A DEACON'S CHRISTMAS

Kinder made us sort o' humsick when we left th' ol' home nest, Me an' mother, an' come flyin' out here to th' Golden West. Folks that's allus been a-livin' in th' place they're born an' bred Course are apt to feel th' changes when they leave th' ol' humstead. There, why, ev'rybody knowed us, an' thar wa'n't a single face That we couldn't call th' names of in th' hull blamed country-place; An' twuz mighty hard to leave 'em, an' to start out all alone Fer a country strange an' diff'nt than us twuz hed ever known.

But that howlin' wintry weather that comes sweepin' o'er th' land, With th' blizzards an' th' snowbanks, me an' mother couldn't stand. Got so 'twan't no fun a-wadin' to th' cowbarn through th' snow, Doin' chores with teeth a-chatter an' th' mercury below. An' a-sleepin' in a chamber like an ice-box got ter be— Wal, ter make an honest statement, it wuz downright misery; So we talked th' matter over, an' c'included it wuz best To come out to California fer a leetle change an' rest.

But th' neighbors—land o' massey—how it opened up their eyes, An' they tol' us (confidential) that th' movement wuzn't wise; Sed thar wuzn't any country—s'arch th' universe el'ar through, That wuz half so good ez Squashville, an' some day we'd see it, too Sunh'ow they hed got th' idee that th' sun jest riz an' set On th' boundaries o' Squashville, an' they still believe it yet. An' they swear that land o' blizzards, sleep' an' thunderstorms an' snow, Is th' best th' Lord's created, 'cuz it's all th' world they know.

Me an' mother couldn't see it, so we pulled out stakes one night Fer th' land o' fruits an' flowers an' perpetual delight. An' the contrast—wal, by doggie, jest ter sniff this balmy air, With th' sunshine an' th' posies an' th' blue sky everywhere, An' th' grass as green as ever—an' in winter time, b' jings! An' th' trees in all their glory, an' a thousan' other things, Then ter think o' how we stood them ternal blizzards an' th' snow Makes me kick myself ter think we didn't come here years ago.

Squashville folks kin keep on talkin' bout their climate, but, by gee, I've diskivered California is th' proper place fer me. Might glad that me an' mother air a-livin' in a land. Whar th' sun makes love ter Natur' all around on ev'ry hand. What would folks back thar in Squashville say, I wonder, if they'd hear We wuz out a-pickin' roses at this season of th' year? Bet they'd read it with a sorter solum look upon each face, An' exclaim, "Th' deacon's lyin', it's too bad he's fell from grace!"

—E. A. Brininstool in Sunset Magazine for December.

State Items

Flint people are considering the advisability of continuing the queer method of lighting the city by arches carrying incandescent lamps over the streets, or adopting the tower system from now on.

The people of Hillsdale county will have a chance to express their preferences on the subject of closing all saloons. The supervisors, upon the receipt of petitions signed by the requisite number of voters, decided to submit the question at the April election.

William Feltbous, 10 years old, jumped on a heavy sleigh at Grand Rapids Friday and fell under the runners. He was dragged about forty feet and was wedged under the sleigh in such a way that it had to be pried up before he could be released. His chest was crushed in and his injuries proved fatal.

A recently married young man in Gagatown suggested to his wife that they should argue some question frankly each morning, over which there was a difference of opinion. The first one tackled was the possibility of a woman being able to dress on \$75 a year. He took the affirmative, and when last seen was climbing into the hay loft and pulling the ladder up after him.

A petition was filed in probate court at Coldwater Friday, asking for the appointment of an administrator for the estate of Philip Miller, deceased. Superintendent Staley, of the public schools, is alleged to have whipped Philip Miller so unmercifully that he died from the effects, and a damage suit against him is intended as soon as the administrator is appointed.

The supervisors of Saginaw county, adopted a resolution providing that the legislature be asked to pass a law that in that county the drain commissioner be elected by the people, the same as other county officers, and be paid a regular salary, doing away with the fee business and attendant evils, and that the county surveyor be compelled to do all the drain work and be paid a stated salary for that work, so that he will be able to give his entire time and attention to it.

