BUCHANAN, BERRIEN CO., MICH., THURSDAY, AUG. 1, 1901.

NUMBER 26.

BUCHANAN'S RURAL MAIL ROUTES

Route No. 1 ---
Route No. 2 ---
Route No. 3 ---

RURAL FREE DELIVERY.

Three Routes Established From Buchanan August 1.

For nearly six months past Postmaster G. W. Noble and various others who have been interested in the establishment of rural free mail delivery from Buchanan post office have been working to bring the matter about, having the active co-operation of Congressman E. L. Hamilton in the effort. Last fall routes were laid out and petitions filed with the department. After several months of tedious waiting, Special Agent F. D. Robards, of Hillsdale, came to Buchanan on June 1 and rode over the proposed routes; and on July 1 the post office department issued the order establishing three routes out of Buchanan, and the Record is pleased to present to its readers an accurate map of the three routes, which are described as follows:

ROUTE No. 1
Beginning at the Post Office in Buchanan
Thence south and west to town limits
Thence west to Weaver's corners, center of south line of section 27
Thence north to the center of section 15
Thence east to Miller's school, center of east line of section 15
Thence northwest, angling to the Town hall, center of the west line of sec 34
Thence east to the river road
Thence south, angling on the river road to the city limits of Buchanan
Thence east and northeast, angling across the river
Thence east, angling on river road to the center of the east line of sec 30
Thence north to the center of the east line of the northeast quarter of sec 19
Thence southwest to the south west corner of section 19
Thence north to Lyddick school, north east corner of section 24
Thence west
Thence south to river road
Thence southeast on river road to the bridge across the river
Thence westerly to post office
Length of route
Area covered 28 square miles; population served 558; number of houses on route 124.
Carrier, EDWIN W. ASHBROOK.

ROUTE No. 2
Beginning at the Post Office in Buchanan
Thence northwest to city limits
Thence west to the center of section 27
Thence northwest, angling to Kool's corners, center of the south line of section 6
Thence east
Thence north to Boyle's corners, center of section 32
Thence west
Thence north to Mt. Tabor, center of the southwest quarter of section 29
Thence south and west, angling to the southwest corner of section 36
Thence south to Gardner's school, center of the west line of section 13
Thence east and south, angling to

Wagner school, center of the west half of section 20
Thence south to the center of the west half of section 29
Thence east
Thence south and east, angling to post office
Length of route
Area covered, 32 square miles; population served, 585; number of houses on route 130.
Carrier, EDGAR L. KELSEY.

ROUTE No. 3
Beginning at the Post Office in Buchanan
Thence south to the town limits
Thence south to Chicago road, center of section 14
Thence west to Curran's corners, center of section 15
Thence north, angling to the center of the north half of section 10
Thence west and northwest, angling to the center of the west line of the southwest quarter of section 9
Thence south to the Chicago road, southeast corner of section 20
Thence west on Chicago road to the center of the south line of sec 19
Thence north, angling to the center of the east line of section 18
Thence east
Thence north
Thence east and north, angling to the center of the north line of section 4
Thence west to Dempsey's corners, southwest corner of section 31
Thence north
Thence east to the center of the north line of section 32
Thence east
Thence east and southeast to Baker-town, center of section 3
Thence north to center of section 34
Thence northeast to post office
Length of route
Area covered, 32 square miles; population served, 540; number of houses on route, 120.
Carrier, GEORGE W. ROSE.

The substitute carriers are Messrs. W. H. Ingalls and Fred B. Hanley. In connection with this service five U. S. iron collection boxes have been placed at the following points:
On Route No. 1, at the extreme northwest corner of route, near center of the west line of section 34.
On Route No. 2, one at Mt. Tabor, near center of southwest quarter of section 29; one at Hill's Corners, near northwest corner of section 12.
On Route No. 3, one at Bakertown, near center of section 3; one at extreme southwest corner of route, near the center of the south line of section 19.

The carriers will leave the Buchanan post office about 9 o'clock each morning, and are required to make the trip every day in the year except Sunday.
The carriers will carry a supply of postage stamps, postal cards, stamped envelopes, and money order blanks for the convenience of patrons along their route. Postage on "drop letters" on the rural routes is two cents per ounce and carriers are authorized to cancel stamps on all letters collected by them, whether intended for delivery on the route or to be mailed from the collecting office.
The establishment of these routes will be a great convenience for the residents of this section.

BASIS OF SETTLEMENT

Of the Great Strike of the Amalgamated Against the Steel Trust.

ALL THE MILLS ARE TO BE "OPEN"

Association to Have the Right to Unionize Them All.

Additional Plants to Come Under the Scale—Matters Yet to Be Settled—The Trouble at Minneapolis.

Pittsburg, July 30.—The following terms of settlement of the strike come from an authoritative source, and can be relied upon, in all human probability, as the outcome of the meeting of the conferees:

The Amalgamated Association is to drop the contention for the signing of a scale for all mills.

All mills are to be "open" mills in the fullest sense of the term.

The company is to have the right to place a non-union man in any plant, and keep him there.

In addition to the plants covered by the expired scale it is to be signed for the following: T. Dewees Wood, of McKeesport; Painter, Lindsay & McCutcheon and Clark mills, of Pittsburg, and Monessee plants, of the American Steel Hoop company.

The question of making the Wells-ville sheet plant and the Monessen tin-plate plant directly covered by the scale is to be settled by the conferees.

The Amalgamated Association is to have the privilege of organizing the men in any of the plants.

Pittsburg, July 30.—Everybody is on the qui vive in strike circles, and the result of the conference of the leaders of the two contending forces is looked forward to with mingled hope and fear. Hope, however, predominates, and peace is confidently expected by the majority of those interested. "The executive committee of the Amalgamated Association will meet in the headquarters of the organization at 10 o'clock tomorrow morning, or as soon thereafter as possible, and take up the proposition of the United States Steel Corporation for a settlement of the steel workers' strike." This statement was made yesterday by Secretary Williams, of the Amalgamated Association. Beyond this he declined to discuss the strike in any form.

Parties Do Not Relax Watchfulness.
There was no change in the position of the two contestants yesterday. Both sides held firmly to the plan of watching each other. The officials of the Wood mill of the American Sheet Steel company made no attempt to start the plant, and indications pointed to their remaining inactive until the strike negotiations are decided one way or the other. The first report of the day, that the American Tinplate company was making an effort to start the Demler plant with non-union men, and that one set of rolls was being operated, was afterward explained as being a rumor that started from the fact that the company had some men at work repairing the plant, with the expectation that the strike will be settled shortly.

Shaffer Has a Busy Day.
Yesterday was a busy day for President Shaffer and the executive officials of the Amalgamated Association. There was a steady stream of callers from early in the morning, and innumerable conferences bearing on the proposed settlement of the strike. President Shaffer was firm in his determination not to talk on the strike situation.

Joseph Bishop, the secretary of the Ohio board of arbitration, had a conference with President Shaffer. His visit was in connection with the strike and its probable settlement.

STRIKERS MAKE LARGE GAINS.

They Unionize Pretty Near Everything While the Trouble Is On.
One of the most apparent facts in the status of the strike yesterday was the determination of the strikers to lose no ground in their struggle while peace negotiations are being conducted. It was explained that this plan was absolutely necessary in order that the position of the Amalgamated Association should be strong when the settlement takes place.

News received from all points where the strike is in progress is of an encouraging nature to the strikers, who claim to have more than held their ground since the strike began, and since the opening of the campaign they claim to have increased their membership in McKeesport alone to over 1,500 men. Accessions to the ranks of the Amalgamated Association have also been made in Wellsville, Pittsburg, Allegheny, Mingo Junction and River side (W. Va.), where one of the National Tube company mills is operated. With the American Steel Hoop company the change has been one of the most sweeping. Before the strike practically all but two of the mills

were non-union. At this time all but one of the mills of this company are union and are idle from the strike.

The situation of the American Tinplate company is well understood. All of the mills of that company are working under union rules excepting the Monessen mill. The story told of this mill is that under the agreement made at the time it was secured by the trust the management of the plant was to be left in the hands of the former officials for a period of five years. This was done in order to prove the value of the patent methods for producing tinplates there. The plant is still running as non-union, and while thirty-six men have been discharged from the plant for embracing union principles, Manager Percy Donner claims that the plant is running full and has not been affected by the strike in the least.

MINNEAPOLIS STRIKE SITUATION

Millers Positively Refuse to Make a Contract With the Union.

Minneapolis, Minn., July 30.—Minneapolis millers will not enter into a contract to guarantee the wages of the packers and nailers for a year. This information was communicated to the dissatisfied workmen at a conference yesterday morning. It is now up to the packers and nailers to say whether or not they will strike. The millers stated their position unequivocally, and refused absolutely to entertain any proposition looking to the signing of a contract.

The men were informed by representative millers at the conference that it was unfair in them to insist upon a contract, inasmuch as such an instrument must be made with irresponsible parties. By that they meant that the men, under a contract, would have them at a disadvantage, as there was nothing to prevent the packers and nailers from striking at any time and leaving their employers in the lurch. Even if the men were not disposed to strike because of any local grievance they might be called out through some action of other unions.

The original demand of the men was for a five years' contract at \$2.75 a day for packers and \$2.25 for nailers, an increase of 25 cents a day each, but they finally concluded to be satisfied with a one-year contract, provided they could get it.

Judge Gary to Issue a Statement.

New York, July 30.—A member of one of the constituent companies of the steel corporation said last night: "A statement will be issued from Judge Gary's office tomorrow. There has been a great deal of conjecture on the part of the newspapers, and this statement will develop a contrast between conjectures and the real facts in the case."

DEMAND FAIR PLAY.

Maryland Senators and Representatives Aroused Over Schley.

Baltimore, Md., July 30.—Admiral Schley being a native of Maryland, the senators and congressmen from that state are expected to take the leading part in forcing a congressional investigation of the whole Santiago affair and the part the navy department has played in the anti-Schley cabal. Every member of the Maryland delegation takes the ground that the Maryland officer has been made the victim of rank injustice if nothing worse, and all are preparing to bring the matter before congress as soon as it convenes should the admiral not be vindicated by the court of inquiry.

Congressman Schirm, the new member from this city, was the first to express himself on the subject and he is now preparing a resolution providing for an investigation of the whole West Indian campaign by congress. "I want it understood," said Mr. Schirm, "that my resolution is not inspired in any spirit of vindictiveness against Admiral Sampson. I simply want congress to get at the facts in the West Indian naval campaign. If the charges which Maclay makes against Schley are true, then the navy department has been derelict in executing the laws made by congress, and no excuse can justify the navy department for failure to court-martial Schley."

The two senators, while not close together on any other subject, stand side by side in demanding fair play for the Marylander. In the last session of congress Senator McComas attempted to end the controversy by introducing a bill providing for making both Sampson and Schley vice admirals, and the measure had a fair chance of passing, when Sampson's now famous Gunner Morgan letter set the country agog and nothing could be done owing to the popular antagonism to Sampson. Senator Wellington has said within the past few days that he proposes to continue his fight to secure justice for Schley.

Washington, July 30.—Secretary Long has issued the following general order: "All persons in the naval service are strictly enjoined to refrain from any public statement concerning the subject matter of the court of inquiry requested by Rear Admiral Schley."

Big Strike at San Francisco.

San Francisco, July 30.—The labor troubles in this city reached their culmination late at night when the City Front Federation ordered a general strike on the docks of San Francisco, Oakland, Mission Rock and Port Costa and in the city of San Francisco, to go into effect at once. The resolution to strike, which received the unanimous endorsement of every delegation to the federation, was short but its effect will be to cause a temporary paralysis of the shipping business of San Francisco such as has not been known before.

WORSHIPERS IN A FRENZY

Tear Off Ornaments and Throw Them in the Contribution Basket.

Cleveland, O., July 30.—Frenzied worshippers, some of them shrieking aloud in their religious excitement, tore rings from their fingers and watches and jewelry from their clothing and cast them at the feet of President A. B. Simpson of New York,

REV. DR. A. B. SIMPSON.

head of the Christian and Missionary Alliance at the alliance camp meeting at Beulah Park.

