE.

The other morning, going down town on a Sixth Avenue "L" train in New York, a woman, shabbily dressed, reached over to another seat and picked up a paper that had been left by a man who had just got off. The woman with the shabby dress had her nose buried in the paper. A philanthropist and a business man were riding in the seat back of her.

"You see," said the philanthropist, "how eager the poor working people of this country are to acquire knowledge. Now, that good woman ahead of us cannot afford to buy a paper, but she is ready, nevertheless, to gain information, and picks up a paper wherever she can. Commendable, isn't it?" "Do you know who the woman is?" asked the business man.

No," said the philanthropist. "Who is it?" "Nettie Green, the richest woman in the United States."—Pittsburg News.

I am a farmer located near Stony Brook, one of the most malarious districts in this State, and was bothered with malaria for years, at times so I could not work, and was always very constipated as well. For years I had malaria so bad in the spring, when engaged in plow work, that I could do nothing but shake. I must have taken about a barrel of quinine pills besides dozens of other remedies, but never obtained any permanent benefit. Last fall, in peach time, I had a most serious attack of chills and then commenced to take Ripans Tablets, upon a friend's advice, and the first box made me all right and I have never been without them since. I take one Tabule each morning and night and sometimes when I feel more than usually exhausted I take three in a day. They have kept my stomach sweet, my bowels regular and I have not had the least touch of malaria nor splitting headache since I commenced using them. I know also that I sleep better and wake up more refreshed than formerly. I don't know how many complaints Ripans Tablets will help, but I do know they will cure any one in the condition I was and I would not be without them at any price. I honestly consider them the cheapest-priced medicine in the world, as they are also the most beneficial and the most convenient to take. I am twenty-seven years of age and have worked hard all my life, the same as most farmers, both early and late and in all kinds of weather, and I have never enjoyed such good health as I have since last fall; in fact, my neighbors have all remarked my improved condition and have said, "Say, John, what are you doing to look so healthy?"

WANTED.—A case of bad health that R.I.P.A.N'S will not benefit. They banish pain and prolong life. One gives relief. Note the word R.I.P.A.N'S on the package and accept no substitute. R.I.P.A.N'S, 10 for 5 cents or twelve packets for 45 cents, may be had at any drug store. Ten samples and one full and detailed testimonials will be mailed to any address for 5 cents, forwarded to the Ripans Chemical Co., 230 N. Spruce St., New York.

THE PEOPLE'S NATIONAL FAMILY NEWSPAPER.

NEW-YORK **NEW-YORK** **WEEKLY** **WEEKLY** **TRIBUNE** **TRIBUNE**

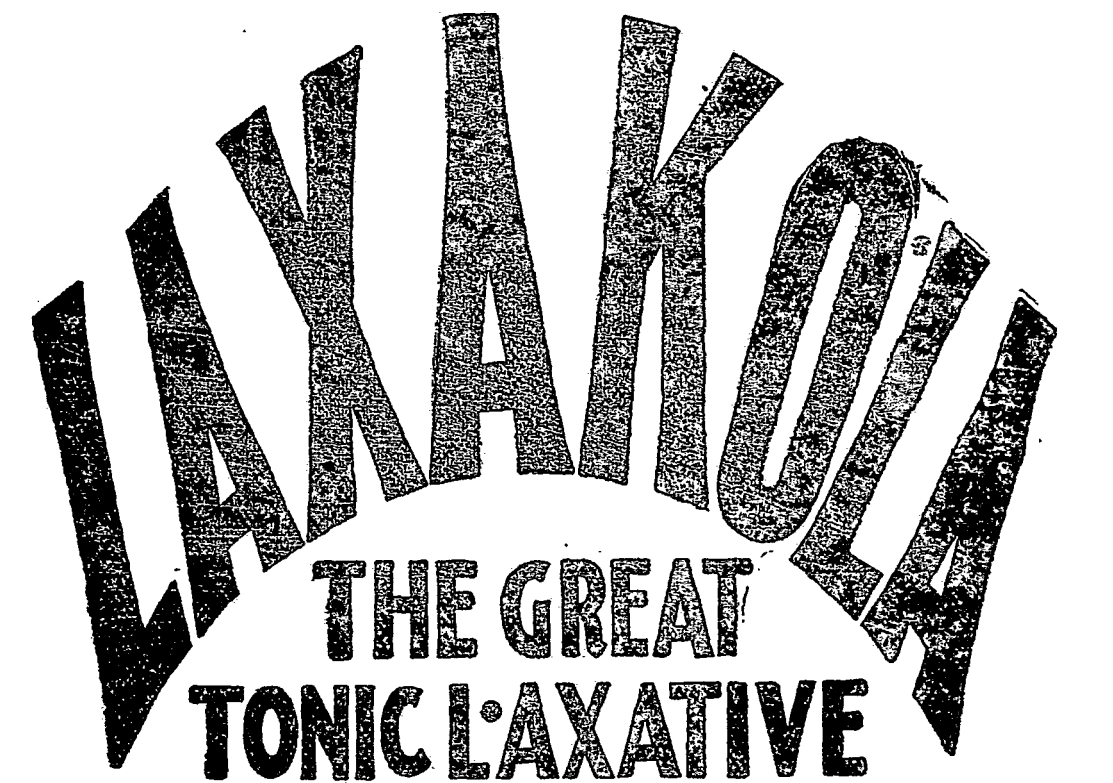

Published Monday, Wednesday and Friday, in a lively, fresh, every-other-day daily, giving the latest news on days of issue, and covering news of the other three. It contains all important foreign cable news which appears in THE DAILY TRIBUNE of same date, also Domestic and Foreign Correspondence, Short stories, Eminent Half-tone Illustrations, Humorous Items, Industrial Information, Fashion, Notes, Agricultural Matters and Comprehensive and reliable Financial and Market reports.

It contains all the most important general news of THE DAILY TRIBUNE up to hour of going to press, an Agricultural Department of the highest order, has established reading for every member of the family, old and young, and reports which are accepted as authority by farmers and country merchants, and is clean, up to date, interesting and instructive.

Regular subscription price, \$1.00 per year. We furnish it with THE RECORD for \$1.25 a year.

Send all orders to THE RECORD, Buchanan, Michigan.

If you have sour stomach, indigestion, biliousness, constipation, bad breath, dizziness, inactive liver, heartburn, kidney troubles, backache, loss of appetite, insomnia, lack of energy, bad blood, blotched or muddy skin, or any symptoms and disorders which tell the story of bad bowels and an impaired digestive system, Laxakola Will Cure You.

It will clean out the bowels, stimulate the liver and kidneys, strengthen the mucous membranes of the stomach, purify your blood and put you "on your feet" again. Your appetite will return, your bowels move regularly, your liver and kidneys cease to trouble you, your skin will clear and freshen and you will feel the old time energy and buoyancy.

Mothers seeking the proper medicine to give their little ones for constipation, diarrhea, colic and similar troubles, will find Laxakola an ideal medicine for children. It keeps their bowels regular without pain or griping, acts as a general tonic, assists nature, aids digestion, relieves restlessness, clears the coated tongue, reduces fever, causes refreshing, restful sleep and makes them well, happy and hearty. Children like it and ask for it.

For Sale by DR. E. S. DODD & SON
 W. N. BRODRICK

Laxakola is not only the most efficient of family remedies, but the most economical, because it combines two medicines, viz: laxative and tonic, and at one price, 25c. or 50c. At druggists. Send for free sample to THE LAXAKOLA CO., 132 Nassau Street, N. Y., and mention the name of your druggist. We will express to any address on receipt of 50c. in stamps or post note, all charges prepaid, a large Family size bottle of Laxakola, sufficient to last for a long time.

A FINE ADDRESS

The Baccalaureate Sermon delivered by Rev. C. E. Marvin, on Sunday

The Presbyterian church was crowded to its utmost capacity on Sunday evening, by the friends and relatives of the members of the class of 1901, who assembled to listen to a baccalaureate address by the pastor of the church Rev. C. E. Marvin. The was tastefully decorated with the class colors, pink and green, and the Juniors acted as ushers and looked after the various arrangements.

Rev. Marvin delivered the following admirable and eloquent address to the members of the graduating class, which we are pleased to be able to give to our readers.

The Great Work of Life "For what hath man of all his labor and of the vexation of his heart, wherein he hath labored under the sun?"

Man is a worker. He has laid great foundations, and upon them he has built in wonder. The earth speaks of man as a genius, and lauds and honors him with the burdens which it carries. Look everywhere and you may see the labour of his hands, the visible symbol of his creative genius.

"For what hath man of all his labour, and of the vexation of his heart, wherein he hath laboured under the sun?"

The works of man are only an outward expression of the great ideas unfolding themselves within him; building a temple more beautiful, more sublime, more enduring than all the efforts of his hand—The Building of Man.

In the construction of this beautiful temple there are a multitude of principles that conspire together in its production. But the foundation principle which is really the material with which the temple is concerned is that which man possesses when he is first launched forth from the hands of the Creator to make the most and the best of which his faculties are susceptible.