Nearly a hundred business men Saturday gave a street parade through all the principal thoroughfares of Sault Ste Marie, drawing Frank Reynolds, a leading grocer, with his bride, in a gaily decorated sleigh. A band headed the parade and the turnout was cheered by a thousand persons. It was the biggest demonstration of the kind ever made in the city. Reynolds returned last night with his bride, from Connecticut.

An explosion took place Saturday, whereby the M. E. church of Walled Lake was very badly damaged. The janitor stepped into the basement with a lighted lantern to care for the acetylene plant with which the church was lighted, when escaping gas ignited and an explosion followed. The janitor was badly burned about the face and hands. The windows crashed, most of the floor broke up, partitions were blown down, walls and chimneys unsettled and considerable other damage done.

E. B. Scott, a marine engineer from Sterling, Ia., tried a new stunt in coasting at Ann Arbor Friday night, with serious results. A party of six, including three ladies, went to the Geddes avenue hill, which is very steep and icy. The suggestion was made that they slide down the hill on their backs. Two students and the three ladies made the descent in safety, but Scott was switched off and struck a stump. His right arm was broken in two places.

A story is going the rounds of the legislature about one Wayne member who exercised virtue that he now regrets. When he first came to Lansing he received a Michigan Central pass, and also his mileage to and from Detroit at the rate of 10 cents a mile. "I don't think it right," he said to some of his colleagues, "to ride on a pass, when the state pays your mileage." And he sent back his pass. Since then this new member has found that he is entitled to mileage for only the first trip to Lansing and return and now he wants his pass back. A different kind of conscience was developed in a member from another part of the state. He refused to accept a free pass and sent a \$1 bill to the railroad company for the blue ticket which runs all through the legislative session.

A Grim Tragedy.
is daily enacted, in thousands of homes, as Death claims, in each one, another victim of Consumption or Pneumonia. But when Coughs and Colds are properly treated, the tragedy is averted. F. G. Huntley, of Oaklandon, Ind., writes: "My wife had the consumption, and three doctors gave her up. Finally she took Dr. King's New Discovery for Consumption, Coughs and Colds, which cured her, and today she is well and strong." It kills the germs of all diseases. One dose relieves. Guaranteed at 50c and \$1.00 by All Druggists. Trial bottle free.

Bring your printing to the Record office.

Prices on all other goods in proportion. Absolutely the greatest chance of the season to save money on this class of goods.

"THE RACKET"

J. C. REHM,

BUCHANAN,

Call for Republican State Convention

To the Republican Electors of the State of Michigan:

The State Convention of the Republicans of Michigan is hereby called to meet at the Majestic Theatre Building in the city of Grand Rapids, on Tuesday, February 14th, 1905, at eleven o'clock in the forenoon, for the purpose of nominating candidates for Justice of the Supreme Court and Regents of the University and transacting such other business as may properly come before the Convention.

In accordance with the resolutions of 1876 and 1900, every county will be entitled to one delegate for each five hundred of the total vote cast therein for Governor at the last election in a Presidential year (November, 1904), and one additional delegate for every fraction amounting to three hundred, each organized county being entitled to at least two delegates.

Under the resolutions of 1858, no delegate will be entitled to a seat in the convention who does not reside in the county he proposes to represent.

The delegates from the several counties in each Congressional District are requested to meet in district caucus at the State Convention for confirmation:

- 1—One Vice-President;
- 2—One Assistant Secretary;
- 3—One member of the committee on "Credentials;"
- 4—One member of the committee on "Permanent Organization and Order of Business;"
- 5—One member of the committee on "Resolutions;"

In compliance with the resolutions of 1890, the secretary of each county convention is urged to forward to the Secretary of the State Central Committee at Clare, by the earliest mail after the delegates to the State Convention are chosen, a certified list of delegates to the State Convention from his county.

By order of the Republican State Central Committee.

GARRIT J. PIKEMA, Chairman.
DENNIS E. ALWARD, Secretary.
Berrien County is entitled to 23 delegates.