Similar scenes at previous annual gatherings of this sect were outdone. The excitement among the 5,000 at the meeting under the auspices of appeals of the president was boundless. A newsboy gave \$3. An aged woman who said she washed the money from "dirty clothes," gave \$5. She was blind and attended the meeting in the hope of a divine healing of the disease of her eyes, so that she can continue to make a living by washing. One woman flung her watch through the air toward the platform where the president stood.

In addition to the jewelry \$12,700 was collected at the forenoon meeting and another large sum in the evening. Some one, whose name was kept secret, gave \$3,000. "Here's my Pan-American trip," shouted one man, as he thrust a roll of bills into one of the bushel baskets used for receiving contributions. The gifts were greeted by cheers of "Praise the Lord" and similar exclamations. Much valuable jewelry was given, this not being included in the total of \$12,000. The announcement was made that only solid gold and genuine gem jewelry was wanted.

ORDERED THE JURY TO ACQUIT

End of the Trial of a Man for the Murder of His Sister.

Pittsfield, Mass., July 27.—Robert Fosburg, on trial here this week for the murder of his sister, is a free man. Before the jury had a chance to retire yesterday morning the judge, stating that the evidence was insufficient to convict, ordered the jury to find a verdict of acquittal. The evidence was very insufficient—in fact, so much so that it is generally held that there never was any good reason for the trial.

Fosburg's sister, who had been his favorite and chum, was killed with a pistol on the night of Aug. 19, 1900. The family said that burglars had got into the house, and being discovered had shot the girl dead. There were circumstances that caused this story to be disbelieved, and young Fosburg was arrested, indicted and tried, with the result stated. The verdict is universally approved.

Supposed To Be Insane.

Lansing, Mich., July 29.—Mrs. John D. French, arrested here for poisoning her husband, is probably demented. On her person were found several letters addressed to Farmer Giddens, whom she first accused of poisoning French, in which she suggests that he shoot her husband, and says that she had put poison in his strawberries, and had been trying for weeks to "get the drop on him." The letters also expressed the hope that French would die this time. In spite of these evidences Mrs. French now insists that her confession is untrue and that she is innocent.

NEW MAINE IS AFLOAT

Champagne Used to Christian the Prohibition State Namesake.

Philadelphia, July 29.—Standing on the platform built up alongside the bow of the battleship Maine, as the great hull began to slide into the sea from the ways in the Cramp ship yard, Miss Mary Treble Anderson broke a bottle of wine on her steel stem and said "I christen thee Maine." Thus the christening fluid used on the ship named for the prohibition state was that which is the pet aversion of the laws of that state, and i. may be that Neal Dow's spirit was vexed if he knew what was going on in this mundane sphere.

The state of Maine was officially represented by Governor Hill and members of his staff. From Washington came Rear Admirals Bradford, Melville and Walker, Lieutenant Commander Bailey, Captain Leary, former governor of Guam, and a number of bureau chiefs of the navy department. The ship is much larger and will be a knot an hour faster than the one that came to such a terrible end in Havana harbor, and she is a little more than half done and will cost \$3,000,000.

Brings Troops from Manila.

San Francisco, July 29.—The transport Meade arrived yesterday from Manila in the record-breaking time of twenty-one days. The Meade brought 135 men of the Eighth field battery, twenty-one hospital corps men, thirty-five insane, 369 convalescent soldiers, one time-expired prisoner, 202 discharged soldiers from Manila and 103 bodies, including that of Helen D. Cochran, a contract nurse, who died in Manila of acute nephritis.

Constitution Bumps on a Ledge.

Newport, R. I., July 26.—The Columbia yesterday, in a rattling thrash to windward from New London to Newport got home first because the Constitution struck on a ledge near the Race Rock lighthouse, and will be put into dock before she races again. The weather was regular Constitution weather.

Barge Sunk in Collision.

Sault Ste. Marie, Mich., July 30.—The whaleback barge Sagamore was sunk in a collision with the Northern Line steamer Northern Queen near Point St Ignace. Of the crew of eight men two were drowned and one is missing. The dead are: Captain E. Joiner, master of the Sagamore, lived in Henderson, N. Y.; Ira Ives, cook, lived at Sackett's Harbor, N. Y. The missing: Burley Smith, seaman, lived at Woodville, N. Y. There was a dense fog at the time of the collision.

Chicago Yacht Races Indecisive.

Chicago, July 30.—The Cadillac won the seventh trial race, yesterday, beating the Illinois by 1 minute and 5 seconds over a twenty-one mile course. At the conclusion of the race the judges announced that they considered the results so far obtained indecisive, and ordered three more races. This announcement caused trouble, and the Cadillac may not sail any more. The Milwaukee did not start because the wind blew her mast in two.

Columbia Wins Astor Cup.

Batemans Point, July 30.—The old cup defender, Columbia, won the \$1,000 Astor Cup, leading the new aspirant for cup honors, the Constitution, at the finish by 2 minutes, 14 seconds, shore time.

KNEW THEIR BIBLE.

Baptist Young People Show Aptitude in Scripture—Banners Presented.

Chicago, July 29.—Delegates to the Baptist Young People's convention at the day's session proved themselves good Bible students. By way of diverting the chairman called for verses from the seventeenth chapter of the gospel of St. John. This was continued for an hour, and but one mistake made in the quotations. Banners were presented to delegations which excelled in the senior sacred literature course, and to others for general merit. Registration slips were passed about and showed that approximately 3,000 people were present. The address of the forenoon was made by Rev. W. P. McKee, of Mt. Carroll, Ill., on "What Christ Adds to Life."

Ways to Cook Green Corn.

American gardens are rich in luscious vegetables, but among them all none exceed in solid value our delicious sweet corn. It deserves to be extolled as a national dish. Satisfying, hearty, it is a strong food and not a mere relish, while at the same time it has the most tempting and delightful quality. In its generous abundance, it is equally at home on the plainest and on the most elegant table.

It is so easily grown, asking only room enough, clean culture and a hot sun, and returning some excellent forage as well as a good supply of sweet, nutritious ears of green corn, that it commands the favor of the farmer and the gardener. If he plants three varieties, one of the small, early kinds for the first picking, then a second crop maturing a little later, and a good stock of a late variety, there will be an unending succession from mid-July, or August first at the farthest, to the time of sharp frosts. It is therefore in its long period one of the most valuable of summer vegetables, and canning or drying will prolong this through the winter months.

The green corn of the market lacks much of the sweetness and delicacy which distinguishes it at its best, for it deteriorates rapidly when picked, and should be cooked the same day that it is gathered from the stocks. There is a "knack" too, in picking it at the right moment, when its sweetness and flavor are fully developed, without any loss of tenderness.

If the corn is of this ideal quality, a good variety (of which the choice varies in different localities), and gathered at the point of actual perfection, it is perhaps as good as can be, simply boiled or roasted on the ear. Corn boiled on the ear should be plunged in plenty of fast-boiling water, and kept at the boiling point for 15 to 20 minutes. Long boiling hardens instead of softening; salt in the water has the same tendency. Wrap at once in a napkin and serve very hot, to be eaten with sweet butter, salt and pepper to taste. It is a common fad to have pretty designs of the corn itself on the embroidered covers for the corn, and a few plants are more suitable for decorative use. Roast corn is with many people associated only with childhood, or with unconventional picnic parties, but a careful cook will roast several ears at a time, shut in a wire gridiron, with entire success, and it makes a very appetizing dish.

Another simple but admirable way of cooking green corn is to stew it with milk in a double boiler. Cut the corn from the ear by scoring each row of kernels lengthwise, slicing them off quite thinly, and then with the back of the knife pressing out the cream and germ of the kernel, leaving the skin on the cob. This is the proper way to prepare the corn for all the more complicated modes of cooking. For a quart of corn add a

half pint of rich milk, and let it simmer for half an hour, stirring occasionally. Just before taking up add salt, white pepper and a generous lump of the best butter.

For succotash cook in this way, adding Lima or butter beans, which must be cooked for half an hour separately before putting with the corn. Tomatoes instead of beans make another excellent combination. These (first sliced after taking off the skin) also need longer cooking than the corn, and should therefore be put over the fire half an hour by themselves before adding the corn. Season highly with salt, butter and cayenne.

Fritters made of green corn are so good that a liberal dish is generally required. Cut off the corn as before, add two well beaten eggs to each quart, and flour enough to make a soft batter. It is impossible to give the exact quantity, as the corn varies in solidity so much. Add a salt spoonful of salt and one of sugar, if the corn is at all lacking in sweetness. Drop in hot fat and cook like other fritters; drain well, and serve very hot.

Delicious muffins are similarly made, using a little more flour. They may be baked on a griddle if preferred. Brown nicely, and butter profusely as they are taken up.

Cold boiled corn cut from the cob and browned in a frying pan with a little hot fat makes a good breakfast dish. Or if a few ears are roasted (taking great care not to burn it) and then cut quickly off the cob with a sharp knife, buttered and seasoned well, and served very hot, either by itself or in an omelet, it will be found a highly popular dish at most tables.

A Genuine Lincoln Anecdote.

The following anecdote is vouched for by the editor of *Leslie's Monthly*, who has it from a very old lady, Mrs. H. A. Baldwin, now living at Los Angeles, Cal. who was a close neighbor of the Lincoln family when they resided in Springfield, Ill.

"I can remember clearly a little incident which occurred one very hot Sunday morning in summer. It was just about the time Mr. Lincoln had received the nomination for senator. My husband had gone to church alone that morning, as I was not feeling well. I was sitting at the window looking out on the street, when I espied little "Tad" Lincoln trotting down the walk past our house as fast as his little legs could carry him; he was between two and three years of age at that time and the sharpest little chap imaginable. His father had nicknamed him "Tadpole" soon shortened to "Tad" as all the neighbors knew.

"Mrs. Lincoln had gone to church, leaving the children at home in care of Mr. Lincoln, and the little fellow had escaped from the yard in some way or other. As I watched "Tad" trotting past, I heard someone calling him from the street. Glancing up, I saw Mr. Lincoln coming as fast

as his long legs could carry him; as I have said, it was exceedingly warm day, and people were wearing their thinnest clothes. As long as I live I shall never forget Mr. Lincoln's appearance; he was coatless, vestless, bareheaded and barefooted! Think of it! The man who was later to be President of the United States, actually striding down the street barefooted after his runaway child! It was the most comical sight I have ever witnessed. "Tad" was soon overtaken, and Mr. Lincoln grasping his rebellious son around the waist, tucked him under his long arm like a sack of meal, with his head to the rear, and started for home again. Unfortunately church services had just closed, and the streets were crowded with people, fashionably dressed, who stared in astonishment and with merriment upon the comical sight. Little "Tad" was screaming, kicking and squirming in a vain attempt to escape; his little arms and legs were revolving in all directions and the sight of Mr. Lincoln, barefooted and half dressed with that boy under his arm would have sent his wife into spasms had she witnessed it. He, however, was not embarrassed in the least, but ducked and bowed right and left to acquaintances responding cheerily to their "why, good morning Mr. Lincoln," "Fine! How are you Mrs. So-and-So," or "Fine day, Mr. So-and-S," all the time wearing a pleasant smile, while the spectators were nearly convulsed at the sight."

Scribner's Magazine for August is the annual Fiction Number, and it contains seven complete short stories, the beginning of a new serial, and special illustrated articles and poems. The color-printing is shown at its best in the exquisite work of Maxfield Parrish, who has found a very congenial subject in Quiller-Couch's story of the Cornish coast, which has to do with a classical legend. These drawings are the most remarkable in color which have been yet attempted. There is a beautiful cover-design by Albert Hearter, which it has taken ten printings to reproduce.

The leading fiction is a novelette by Richard Harding Davis, entitled "A Derelict," which depicts the character of a brilliant but erratic newspaper correspondent, who writes the best story of the destruction of the Spanish fleet at Santiago. It is a thrilling narrative, and the illustrations by Walter Appleton Clark are the most effective yet achieved by this artist.