Closely related with man's inherited possessions are his surroundings. While no man is a creature of circumstances, yet circumstances often have their weight of influence. In the very beginning of life many are called into unfavorable surroundings; with some their surroundings weigh them down, with others they arise above every resistance of their environment.

It seems strange that so long as mankind are constructed on the same principle that they should end life's career differently. We have heard it said that poets are born, that musicians are not made as such, and that every man has his life's work within himself.

they step forth as they step forth as those prepared for the positions of honor and trust. If ever the world demanded brains it is now, men with sterling worth of intellect, fertile minds and quick to perceive the right thing and know how to make the most acceptable to humanity. In life's great battle for existence the untrained go to the walls while the educated pass on triumphantly and victoriously to those positions for which they are prepared.

But I would broaden my use of the term education by giving it access in the field of skill. We ought to be familiar with books and authors; but greater than all of that we ought to have skill, so as to wisely use our learning in the great purpose of life. Launching out a little farther in the field of skill we find that there is a mental and manual training which accompanies man's many vocations.

James Martineau at the ripe age of seventy-eight produced his wonderful work on ethics. The scholars said that it was the completion of a well rounded life, a master piece, permitting him to rest from his labour; but the dear old philosopher was at work again, and worked as merrily as in the vigor and prime of life; when he had crossed the line of eighty-four years there came forth from his fertile mind another book, entitled "The Seat of Authority in Religion."

Among the other characters in history who have toiled and reached their honors and greatness through labor is the name of Michael Angelo. During his last days we find him standing upon a painter's ladder, his shaggy hair flowing down upon his shoulders, his nerves as steady and firm as in youth, his eyes as keen to the sense of color as ever, there he stands beautifying the walls and ceilings, of the Roman capitol at the age of ninety as a sublime personality of human history.

The cost of our hopes and aims is not only labor but the humility of labor. There is no royal way in which to build the temple of life. The highway of life reaches from earth to heaven, its humble now, but divine farther on. Whatever great and grand things man may do in this world, there is no great or grand way of doing them. Things become grand only through patient and persevering labor.

We must remember that diamonds are not secured with a small price, or gold sought with little effort; whether do we build the grand temple of life in the twinkling of an eye or with little labour. It must be bought with a price, and that price is exceedingly dear. It costs much to travel over the pathway of life and so complete it, that when you have reached the end you may look back with conscientious gratitude and say that you "have fought a good fight."

The first thing that our hopes and aims cost is a thorough preparation for life. Preparation is something that no man can dispense with. He must prepare for life at any cost. Right principles of conduct and purpose must be formulated and incarnated in the young and growing heart. The young person who fails to lay the foundation principles of success in life, principles which are his own, drafted for his own personal conduct is without life's substantial capital and is doomed to an inevitable bankruptcy. The young and rising generation today must be educated let it cost what it may. The qualified are the leaders of today,

and nothing short of results will satisfy. This will give one a sense of duty, leaving upon him the sense of a moral obligation which can be discharged only when results are obtained. When duty seizes the mind it steps forth to secure results knowing no defeat. That most helpful principle of stick-to-it-ness is one that will win and must win. Many people fall short of success when it is almost within reach. Stand by the principles of your life, let come what will and success will surely be yours.

You have undoubtedly heard the story of how a Tyrolean minstrel taught a bulfinch to sing the famous French air, the Marseillaise. He retired to an old deserted castle with his violin, taking with him his bulfinch; here he played before the bird the famous tune a hundred times a day without varying one note; this he repeated for a hundred days, until the bird's throat could vibrate with that national air and thus whistle the tune. The bird formed the unconscious habit of breathing to the tune, and when he opened his mouth he could not help whistling the air. That Tyrolean minstrel worked for results, and in that bulfinch he secured a fortune. We must exclude ourselves.

Mr. and Mrs. Peter Smith of Glendora, was in town Friday.

Miss Margaret Storm of Benton Harbor is visiting relatives in town.

Miss Emma Marshall of Sturgis was calling on friends in town today.

Prof R. J. Black arrived Monday evening, called here by the death of his mother.

Mrs. Maria Stebbins who is visiting Rev and Mrs. W. W. Wells went to Chicago Monday.

Miss Sarah C. White of Dowagiac and Alvin Godfrey spent Sunday at Mr. Jay Godfrey's.

Attorney W. H. Andrews of Berrien Springs was in town Monday on his way to Cassopolis.

Mrs. F. L. Spencer of Lawrence, Mich. is visiting her brother Mr. F. A. Stryker and family.

Mrs. E. S. Roe and daughter Mildred spent Sunday at Dowagiac, with Mr. and Mrs. John Tichenor.

Rev. Mrs. J. C. DeVinney of Parkville, Mich. are visiting his parents Mr. and Mrs. J. G. DeVinney.

Miss Mercer and Miss Jennie Mercer of Viaksburg are visiting their brother Mr. W. L. Mercer and wife.

Rev. J. R. Neirgarth was in Vicksburg, Mich. last week attending a ministerial meeting of this district.

Mr. J. F. Weaver of Adamsville, Mich. returned home Monday after a visit with his brother Mr. Allan Emerson.

Rev. J. F. Bartmess went to Bourbon, Ind. where he delivered a lecture to the Young People's Union last night.

Mr. O. L. Churchill of Jamestown, N. D who has been visiting relatives in Buchanan left last week for New York City.

Messrs. Jud Cyno, and John Byers of Benton Harbor, were the guests of Misses Winifred Bliss and Grace Rouse, Sunday.

Miss Grace Godfrey returned from California last Friday. She thinks that a delightful country and is very much improved in health. Her father met her in Chicago and accompanied her home.

Mr. and Mrs. J. A. Childs and Miss Childs of Evanston, Ills. arrived here for the summer Tuesday. They were accompanied by Miss A. L. Sproule and Miss Edna Stanton of Evanston who will be their guests for some time.

The band concert Tuesday evening was a great success

The Old Settlers Picnic occurred at Berrien Springs yesterday, quite a number driving down.

Mr. Geo. E. Howe who was in charge of the Michigan Central freight train which ran over Zerbe, was formerly a resident of Buchanan, Supervisor A. F. Howe of Bertrand being a brother.

Last Friday evening the Royal Neighbors entertained the Woodmen after lodge. Solos were rendered by Mrs. Sig Desenberg, and Mrs. D. H. Bower and a reading by Mrs. E. S. Roe, and a sunbonnet drill caused great amusement.

Mrs. Frank Steiner went to Ann Arbor Monday to have an operation performed upon their baby's ear, but the physicians at that place decided it would be better to postpone the operation until the child was two years old. Mrs. Steiner returned home to-day.

Miss Bertha Housewerth the thirteen year old daughter of Mr and Mrs. John Housewerth has had a serious time with appendicitis. She was taken ill on February third and since then has had two operations performed but they have failed to give relief, and now her father has arranged to take her to Ann Arbor on Monday to see if a permanent cure cannot be made. The Record trusts that the operation will be successful.

Last Saturday night about eleven o'clock the engine of Michigan Central freight No. 57, George E. Howe, conductor ran over and killed Frank J. Zerbe of Vandavia. The train was doubling over the heavy grade two miles west of Niles, and the engine was coming back after the last section when it struck Zerbe who was walking on the track. A jury was empaneled and an inquest held before Justice W. H. Keller, on Monday, and a verdict rendered of death caused by being run over by engine.

Sunday morning as Wm. Trout-fetter was returning home over the M. B. H. & C. track he found a broken switch near their hand car house. The morning train was coming and he ran toward them swinging his hat, and stopped them within a few feet of the misplaced switch. If he had not stopped them, the train load of excursionists would have been hurled down a high embankment to certain destruction. Probably no one but such an experienced railroad man as "Billy" is would have noticed it, but his practiced eye saw at a glance that the switch was broken.

Commencement Exercises

The commencement of the Buchanan Public School will be held to night at Rough's opera house, beginning at eight o'clock. The following is the programme.

Valetictory - CARRIE M. SWANK
Presentation of Diplomas
Benediction - REV. W. J. DOUGLASS

A fine cement walk is being laid in front of Desenberg's store.

Mr. H. S. Robinson, one of the old residents of this county, died at his home in Berrien Centre on May 30.

The great ball game between the North and South side business men was played on Tuesday and in anticipation of a victory for the North side the Record had a full column article all ready, but alas when the South side produced their pitchers it developed that two pill tossers were too much for our one lone barber, and not content with this advantage, when the south side pitcher tried to cripple the best man the north had, John Hershonow, we concluded we would not say much about it. The score was 20 to 16 in favor of the south side.

WITH THE SAGES.

Do not lose the present in vain perplexities about the future.—Sir T. Martin.

No man has a right to do as he pleases, except when he pleases to do right.—Simmons.

There is no greater honor to a man than to suffer for the sake of what he thinks to be righteous.—W. E. Gladstone.

It is more from carelessness about truth, than from intentional lying that there is so much falsehood in the world.—Johnson.

How truly is a kind heart a fountain of gladness, making everything in its vicinity to freshen into smiles!—Washington Irving.

As a man thou hast nothing to commend thee to thyself, but that only by which thou art a man, that is by what thou chooseth and refuseth.—Taylor.