Died in Kalamazoo

Stephen M. Atwood died in Borgess hospital, Kalamazoo, last Tuesday night at the age of 76, after a brief illness.

Mr. Atwood was born in Chester, Birmingham county, New Hampshire, and in 1851 moved to Buchanan. He lived here for 37 years and followed his trade of machinist. In 1888 the family moved to Kalamazoo and have since resided there. He was a member of the Buchanan lodge F. and A. M., and although a resident of the celery city, had always held his membership in the local lodge.

Mr. Atwood leaves a widow, one son Claud M. of Denver, Colo., two daughters, Mrs. N. J. Geer, of Everest, Kan., and Mrs. W. G. Van Kerson of Kalamazoo and three grand children, C. R. Sabin, Carlos Busselle and Fay Busselle, all of Kalamazoo. The funeral was held Friday.

Free Water to be Cut Off

According to the following article taken from the Niles Sun, that town feels that they made a poor bargain when they induced the Chicago-Envelope Clasp company to move from Buchanan to Niles. The Sun says:

Five years ago in February the city of Niles entered into contract with the Chicago Envelope Clasp company, manufacturers of novelties, for the location of their plant in this city. Under the contract they were to be given free water power for five years, in consideration of their employment of twelve persons for at least ten months of the year. When the contract expires next month the company, which occupies the second floor of the old Tuttle building, in which the city offices are on the first floor, a meter will be installed and they will be required to pay for water used as any other consumer.

This contract has been a bone of contention for years and the board of public works has frequently considered the question of annulling it on the ground that the company has never complied with its agreement respecting the number of people employed. They are at present the only consumers of water who are on the free list, and the present policy of the city is opposed to any grants of free water, free lights, or for the remission of taxes on any ground whatever.

The Messrs. Sewell, owners of the plant in question, are excellent citizens, but the industry has fallen short of expectations and no further extension of concessions will be made.

Church Notes

The U. B. Sunday school in session on Sunday morning Jan. 15, 1905, elected officers for the present year which resulted in the election of the following persons: Viz: Superintendent, E. Pennell, Assistant Superintendent, L. Sweet, Secretary, Maud Sweet, Treasurer, Jennie Miller, Organist, Iva McGown, Chorister, Bessie Graffort. These will all take their places next Sunday morning.

Prayer meeting, class meeting and Sunday school, Sunday morning in the U. B. church. No services Sunday evening in the U. B. church on account of the Sunday school Convention to be held in the Evangelical church Sunday afternoon and evening.

There will be no services on Sunday afternoon Jan. 22, in the Mount Zion U. B. church on account of the Convention to be held in Buchanan.

Monday Club

The M. L. Club met with Mrs. Howard Monday Jan. 16. The president opened the meeting by reading the eighth chapter of first Corinthians and a prayer on charity from the Prayer book.

After the report of the Secretary had been read and accepted, Mrs. Dana Phelps took charge of the History lesson. Twenty ladies responded to roll call with current events. After recess Mesdames Perrot, Bishop and Blake sang a Trio, "The Mermaids Evening Song", Mrs. Graham accompanying them on the piano. A charming selection and greatly enjoyed.

Miss Ella Hahn read sketches from Katherine and Petruchio in "The Taming of the Shrew." They were highly appreciated. Mrs. Howard asked the ladies to remain seated and served very dainty refreshments to which all did ample justice.

Club adjourned to meet with Mrs. E. S. Roe Monday, Jan. 23, 1905.

"Sapphire Waltz"

We have just received a copy of the most popular piece of music ever published in this country, called "Sapphire Waltz," composed by Charlie Baker. It is written in an easy style and can be played on either piano or organ. The title page is very handsome in four colors. This piece of music should be found in every household throughout the entire country.

Price 50 cents per copy. Upon receipt of 15 cents in postage stamps, a copy of this beautiful waltz will be mailed to any address in the United States by The Theatrical Music Supply Co., 44 West 28th Street New York.

Do you read the RECORD?
If not, why not?