HOW TO KEEP THE HOUSE COOL

What can be Done to Make it a Comfortable, Restful Place in Hot Weather

"Many things can be done to make even the small house a comfortable, restful place in hot weather," writes Maria Parlon, in the *Ladies' Home Journal* for August. "Of course the windows must be properly shaded with blinds or awnings, and also well screened. All the heavy hangings should be removed, and when possi-

ble the carpets should be taken up or covered with linen. Cool colors, such as white, gray, light greens and blues, should take the place of the warmer colors. Thin white muslin curtains soften the light. The house should be well sunned and aired at least once a day, the early morning is the best for this; open all the windows and blinds and let the sun and air pour through the house. About nine o'clock close the blinds and all the windows except one or two down stairs and two or three upstairs. In the open windows place wet grass screens, or cover the regular screens with wet flannel. When the sun goes down open all the windows and blinds. A skylight or window should be kept open night and day in the attic, except of course, when it rains. The cellar windows should be open only at night, if they are not closed during the heat of the day the warm, moisture-laden air enters the cellar and condenses on the walls, pipes, metals, etc. and in a few days will make it so damp as to be an unsuitable place for keeping food."

SUCCESSFUL SPRAYING.

Apparatus on Large and Small Scales—Main Points of Its Use. Successful results in spraying require the breaking up of the liquid into a fine mist. The essential features of such an apparatus are a force pump, several yards of one-half inch cloth reinforced hose with bamboo hoisting rod and a spray tip. The size of the apparatus will depend on the amount of vegetation to be treated. For limited garden work and for the treatment of low plants the knapsack pumps or the small bucket force pumps are suitable, the former costing about \$14 and the latter from \$6 to \$8.

Ready fitted pumps—knapsacks and others—for the application of insecticides are now made by all the leading pump manufacturers of this country and also large reservoirs with pump attached for extended orchard operations, the price of the latter ranging from \$25 to \$75.

The cost of a spraying outfit for orchard work may be greatly reduced by combining a suitable pump and fixtures with a home constructed tank or barrel to be mounted on a cart or wagon. A spray tank having a capacity of about 150 gallons is a very satisfactory size and may be conveniently made 4 feet long by 2½ wide by 2 deep, inside measurements. It should be carefully constructed, so as to be water tight, and should be strengthened by four iron bolts or rods across the ends, one each at the top and bottom. A good double acting force pump may be obtained from any of the leading pump manufacturers at a cost of from \$10 to \$20.

The more economical spray tips on the amount of liquid required are the different styles of cyclone nozzles, the best form of which is known to the market generally as the vermorel nozzle. These are manufactured by the leading pump companies. Other good nozzles are also on the market. The common garden spraying and hose nozzles are much too coarse for satisfactory work and are wasteful of the liquid.

Entomologist Marlatt, giving this information about apparatus in a recent bulletin on important insecticides, further advises that a prime essential in spraying, especially where the large

ORCHARD SPRAYING.

reservoirs are employed, is to keep the liquid constantly agitated to prevent the settling of the poison to the bottom of the tank. This may be accomplished by constant stirring with a paddle, by shaking, but preferably by throwing a stream of the liquid back into the tank. Many of the larger pumps are now constructed with two discharge orifices with this latter object in view or are provided with special agitators, and the use of such is recommended.

In spraying orchard trees it will be found convenient in going between the rows to spray on each side, half of each tree in the row at a time and finish on the return rather than attempt to spray all sides of one tree before taking up another. The object in spraying is to coat every leaf and part of the plant as lightly as compatible with thoroughness, and to avoid waste in doing this a mist spray is essential. The application to any part should stop when water begins to drip from the leaves. A light rain will not remove the poison, but a dashing one will probably necessitate a renewal of the application.

Subscribe to the Record, only \$1 per year.

WANTED.—We can give a few Teachers, Students or others pleasant and profitable employment for the vacation season. For particulars address Manager P. O. Box 151 Tecumseh, Mich.

Village Taxes

I have received the warrant for the collection of village taxes and will be prepared to receive payment of the same at the First National Bank, Buchanan, on and after Monday, June 10, 1901. ARTHUR W. ROE, TREAS.

THE DANGER SIGNAL

Are You Sleepy After Meals? It is the Danger Signal. Do not Delay too Long.

If you are sleepy after meals it is a sign of inactive liver and poor digestion. This will lead to serious trouble, if neglected. Pepto Quinine Tablets are a combination of pepsin which aids digestion. Quinine which drives away malaria, and cascara, which regulates the liver and cures constipation; Pepto Quinine Tablets will make you feel like a new person, and you are liable to live in health for many years. Pepto Quinine Tablets. 25c.

Estate of Levi A. Spaulding, Deceased.

STATE OF MICHIGAN, County of Berrien, ss. At a session of the Probate Court for said County, held at the Probate office in the city of St. Joseph, on the 10th day of July in the year one thousand nine hundred and one. Present, Frank H. Ellsworth, Judge of Probate. In the matter of the estate of Levi A. Spaulding deceased.

On reading and filing the petition duly verified, of Amos C. Spaulding, executor of said estate praying for the reasons herein stated that he may be authorized, empowered and licensed to sell the real estate of said deceased in said petition described, for the purpose of paying debts of said deceased. Thereupon it is ordered that Monday, the 5th day of August next, at 10 o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs at law of said deceased, and all other persons interested in said estate, be required to appear at a session of said Court then to be holden in the Probate office, in the city of St. Joseph, and show cause, if any there be, why the prayer of the petitioner should not be granted. And it is further ordered, that the said petitioner give notice to the persons interested in said estate of the pendency of said petition and the hearing thereof by causing a copy of this order to be published in the *Buchanan Record*, a newspaper printed and circulated in said county, three successive weeks previous to said day of hearing. FRANK H. ELLSWORTH, Judge of Probate. (A true copy.) ROLLAND E. BARR, Probate Register. Last publication August 1, 1901.

First publication June 27, 1901.

Administrators Sale of Real Estate.

STATE OF MICHIGAN, County of Berrien, ss. In the matter of the estate of William Trenbly, deceased. Whereas, I, Frank H. Ellsworth, Judge of Probate in and for said County, on the 29th day of April A. D. 1901, the forenoon of said day subject to certain incumbrances thereon all the right, title, and interest of said estate in and to the following described lands and premises, situated in the village of Buchanan, county of Berrien, state of Michigan, to wit:—Some of lot one (1) in John Hamilton's original plat of the village of Buchanan as is bounded by a line commencing at one o'clock in the afternoon of said day at the southeast corner of said lot one (1), running thence west seventeen (17) feet, thence north one hundred twenty-five (125) feet, thence east thirty (30) feet, thence south (125) feet to the north sixty nine (69) feet, thence west eighteen and one-half (18½) feet, thence south fifty-six (56) feet to the place of beginning. A. A. WORTHINGTON, Attorney for estate. Dated June 28th A. D. 1901. Last publication Aug. 8 1901.

Foreclosure Sale

Default having been made in the terms and conditions of a mortgage dated the 28th day of December A. D. 1899, executed by Elijah E. Koons and Elizabeth Koons his wife, of the village of Buchanan, county of Berrien, state of Michigan to Sarah J. Fisher and as guarantor of said mortgage, the township of Buchanan in said county of Berrien, which mortgage was duly recorded in the office of the register of deeds of the county of Berrien aforesaid in Liber 6 of Mortgages, on page 485, on the 13th day of December, A. D. 1899. On which mortgage there is claimed to be due on the date of this notice the sum of one hundred and thirty dollars, as principal and twelve and one-half (12½) per cent interest thereon, and the sum of fifteen dollars as an attorney fee stipulated for in said mortgage. Therefore by virtue of the power of sale contained in said mortgage and of the statute in such case made and provided.

Notice is hereby given that on the 26th day of July, A. D. 1901, at one o'clock in the afternoon, for the purpose of foreclosing said mortgage, the premises herein described will be sold at public auction to the highest bidder at the front door of the court house in the city of St. Joseph, county of Berrien; said premises being situated in the village of Buchanan, county of Berrien, State of Michigan and described as follows:—Village lot number four (4) in block D in A. C. Day's addition to the village of Buchanan. Dated May 1, 1901. SARAH J. FISHER, Mortgagee. ALTHON C. ROE, Attorney for Mortgagee.

First publication August 1, 1901

Estate of Frank E. Spaulding Deceased.

STATE OF MICHIGAN, County of Berrien, ss. At a session of the Probate Court for said County, held at the Probate office in the City of St. Joseph, on the 30th day of July in the year one thousand nine hundred and one. Present, Frank H. Ellsworth, Judge of Probate. In the matter of the estate of Frank E. Spaulding deceased.

On reading and filing the petition, duly verified, of Amos C. Spaulding, executor of said estate, praying for the reasons herein stated that he may be authorized, empowered and licensed to mortgage the real estate of said deceased in said petition described, for the purpose of paying debts of said deceased. Thereupon it is ordered that Monday, the 26th day of August next, at 10 o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs at law of said deceased and all other persons interested in said estate be required to appear at a session of said Court then to be holden in the Probate office in the city of St. Joseph, and show cause, if any there be, why the prayer of the petitioner should not be granted. And it is further ordered, that the said petitioner give notice to the persons interested in said estate of the pendency of said petition and the hearing thereof by causing a copy of this order to be published in the *Buchanan Record*, a newspaper printed and circulated in said county, three successive weeks previous to said day of hearing. FRANK H. ELLSWORTH, Judge of Probate. (A true copy.) ROLLAND E. BARR, Probate Register. Last publication Aug. 22, 1901.

THE PORTRAITS of our PRESIDENTS

With Biographical Sketches

BY GENERAL CHARLES H. GROSVENOR.

Member of Congress for nearly 20 years.

Contains twenty-four large Photo-gravure Etchings and near relatives of the Presidents. Printed on heavy plate paper, embossed. A very large book of 600 pages designed by Tiffany. Biographical sketches printed in large, open type in two colors. The greatest work of the 20th Century. So beautiful that when President McKinley saw it he subscribed immediately. One agent selling 500 copies in small territory in Pennsylvania. A million copies will be sold quick. Fortunes will be made this inaugural year. High class man or woman of good social standing can make a little fortune in this territory. Territory is going rapidly. Presses running day and night to fill orders. Wanted.—State Manager to look after correspondence and agents. Address to-day THE CONTINENTAL PRESS, Corcoran Building, Washington, D. C.

 general health. 25c per box.

FLOCKS AND HERDS.

HOW THEY MAY BE GRADED UP AT
 MINIMUM EXPENSE.

Breed Best Females to Pure Bred
 Males—Continue the Process to the
 Extent of Inbreeding—Value of
 Skillful Feeding.

It is often easy for the farmer who
 has not abundant means to purchase
 pure bred stock for his flock and herds
 to improve them by taking the best
 females he has as a foundation and
 breeding them to pure bred males of
 the type desired, thus getting half
 bloods from the first cross and three-
 quarters at the next mating, continu-
 ing in each generation to reach nearer
 to the pure breed, says The American
 Cultivator.

If he wants cows of greater milking
 capacity, let him try the Holstein or
 the Ayrshire, the latter being better
 adapted than the Holstein to scanty
 hillside pastures, where there would
 not be enough to fill the capacious
 paunch and noble udders of the larger
 breed.

For those who want milk richer in
 butter fat there are the Jersey and
 the Guernsey, in which the first named
 has the advantage of being more
 abundant and therefore cheaper in this
 country. A cross of these upon a good
 grade or native cow, as some call those
 that have so many different strains of
 blood in them that one does not know
 how to class them, seldom fails to
 bring a cow that will have the good
 qualities of her mother and the better
 making ability of the breed to which
 the bull belongs.

The same may be said for the beef
 breeds, Hereford, Shorthorn or Angus.
 They have been bred for that one pur-
 pose so many generations that their
 offspring will inherit the tendency to
 put on flesh and to put it where most
 needed, as the child of the African will
 inherit a dark skin.