I have always taught, and do teach, and shall teach, I doubt not, till I die, that in resolving to do our work well is the only sound foundation of any religion whatsoever.—Ruskin.

He who would keep his heart pure and holy must plant a sentinel at every avenue by which sin may find access there, guarding against none more than the little sins, as they are called.—Thomas Guthrie.

The single act of man which can always obtain its object is the accomplishment of duty. The issue of all other resolutions depends on accidents, with which even prudence can do nothing.—Madame de Staël.

Let children know something of the worth of money by earning it; overpay them if you will, but let them get some idea of equivalent; if they get distorted notions of values at the start they will never be righted.—Talmage.

LOOKED BETTER THAT WAY.
We deemed it the part of wisdom to confine the conversation, as far as might be, to generalities.

"The average sailor," we accordingly observed, "is apt to be a pretty bad egg."

"Ah, yes," replied the cannibal, "you are quite right! Why, the last sailor we had was such a bad egg that we couldn't do a thing except make a custard of him!"

From this we gleaned that these savages were not altogether ignorant of culinary devices of civilization.—Detroit Journal

OBITUARY

Mrs. William Blake who has been a great sufferer from paralysis the past ten years died at her home near Buchanan on Sunday morning. The funeral was held Tuesday morning at 10:00 o'clock, Rev. J. C. Royer officiating. Interment was made at Oak Ridge Cemetery.

MARIA J. TAYLOR

daughter of Salema and Harriet Taylor, was born in the state of Ohio July 16, 1838, and died at the home of her daughter in Berrien county, Michigan, June 6th, 1901, being 63 years, 10 months and 22 days old.

She was the oldest of nine children all of whom except two have passed away. She was married to George Dutton Dec. 6th, 1855, and to them four children were born two of whom with their father died in 1869. She married to G. L. Pennell Dec. 31st, 1874, who also preceded her to the grave. She professed faith in Christ and was baptized many years ago in a meeting in Buchanan held by a Baptist minister. Funeral services conducted by Elder Wm. M. Roe, were held at the Christian church at 10 a. m. June 10th. The music rendered by J. J. Roe and Mrs. Geo. B. Richard's was very fine. Interment was made in Oak Ridge cemetery.

BUSINESS AS A SIDE LINE.
Government Clerks Who Make Money in Other Ways.

"It would surprise you if a list could be prepared showing the number of clerks employed in the government departments in this city who make a good living on side lines," said the head of a bureau of the treasury to a Washington Times man. "Many of these people devote hours of the time for which they are paid by the government to schemes of all kinds from which they manage to derive a good income. As matters stand today the tenure in office of a clerk is much longer and safer than it has ever been before and while all of them are getting good salaries they seem to have an idea that the world owes them two livings, and they are getting them in strange ways. Personally, I am acquainted with clerks who have established real estate and rooming agencies, shoe stores, bucket shops and chicken farms. At least one of them has a flourishing loan business. Then the clerks who are engaged in the study of law and medicine are numerous. There are scores of embryo lawyers in all of the executive departments and full-fledged doctors by the dozen. Many of these do a little business on the side when it comes their way, but few of them dare advertise for it. Some years ago the 'sundown doctors' were very prominent in Washington, but of late they have been kept down. These 'sundown doctors' were government clerks who practiced medicine after office hours and many of them even left their desks during the day to make professional calls and to prescribe for patients. This scheme has been broken up, but there are many others which have not. Many attempts have been made to compel the clerks to do that for which they are paid by the government and nothing else, but these have never resulted in anything."

AFTERTHOUGHTS.

When doctors disagree it must be very trying for them to prepare their bulletins.

Our admiration for the skill of some people often causes us to overlook their methods.

The habitual story teller is about the only person who can win commendation by being short in his accounts.

The difference between our plans and our accomplishments shows that experience is generally acquired too late to make much use of it.—Indianapolis News.

Woodman Decoration Day

Next Sunday being the Decoration Day in connection with the M. W. A. appointed by Head Council Northco. It is expected every Woodman will participate. They are requested to meet at the Woodman hall, Sunday afternoon at 2:30, sharp. The line will start at 3 o'clock, march to the cemetery where appropriate exercises will take place. Please bring flowers to the hall not later than 10 o'clock a. m.

Barber Wanted

To purchase, lease or take my shop. Full particulars upon applying to W. W. WATERMAN.

Preaching at the Christian church, by the pastor, W. B. Thomson, morning theme "The old Gospel," evening "The Lights of the world." C. E. prayermeeting at 6:15. Prayermeeting, this week will be held on Friday night, owing to High School commencement this evening.

River Side Camp Meeting

The Trustees of the River Side Camp Ground Association met yesterday at the home of Amos House, and laid plans for this year's camp meeting which will take place over the last two Sundays in August (Aug. 16-25.) Some important changes have been decided upon, and new features added.

Bishop W. Horn and Editor J. H. Lamb both from Cleveland, Ohio, have been listed among the principle speakers.

The outlook for this year's camp meeting is promising and no time, means nor labor will be spared to make it one of the best ever held. Announcements of special services with full particulars will appear on Bills.

BUCHANAN RECORD.

THURSDAY, JUNE 13 1901

Entered at the Post-office at Buchanan, Mich. as second-class matter.

LOCAL NOTES

The railroad carpenters are building new platforms around the M. C. freight house.

The Hamilton and Knight family picnic will be held at Hudson Lake, on Wednesday, June 19.

Mr. and Mrs. C. A. Chapin, now of Chicago, announce the engagement of their daughter, Lucille, and Lionel O. Robertson, of Jamestown, N. Y.

The second quarterly meeting of the Evangelical church will take place next Sunday in the Evangelical church. Rev. G. A. Hettler will have charge of all the services. There will be preaching on Friday and Saturday evenings at 7:30. The public is invited to all services.

The Berrien County Y. P. S. C. E. Union will hold a convention at Three Oaks on June 20, and 21. Interesting programs have been prepared and a good time is promised for all. Among those on the program will be Miss Elsie Kingery and Mr. J. Ellison Miller of Buchanan. Thursday evening Rev. W. S. Ament D. D. will speak on the "Boxer" movement in China.

Postmaster G. W. Noble has installed a new cancelling machine in the post office, which is a great improvement over the old hand stamp. The machine is called the Perfection Hand Stamping Machine, and is made by a Detroit concern. The machine was put in use on Friday and the force are greatly pleased with the work it does.

The Lady Maccabees are invited to the home of Mrs. Riley Scott, next Thursday for a Maccabee dinner. Every one invited to come early and stay late.

Harry Brown son of Oscar Brown, arrived home from the Philippines last Saturday, after a service in the 45th. U. S. V. of twenty one months. He has many interesting stories of his experiences.

The Children's day exercises of the Presbyterian Sunday School will take place next Sunday morning at 10:30 o'clock. There will be given a program of songs, recitations and music. In the evening Mrs. Abbie M. Stebbins will speak concerning the people and religious work of India. She will also address the children in the morning. All are invited to attend.

A number of Buchanan music loving people, enjoyed a great treat at the home of Mr. and Mrs. Sig Desenberg last evening. Mrs. Catharine Robbins, and Miss Gertrude Smith who are studying and teaching music in New York City gave a fine musical program, which was greatly appreciated by all present. Mrs. Robbins has a high reputation as a vocal teacher and may be prevailed upon to take a class of pupils here this summer.

Cards have been received here announcing the marriage of Rev. J. Clyde DeViney and Miss Grace Hervey Collins. The happy event occurred at Blissfield, Mich., on June fifth, at the home of the bride's parents Mr. and Mrs. H. M. Collins, Prof. Goodrich of Albion College performed the ceremony. Rev. and Mrs. DeViney will be at home after June twenty fourth at Parkville. The Record extends hearty congratulations to the happy couple and wish them a prosperous journey through life.

The Class of 1903 gave a very pleasant reception to Supt. L. G. Avery last Friday evening at the home of Fred Knight on Days Avenue. The decorations were very beautiful, the hall being in pink and green; the parlor, pink and white; library in yellow and blue. About fifty were present and listened to the following program:

Instrumental Solo EMMA CONRAD
Vocal Solo JEAN EARLE
Duet HAZEL MILES AND ELSIE SMITH
Vocal Solo MRS. MERCER

Quartette
Recitation MABEL CARROLL
Quartette

After the program, games were played followed by a dainty two course supper at the conclusion of which the toasts were given and responses made as follows:

Teachers, Leah Ray; Boys, Blanche Wells; Girls, Walter East; Tenth Grade, Agnes Slocum; Mr. Jesse East officiating as toastmaster.

The Michigan Central railroad ever mindful of the comfort of its patrons are adding some elegant new coaches on their through trains. The coaches are of the platform vestibule type and are comfortable and handsome. A new time table went into effect Sunday, the only changes affecting Buchanan are the time of train No. 14 going east which now leaves at 5:23 P. M. instead of 5:30 P. M. and an arrangement whereby the Grand Rapids flyer going west at 3:15 p. m. will stop to take on passengers going west of Michigan City, and the east bound flyer will stop at 7:15 p. m. to leave Chicago passengers. A new flyer called the "Pan American Special" has been added which makes no stops except Michigan City, Niles, Kalamazoo, Battle Creek, Jackson Ann Arbor, between Chicago and Detroit. The train goes through Buchanan at 7:10 a. m. going west, and 8:10 p. m. going east. You can be sure that the Michigan Central will take good care of its patrons.