30 Club.
The "30 Club" met Jan. 11 with Miss Bernice Mead and in spite of the sleet and rain there was a good attendance. Meeting was called to order by the president and all joined in singing the opening hymn, and repeating the Lords Prayer. Mrs. Blake had charge of the history lesson "Julius Caesar Act III". In place of music for the day, Mrs. Merrill gave one of her inimitable recitations "Abe Lincoln" which called forth hearty applause.

Roll call, New Years Resolutions, was well responded to. A paper on the "Life and works of Anthony Van Dyck" by Mrs. Boyle was particularly interesting. A paper on "Vilasquez" the Spanish painter was read by Miss Searles. Club adjourned to meet with Mrs. Pears Wednesday Jan. 18.

Additional-Locals.

A mortgage for \$60,000,000 was filed by the Pere Marquette railway company at the register of deeds' office in this county Saturday morning. The lien is given the Central Trust company of New York city and is to run fifty years to January 1, 1955. It will draw four per cent interest. The mortgage is known as "Pere Marquette Refunding Mortgage" and will probably wipe out some of the other liens against the corporation. The paper will be filed in every county in the state through which the Pere Marquette passes.

An exchange says: A merchant in a neighboring town states that his advertising last year cost him 40 cents on every one hundred dollars worth of merchandise sold. He used a half page and was represented in every issue of both town papers. This year he has contracted for a full page and declares that he will continue to advertise as long as people continue to read newspapers. The biggest and best merchants in the world believe in newspaper advertising. The man who ignores it may succeed for a time but he will have to give way to the competitor who makes better use of his opportunities.

A man once got a dun through the postoffice and it made him mad. He went to see the editor about it and the editor showed him some duns that he had received himself; one for paper, one for plates, one for ink and several others. "Now," said the patient editor, "I don't get mad when these come. I knew I owed then and I relied on you and others who owed me to come in and pay me so I could pay them. You see we all depend on somebody." The mad subscriber saw the force of the argument and said he was sorry that he had let the bill run so long. How about you?—Exchange.

Sam B. Miners went through the deluge of the past week of business at the county clerk's office like a veteran, and members of the board before their departure extended to him their congratulations for the splendid manner in which he has inaugurated his term. With circuit court in session and the board of supervisors in one of the most important sessions of the year, Mr. Miners found the office flooded with work, but he quickly adapted himself to the system to the fullest satisfaction of those who had business to transact with the office.—News-Palladium.

Subscribe to the Record, only \$1 year.

SCHOOL NOTES

HIGH SCHOOL

The senior class elected the following officers at the class meeting last Thursday: President, Guy Huff, Vice President, Robt. French, Secretary, Violet Morgan and Treasurer, Earl Gardner.

The pupils are busy with their semester reviews. The semester examinations will be held Jan. 25, 27.

The seniors are delivering their first orations during the chapel hour Monday morning.

EIGHT GRADE

Eight graders are planning a sleigh ride for Wednesday evening.

Whittier's classic "Snow Bound" will be taken up next week, and studied critically, it is the second classic.

We have three pretty new 1905 calendars.

The study of the Constitution has been finished and the forms of the Congressional Bill taken up.

Garfield's and Arthur's administrations have been begun and all the names and dates of the presidents are being learned.

Reba Binns was reporter for this week.

SEVENTH GRADE

Jennie Ballard entered the seventh grade making the number 27.

Willie Sweet and Harvey Bupp stood 100 in the Arithmetic test for B class last week.

The A division are making a very interesting review on the War of the Revolution.

SIXTH GRADE

The A division begins the review work in Geography today.

The B division started in the Physiology review last week. The review work in Arithmetic is quite completed.

Our special program last Friday afternoon was given by Bernadine Blake, Richard Smith and Glen Salisbury.

FIFTH GRADE

The classes are greatly enjoying their review work in Arithmetic, many one hundreds are being received each day.

The Physiology class have been studying the circulation of the blood. It was made much more interesting by having a heart through which we could trace the flow of the blood.

For the last three months Martin Lentz has not missed a word in spelling.

FOURTH GRADE

Elsie Housewerth and Hazel Fish have entered school.