This is by no means confined to the
 cattle alone, but the principle holds
 good in sheep, swine or poultry. The
 pure bred male stamps the type of his
 ancestors upon his get and all the
 more plainly when the mother is not of
 a strongly antagonistic type, but is a
 combination of many breeds.

Two things, however, are necessary
 to success in doing this. The first is
 absolute purity of blood on the part of
 the sire, and the other that he is in
 good health and a vigorous condition.
 This gives the prepotency to fix the
 type and intensify it. Do not think
 that by using a half or three-quarters
 pure blood male that there will be at
 least half or three-quarters as much
 improvement as if he was pure bred,
 for this is by no means sure. In prac-
 tical tests it has often been found that
 the result from using a half blood was
 to get a poorer animal than the mother.

Having once decided what type to
 breed to, continue it even if necessary
 to use the sire upon his daughters and
 granddaughters. This has been done,
 and where both animals were as nearly
 perfect as they could be it has brought
 about a more rapid improvement than
 using another animal of the same
 breed. It was thus that the great herds
 of Shorthorns were built up by that
 famous breeder, who has scarcely been
 equaled since his day, Bates, the founder
 of the Duchess family. Thus, too, have
 some of our best breeds of other ani-
 mals and fowls been created or brought
 to their present high standard. But
 when a defect in the sire begins to
 appear in the offspring, it is time to
 look for another of the same breed
 lacking that defect.

But having secured the improvement
 in the young it must be retained by
 constant care to feed for the results
 desired as well as to have bred for it.
 The dairy cow should not while com-
 ing to maturity be so fed as to fatten
 her. Give her enough, but of such a
 character as to promote growth, to
 make frame and muscle instead of fat.
 The cow of the beef breed should have
 her frame well built up, but she should
 be so fed as to keep up a good growth
 at those points which make the beef
 animal valuable at the block. A skillful
 breeder should be a skillful feeder.

The sheep breeder should decide if
 he wants mutton sheep and fat lambs
 or if he wants heavy fleeces, the swine
 grower whether he will have what are
 now called bacon hogs or those that
 will mature younger and make fatter
 pork and the poultry keeper whether
 he wants fat chickens or fowl that are
 productive of many eggs, and, having
 decided, they should each breed and
 feed for what they want most. They
 cannot have the best of each quality in
 the same animal or bird.

Care of Horses.
 Before the horses are put to work
 very hard in the spring after a winter
 of comparative idleness their grain ra-
 tions should be gradually increased,
 and the work should not be too hard
 or the days too long at first, and this
 last is a good rule for man as well
 as beast, but the man should have
 sense enough to look out for himself
 and his team. See that the harness is
 properly fitted, clean and oiled until
 it is soft and pliable, that it may not
 chafe anywhere and thus avoid sore
 shoulders and saddle galls. A little
 water at the middle of the half day's
 work will always be relished and may
 prevent drinking too much at one time
 and thus lessen the danger of colic.—
 American Cultivator.

Marketing Farm Products.
 Selling grain and hay from the farm
 in bulk reduces the profit in two ways.
 It is expensive to handle and haul,
 and it takes away elements of fertility
 that should be saved and returned to
 the soil. Feed hogs, sheep and cattle
 and so market your product in the
 most condensed form and in the easi-
 est way, on the hoof, and keep up
 the land while you are cropping it.

MAKING GOOD BUTTER

CLEAN, WELL FLAVORED MILK IS A
 PRIME NECESSITY.

Roots to Avoid in Feeding—Care of
 the Udder—Best Milk Pail—Separat-
 ing the Cream—Cooling the Prod-
 uct—Churning and Salting.

Annie Garton, a student of butter
 making in the Purdue college short
 course, contributes the following to
 the literature of dairy farming:

In butter making it is a necessity to
 secure clean, good flavored milk. The
 flavor of the milk depends mainly upon
 the food of the cows. Food containing
 a strong volatile oil, such as leek, tur-
 nips, etc., gives a bad flavor to milk;
 hence it is necessary to avoid any such
 food. The flavor of the milk depends
 somewhat upon the cleanliness also, as
 foreign matter in any great amount
 taints it and also carries the germs that
 cause the milk to sour.

The udder of the cow should be well
 brushed and then dampened, which re-
 moves any loose hair, and the damp
 surface has a tendency to hold any
 germs that come in contact with it.

The pails used in milking and any
 place in the dairy should be thoroughly
 cleansed and should be of pressed tin
 or else have the seams well filled with
 solder. Milk is a perfect food for bac-
 teria and when left there in the minut-
 est quantities gives a breeding place
 for the germs that cause milk to sour
 and also that give a bad flavor to the
 butter.

The cream must be separated from
 the milk as soon as possible after it is
 drawn and should be done as quickly
 as possible, whether the method be by
 separator or deep or shallow setting.
 When the separator is used, the milk
 should be at a temperature of 90 de-
 grees in order to secure a satisfactory
 separation. For deep setting it must
 be at least 42 degrees and cooled to
 that temperature before any consider-
 able amount of lactic acid is formed in
 the milk.

The cream as it comes from the sep-
 arator is quite warm and in order to
 keep it from souring and also give a
 better texture to the butter must be
 cooled immediately to the temperature
 of ordinary well water.

Cream of different ages should not be
 mixed until cool. Keep it sweet until
 enough is secured for a churning, then
 ripen or sour it. It should be ripened
 at a temperature between 65 and 75 de-
 grees, as this is a very desirable tem-
 perature for the growth of lactic acid
 germs, which forms acid, gives the sour
 taste to the cream and the flavor to the
 butter. Cream should not be more
 than four days old when churned.
 Twenty-four hours is sufficient time for
 souring cream for churning. If it is
 kept reasonably cool, it will not get too
 sour in four days.

The agitation in churning should be
 as violent as the form of the churn will
 admit. The churning is to be stopped
 while the butter is in the granular
 form. In order to have thorough chur-
 ning, the temperature of the cream
 should not be above 58 degrees, while
 52 degrees is usually much more de-
 sirable.

The buttermilk should be drawn
 from the churn and then the butter
 washed. The butter must now be re-
 moved from the churn and salted while
 yet in the granular form. The amount
 of salt should be according to the taste
 of the consumer. For most people one
 ounce to the pound is required.

The color of the butter should also
 be according to the demand of the
 consumer. If necessary, use butter color.

After the butter is salted it is ready
 for working. The working depends on
 the firmness of it. It can now be al-
 lowed to stand for two or three hours
 to allow the salt to dissolve, then re-
 worked and put into prints or molds.
 The pound print is the most desirable
 form, while in some cases molds or
 jars are desired by the customer.

Handy Milk Stool.
 The little stool shown in the accom-
 panying illustration is unique in the
 way in which the legs are inserted, be-
 ing spread over a large space, and it is
 impossible to turn the milker over.
 The drawing is out of proportion. The
 stool should be 12 inches long and 8

STOOL THAT WON'T UPSET.
 Inches wide. The seat is made of two
 inch pine board. Holes are bored al-
 most through the board, but not quite.
 These are in slanting directions, so
 that the legs when fitted will occupy
 the position indicated in the drawing.
 Now take a pair of old broomsticks,
 whittle the ends so that they will fit
 into the holes, drive them in tight and
 saw them off any length desired.

Salting in the Churn.
 This is practiced by many butter
 makers and especially by farmers. The
 butter granules are allowed to reach
 the size of a grain of wheat, the salt
 is then added and the churn slowly re-
 volved. It will not take the salt long
 to become thoroughly incorporated in
 the butter. The maker will soon be
 able to estimate the amount of salt re-
 quired for any one churning.

To Eradicate Lice.
 For lice on cattle the simplest and
 best remedy is as follows: Take a good
 sized tin box, punch holes through the
 cover and partially fill with powdered
 sulphur. Sprinkle the whole length of
 the animal on the back, from head to
 tail, and in about two weeks if any
 lice remain go over again lightly. Don't
 let cattle out if it storms.

Mr. and Mrs. John Morris and son Oscar will leave on Sunday for a pleasant trip. They will go to Du buque, Iowa, by rail, and from there will go to Minneapolis by steamer, and visit other points before returning.

BERRIEN MAN ARRESTED

On Suspicion of Being the Fosburgh Murderer.

A Berrien county man has been arrested in Washington on suspicion that he is either the murderer of May Fosburgh, or knows something about it. Robert Fosburgh was charged with the crime of killing his sister, but has been acquitted.

Last Friday a man named James Gray was arrested in Washington charged with the murder. Gray formerly lived at Union Pier in this county, where he worked last year from the middle of June to the middle of September on the Gowdy farm. Although a white man, of fair complexion and straight hair, he had a flat nose and face; had negro blood in his veins. Though he drank to some extent nothing wrong is known of him. He was 38 years old and went by the name of Gray in Union Pier but was known to have taken the name of White elsewhere. Inquiries have been made of late of Union Pier parties by Washington officers as to his whereabouts.

Sugar Plant May Run

The Wolverine Sugar Company plant need not be idle this fall, for the company has within its reach 25,000 tons of beets that must be turned into sugar. At and near the Shelby farm of 12,000 acres over which Charles W. Schriver is manager, there are being raised this year 2,500 acres of beets, and as the Central Sugar Company's plant, which was started on that farm this year will not be completed, it is up to the company to find a plant that will handle their beets.

The Three I and Pere Marquette railways can both be brought into use and will compete strong to handle these beets if a contract is made to bring them to the Benton Harbor factory.

The first year the Wolverine Sugar company handled 1,000 tons, and Mr. Schriver says that if the contract is secured it will mean \$20,000 paid out for labor here during the three months in the fall that the plant is running.

Bay City, Mich., July 30.—Frank Kisane, aged 23 years, was shot and killed early Sunday morning near the west end of Belvidere street bridge by Patrolman Cornelius Gleason, of West Bay City. For several weeks the saloons in the northern end of West Bay City have been troubled with burglars. They made it a practice on pay day nights to break into the saloons and steal what money they could find, or anything else of value. The police had their suspicions as to the leader of the gang, but could get no evidence that would implicate him. Kisane was suspected, mainly because he lived in that part of the city and also because he had been arrested a number of times and had a prison record for burglary.

Officer Flushes the Game. About 12:30 o'clock, while Gleason was patrolling his beat on Martin street, his steps aroused two men who were working at a back window in Martin Kindermann's saloon, opposite the bridge approach. The men evidently did not know where the officer was, as they ran out of the alley between the Kindermann building and another house and nearly fell into his arms, but turning suddenly they retraced their steps, with the officer in hot pursuit.

Tries a Shot Into the Dark. The men ran into an open space which was totally dark. The officer fired twice into the air over their heads, and these shots having no effect, he lowered his revolver and fired a third shot. It was a chance shot in the inky darkness, but it was well aimed, and brought one of the men down, just as he reached the sidewalk on Martin street. His companion then surrendered and proved to be George McNeil, 19 years of age, a cousin of Kisane.

Proved to Be the Suspect. The man lying on the sidewalk with blood spurting from a wound in his head was the suspect Kisane. Kisane died on his way to Bay City. Doctors found the bullet had entered Kisane's brain two inches back of the left ear. They expressed surprise when told that Kisane had run fifty feet after being shot, saying they could not see how that was possible.

NEW CURE FOR A BALKY HORSE. Case in Which Dowieism Was Used with Great Success.

Kalamazoo, Mich., July 27.—An elder of the Dowie faith from this city attended a meeting at Zion City, Chicago, and told how prayer made a balky horse tractable. The horse, according to the elder, would have caused David Harum to trade him off at any price, but after a thought of Dowie and Zion the horse was a good animal warranted to stand without hitching and to go when urged. Said the elder:

"They gave us a balky horse this morning when we started out to Zion. We remembered that the general overseer said: 'Stop at 9 o'clock and have five minutes of prayer.' We stopped and had five minutes of prayer, and then we suggested to God that he make the horse gentle and take the devil out of him, and he did. The horse was gentle all day and did not give us any further trouble."

OBITUARY

A Beautiful Life Closed.