BACCALAUREATE ADDRESS

Continued from page 3

ves from everything but the great object of our lives. and then discipline ourselves for great and honorable results.

Napoleon I. was conducting a campaign, he was engaged in a great battle, a critical point came, he called an officer to him and asked the officer if he could if he could take yonder fort; the officer's response was "I will try sir" "Try" said the great general "give me your sword and go to the ranks." Then he questioned the assembled officers. "Who will take the fort?" Murat lifted his white plume and said "I will do it sire" "go brave Murat, and a kingdom awaits your safe return." We are not here in this chequered world simply to try for results, but to secure them.

In connection with our ideals and our efforts to realize them. We formulate habits—good or bad. Our habits are really the machinery, through which we transmit power into our own little world and thus assist in the movement of the great world around us.

Our bad habits may become many and in part paying their obedience to our besetting sin which is the immoral gravitation of our soul toward sensual gratification. It is possible for all mankind to indulge in intemperance and there are many avenues in which men can give vent to intemperate desires. There is the channel of intoxication, of profanity, vulgarity, theft, prevarication, malice, hatred and a host of things that are possible for the humane heart to foster. Bad habits are as much a power in the immoral world as good habits are in the moral. And bad habits are the powers that rule the soul toward an evil and sad end; and no man can afford to carry the lodestone of evil in his heart when it is taking him farther and farther away from the grand possibilities of what he might attain unto.

It is sometimes difficult to impress upon the mind of those who are forming bad habits that they go in groups and one bad habit follows another. The law of nature has been demonstrated over and over again, that one bad habit will lead in succession to others still worse until the soul falls into immortal bankruptcy. There is eminent danger in this direction in as-much as they are accumulative in their progress. They are not in a dormant state, nor do they remain in a dimutive condition, but every time they are yielded to they gain in strength, in momentum, and in volume. As has been very truthfully said, bad habits bear interest, even compound interest.

May we speak a word as to good habits which we should inculcate into our temple of life. The first good habit that I would suggest is that of being wise. I do not mean the gathering in of facts or of obtaining an education, but I mean the readiness of acting judiciously, discreetly, or with sagacity, and in addition to all of this to put our wisdom before them into the activities of life so as to gain the best possibilities of which our nature is capable. Many a disaster has befallen the human family, many a sorrow has found its way into otherwise undisturbed homes, and many a soul has suffered dire distress because some one or more has been in want of real practical wisdom. Not cunning, nor craftiness, but wisdom.

The second good habit that I might mention as the outgrowth of wisdom is that of attention for the better things of life. There is more want in this direction than in any other. Good things come and go, but no attention is paid to them. Attention to things divine will carry man along the avenues of escape from bad habits, and lead him to great things of life. Around this one point, I dare say that there is more sorrow and disappointment, more discouragement and blasted hopes than around any other given point. Many a soul lays upon the battle-field of life as a splendid failure all because of a want of attention to better things.

In close proximity to attention comes thoroughness as a good habit. Life's great work is not complete unless it has been one of thoroughness. Half-hearted work is not a successful method. The person who follows the principle of thoroughness will be more useful, consequently more successful, and will attain to a greater degree of eminence than he otherwise would. Live a thorough life. Be a thorough workman. Be a thorough student. And last but not least be a thorough child of the heavenly King if you wish to reach true greatness of character.

Have you got friends? Are they

good friends! Are they worthy of your association? The best friends are good habits. Good habits are the fortifications behind which we may entrench ourselves now and in the future as a part of the great temple of life.

In closing our remarks upon the subject of temple building, permit me to add two concluding thoughts. The first is that we must expect to lead nameless lives. Our hopes to become eminently great can hardly be realized. The only greatness we can ever expect to reach is that of a goodly character. Othwise our lives will be nameless beyond the circle and generation in which we live. In a certain church there were two devout and highly esteemed ladies who were upon their death beds. A good brother came to me one day with sorrow in his heart and condolence upon his lips, saying "We will greatly miss those two women, and the church cannot succeed without them." "Hush brother the church will move on just the same, even though they may be greatly missed." The great wheel of church and state will roll on just the same regardless of who falls by the wayside. Lincoln fell, did the state stop? Garfield was shot, did the government cease? Luther and Wesley, Knox and Fox, Spurgeon and Beecher and Hall and Simpson are gone but the wheel of church moves on without them as if they never were among men. What will the Church and State do when we are gone? never know that we have fallen by the wayside. In our cemeteries we see the granite shaft, the white slab, the oval board, and the grassy mound, all of them represent man's efforts to perpetuate the names of the sainted dead in a feeble effort to keep man from going into a nameless grave.

The second thought is What is greatness of life and character? True greatness is the higher and nobler sentiment of life welling up within the heart, overcoming resistance, reaching out after the possible ideal, and crystallizing all of life's noble purposes in a development of character that will reflect benevolence of soul upon those around.

The Saracens had invaded Italy; and were besieging the Christian cities of Beneventum and Capua. The Lombard sought aid from the Greek emperor. One of their citizens dropped over the walls and passing the enemy's lines performed his commission, and on his return he was captured by the barbarians, they demanded that he assist them in their enterprise by deceiving his countrymen; and for this he would be rewarded, otherwise he would suffer immediate death. He apparently yielded and they led him to within hearing of the city, when he cried with a loud voice, "Friends and brethren be bold and patient; maintain the city; your sovereigns informed of your distress and your deliverers are at hand." The rage of the barbarians brought him to an untimely death by piercing him with a hundred spears. That man possessed a noble character, he was willing to offer himself as a sacrifice for the people, for Christianity, and for the world.

To be great, have the higher law within the heart, and live in the broadest sense of the word, a life for man and for God, and thus build a temple enduring in the heavens.

At the conclusion of the address Rev. W. B. Thomson pronounced the benediction.

The names of those comprising the class are as follows:—Florence Swank, Ruby R. Phelps, Geo. N. Riley, M. Myrtle Clevenger, Mabel Colvin, Fannie D. Williams, Mattie L. Richardson, Flora N. Currier, Myrtle A. Kelsey, Zella M. Alliger, E. Seba Allen, Daisy E. Redden, Frank R. Swink, Maud Smith, R. E. Mead, Carrie M. Swank.

ONLY HALF TRUE. The following is an opinion doubtless to be shared by many Americans who heard Matthew Arnold lecture during his stay among us. After his return to London at the close of his first American tour he visited Mrs. Proctor, the widow of "Barry Cornwall" and mother of Adelaide Proctor. The lady was then 80 years old, and in giving Mr. Arnold a cup of tea she asked, with the pardonable frankness of age:

"And what did they say about you in America?" "Well," said the literary autoer, "they said I was conceited. They said my clothes did not fit me." "Well, now," commented the old lady, "I think they were mistaken as to the clothes."—Youth's Companion.

For Rent Two large airy rooms well furnished. Good location. Enquire of Mrs. Clara Dodd Smith at her Massage Parlors, first house south of wagon shop.

COUNTY SEAT NEWS

Judge J. J. VanRiper made his first argument before a court in eight years in the sidewalk damage suit of Lydia Weed vs. the city of Niles in Circuit Court Friday afternoon. Judge VanRiper's earnest and well-constructed plea being in behalf of the defendant city. The jury retired in the evening and at 9:30 o'clock agreed on a verdict of \$510 for Mrs. Weed. She sued for \$5,100. The city had offered her \$250 in settlement, as it was a plain case of municipal liability, and for this reason the judgement on the verdict will be paid without further contest. Mrs. Weed fell on a defective walk and hurt her wrist badly, besides receiving other injuries.

It was proven that the attention of the authorities had been called to the bad walk and that negligence was shown in ordering repairs, which always renders a city liable to payment for any injuries subsequently received.

VENTILATING CHURCHES.

Bad Air the Prime Cause of Illness in Congregations.

The ventilation of a large number of churches is notoriously bad, and bad ventilation has frequently more to do with sleepy congregations than even the dullness or the length of the sermon. Wide interest has been created by the description of a new departure in the system of combiner warming and ventilation introduced by Prof. Fischer in the new memorial church at Berlin, Germany, which in its general plan resembles St. Paul's Cathedral, in London. To the height of 80 feet from the floor the walls are traversed by hot-air chambers, so that from the ground to the galleries, 22 feet above, there is no perceptible difference of temperature, the air being kept constantly at 15 degrees C. (60 degrees F.) The aid of the engine has been the removal from the space occupied by the congregation of paths followed by the currents of air conveying the warmth from the sources of heat to the radiating surfaces, by placing the heating apparatus high up in the neighborhood of the cooling surface, maintaining, in reversal of the usual procedure, a higher temperature in the upper portion of the building and intercepting and reheating the cooled air in its descent toward the lower part occupied by the congregation. There are thus four stratas of air of different temperatures. Prof. Fischer maintains that the system of heating the upper more than the lower regions of the air is the only proper course in such lofty buildings as churches, for whereas with the ordinary method the air heated on or below the ground level is cooled on reaching the roof and, fouled by the products of respiration, descends again on the heads of the congregation, unless withdrawn by an exhauster, in his system the fresh air is warmed to an agreeable temperature in its passage through the channels in the walls. Furthermore, its ascent is encouraged by its being led through two sets of heating coils. In the dome there is a third set of coil, which, although they do not contribute to the warming of the parts occupied by the worshippers, serve effectually to prevent the descent of the foul air by promoting its continued ascent toward and escape through the apertures in the lantern that crowns the edifice.