During the past four weeks of school Eula Davis has made the best record in spelling having had perfect lessons.

Mrs. Emerson, Mrs. Bainton and Misses Wilcox and Lewis have visited us during the past two weeks. We are pleased with the interest shown by the parents in visiting us and hope that others may come at any time in order to see the regular work of the children.

THIRD GRADE

Mrs. Bainton and Mrs. Herling were our visitors last week.

Lena Richardson and Louisa Guess are in school again after an absence of several weeks.

The pupils are having lessons this week on the human body.

The A class has finished the readers.

DEWEY AVE. SCHOOL.

We are glad to welcome back Ruth Sewell after several weeks spent in the west.

Nina Benedict is a new pupil in the first grade.

Through the exceeding kindness of Mr. Will House all the little people of this building have had a fine sleigh ride. It was appreciated.

Miss Carrie Williams is suffering from a complication of cold and grip. Miss Currier is looking after the 2nd grade.

We can hardly calculate how large a space a little body will fill, till it is left vacant.

Mrs. Walter Hathaway, Mrs. Frank Fisk and Beryl Russell have been our callers in the last week.

Greatly In Demand.

Nothing is more in demand than a medicine which meets modern requirement for a blood and system cleanser, such as Dr. King's New Life Pills. They are just what you need to cure stomach and liver troubles. Try them. At All Druggists, 25c, guaranteed.

THOS. S. SPRACUE & SON,
PATENTS
Wayne County Bank Bldg., DETROIT

PEARL IS IMITATED MOST.

More Sham Gems Are Made to Represent It Than Any Other Jewel.

Among all precious stones few are so extensively imitated as the pearl. The real article is a silvery white, iridescent gem, extracted from the pearl oyster. The genuine pearl is really an unfructified egg of the oyster.

Its imitation is arrived at by a chemical process. The liquid employed in the manufacture is called "essence d'Orient." The base of the compound is prepared by throwing into water of ammonia the brilliant scales of a small river fish called the blay.

The scales are first carefully washed and put to soak in water, when the pearl-like film falls away and forms a sediment at the bottom of the vessel. This sediment is worth to the manufacturer \$25 an ounce.

White wax of mucilage or gum arabic forms part of the mixture proper for the more important and expensive imitations, such as those made to imitate the rare Oriental pearls, which fetch fabulous prices.

The emerald is another stone which is cleverly imitated. A perfect emerald is the rarest stone in the world, though the trade ranks it after the ruby and the diamond. The best emeralds come from Peru, the imitations from France, and a few from Birmingham, England. The real article becomes electric by friction, and herein lies the difference between it and the imitation.

The Real Thing.

"What is a pound party, papa?" asked Floramay, who was perusing her Sunday school paper.

"A pound party, my child," replied her father, "is a girl who is learning to play the piano."—Cincinnati Enquirer.

He (at the beach)—Will you give me a lock of your hair before you leave for home?

She—Certainly. I'll have a lock for you to-morrow. Which do you want, light or dark?—Yonkers Statesman.

Basket ball next Friday night.

You will have a big time at the Masquerade ball Jan. 19. Don't miss it.

Blank notes, drafts, and receipts string and gummed marking tags, shipping tags etc.
BINNS' MAGNET STORE.

The Young Peoples' Bible Study class met with Misses Mary and Lura Keller, Monday evening.

A sleigh load of young people from Niles were in town Saturday. They were having a big time.

Harry Smith will move into his house on Second street next week. The place has been undergoing extensive improvements during which time the family have been living with Mrs. Smith's parents.

Miss Bernice Lano entertained twenty-four of her little friends last Saturday afternoon. Refreshments were served and a good time was had by all, and they left numerous presents to remind her of her seventh birthday.

The Royal Neighbors will hold installation of officers Saturday night. Each Neighbor is privileged to bring a lady friend. Commence promptly at 7.30. Practice tonight officers and members requested to be present.

At the M. E. church next Sunday morning, the Rev. James Lyon will talk about India and the work there. He has been for twenty-five years in India and is just home for his first furlough. His story will be very interesting and profitable.