Deep was the darkness that last Thursday noon settled over the home of Mrs. A. M. Bainton when the sad intelligence was received by telephone and wire of the death of her daughter, Mrs. Ed. Beverstock, of Bowling Green, Ohio.

Death, in whatever home, is a shadow. Even when life's full mission has been accomplished, when the full three score and ten years have been told and the spirit sits in waiting for its brighter home, the heart of loving ones are made desolate when the spirit takes its flight.

But when life's mission has just begun—

Mrs. Beverstock went from our midst three years ago August 3, next, a happy bride. She had been confined to her room for some days but at no time was she considered dangerously ill. It was a terrible shock to her mother, brothers and sisters. The family had just received a letter saying she was rapidly improving, and the next was the sad news that she was dead. To every one the news came with a shock. Her husband and sister, Mrs. J. C. Snyder, were at her bedside when she died.

She had requested of her sister, Mrs. J. C. Snyder, that if she died her body be buried at the old home. In accordance with this wish the remains were brought to Buchanan for burial, accompanied by her husband and Dr. J. C. Snyder and family, arriving here Friday at 7:30 p. m. They were met at South Bend by her brothers, Wm. F. and Chas. L. Bainton. The funeral was held at the family residence, on River street, Sunday, July 28, 10 o'clock a. m., her every wish being observed. The floral decorations were most profuse and beautiful. Among which was a beautiful spray of roses, presented in sympathy by Mr. Beverstock's law partners, Hon. B. F. James and L. Donahue, of Bowling Green, Ohio. The funeral services were conducted by Rev. Marvin, of the Presbyterian church, assisted by Rev. J. F. Bartmess, of the U. B. church. The services were very impressive. The test, selected by herself and found marked in her bible, was the 12th verse of the 9th chapter of Job. The songs were those she loved, sang by a gentlemen quartette consisting of Messrs. Will East, Wm. Moore, Dr. Claude Roe and D. L. Boardman. Dr. Claude Roe sang a beautiful solo.

The deceased is survived by her husband, a two weeks old babe, an invalid mother, two brothers, Wm. F. and Chas. L. Bainton, and two sisters, Mrs. J. C. Snyder, of Bowling Green, Ohio, and Miss Emma Bainton, of this place. Interment was made in Oak Ridge cemetery, beside her father and favorite sister, by Richards & Emerson.

"We know not of love's might Till death has robed, with soft and solemn light, The image we enshrine."

The following accounts of the death of Mrs. Beverstock are taken from the Bowling Green papers:

Not for a long time has this community been so shocked as it was when the word flew from one to another today that Mrs. Ed Beverstock was dead. She expired about 9:30, as the result, as near as learned, of a blood clot stopping the action of the heart. She had been feeling unusually well and expected to sit up and eat dinner with the family. Her sister, Mrs. J. C. Snyder, had been there to see her and advised her not to overtax her strength. Mrs. Snyder had scarcely reached home until Mrs. Beverstock was seized by the fatal attack. Her husband was called from his office and reached her bedside just in time to see her expire.—*Tribune.*

Mrs. E. Beverstock died quite suddenly about 9 o'clock this morning, at the family residence on Grove street. About ten days ago she gave birth to a child and had been confined to her bed room, but was feeling much better. Last night she slept well, and this morning spoke of getting up for breakfast. Mr. Beverstock left the house in a hopeful mood, only to be called back shortly with the terrible news that his wife was dying. He got home only a few minutes before she died. Her sister, the wife of Dr. J. C. Snyder, had been called before, and was with the dying woman.—*Sentinel.*

OTIS FULLER

News was received here last week of the death of Mr. Otis Fuller, brother Messrs C. H. and Milton Fuller of Buchanan. Mr. Fuller's death occurred on July 28rd at Santa Paula a town in the mountains where the deceased had gone in hopes of deriving a benefit to his health. The deceased was about forty years of age and went to California from Buchanan in 1881 in company with Mr. Frank W. Thomas.

THE TIME TO LAUGH.

SOME GOOD JOKES, ORIGINAL AND SELECTED.

He Was Accommodated—Mother Goose Repartee—His Stock Dropped—Next Best Thing—His Memory Failed—Laughable Anecdotes and Incidents.

HE WAS ACCOMMODATED.

From the London Tit-Bits—He was a duds little man, but he had a loud voice, and evidently wanted everyone to know what he said. He and a companion, who he it said to his credit, seemed ashamed of the company he was in, stood in the hotel rotunda last Saturday night. The little fellow was talking about Ireland, and he said many hard things about the country and the people. A great big man stood near by listening to the little fellow's vapourings. He merely smiled until the little fellow said in a very loud tone: "Show me an Irishman and I'll show you a coward."

Then the big fellow slipped up and, touching the little fellow on the shoulder, said in a heavy, bass voice: "What's that you said?"

"I said show me an Irishman, and I'll show you a coward," said the little fellow, whose knees were shaking under him.

"Well, I'm an Irishman," said the big fellow.

"You are an Irishman? Well," and a smile of joy flitted over the little fellow's countenance as he saw a hole through which he could crawl, "I'm a coward."

Slot Machines Absorb Small Change.

The dearth of halfpenny pieces, or pieces value 2½ cents in Holland, has caused a new class of merchant to spring into existence, namely, the halfpenny merchant, writes an Amsterdam correspondent. The scarcity of the coin in question has been caused by the widespread employment of the automatic gas meter, into which the Dutch housewife puts her halfpenny. In the Netherlands the 2½-cent piece, or halfpenny, is the largest copper coin made, hence it is being used for the gas meters and automatic machines generally. The Dutch mint does nothing to ease the scarcity, with the result that slowly but surely the halfpenny is disappearing from use among the general public. The dealers in these coins sell them at the rate of 1 penny premium for every twenty coins, or 10 per cent profit.

BUCHANAN RECORD.

THURSDAY, AUGUST 1 1901

Entered at the Post-office at Buchanan, Mich. as second-class matter.

LOCAL NOTES

If you want to see the new style hair cut, ask Dr. C. B. Roe about it

A party of nearly thirty of the Buchanan young people drove to Clear Lake Monday evening.

The Ladies' Aid Society of the Presbyterian church enjoyed a picnic at Clear Lake yesterday afternoon.

The RECORD owes an apology to Mrs. J. F. Bartmess and neices. Our types said that they spent Sunday at Clear Lake, when we meant to say Tuesday.

The M. B. H. & C. Ry. are taking out a hundred car loads of gravel from their pit just on the edge of town. The gravel will be used on Benton Harbor streets.

The RECORD is under obligations to Mr. William Broceus for some very fine apricots. Mr. Broceus has quite a number of trees and realizes good prices from the sale of this delicious fruit.

The committee of arrangements for the pioneer picnic held a meeting Tuesday and have provided an excellent program for their picnic, which will take place at south Clear Lake on Thursday, August 15.

The K. O. T. M. of Southwestern Michigan are arranging a monster picnic to Paw Paw Lake for August 22. The M. B. H. & C. expect to handle at least 22 coaches loaded with excursionists, on that occasion.

Messrs. James & J. H. Pound, of Benton Harbor, are using a good space to call attention to their August clearing sale. This firm is one of Benton Harbor's stand-bys, and they will treat you right.

Mr. L. D. Boardman has inaugurated a big "Midsummer Clearing Sale," and his space in this week's RECORD tells the story as well as can be told in any manner. Read his ad, and then take advantage of the bargains offered.

As will be seen elsewhere, Mr. L. Schwabach, of the shirt waist factory, is advertising for additional help. Mr. Schwabach states that he will devote more of his time here than formerly and will add machines as fast as he can secure help to operate them.

Owing largely to the objections raised by the clergy, the carnival committee has announced that the big fete, which was to have been held at Niles during three days in August, has been cancelled. Objections were raised to the gambling there attends the modern carnival.

Miss Audrey Emerson, daughter of Mr. and Mrs. Allen Emerson, was six years old yesterday and to properly celebrate the event she invited in a number of her young friends to help observe the day. About thirty-five little folks were present and all enjoyed a fine time playing games and partaking of the dainty refreshments. Each guest carried away as a souvenir a dainty card and photo of the little hostess.

LIVERY CHANGE

I wish to announce to the public that I have purchased the Klondike Livery Barn from Wm. D. House, and will endeavor to give the best of satisfaction. The South Bend trips will be continued every Thursday as usual. Fare 50 cents for round trip. Bus leaves Buchanan at 7:30 a. m. sharp. Returning leave South Bend at 4:00 p. m.

JOHN MCFALLON

EXCURSIONS VIA THE PERE MARQUETTE

Sunday August 4th, Grand Rapids and Ottawa Beach. Train will leave Benton Harbor at 8:00 a.m. Returning, leave Grand Rapids 6:30, Ottawa Beach at 7:00 p. m. Rate Grand Rapids \$1.00, Ottawa Beach \$1.00.

Mrs. S. E. Johnston
Dressmaker. Phone No. 108.

The Ladies' Aid of the Larger Hope Church will meet with Mrs. W. A. Sparks next Thursday.

Mr and Mrs. A. Jones are the proud parents of a bran new 8 pound girl who arrived last night. All are doing nicely.

The Evangelical Sunday School will hold its annual picnic on Batchelors Island next Thursday, Aug. 8th. Children that have no Sunday School are invited to meet at the church and go along.

Born to Mr. and Mrs. Martin a 10 1/2 pound boy. The young man arrived last night and is named Charles Wesley after its grand father C. W. Vorhees.

The Niles City Bank of Niles, which recently incorporated as a state bank with \$35,000 capital, held its first stock-holders meeting Friday and elected the following officers:—Jas. Reynolds, Pres., Chas. F. Pears, Vice Pres., Dickson S. Scoffern, Cashier. Board of Directors, Jas. Reynolds, Chas. F. Pears, S. W. Redden, Chas. Bishop, Geo. L. Faurote, and Dickson S. Scoffern.

Leon, the little three year old son of Mr. and Mrs. Wm. Troutfetter was run into by a bicycle and knocked down Saturday evening about half past eight. The bicycle was a motor cycle ridden by Mr. Fraser of South Bend who quickly stopped his machine and carried the little one into Dr. Henderson's office, where the wounds were dressed, and found to be of trifling nature.

A horse attached to a single buggy created a little excitement on Front street Tuesday by running through the business section, overturning a rig belonging to I. N. Batchelor that was standing in front of Churchill's, and then the runaway overturned the buggy to which it was attached, and after dragging the buggy about a block was captured without further damage.

The Dry Goods Trade.
The improvement in the dry goods trade continues, and the market grows stronger every day, says the Wall Street Journal. The condition of the cotton market supports higher prices for goods. The export demand is increasing, and the supply of coarse goods desirable for China is said to be practically cleaned out. For this reason mills that changed eight or nine months ago from coarse to fine yarn cloths are about to return to the production of coarse goods. This will help the market for light weight goods.

Every house on the line of the new rural routes will receive a copy of this week's RECORD with their first delivery of mail matter. To all we would say, look the paper over carefully, and then if you would like to read the RECORD each week send in your subscriptions and we will see that you have the best weekly in this section. The price is only one dollar per year, fifty cents for six months and twenty-five cents for three months. Send in your names.

A Michigan Central engine was noticed last Friday which has new features in appearance. Instead of the initials the words "Michigan Central" were painted on the tender, while the number was on the rim of the tender. Its effect is quite an improvement and it is understood that most of the leading roads have adopted a similar method. It is reported that the Michigan Central locomotives will eventually be thus named, also classified and the class indicated on the cab. The Michigan Central engines will comprise some 20 classes.

THE NILES CITY BANK

Given a Good "Send Off" by Inspector Maltz.

George L. Maltz, the state bank examiner, who was here last night and today, going over the books and looking into the standing of the new Niles City Bank, which begins business today incorporated under the state laws, was seen at the bank this noon by a representative of the Sun.