PEAT TO REPLACE COAL.

The Bogs of Ireland May Supply the English Fuel Scarcity.

Science has recently explored with startling results the possibilities of peat as a fuel, and mechanical ingenuity has devised a plant which promises to convert the Irish bog into a more valuable property than the Russian petroleum fields. By these new methods of which certain details have been recently communicated, promise is given of an extraordinary revolution in the fuel problem. Machinery has been devised by means of which the moisture of the raw peat is absorbed and complete disintegration effected at one simple and rapid operation without the aid of either kiln or grinder. It is no longer a clumsy and imperfect operation of months, but almost one of minutes only. A plant for the working daily of 1,000 cubic yards of bog can be readily installed, and these 1,000 yards will yield 300 tons of peat fuel at a cost of \$5 6d to 5s per ton. A step farther converts these 300 tons into peat charcoal, a product equal to the best ordinary charcoal, at an average cost of 15s to 17s per ton. The new peat fuel is practically smokeless and odorless, being almost free from carbon or hydro-carbon, excepting as primarily contained in the peat. Its specific gravity, calorific properties and cleanliness are also very powerful recommendations. It burns with a brilliant flame, yields intense heat and is remarkably lasting. For steam and naval purposes the peat is subjected to special treatment, the nature of which is at present a secret. It may be said, however, that no tar, pitch, petroleum or similar adhesives are used, the special object being to avoid smoke, soot, gases and dirt. When Ireland, with her 3,000,000 acres of peat bogs, and the rest of the kingdom with two and a half millions, are taken into account there is certainly a call for the new process.—Utica Globe.

SOUTH AFRICAN NATIVES.

Abrorigines in This Land Are Dirty Yellow Bushmen.

Some Englishmen call the natives of India "niggers," with an emphatic adjective often prefixed. Persons of this kind, with the same exquisite accuracy and the same just sense of superiority, call the races of South Africa "niggers" also. Some persons are neither wiser nor better bred than those foreigners in Africa who habitually refer to the natives as "black cattle" or "black trash." The fact is that the natives are neither negroes nor black. The aborigines appear to have been bushmen, who are of a dingy yellow color. These have been pressed southward and broken up into scattered communities by invading peoples of Bantu stock. The Hottentots are believed to be of mixed bushmen and Bantu descent. In physical characteristics they resemble the bushmen, and they speak a tongue like theirs, full of clicks, and like theirs in grammatical construction. To the similarity of grammatical construction, however, there is one important qualification. The bushmen language is that primitive type which has no genders, while the Hottentot language is sex-denoting. South Africa is generally divided into two great peoples known generically as the Bechuana and the Zulus. To these two peoples (I do not attempt here an enumeration of the various tribes) the native inhabitants of the Transvaal and the Orange River colony chiefly belong, though there are isolated communities of bushmen. Soft in their speech and pleasant to the ear, full of vowels and devoid of the clicks and harshness of the bushman dialects. Though they are not negroes, they are prolific and thrive, as the negroes, too, thrive in the presence of civilization. Hence they are likely to remain a permanent element of the population, and an increasing rather than a diminishing element. The bushmen are hunters at a relatively low level of savagery, but furnished with the bow and possessed of considerable artistic power. Far inferior to them in the latter respect, the Bantu tribes are otherwise much further advanced. They are pastoral and warlike peoples, living under the government of chiefs in communities organized on a patriarchal basis.—Monthly Review.

FORECAST OF FASHIONS.

Waists of all-over embroidery will be much in vogue this summer.

All skirts for afternoon and evening wear will be made with the dip front.

Everything is done to broaden the shoulder effect, though the sleeves are not puffed at the top.

Hats covered almost entirely with flowers are becoming to most women, and are much in fashion.

The walking skirt for the coming spring should not be over three inches from the ground in length.

The Janice Meredith curl gives a girl a decidedly untidy appearance, especially when that style of coiffure is worn in the street.

One of the new ideas in spring millinery is to combine straw braids with tulle, the latter being introduced into the trimming.

Skirts for afternoon wear are made of velvet, taffeta and peau de soie, but satin is not in evidence unless draped with net or grenadine.

Among the most attractive material now appearing in the new summer gowns is chambray in plain and fancy ground, with both dull and mercerized finish.

This is the season when one grows tired of one's winter gowns and becomes anxious for spring suits with lightweight jacket and skirt, but it is not wise to discard the heavy coats and furs even though the days seem warm.

Among elegant creations of French dressmakers are long coats in the Empire style, trimmed of the leading shades of finest lily-finished cloth, lined with white or very delicate mauve, blue or old rose satin, with standing and cape collars of panne, edged with sable, ermine, mink, otter, or chinchilla fur.

Short Talks on Advertising

By Charles Austin Bates.

No. 11.

Some time ago one of the largest and most liberal advertisers in a leading Eastern city had a successful sale of a stock of goods obtained through the failure of a competitor. The man who failed had a large capital invested in his business. He carried a line of goods above the average for completeness and desirability. There seemed to be no reason for his failure except one. His store was poorly advertised.

In one of the advertisements of the firm which bought the stock, the statement was made: "The store was poorly advertised, so poorly indeed, that few people knew of the existence of so great a business house anywhere east of Main street."

This transaction furnishes an object lesson that is most conclusive. The man who failed to advertise, but he did not advertise right, or no at all. His stock was sold by the advertiser who did advertise properly and liberally.

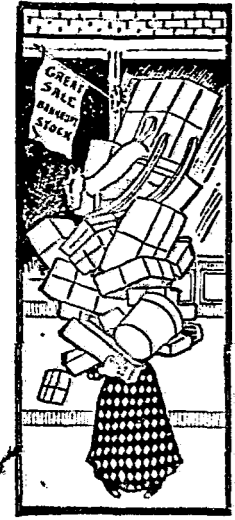

Advertising is the most useful of all the tools of business, but it has a razor edge. The man who handles it carelessly is sure to wish he hadn't. The mere fact that a man advertises is by no means an insurance of business success. He must give constant, careful thought to the subject. It is the only part of his business which will never run itself. You can get any other department in the business down to such a system that it will require very little thought, but the successful advertiser must be always alert and must never take his hand off the advertising rudder for an instant.

Every day people are gaining more and more confidence in advertising. More and more of them are turning to the advertising columns of the paper for information. There is no doubt about this.

The business men who fail to appreciate it are likely to find themselves so far behind the times that they will never catch up. It is always better to advertise a little too much than not quite enough. It is better to use a little more time than is necessary in the consideration of advertising and the preparation of advertisements than it is to be ever so little careless about it.

He has a large capital invested in his business.

The advertiser advertises. His store was sold, not by the advertiser who did.

Advertising is the most useful of all business tools, but it has a razor edge.

use. This one machine must be all right within itself, and must be run according to rule if you are to succeed with it.

The several machines have different methods of turning the eggs, all of which will accomplish the desired end. Some people turn them twice, other once in twenty-four hours, with equally good results. I feel no hesitation in saying that the hen shifts her eggs much oftener than is supposed. The next time you set a hen mark two of the eggs with a black line all around them, lift the hen from the nest two or three times in one twenty-four hours, and note the change of position of these two eggs; and I believe you will conclude that she changes them oftener than once a day.

The hen leaves her nest regularly once a day when she has her own way about it, usually during the morning hours. If she can find food, water and a dust-bath, she will return to the eggs in from 20 to 30 minutes. During this time her eggs have had time to air and cool, her body is cooled off and she returns refreshed to the eggs. Naturally one would suppose the eggs would be considerably cooler when she returned to them than when she left them; but they hatch well. Usually she hatches every hatchable egg. And we all work to have our incubators do as well as the hen. Might not it be well to study her methods?

Air and ventilate the eggs in a proper manner. Don't be fearful of their getting too cold, providing they are in as warm a place as the hen has her nest. Let both the eggs and the machine have proper airing—not in a freezing atmosphere, but where the surroundings are right for the machine. Some people keep them out 10 minutes, others 15 and 20. I believe from 10 to 20 minutes, according to the temperature of the room, to be about right. You have thus struck about the average time that the hen allows herself when she leaves the eggs. Less than half as much airing will be plenty for the machine. Do not allow it to run below 90 degrees or 95 degrees when the eggs are out. Testing the egg has nothing to do for or against the hatch. It simply furnishes you with facts in advance. If the eggs are tested the seventh or tenth day, you can select the clear eggs which are, as good for general use as any eggs two weeks old. If perfectly clear and free from life giving germs, they will keep longer than other eggs. Many use these clear eggs to cook for the chicks, or in making corn bread for them. I hardly think anyone could tell them from other eggs of the same age if made use of for cooking or the table, as they are not injured in the least beyond other eggs that we keep in box or basket for two or three weeks.