The social given by the members of Rev. Douglass' S. S. Class, at the home of Miss Ruth East, Friday, was well attended. The evening was pleasantly spent with games. Three very fine violin solos were given by Mr. Geo. East accompanied by Miss Ruth East.

Alfred Richard's new home on Clark street is nearing completion. A fine hot and cold water system has just been installed by Harry Smith and is in first class working order. Mr. Richards expects to move into his new home about the first of April.

Romania Shafer, a Weesaw girl says that Martin Meffert of Buchanan, won her affections and then broke his promise to marry her. She wants \$5,000 to soothe her broken heart and has brought suit for damages in the circuit court. A. A. Worthington is attorney for the plaintiff.

A letter just received by the Record from Mrs. Jay Godfrey, of Riverside, Cal., states they need no fire there this winter, excepting just a little some evenings. She also says, "Our kitchen is a screen porch, and a great many people are sleeping in tents and on porches."

E. B. Harkrider, late publisher of the Benton Harbor Review is defendant in a garnishee suit brought by Beecher, Peck & Lewis of Detroit to recover \$660 due them for paper stock. Among the garnishee defendants are the present publishers of the paper also Dr. Bell and Ex Sheriff Collins, who are supposed to be financial backers of the paper at present.

The Degree of Honor installed their officers Saturday evening. Mrs. Nella Welsh, of Coldwater, state deputy of the order was present and acted as installing officer. After the installation a new member was adopted, following which a musical and literary program was given, and refreshments were served. Dancing was next on the program. The evening was one long to be remembered by the participants.

Mr. and Mrs. Eugene Crawford will give a Masquerade Ball the evening of their assembly, Thursday Jan. 19 at Pears-East hall Buchanan. Masked Gentlemen 50c, masked Ladies free, Spectators 50c. All those not wearing mask costumes will not be allowed to dance until after the unmasking. Cash Prizes will be given for best ladies, and best gents, costumes, also for most comic ladies, and gents, costumes. To assure all that no disrespectful characters will be allowed all masks will be raised at the door by the management. Dancing will begin at 8:30 p. m., both round and square dances will be given. The Grand march to award prizes and unmask will be at 11:30 p. m. Music by Stryker's Orchestra, "Supper Extra."
J. 17

PERSONAL.

John Fwell was a South Bend visitor Monday.

Harry Walker, of Niles, was in town last night.

Wm. Burkhardt, of Detroit, came to Buchanan Friday and will be employed by the Michigan Motor and Machine Co.

After a 30 days' visit with relatives and friends, Beryl Russell started Tuesday for Glendive, Montana, to resume work on the N. P. R. R.

Mrs. John Christopher returned to her home in Churubusco, Ind., Friday after a week's visit with her sister Mrs. W. W. Waterman.

Mr. and Mrs. L. R. Scott and daughter Maude, John Smith, Alex. Charlwood and Chas. Charlwood started this morning for West Point Miss.

Mrs. A. C. Spaulding and child Clayton of Buchanan, Mich., have returned to their home, after a brief visit with relatives and friends in North Liberty and this place.—Walker Independent.

If you wish to clean up your rooms and save money in doing so see Binns' BINNS' MAGNET STORE.

Miss Mabel Currier will entertain the members of Bethany Class Wednesday evening by a sleigh ride party to her home, five miles west of town.

Jack Frost has proven to be a better detective than those employed on the Niles police force, according to the following item taken from the Niles Star: The other day a water pipe bursted in a tenant house in Niles, whereupon it was discovered that city water had been in use therein for two years, although there is no record to that effect on the city's books.

The liberty pole at Sherwood Corners near Sodus, was blown down and broken in three pieces, in a recent storm. This pole was raised in 1868 and was instrumental in electing U. S. Grant. During Cleveland's first term the pole leaned slightly and a farmer near by, who was more economical than patriotic, cut it down and drew it home intending to make it in fence posts. L. M. Hogue expressed himself as being strongly opposed to any such use being made of the liberty pole. Some unknown persons seized the pole one dark night and drew it around to Hogue's place, where they knew it would be taken care of. W. E. Hogue painted the pole and rigged it up in fine shape, and there was another grand pole raising, in 1888, just in time to help elect Benjamin Harrison. It was one of the oldest landmarks of Berrien county. It was of red tamarack and had stood the storms for thirty-six years.