"Yes, I have been looking over the new bank," said Mr. Maltz, "and I find everything in splendid shape. The capital stock is all paid in, the showing of business done, and in sight is a good one, and everything starts off in elegant shape. In fact, I have never seen a state bank begin business with everything in such fine condition as does this one. The outlook is certainly a gratifying one, and while Niles has been rather unfortunate in its banking experiences, the prospects certainly seem bright now for a new era, under careful and capable management, such as your people are now assured of."—Niles Sun.

MIDSUMMER SALE

At this season of the year it is our custom to clear out all odds and ends, and as nearly as possible all summer goods, to make room for fall goods which have already begun to arrive. In accomplishing this end we shall name some very INTERESTING PRICES.

BUCHANAN. MICHIGAN

Dislocated his Shoulder

Mr. J. A. Arthur had a narrow escape from serious injury, and although he is confined to his home with a dislocated shoulder and several cuts about the head he is congratulating himself that he escaped so luckily.

Mr. Arthur had been out to Clear lake for the day with Rev. C. E. Marvin. The Sunday school classes of Mrs. Marvin and Miss Georgia Wilcox had gone on a picnic to Clear lake and the two gentlemen had accompanied the classes. When coming home Mr. Arthur who was in the first load had reached a point just this side of the cemetery when the bolt holding one of the thills broke, letting the thill down on the horse frightening the animal so that it started to run, Miss Wilcox who was driving had about quieted the animal when the noise of the second load coming over the hill gave the horse a fresh scare the horse started to run throwing Mr. Arthur against a telegraph pole, and as the wagon was being drawn by only one thill it ran diagonally across the road and struck another post the horse breaking away from the wagon and running down town where it was finally captured. Miss Wilcox and the children jumped from the vehicle before it struck and escaped injury. Mr. Arthur was brought to Dr. Henderson's office where the dislocated shoulder was set, and his wounds dressed, and at this writing is doing nicely.

Child Lost for a Week.

Rockland, Mich., July 27.—The little 9-year-old daughter of John Wesen, of Rockland, has been lost in the woods since last Saturday. The whole town is aroused and hundreds of men are searching for the lost one.

MAY BE A BRAND NEW DISEASE.

And Not Smallpox, as It Has Been So Far Diagnosed.

Kalamazoo, Mich., July 29.—Dr. Herman Ostrander, assistant superintendent is authority for the statement that physicians at the Michigan asylum believe that the cases in that institution which have been diagnosed as smallpox may be a new disease not yet named. He says there have been large numbers of cases in Michigan which have been diagnosed as smallpox and which closely resemble that disease, but which many leading physicians believe neither smallpox, chicken-pox nor varioloid.

Physicians studying the alleged new disease say it is contagious, but light, and there have been no deaths which can be directly attributed to it. It is noteworthy that the best-posed physicians in Kalamazoo are unable to agree on a diagnosis of the cases at the asylum and in the city. There is only one case which they all agree in calling smallpox.

Wins at the State Trap Shoot.

Detroit, July 26.—A team from Flint, Mich., consisting of C. E. Caleb, T. Houghton and W. C. Summerville won the three-man championship state trap shooters' trophy yesterday at the Rush House grounds. They broke 67 targets out of 75. The trophy was won for the third time by this team, but it was returned to the State Trapshooters' League to be competed for again. The Iron City trophy, a diamond medal, was won by J. R. Cotter, of Bay City, in a shoot-off.

Funeral of Mrs. H. B. Brown.

Detroit, Mich., July 30.—Funeral services over the remains of Mrs. Caroline Pitts Brown, wife of Judge Henry B. Brown, of the United States supreme court, were held at the home of Mrs. Brown's brother-in-law, General Henry M. Duffield, yesterday afternoon. Six nephews of Mrs. Brown acted as pallbearers.

Devilish Deed of Boys.

Rogers City, Mich., July 27.—Cyril Larke, the 8-year-old son of Frederick D. Larke, it is alleged, was pushed into a lake from a log boom by older companions, after they had robbed him of 48 cents which he had in his pockets. The crime was witnessed by two persons, who saw the older boys entice the younger one onto the log boom.

IDEAL SHEEPHOUSE.

CONVENIENT AND DURABLE BARN FOR AVERAGE STOCK.

Plan Combines Comfort, Hygiene and Low Price of Construction. Ventilation and Light Are Distinguishing Features.

In answer to an inquiry in Breeder's Gazette for a sheephouse to hold 75 ewes Professor Joseph E. Wing submits the following plan:

For years I have turned over in my head one plan after another, studied all that I could see, built several, and at last I think I have the idea so perfected that it will hardly be improved upon, at least by my own brain. I submit that the ideal sheep barn for the average farm and flock should be, first,

SIDE ELEVATION.

comfortable; next, convenient; next, hygienic, then cheap and durable. All these points are embodied in the plan in an almost ideal combination.

The ground plan provides a room 20 by 36 feet or any desired length, without any fixed furniture whatever. It has movable racks (shown in the end elevation) which may be set crossways or otherwise to pen off the space if desired, and there ought to be provided some hurdles for use in making temporary partitions. There are no obstructing posts. The framing is shown in the end elevation. It is all of two inch joists except the lower braces, which are 3 by 8. The long span of joist bearers, which must support considerable weight of hay, consists of three parts, each 2 by 16. They are unsupported for only 12 feet of their length and are amply strong. These joist bearers are separated two inches and supported at the ends by the parts of the 2 by 8 posts. The upper brace, which holds the building from spreading, is a 2 by 6 or 2 by 8, passing between two of the joist bearers and between the two parts of the post at the upper end. It is effective. This device is used in D. C. Harter's sheep barn, and, in fact, the frame is almost identical with his.

The height of the lower story is but eight feet in the clear. The posts are 16 feet. The roof is half pitch. This gives sufficient storage for hay, and at one end in the loft are bran and oat bins, spouted down conveniently. The floor joists are not set on the transverse joist bearers (floor joists run lengthways of the building and are 12 feet long), but are nailed through the joist bearers with spikes before the two outer joist bearers are put in place. After they are nailed, they are let down and the joist bearer ends firmly spiked to the posts, and also there are blocks slipped in between the parts of the joist bearers, and they are so spiked together that they all support the load.

END ELEVATION.

This maneuver saves valuable space in head and mow room and is very little trouble.

The overhang of the roof at the south end is to enable hay to be unloaded there by means of a track in the peak of the roof. The ends of the purlin plates are tied here as at the north end, and there is no danger of the roof spreading with no other ties. Nail girls are 2 by 6, spiked on.

The distinguishing features of this plan are the ventilation and light. Here I have copied Mr. Shoemaker's barn for dairy cows. The glass is nearly continuous on two sides. It hinges at the bottom, and by means of a supported iron rod, with a series of rigid cranks fast to it and attached to the individual sashes, the entire row of windows may be opened at once, either very slightly or quite widely. The rod is turned by a little wheel and cog gear, which any greenhouse builder will supply, being indeed the same familiar greenhouse sash contrivance. The air is admitted at the ceiling, avoiding drafts. The sunshine comes in whenever there is any.

Soaking Corn For Horses.

A correspondent tells in Prairie Farmer how he prepares corn for summer feed for horses. I don't grind mine at all. I shell it and soak it with splendid results. Keep a vessel sweet and clean at hand. An earthen jar is best. Shell in the morning enough for the noonday meal and pour upon it fresh water. At noon place to soak what you wish to feed at night and at night what you wish to feed the next morning, putting a little salt on it each time, which will render it palatable, besides giving the horses the amount of salt they naturally crave. I am never troubled with horses having sore mouth or teeth from eating hard, flinty corn and, besides, this digests well and seems to do them the fullest amount of good.

FEED OF BROOD SOWS

PROPER TREATMENT BEFORE AND AFTER FARROWING.

Milk Flow Must Be Kept Strong and Regular—Danger of Feeding to Excess—Oats and Corn Ground Together Form a Good Ration.

The sow should be fed before farrowing the same kinds of food that she is to have while suckling, writes J. M. Jamison of Ohio in National Stockman. The feeding should not be high before farrowing, unless of a succulent nature. If in the winter time and mainly clover hay, made palatable by the addition of a small amount of middlings, there is little danger of feeding to excess. But if the farmer depends mainly on corn for feed the danger of feeding to excess is always present. If strength is kept up with needed flesh, there is danger of bad results. One of the worst features will be a limited amount of milk and not of a pig nourishing kind.

A sow should go to the farrowing nest well fed in a way to make her comfortable, but not too full of rich food. The food should be cooling in its nature. I remember once that I fed two sows in the evening their regular feed of slop, bran and middlings, a liberal feed and most too much, as it caused sickness and vomiting while farrowing before next feeding time.

After farrowing if the sow has been well fed and is in good flesh she will not show signs of hunger for 24 hours, and if given what drink she needs she will remain quietly with her pigs. It is an error to think a sow must be given a rich feed as soon as found after farrowing.

As her pigs grow older and the flow of milk increases to meet their needs the ration she is given needs to be increased. A sow with a numerous litter can be fed to keep up her flesh, but it needs constant and careful feeding to do it. Because sows nearly always get thin soon after farrowing it does not follow that it must be so. It is so because they are not fed right. When grass is plentiful, it is much easier to keep up the flesh than it is in early spring or winter.

I now have a sow with nine pigs 7 weeks old that has been fed twice a day slop with some ear corn. The slop comes from the kitchen thickened with bran and middlings. The corn she eats too rapidly and does not masticate it properly, and I noticed a few days ago that she had fallen into the filthy habit of working over her droppings for the whole grains. To stop this I cut down the corn ration and increased the slop ration. But I find it is hard to satisfy her when she is fed only twice a day and will feed now three times a day. From this on she will get a quantity of clover leaves mixed with her morning ration of slop. As a rule I do not favor feeding three times a day, but when the weather is cold I deem it advisable and profitable.

Last year more oats were grown in this section than usual, and I find farmers are having much of it ground with corn. This makes an excellent ration for a sow and litter, although the pigs do not like the oat hulls. The ration would be much more acceptable if the hulls could be sifted out before feeding by putting through a coarse screen. The hulls would be readily eaten by the horses and cows. This sifting is hard to do, as farmers mix the corn and oats before grinding. Aside from the hulls the expense of grinding counts strongly against the ration, but this cannot be avoided, as this is the shape that is most acceptable to the sows and pigs.

To succeed with the sow while suckling, she must always be brought to a strong, regular flow of milk by a gradual process and regular feeding, by the use of such foods as I have indicated. Irregularity in feeding is fatal to success, and so is stinting in amount of feed.

Truths in Pig Feeding.

The Maryland experiment station publishes the following conclusions drawn from its pig feeding experiments:

It was found that with some rations the gains on pigs could be produced as low as 2½ cents per pound.

In all the tests where properly compounded rations were used pork was produced at a profit when the pigs were not allowed to become too old.

The cost of producing a pound of pork increases with the age of a pig. The aim should be to produce from 150 to 200 pound pigs at 6 to 7 months old for the greatest profit.

Skim milk was found to have a feeding value for pigs equal to fully double the price charged at most of the creameries of the state.

Separator skim milk at one-half cent per gallon and linseed and gluten meals at \$15 per ton have about the same value for balancing rations for pig feed.

Best Roofing Material.

Slate is not more costly per square than the best tin. It can be used on any pitch down to one-fifth and will make a safe and reliable roof. It is not liable to be broken by hail or storms, gives universal satisfaction and in the end is cheaper than any other material, requiring almost no attention and rarely any repairs. On all good buildings why not use the best and get the most for the money?—Practice Farmer.

KEEP THE CALF FAT.

Young Breeding Cattle Pay Better When Well Fed.

Mr. S. McKelvie, a Nebraska breeder, writes as follows to Breeder's Gazette: I notice that a correspondent has been feeding a bunch of calves for breeding purposes on cob meal, bran and oats. We have been feeding our Red Polled breeding bull calves very similarly the past year and feel well satisfied over results. We have during the winter in absence of oats fed cob meal and bran in equal parts and all the alfalfa hay they wished to eat. The calves had the run of a lot at will and a shed they could go under if they wished to. We have just sold the largest bull calf. He was 12 months and 14 days old and weighed 1,275 pounds. These calves are strong and vigorous. The bull just shipped we had already used on six cows, commencing when he was 10 months old. It did not appear to check his growth a particle.