The advantages of testing the eggs as soon as practicable are many. If two or more incubators are filled and started the same day, when the time comes to test them it may be possible that the good fertile eggs will all go into one machine; and the other may be filled again, thus saving time and space. Those who run a number of machines, and are expert at testing, can select all the clear eggs from the fertile eggs the third or fourth day; thus selecting the clear eggs for market before they begin to spoil. This is a large business, and many of what are called tested ducks' and hens' eggs are sold in the cities. The sooner they can be selected from the fertile eggs the better for the handler, who turns his money the quicker.

The question of moisture has been much considered. We never furnish any artificial moisture for our machines, neither do we keep them in hot rooms. Up to May first they are kept on the first floor in one of the living-rooms—that is, next to the kitchen. All the heat that gets into the room comes through an open door into the kitchen, or from the machines themselves. After May 1 they go into the cellar under the house. Machines that are constructed for this method supply their own moisture from the atmosphere. It is quite possible to furnish too much moisture when a pan of water is put into the machine. The less aid we give the better. When it is necessary to use a moisture gauge to be satisfied that there is enough moisture in the machine, or when we must move and remove pans of water into and out of the machines, it adds to the complications of management and gives that much more trouble. The more simple the management, the better, provided they will do good work, the test of which is their ability to hatch every hatchable egg.

When the hatch comes in sight, don't open the machine until it is complete

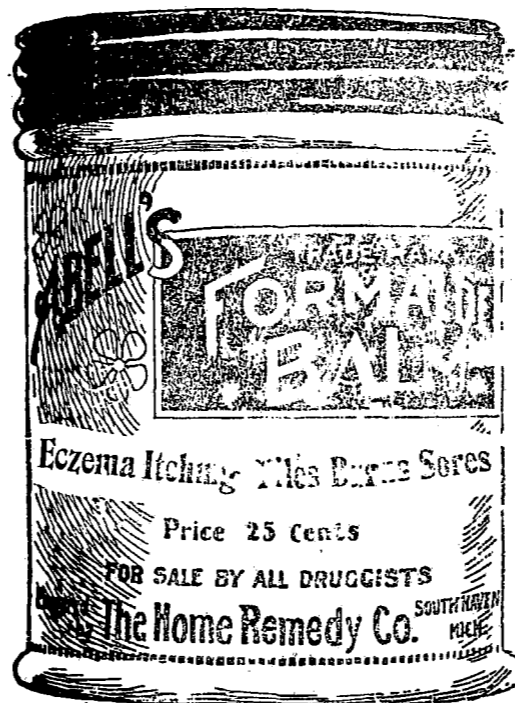

The conditions of moisture and aid for breaking the shell should be complete at this time, and to open the machine may so disturb these conditions as to retard their advancement and create other conditions that may reduce the results materially. If your machine is properly constructed, the ventilation will be such as to make the chicks comfortable after they drop below the tray, where they may stop for a day or more and do well. I have seen them kept in the lower part of the machine as a brooder for three days, and do well, being provided with food but no water.

T. F. MCGREW.

Beware of Wet Food!—It is a mistake to suppose, because the chicken is small, that it needs to be fed mainly soft food. No other one thing causes so many deaths among young chicks as wet corn meal, left where they can run into it, trampling the food with their dirty feet, and then leaving a large part of it to ferment, which it is sure to do in the warm sunshine. The food for the chicks should be as nearly dry as it can be, to feed conveniently, and corn meal should never be given to small chicks except as it is mixed in a dry, crumbly state. A very good feed for little chicks is corn meal, bran and ground oats, equal parts. For this purpose, the oat meal should be sifted, so as to remove all coarse matter, then mix and bake hard like a johnny cake. To get this bread in good shape to feed, it should be run through a mill and ground fine. But, I believe in giving dry grains from the start—pin-head oat meal, millet, finely cracked corn and wheat. Some fine grit and charcoal should now be placed where they can get at it. Whole corn should not be given to chickens until they are quite large; the kernels are too large for them to digest will, and its heating nature makes it likely to ferment in their gizzards, as corn meal will do, if eaten freely. Wheat is an excellent feed for chickens after they are eight or ten weeks old.—*Poultry Monthly.*

Black That Won a Fortune.
Gov. Charles Mackintosh, of the Northwest Territory, found himself at the age of 55 years not only practically broke, but with a string of debts reaching from the west to the east of British North America. He put his hand to the plow, however, with unabated courage, and the result was another proof of the truth of the old proverb that where's there a will there's always a way. He went on a hog train into Rossland when the first news of that wonderful mining strike reached him, and two years later he came out without a debt in the world and a bank balance of no less than \$350,000. He has been governor of the largest province in the British empire, for the Northwest Territory, stretching as it does from Montana on the south to Alaska on the north, including the Klondike, and from Manitoba on the east to British Columbia on the west, is easily the ranking province of the empire in point of area.—*Utica Globe.*

The Reliable Dealers for all Kinds of

Fuggies, Wagons, and Farm Implements

ALSO FERTILISERS OF ALL KINDS.

At The "Popular Store."

JULY ATTRACTIONS.

A special display of summer wearing apparel. Lines are now complete—correct styles that are made well and fit well. Comfort can be had at very little expense if you buy

AT ELLSWORTH'S

Tub Suits

Are suits you can put into the wash tub and wash clean again after wearing. A "Tub Suit" consists of a shirt waist with a skirt to match. These are made of dimity, lawn gingham. There are a great many colors and you will find the prices reasonable—\$1.98 up.

Dressing sacques These dainty garments are made for hot weather wear and come in both white and colors.
Kimonas They are made of lawns, soft dimities, etc., and trimmed with fine laces and embroideries. They are not expensive, either. Fifty cents or \$1.00 will buy a beauty.

Wrappers

The wrapper department this year is prepared to show you the strongest line of wrappers this store has ever owned. All are new, made of good, serviceable materials that will not fade in the wash tub. Bishop sleeve, wide flounce. Sizes range from 32 to 46. Prices reasonable—75 cents and 98 cents for truly dependable wrappers.

The Geisha Shirt Waist Is the standard WHITE shirt waist from which all other shirt waists are copied. This is the most beautiful shirt waist in the market to-day. It is just as cheap to have the best fit and style. You are sure of getting something good if you care to invest 89c in a "Geisha" white shirt waist. Eighty-nine cents is the lowest price for Geisha Waists. They come in other grades, too—98c, \$1.25 and up.

My line of colored waists include the celebrated "Derby Waist," "The Paragon," "The Parkside." These are made in all the popular materials. The shades are new, linen color, strawberry-red, ox-blood, etc. The new sailor collar and vest effect. Prices, 75c and 98c up to \$2.50.

Bargain table Offer All waists left over from last year are placed on a separate table and priced 25c and 50c. There are some splendid values here in materials—the styles are passe, but some of them cost originally as high as \$2.00 each.

Separate Wash Skirts The new shapes cut with extreme flare, made of crash, duck, batiste, linen, pique and denim. Prices from 25c each to \$5.00.

Golf Vests For ladies and misses. In bright red, bright green, royal blue and black and white. Prices from \$2.00 to \$3.50.

I ask you the favor of a visit to my store and assure the certainty of satisfaction you will receive. You are always welcome at THE POPULAR STORE whether you wish to buy or not.

POULTRY

Starting on Borrowed Capital.

EDS COUNTRY GENTLEMEN—I have 120 acres in the Catskills—50 acres or more tillable—located on railroad and immediately at one of the principal stations on said railroad. The land is good and well watered, springs and trout streams, and the section is one of the most noted summer resorts in these mountains, affording a good home market during the summer for various products. I am middle aged and understand the practical side of farming, from several years of experience gained when younger. I have very little capital, however, and the question is would I be justified in negotiating a loan of sufficient amount to start the poultry business at this place, and employ a man who is thoroughly conversant with all details of the business and farming? This place is one hour by rail from the city of Kingston, on the Hudson, and three hours by rail from New York City. s. c. s.

If you are sure you could have a profitable market for your products, you might make it pay, but your season is short; your home market will scarcely last longer than five months, during which time poultry, eggs and garden stuff is plentiful all about you and can be purchased for less than during any other season. For these reasons we should advise your going into the poultry venture in a small way at first. Provide for not to exceed fifty or one hundred to start with. Learn to care for these; if you find you can make this number profitable, you can slowly add to your number.

To mortgage your farm to start into a venture that you do not understand, and for the success of which you must depend on hired labor, is rather a risky business. You had better employ farm help that will relieve you enough so you will have time to attend to the fowls yourself, and in this way learn how to make these few pay before you go into a venture that one must thoroughly understand to make it pay a profit.

Before you go into the poultry business, you should visit some well-established poultry plant, where you can see and study its workings. By so doing, you will gain much information that will be valuable to you in the future. You will see the absolute necessity of care and economy in all of its branches, the complete knowledge of which is requisite to success.

Incubators and Incubator Chicks.

When you select an incubator, be sure that you choose one that is standard in quality, one that has and will continue to do good work in the hands of an amateur. Do not for one moment get the notion in your head that any child can run one; but you may depend upon it that any good sensible person, man, woman or child that is old enough, can learn to run one very nicely if he will give the matter his attention; but like the sewing machine or the churn, it must have sensible attention or poor results must follow.

Lamps must be properly cleaned, filled and the wicks trimmed. It takes fully as much care for the lamp that heats the machine as is necessary for the lamp you read by. The heat must be as carefully regulated in the machine as in the oven for baking. It must be just right. The regulator will do its part; but should those in charge of the machine be so careless as to refill and put it back without properly regulating the flame, too much heat may be the result. This is the fault of the operator; the same if too low, and too little heat results.

When the machine is started one should pay strict attention until one is fully satisfied that he has turned on the proper sized flame that will, with the help of the regulator, keep the proper degree of heat within the machine. When this is intact the machine should go along for twelve hours without attention. Frequent observations for the first day or two are necessary to fall assurance that the lamp and regulator are doing their proper work. When this condition is reached, note the height of the flame, and keep it to this form, for in this way trouble comes.

The heat should hold very nicely in a good machine when you have it properly regulated. I have had machines go through the whole three weeks and not vary two degrees during the whole period; while I have seen them vary as much as four degrees in one day. This is partly the fault of the attendant, and partly the fault of the machine. For these reasons it is well to consider the machine you buy before you secure one; also to pay proper attention to printed directions when you get it. An expert can run successfully any machine; but this is not the case with the thousands who buy one machine for their own

CORRESPONDENCE

DAYTON.

Wm. Bromley went to Big Rapids Friday, to attend a family reunion and in hopes the change of air may help his failing health.

Mrs. Wm. Bromley and daughter, Jane, are visiting in South Bend.

Floyd Weaver was in town over Sunday.

Arthur Whitley of Chicago was in town the first of the week, visiting his family.

Mr. Williams visited in Three Oaks Wednesday.

BENTON HARBOR

There was a concert at the Congregational church Tuesday evening.

Children's Day was appropriately observed by the various churches last Sunday.

Mr. and Mrs. John Jarvis of Buchanan spent Sunday in this city.

St. Joseph is to pave seven of her streets, five with brick and two with asphalt, at a cost of \$24,000.

There was a game of baseball in St. Joseph, last Sunday between the All-Stars of that place and a team from Grand Rapids.

The first new potatoes of the season were brought to this city from Fair Plain, last Friday. There were eight of them in a paper candy sack.

Last Friday a Hoosier farmer was fleeced of \$130, by three card sharks in a St. Joe saloon. They were arrested by the deputy sheriff and rather than stand trial, they disgorged.

The Three I railroad is to be extended across the river to this city, and it is said the contract for a very large and a very fine bridge has been let to the American Bridge company.

The leadership of the Pottawatomie Indians has been in the Pokagon family since the discovery of America till a few days ago, the council of seven held a secret meeting at Hartford and elected Isaac Quigno chief; Charles son of the old chief Pokagon, was deposed of because of his drinking habits, and because he is not sufficiently active in pressing the tribe's claim to the lake front of Chicago, which claim involves the enormous sum of \$200,000,000. There are some sensational stories afloat concerning the matter.

GALIEN

Mr. and Mrs. Will A. Endly of Walkerton, Ind., visited relatives in town the first of the week.

Clarence Smith made a business trip to South Bend and Elkhart the first of the week.

The Galien juvenile team were defeated at Three Oaks Saturday by a score of 29 to 10. The teams have now won a game each and the "rubber" will be played on the Galien grounds a week from Saturday.

Some fine black bass weighing up to 5 and 6 pounds are being caught in Garwood lake.

A large number from here attended Wallace's circus at South Bend, Tuesday.

W. A. Endly and Ben. R. Jones made a fishing trip to Dayton lake, Monday.

Dr. Conrad was in Buchanan Sunday.

Clark Glover was in Buchanan calling on friends.

In a boiler explosion at the Wolverine handle factory Friday, in which the mud valve blew out, engineer Henry Wediner was quite seriously injured. The accident has compelled the factory to shut down for a time.

The M. C. R. R. have made their old depot here look quite respectable, having painted it a drab color trimmed in dark brown.

Glen Smith is painting his store building, this week.

The I. I. R. R., now run two passenger trains daily through this place.

Glen Smith will go to Mineral Springs, in Ind., next week, where he will take treatment for rheumatism.

Otto Lyon of this place sang in the male quartette at the Three Oaks commencement Friday.

Dave Havens of South Bend is visiting his father S. S. Havens, here this week.

The pear crop in this section will be a failure this year. The frosts did the work. Peaches and apples are looking well.

Our printing will please you. Give it a trial.

Pepto Quinine Tablets cure a cold

COUNTY SEAT NEWS

THURSDAY.

Judge Carr, of Cassopolis, is here to day to sit on the bench in the trial of the \$10,000 damage suit of Lydia Weed vs. the city of Niles. The plaintiff claims she was permanently injured by a defective sidewalk. Judge Coolidge owns property in Niles and was unable to hear the case on that account. Some difficulty was encountered in securing suitable jurors. Gore & Harvey appear for the plaintiff and J. J. VanRiper for the defendant.

FRIDAY.

One juror lost Lucy Stickley a heavy verdict for damages against the township of Sodus Thursday night. The man who stood out in favor of the defendant was Mr. Will Newland, of Benton Harbor.

The case will undoubtedly be tried at the next term of court.

Gore & Harvey appeared for the plaintiff and L. C. Fye and James O'Hara for the defendant.

The case of Arthur L. Pearl vs the township of Benton, for damages for injuries in the falling of a defective bridge, in which the plaintiff was awarded a verdict of \$5,000 on the first trial in Circuit court and \$8,500 in section, was tried by stipulation informally Thursday afternoon, the type written evidence of former trials being submitted without examination of witnesses or arguments and Judge Coolidge directing a verdict for the defendant. On this showing the case will be carried again to the Supreme court so as to get the merits of the case before that tribunal to ascertain the liability of the township for damages under the peculiar circumstances involved. In this case Messrs Gore & Harvey appear for plaintiff and Geo. M. Valentine and M. L. Howell for the defendant.

The case of Lydia Weed vs. the city of Niles is on trial before Judge Carr.

A case by summons has been commenced by Chas. E. Sweet against the city of Niles.

Class Picnic

If a Sunday school class ever enjoyed themselves at a picnic it was class No. 3, of the Christian church, last Saturday.

The teacher took the class out to the home of Mrs. Wm. Haslett to spend the afternoon, and right royally were they entertained by Mrs. Haslett and her worthy daughters. Swings, hammocks and boats were all employed in lending delightful pleasure to the happy children. At about five o'clock the class and others were called to partake of a bountiful supper prepared by Mrs. Haslett. As we entered the spacious dining room two large tables loaded with delicious dainties, fit for a king greeted the astonished eyes of the happy children, which in all numbered about twenty-five. Truly Mrs. Haslett has somewhere in life learned the beautiful lesson "that it is more blessed to give than to receive."

Soon after supper all returned to their homes feeling there were but few people in the world that know better how to entertain their guests than does Mrs. Haslett and her daughters. May they live many long years to gladden the hearts and lives of those about them. Surely this world is in need of the warm sympathetic sunshine which comes from such lives as these. God bless every one that was there.

Rev. O. J. Roberts of Flushing a former pastor of Buchanan, delivered the Memorial Day address at Flushing. The *Observer* of that place in speaking of Mr. Roberts address says: Like all of Mr. Roberts' utterances on such occasions his address was patriotic, inspiring and replete with good thoughts, and was listened to with close attention by his large audience.

SHE 'SAT DOON.'

A Glasgow servant girl went home a few evenings ago with her head wrapped up in a shawl.

Her young mistress asked her what ailed her, and was told that she was suffering from a bad attack of toothache, brought on by sitting in the park.

"But you ought not to sit in such a cold, chilly night as this," said the mistress. "You should walk at a smart pace."

The girl looked at her a minute, as though pitying her ignorance, and then answered:

"You canna coort aight walking; you must sit doon."—London Spare Moments.

MILK DIET NOW THE FAD.

Bread Used Only as a Medium for Butter Eating.