We not only consider this a good way to keep breeding bulls while in their calfhood, but also to feed calves for market as well. We have about a car of calves for the market fed in almost the same manner, only they have timothy hay instead of alfalfa, and they have done remarkably well, growing nicely and are in excellent flesh and can now from grass be put on the market at a good profit by July 1, before the flies are bad. We will turn on grass as soon as it is good, but should these calves be kept over and fed out later we believe this is the way to feed.

For illustration, had the pure bred calf been castrated and now at 1 year sold as a market animal he would have been worth at least 5 cents per pound, bringing over \$60, while if he had been kept (as is too much the custom) in so called stock order, which is a half starved condition, he would have weighed about half what he now does and have been worth less per pound.

Some may think bulls thus kept are in too high flesh for breeding purposes. We think not, but, on the other hand, consider them more vigorous and able to produce stronger offspring. Having the run of an open lot with plenty of room, they are not tender, but strong and tough, and stay out in some severe weather, not seeming to notice the cold. They grow more hardy and are all the better for it. Had we the money that is wasted each year by keeping calves in so called "stock order" we would have a handsome income.

PROFITABLE STOCK.

Sheep Raising Can Be Made to Pay on Every Farm.

We frequently hear it stated that sheep are the most profitable stock on the farm, and when we take into consideration all the circumstances I see no good reason for questioning the truthfulness of the statement, says a writer in Wool Markets and Sheep. Those who carry on the sheep business extensively find it profitable if they give it the requisite attention and skill. While a small flock on nearly every farm is found to be more profitable I believe there is no animal that will convert the weeds and wastes that grow on the farm into money like sheep. They will eat almost every kind of weed that grows, and if they do not clean the fence corners, lanes and bush patches it is because they do not get a chance. Where wild mustard has a good hold in a lot there is no way of exterminating it so effectively and easily as by feeding sheep on the land.

Sheep are also noted for keeping up the fertility of the soil. This is a very important matter and one of the great advantages in this kind of stock raising. A pure bred sheep is always as good as a grade for the drover or butcher, and an extra good well bred sheep will always command an extra price. At any rate, the sires used in every flock should be of some of the pure breeds of sheep. It is the little extra care and attention to breeding and feeding that make the profit.

Clover and Corn For Stock.

If one could raise good crops every year of clover and corn, there would be little difficulty in providing stock with suitable food, says a Michigan farmer. Clover I regard as a double ration, taking the place really of hay and grain. It is possible to winter horses and stock on clover alone without producing any ill effects or reducing them much in weight and strength. This I would not advocate except as an experiment or in an emergency. What our stock needs is variety, and while clover might supply both hay and grain constituents there would be the possibility of inducing sickness and poor appetite from the lack of variety. Clover, of course, produces a direct beneficial effect upon the soil and adds to it more than the corn takes away. Persistent cultivation of corn on any field must in time reduce the soil fertility to such a low point that succeeding crops will suffer. With clover as a part of a rotation there would be little chance of such soil degeneration.

Concerning Hogs.

Hogs should never sleep under the corncrib or under any building what ever. Dust and parasites will absolutely ruin their chances of future usefulness.

Child Drinks Lye and Dies.

Chicago, June 15.—Joseph Houska, 2 years old, whose parents live at 2217 Fiftieth street, is dead from drinking lye. The baby's mother was scrubbing the kitchen floor and was using liquid lye with the water. She left a cup of lye sitting on the floor while she stepped into the yard. While she was out of the room the child picked up the cup and drank the contents. It died a few minutes afterward.

GREAT DAIRY RECORD

RESULTS OF GOOD BREEDING, EXTRA CARE AND FEED.

Value of Making Regular Tests and Weeding Out Poor Milkers—Ensilage Fed in Summer and Cattle Protected From Heat.

I have lately made up my milk record for the past ten months, including all my cows that have gone dry up to the present time, writes E. D. Tillson in Kansas Farmer. I cannot make up the full herd of 53 cows, as they have not all milked their full season, but as I have often been asked how my cows were doing I have made up the record of 40 cows, taking them in regular course as they have gone dry, which I think is a fair average of the herd. The average of last year of the entire herd of 53 cows was 10,242 pounds of milk, average time of milking 11 months 23 days, butter fat test 3.5 per cent, making 418 pounds of butter.

This year they are doing considerably better owing to having been better cared for and better fed during the summer months. We fed a half winter's ration of both ensilage and grain all summer, and we tried to protect them from the severe heat and flies during July and August and continued to weed out all the poorer cows and replace them with good heifers coming in, so that our milk record this year is showing a considerable improvement over last year, and we have been trying to improve every year since we started in to weigh each cow's milk

HOLSTEIN COW.

once a week, test the quality with Babcock tester once a month and keep a yearly record of every cow and weed out 12 to 15 of the poorest milkers every year and replace them with good heifers which we have coming in every year, as we raise all our best calves and turn them into either beef or cows. We commenced working on this system four years ago, also providing green feed for the cows during a drought or a very dry time during the midsummer months, but last summer we made another great improvement by feeding our cows ensilage and grain all through the summer, when on either good or bad pasture we fed half a regular winter ration of both ensilage and grain. Cows like ensilage in hot as well as cold weather, even when on good pasture.

We also added another improvement last year. In very hot weather we kept our cows in stable during the day and out in the pasture at night, also washed them with a mixture. We put it on either with a brush or a spray pump made for that purpose, applied it twice a week, which drove the horn flies all off the cows. All of these improvements have had a good effect in largely increasing the flow of milk, so that this season our cows have averaged 11,660 pounds of milk, testing 3.5 per cent fat, making 476 pounds butter. Average time of milking, 12 months.

Twelve months seem long, but that is caused by our making our 2-year-old heifers with first calf longer than we do older cows—viz, 12 to 16 months—and cows weeded out for beef are also milked a longer time on the whole herd.

My best cow, No. 56, is a cross between a Holstein bull and a Shorthorn cow. She is now 6 years old. She gave first year as a 2-year-old 10,100 pounds in 11 months. Next time she gave 15,000 pounds in 11 months, next year 17,740 pounds in 10 months and 21 days, and this year so far in ten months up to the 1st of February 18,000 pounds. She is now giving 33 pounds per day, and we intend milking her 2½ months longer, making 12½ months. We expect she will give in the 12½ months 20,000 pounds in milk in one year. The quality of her milk has averaged during the whole four years about 3.6 per cent, running from 3.4 per cent to 4 per cent fat, which, made into butter, for the first year would be 424 pounds, second year 630 pounds, third year 745 pounds and the fourth (this) year, the phenomenal, 840 pounds of butter from one cow in one year.

My cows have a good, warm, well ventilated, comfortable stable, roomy single stalls, fresh running spring water and salt always before them, fastened with a chain round neck giving freedom, allowed to run out for an hour or two twice a week on fine days, but kept in on stormy and bad or cold days. We believe in feeding well and find it pays well to do so.

My herd of cows are mostly Holsteins, one-quarter of them pure bred, the remainder three-fourths to seven-eighths Holstein blood, having used a pure bred Holstein bull 15 years, first cross with Shorthorn cows. We have used none other than a pure registered Holstein bull during the past 15 years.

Take Care of the Cow.

Don't expect your milk cow to furnish her quota of milk and butter if she be left to hustle with the rest of the stock. If she is to do her best, she must be fed regularly and well and must be protected from the cold storms and sudden changes of winter. Winter milking doesn't pay unless the cow is well treated.

Howe's Vanilla, Strawberry and Chocolate Ice Cream at W. N. Brodick.

I am a farmer located near Stony Brook, one of the most malarious districts in this State, and was bothered with malaria for years, at times I could not work, and was always very constipated as well. For years I had malaria so bad in the spring, when engaged in plowing, that I could do nothing but shake. I must have taken about 200 pills of quinine besides dozens of other remedies, but never obtained any permanent benefit. Last fall, in peach time, I had a most serious attack of chills and then commenced to take Ripans Tablets, upon a friend's advice, and the first box made me all right and I have never been without them since. I take one Tabule each morning and night and sometimes when I feel more than usually exhausted I take three in a day. They have kept my stomach sweet, my bowels regular and I have not had the least touch of malaria nor splitting headache since I commenced using them. I know also that I sleep better and wake up more refreshed than formerly. I don't know how many complaints Ripans Tablets will help, but I do know they will cure any one in the condition I was and I would not be without them at any price. I honestly consider them the cheapest-priced medicine in the world, as they are also the most beneficial and the most convenient to take. I am twenty-seven years of age and have worked hard all my life, the same as most farmers, both early and late and in all kinds of weather, and I have never enjoyed such good health as I have since last fall; in fact, my neighbors have all remarked my improved condition and have said, "Say, John, what are you doing to look so healthy?"

WANTED.—A case of bad health that R-I-P-A-N-S will not benefit. They banish pain and prolong life. One gives relief. Note the word R-I-P-A-N-S on the package and accept no substitute. R-I-P-A-N-S is for 5 cents or twelve packets for one dollar. Be had at any drug store. Ten samples and one dozen testimonials will be mailed to any address for 5 cents, forwarded to the Ripans Chemical Co., 210 Spruce St., New York.

If you have sour stomach, indigestion, biliousness, constipation, bad breath, dizziness, inactive liver, heartburn, kidney troubles, backache, loss of appetite, insomnia, lack of energy, bad blood, blotched or muddy skin, or any symptoms and disorders which tell the story of bad bowels and an impaired digestive system, Laxakola Will Cure You.

It will clean out the bowels, stimulate the liver and kidneys, strengthen the mucous membranes of the stomach, purify your blood and put you "on your feet" again. Your appetite will return, your bowels move regularly, your liver and kidneys cease to trouble you, your skin will clear and freshen and you will feel the old time energy and buoyancy.

Mothers seeking the proper medicine to give their little ones for constipation, diarrhea, colic and similar troubles, will find Laxakola an ideal medicine for children. It keeps their bowels regular without pain or griping, acts as a general tonic, assists nature, aids digestion, relieves restlessness, clears the coated tongue, reduces fever, causes refreshing, restful sleep and makes them well, happy and hearty. Children like it and ask for it.

For Sale by DR. E. S. DODD & SON W. N. BRODRICK

Laxakola is not only the most efficient of family remedies, but the most economical, because it combines two medicines, viz: laxative and tonic, and at one price, 50c. or 60c. At druggists. Send for free sample to THE LAXAKOLA CO., 132 Nassau Street, N. Y., and mention the name of your druggist. We will express to any address on receipt of 50c. in stamps or post note, all charges prepaid, a large family size bottle of Laxakola, sufficient to last for a long time.

THE PEOPLE'S NATIONAL FAMILY NEWSPAPER.

NEW-YORK TRI-WEEKLY TRIBUNE	Published Monday, Wednesday and Friday, in regular issue every other day daily, giving the latest news on days of issue, and covering news of the other three. It contains all important foreign news of same date, also domestic and Foreign Correspondence, short stories, Elegant Half-tone Illustrations, Humorous Items, Industrial Information, Fashion, Notes Agricultural Matters and Comprehensive and reliable Financial and Market reports.	NEW-YORK WEEKLY TRIUNE
	Regular subscription price, \$1.50 per year. We furnish it with THE RECORD for \$1.75 per year.	
	Published on Thursday, and known for nearly sixty years in every part of the United States as a National Family Newspaper of the highest class, for farmers, and village. It contains all the most important general news of THE DAILY TRIBUNE up to hour of going to press, an Agricultural Department of the highest order, has entertaining reading for every member of the family, old and young, Market Reports which are accepted as authority by farmers and country merchants and is clean, up to date, interesting and instructive.	
	Regular subscription price, \$1.00 per year. We furnish it with THE RECORD for \$1.25 a year.

ROLLMAN CHERRY SEEDER.