Milk is the latest and most approved dietetic fad. The woman who is fair and with forty staring her in the face and who is determined not to be fat, makes her breakfast and lunch of milk and fresh fruit. She dines on a quarter of a pound of lean roast meat, with enough fresh, green vegetables to "make bulk in her insides," as Tommy Atkins would say. The fresh, wholesome beauty of the young Queen of Holland is attributed to her frugal diet of the national milk and cheese, and the extraordinary vitality of the aged Roman pontiff is another evidence of what a rigorous diet will do for even so delicate a man as Pope Leo has always been. The milk diet is of more value than many complexion washes and as a means of adding or diminishing one's weight it has no equal. The popular superstition that milk is fattening arises from the fact that many misguided people, in addition to a heavy meal, drink milk sufficient for another meal, and complain that it disagrees with them and increases their weight. In order to derive benefit from the milk diet one should get hold of a few fundamental facts. In the first place, one and a half pints of pure milk, or three glasses, contain, besides water, enough food in concentrated form and properly proportioned to make a meal for an adult human being. This quantity of milk, with the addition of a little fruit, is the regulation breakfast and lunch of the dieter. For dinner a quarter of a pound of lean roast meat with some green vegetables is allowed. A pint of milk is the limit, where loss of flesh is an object, and one glass, with fruit, for breakfast and the same for lunch, may be regarded as rather rigorous treatment. Milk and meat should never be taken at the same meal. Heavy vegetables, like beans and peas, should be avoided entirely by the stout, but if by reason of infirmity of appetite they are indulged in they should take the place of meat at that meal. Where the diet is adopted because of a nervous breakdown, or general debility, and a gain in flesh is most desirable, a liberal addition of cream to the steved fruit is recommended. Sweet butter is also most valuable for this purpose. Indeed, some physicians go so far as to say that bread is absolutely valueless except as a medium for butter eating.—Milwaukee Wisconsin.

..No., they do not up their shirts. motion. "I asked a voice quivering with the Chinese 'do' up the Am- ter us draw the veil." and 2500 citizens surrounded them. Ten thousand To arms! But the dozen brave Americans were too late. China sea. Suddenly the buge rang! The red sun splintered up from the form of vibrant emphasis. The great lecturer caused the plat- 'L'VAH SHL HONK TALK THE Tyranny of Trifles.

The phrase is Emerson's, but the experience is that of everybody. Trifles are continually usurping sovereignty over us. Their importunateness, says Zion's Herald, is inversely proportional to their insignificance—the less trifle the more tyranny. This is so largely because it has to be so. Life is mostly made up of odds and ends. There is more of the little than there is of the big. The ocean is but little drops of water, the sea beach little grains of sand—so much of life's philosophy the nursery song teaches us. We must work largely with broken bits of opportunity, gathering here and there the fragments that make up the overflowing basketful of success. The problem is how to use trifles so as not to be abused by them. When out of the mass of surrounding trivialities a single particular trifle arrogantly projects itself, monopolizing attention, distracting the mind, and interfering with the calm flow of thought and energy a good deal as a pebble roughens the surface of a brook into a ripple of gurgling protest, the despotism of the insignificant, the tyranny of the next to nothing, is exhibited in an imperious and intractable form. It is the absolutism of a detail. Other trifles of a temporary vexatious sort are like slivers in the hand, not perhaps seriously impairing the general health, yet making their presence felt with the turn of the hand to every task, and thus causing a constant irritation unfavorable to the performance of the highest kind of work. A trifle is a test. The successful man is the man who stands in the right attitude to trifles—who becomes, not their slave, but makes them his servant. Trivialities have their place, but they must keep in their place. Great indeed is he who can use a little thing well, utilizing it as one would a small lens which brings seemingly huge objects near. Great and small are after all but relative terms. Who are we that we should measure atoms because the least of the standards is too big for them? Our duty is to deal with the things that are, in the hope of the things that are to be. Everything works into the plan of the man who can, and who therefore, Carlyle says, is king. A trifle shall not be my tyrant, but my tool. It is as Angelo, prince of the sculptors, said: "Trifles make perfection, and perfection is no trifle."

Summer Boarders.

Any one desiring to take summer boarders are requested to send their names and full particulars of their accommodations to Mr. E. D. Morrow commercial agent, of the M. B. H. & C. R'y, Benton Harbor, Mich.

INCENDIARY HAD BEEN AT WORK.

Attempted to Burn a Town, but the Attempt Failed.

Montague, Mich., June 8.—An attempt to burn the business section of this city was fortunately frustrated. At midnight Dr. L. B. Jones, Andrew Wurtzler, a prominent merchant, and William Boardwell, in passing an alley at Montague beheld a light in the basement of A. E. Boardwell's grocery. They found a fire just starting under the building. A box had been filled with cotton waste saturated with kerosene and so placed that the beams of the first floor were but a few inches away.

The fire was started by some one having knowledge of the premises, for just above it in the rear of the grocery were the oil tank and piles of boxes, barrels and other inflammable material. They quickly extinguished the blaze. The building was one of a row of united store buildings embracing nearly all the business portion of the village.

FREAKS OF A WIND STORM.

Held a Pen of Calves Suspended, as It Were—Torrents of Rain.

Gagetown, Mich., June 10.—During a heavy storm in this vicinity the elements cut up many antics. The wind had the force of a small cyclone. Two miles south of here the barn on Amasa Coon's farm was badly dismantled and shade and fruit trees were ruined. Byron Bingham, whose farm adjoins that of Coon, lost forty rods of fence. A pen containing several calves was blown against the barn and held there for several minutes.

East of the village rain fell in torrents, making great ditches in corn and bean fields. Hail followed the rain. The hail stones were large and cattle in the fields became frantic from the pelting they received. It is believed much damage has been done to crops.

DASTARD COMBATS SUICIDE.

After First Trying to Poison and Then Shooting a Wayward Girl.

Detroit, June 10.—Herbert Bonslett, aged about 28 years and married, Saturday lured Teresa Darowski, aged about 20 years, in to a Larned street saloon, and after offering her a drink which the police believed was poisoned, but which she refused, shot her several times in the neck. The girl is in a hospital and may recover.

After shooting the girl, Bonslett swallowed the poisoned drink and died shortly afterward. The police say he was a man of dissolute habits and allege that the girl had been his mistress. They had quarreled and it was only by promising the girl money that Bonslett succeeded in getting her to come to the saloon, where he was waiting to kill her.

Trophy Cup for the Normal.

Ypsilanti, Mich., June 11.—Frank Showerman, a local jeweler, who has presented the normal college with two trophy cups, which are contested for annually by the junior and senior men and the junior and senior girls, respectively, announces that he will present to the Intercollegiate Athletic association a cup to be awarded next year, and thereafter annually, to the college which wins the most points at the field day contest.

Dastard Kills a Woman.

Flint, Mich., June 7.—Mrs. Jennie Parish, a widow aged 34, was shot and almost instantly killed by Lewis Weeks in her home here. Weeks went to Mrs. Parish's home and demanded admittance, but was refused. He broke in the door and then told Mrs. Parish he had come to kill her, at the same time firing two shots into her right side. Weeks escaped. He has a wife and three children.

Getting Ready for the Vets.

Flint, Mich., June 11.—This city is beginning to put on its best clothes in honor of the old veterans and their ladies, who will be here in large numbers this week to attend the twenty-third annual encampment of the Michigan department of the Grand Army of the Republic and the state Woman's Relief Corps' convention.

Woke to Find a Corpse With Her.

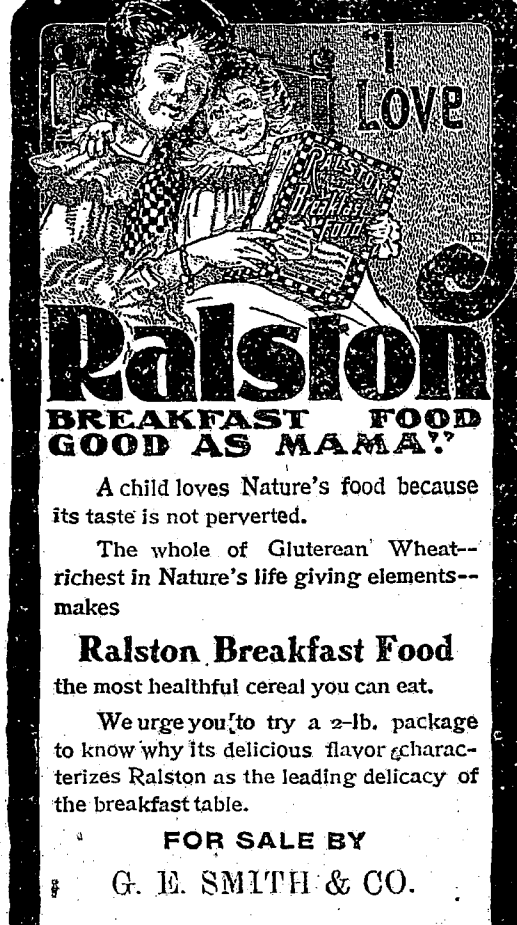

Jackson, Mich., June 11.—Mrs. Philomena Marxhausen, aged 67 years, was found dead in her bed in a room in the Hurd House. She and her daughter Cora were sleeping together, and when the daughter awakened the mother was cold in death. It is supposed heart disease was the cause of death.

Raid on the Machines.

Marine City, Mich., June 7.—A deputy sheriff from Port Huron visited the several saloons in Marine City Wednesday night and confiscated a nickel-in-the-slot machines. Not one is left in the city. This is the third raid here. Prosecuting Attorney Walsh says he will keep them out.

Plentiful Rains on the Wheat.

London, June 10.—"Plentiful rains have fallen in South Russia," says the Odessa correspondent of the Standard, "and a splendid harvest is assured."