This perfect cherry seeder does not crush the cherry or cause any loss of juice. A practical machine for large, small or California cherries. The seed extracting knife drives seed into one dish and actually throws the cherry into another. The marks of the knife can scarcely be seen on the seeded fruit. Seeds from 20 to 30 quarts per hour. Ask your dealer for it. If he cannot furnish, we will send it anywhere in the U. S., express prepaid, on receipt of \$1. For further information write to the manufacturers, ROLLMAN MANUFACTURING CO., 150 Penn Avenue, Mount Joy, Pa.

Value of Farm Lands

The average assessments on the farm lands of Berrien county for the years 1900 and 1901 is shown in the following table, together with the per cent of increase added this year:

	1900	1901	Inc
Bainbridge	\$21 25	\$31 67	48
Bertrand	7 36	38 92	4
Berrien	34 61	38 15	10
Benton	44 59	84 57	80
Buchanan	26 03	30 83	13
Chikaming	16 15	21 60	33
Galen	19 82	24 72	25
Hagar	20 85	32 86	57
Lake	17 81	26 55	49
Lincoln	27 63	41 90	52
New Buffalo	14 35	19 43	35
Niles	36 31	37 75	4
Oronoko	34 19	38 94	14
Pipestone	23 35	32 42	38
Royalton	20 71	41 34	89
Sodus	28 73	38 47	31
St. Joseph	68 53	122 56	64
Three Oaks	21 81	27 80	34
Watervliet	22 41	34 66	54
Weesaw	20 58	25 89	25

The average for the county was \$28.30 an acre in 1900 and \$39.05 in 1901, an increase of 34 per cent.

Death Trap of Alpinists.

M. Fahrni and Mlle. Urweider, accompanied by two guides, have accomplished a truly magnificent performance in climbing the Simelstock, the death trap of many an experienced Alpinist. This peak is among the six most difficult and dangerous summits to ascend in the Alps, and the achievement of the tourists, especially that of the lady, is warmly eulogized in Alpine circles.

COUNTY SEAT NEWS

TO DELINQUENT TAX PAYERS

There are in this county over three hundred and fifty pieces of property still delinquent for the taxes of 1899 and unless sooner paid will be listed October 1st and advertised for sale. This will cost the tax payer one dollar for each description and in many cases the costs will be greater than the tax.

When the tax is of any considerable amount, the interest charge of one per cent per month soon becomes burdensome.

All who own property upon which the taxes of 1898, 1899 and 1900 have not been paid will find it to their advantage to call upon the county treasurer and pay the same at the earliest possible time.

PROBATE COURT

The contest for an administrator in the estate of Georgia Daly resulted in the appointment of the husband of the deceased Friday morning.

Fatal Collision at the "See."

Sault Ste. Marie, Mich., July 30.—The whalback barge Sagamore was sunk in a collision with the Northern line steamer Northern Queen, near Point Francois, yesterday. Of the crew of eight men two were drowned and one is missing. The dead are: Captain E. Joiner, master of the Sagamore; Ira Ives, cook on the Sagamore. The missing man is Burley Smith, a seaman on the Sagamore. All were

FIRST DAY'S DRAWING

El Reno Lottery Turns Out a Number of Farms for Those in Luck.

WOMAN DRAWS A CAPITAL PRIZE

Another Who Was in Luck if She Hadn't Married—Names of Some Winners.

El Reno, O. T., July 30.—When the commissioners appointed by the federal government adjourned the land drawing for the day yesterday 1,000 of the choicest of the 13,000 160-acre claims in the Kiowa-Comanche country had been awarded. The first name drawn from the wheels was that of Stephen A. Holcomb, of Paul's Valley, I. T., for a homestead in the El Reno district, and the second was Leonard Lamb, of Augusta, O. T. These two men will select the two choicest claims in this district.

These Win Capital Prizes.

The capital prize winners, however, proved to be James R. Wood, of Weatherford, O. T., whose name was the first to come from the Lawton district wheel, and Miss Mattie H. Beals, of Wichita, Kan., who drew the second number in that district. They will have the privilege of making the first filings in the Lawton district, and will undoubtedly choose the two quarter sections adjoining that town. These are considered the most valuable in the territory, and are, it is estimated, worth from \$20,000 to \$40,000 each. The day was one of keen excitement, replete with interesting scenes. It is estimated that fully 25,000 persons witnessed the drawing. The great throng was wrought up to the highest pitch.

Prize Winners Were Loudly Cheered.

The drawing of the first names was followed by a mighty shout that reverberated between the hills and must have been heard for miles over the prairies. Each succeeding winning for a time was met with shouts of applause and merit. All was pleasurable. Every man, though he did not draw a prize from the wheels yesterday, had steadfast faith that today or tomorrow would surely see him the possessor of a slip reading him a title clear to 160 acres of Oklahoma land. So in the success of friends or relatives unfortunate ones, instead of bewailing their fate, cheered lustily as familiar names were called out from the commissioners' platform.

Hundreds of "Repeaters" Found.

It has been found that many hundred applicants have "repeated," and that others have applications so illegible that they will be thrown out. Over this much discord has resulted, and the outcome may be an appeal to the courts.

DRAWING STARTED BEHIND TIME

Names of Twenty Persons Who Drove Prizes, One of Them a Woman.

The drawing had been set for 9 a. m., but the transferring of the bundles of envelopes holding the applications from the general receptacle into the wheels, which was by lot, was so slow that it was 10:30 a. m. before the first name was drawn. Twenty-five names were first drawn from the El Reno district, and then an equal number from the Lawton district. When all was ready Ben Heyler placed his hand in an aperture in the El Reno wheel, and withdrawing an envelope handed it to Colonel Dyer. It was passed to Chief Clerk Macey, stamped, and handed back to Colonel Dyer. The commissioner walked to the front of the platform, raised his hand for order, and in a loud tone exclaimed: "Stephen A. Holcomb, of Paul's Valley, I. T., draws the first number."

The crowd yelled for three minutes, apparently as much delighted as if every man had drawn a prize. Envelope No. 2 was quickly drawn forth, and Colonel Dyer again announced: "Leonard Lamb, of Augusta, O. T., born in Illinois." In quick succession other envelopes were drawn, and as the names were announced each one was greeted with a volley of cheers. The other first winners in the El Reno district follow in the order of their drawing: Frank Brown, Ponca City, O. T.; Calvin Churchill, Chikasha, I. T.; Charles D. Williams, Norman, O. T.; Olie M. Rogers, Cordell, O. T.; Edward C. Pince, Watonga, O. T.; Andrew J. Pillsbury, Sheldon, Mo.; John Brown, Caldwell, Kan.; John Shelder, Weatherford, O. T.

When twenty-five names had been taken from the El Reno district wheel attention was turned to that representing the Lawton district. The first name brought out for this district was that of James R. Wood, of Weatherford, O. T., and the crowd again went wild. The second ticket was drawn, and Colonel Dyer cried out: "I have the pleasure to announce the name of the first woman to draw a prize—Mattie H. Beals, of Wichita, Kan."

Then Colonel Dyer gave her description as 23 years old and five feet, three inches in height, just the height of Woods. Instantly the crowd caught the humor of the situation, and "thousands of throats went up the shout: 'They must get married.' The other first names drawn from the Lawton district follow in their order: Winfield S. Laws, Langston, O. T.; Faison Woodhouse, Eldon, Ia.; Marvin Hawkins, Wayland, Tex.; William C. Laid, Fort Worth, Tex.; Harry T. Foster, agent for Harry F. Parrison, El Reno, O. T.; Lee A. Stubblefield, Dunbar, O. T.; Richard H. Wyatt, Henrietta, Tex.; Charles C. Doss, Shawnee, O. T.

The eighteenth winner in the Lawton district was Minerva McClintock aged 25 years, of Oklahoma City. She was married Sunday, and by this act forfeits her right to file for a claim. She might have chosen a claim near a county seat town worth several thousand dollars.

Faith Healing Did Not Heal.

Mason, Mich., July 26.—The coroner's jury which investigated the death of Mrs. Thomas Shepard, a Christian Scientist, of Aurelius, rendered a verdict of death by blood poisoning, caused by not receiving proper treatment at childbirth.

SORT OF CO-OPERATIVE INSURANCE

That Doesn't "Go" in Michigan if the Attorney General Knows It.

Lansing, Mich., July 30.—The League of Educators, the Chicago institution that the attorney general's department proposes to chase out of the state, is a first cousin of "The League of Eligibles" that the department drove out of business some two years ago. It is worked on the co-operative insurance plan and the stationery sent out contains the cut of an immense five-story building named the "Eligible Building," to be erected some time "for the exclusive use of members and their friends when in Chicago."

The central office and clearing house is located at 184 LaSalle street, Chicago, and the board of managers given in the circulars consists of C. Franklin Davis, president; M. J. Baxman, secretary-treasurer, and David H. Roblin, head counsel. For the small sum of \$3 a certificate of membership is issued to the person who bites, which calls for \$500 "when the terms of the certificate are all faithfully complied with." These mature at the end of five years.

Assessments are levied regularly and at the end of one year, if the member marries he or she receives \$12.50, but three new members must have been secured. At the end of two years the subscriber receives \$25, three years, \$37.50, and four years, \$50. To be eligible to the league one must be of good moral character and believe in a supreme being.

HE FELL INTO THE MACHINE.

While Threshing, and His Leg Had to Be Amputated.

Allegan, Mich., July 26.—Toney Rantuff, of Salem township, ten miles north of Allegan, lost a foot in a threshing machine last Saturday. He was helping with a threshing crew at Charles Miller's place. The elevator became clogged and the belt ran off. He started to fix it and stepped on the bundle table. The machine was running at half speed. He stepped on a bundle of wheat on the table, which rolled into the machine, taking his foot along.

The engineer heard the chugging noise resulting and threw the belt off the engine, but Rantuff was in the cylinder twenty-three minutes before the crew could get him out. As the flow of blood was not stopped until the arrival of a doctor, it is feared he may not recover. His leg was amputated just below the knee.

Drowned by a Capsizing Launch.

Detroit, July 29.—The News-Tribune, a naphtha launch used to deliver newspapers to the residents of the Lake St. Clair Flats, capsized about two miles north of the lights last night during a sudden squall. Miss Maud Randall, of this city, one of the four passengers, was drowned. The captain and the other passengers were rescued.

Not So Poor as Was Thought.

Grand Rapids, Mich., July 29.—Mrs. Antonio Van Oosten, an aged Holland woman, fell dead from the heat on the street yesterday afternoon while on her way home from church. She was supposed to be in very poor circumstances, but a cloth pouch was found tied about her waist under the skirts containing \$1,045 in gold and bills.

Michigan Minute.

Sault Ste. Marie.—The joint prison boards of the state will meet here Aug 6 and 7.

Hudson.—The new M. E. church here, which cost \$22,000, was dedicated Sunday.

Byron.—The mill dam on the Shia wassee river at this village has gone out, doing considerable damage.

Buchanan.—Marsh fires west of here threaten to spread to fields and destroy crops.

Farmington.—Albert Utley is dead of injuries received by falling from a load of hay.

Grand Ledge.—This village was in darkness for two nights because of an accident to the electric light plant.

Williamston.—Aue barns on the farm of Milo Speert, in Locke, burned Tuesday; loss, \$2,000.

Ann Arbor.—Fred Gauss, instructor of French in the university, has accepted an assistant professorship at Lehigh university.

Ionia.—Hub Steadman, a Ronald farmer, has been missing since Saturday week.

Albion.—Charles O'Brien, of Hillsdale, will serve a sixty-five days' sentence in the Detroit house of correction for selling obscene literature to boys.

Orchard Lake.—The Michigan Baptist assembly will meet here Aug. 13 to 18.

Iron Mountain.—Galli Cruciano was stabbed by Galli Tomassini, a fellow miner, during a quarrel.

Ceresco.—A rural free delivery will be established here Sept. 2, with one carrier.

Waldron.—Sam Stahl, aged 16 years, was run down by a passenger train and instantly killed.

Big Rock.—Mrs. W. D. Rice, of Big Rock, was appointed recently a member of the county board of school examiners.