LOST—Pair of gold bow nose glasses, Dr. J. W. Emmons.
J. 20.

LOST—A pair of skidding tongs, between Buchanan and the Logan farm. Please leave same at Record or with J. H. Miller and receive reward. 1 t.

LOST—Saturday morning a bundle containing a man's sweater, somewhere between Front street and 3 miles north of town. Finder please leave at this office. 1 t.

PIMPLE FACED

Young women feel uneasy. Of course it is distressing, especially when pimples are filled with pus. However,

"Hermit" Salve

will not alone relieve but cure. It is a skin tonic and will leave the complexion clear as a baby's. "Hermit" Salve has been used for twenty-five years and is for sale by

ALL DRUGGISTS. 25 and 50c.

Every Bottle Guaranteed.

GREAT PRESENCE OF MIND

An Ingham County Saves Two Cows in Oklahoma with an Ear of Corn.

An Ingham county farmer recently returned from Oklahoma says Michigan's good enough for him. "It's too windy there," was his objection. "Why, one day last summer I picketed two of my choice cows out near the dairy, so's to have 'em handy to milk. Well, there come up a wind, and I went out to look for my cows, blamed if they were anywhere in sight. Then I happened to look up, and them two cows was floatin' round in the air. The wind had blowed 'em out and up to the end of the 200-foot picket ropes and there they was, like anchored kites. The wind kept on blowin' till evening and held the two cows steady in the air, about 80 feet from the ground, for six hours. It was milkin' time, and I was bothered to know how I was ever to get them cows down, when a happy thought struck me all of a sudden. I went into the barn and got a few ears of corn. Then I called the cows and showed 'em the corn, and both of 'em came a-walkin' down them ropes as slick as you please; want neither of 'em hurt a particle. Yes sir, and I brought some of that corn home with me. If you'll come in I'll show it to you."

"U. S. Corn Cure for ladies is good for men too. I travel all over the United States but have found nothing equa. to it, one bottle took the soreness out of two very bad corns and took the corns out in a few days." Mr. M. P. Fox, New York City. Price 15c or two bottles for 5c at Dr. E. S. Dodd & Son.

Our printing will please you. Give it a trial.

"SAVED MY LIFE"

—That's what a prominent druggist said of Scott's Emulsion a short time ago. As a rule we don't use or refer to testimonials in addressing the public, but the above remark and similar expressions are made so often in connection with Scott's Emulsion that they are worthy of occasional note. From infancy to old age Scott's Emulsion offers a reliable means of remedying improper and weak development, restoring lost flesh and vitality, and repairing waste. The action of Scott's Emulsion is no more of a secret than the composition of the Emulsion itself. What it does it does through nourishment—the kind of nourishment that cannot be obtained in ordinary food. No system is too weak or delicate to retain Scott's Emulsion and gather good from it.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

From The Sunny South
St. Petersburg, Fla.,
Jan. 11, 1905.

Mr. Editor: Well here I am again, about three hundred miles south of Jacksonville, at the little town of St. Petersburg just across the bay from Tampa, eighteen miles, on the west coast of Florida. This town has about three thousand population, and in the winter time, it nearly doubles its number by the winter tourists. It differs from Jacksonville in one leading particular, there, about one half of the people are colored, here, not more than one eighth are negroes.

St. Petersburg was laid out about twenty years ago, but it did not seem to move forward much until about six years ago; since then it has made most wonderful strides, boasting now of a good electric light plant, street cars and a good water system, pumped up and brought from a nice, clear, fresh water lake, not far from town.

Everything seems to be on the boom and from all that I can see, hear and observe, it is my opinion that a man could do well by investing and that property bought here now, would be sure to advance and would double in value in the near future and now as regards the climate, can say—you know that I have been on the east coast from Jacksonville to St. Augustine (the oldest town in the state), to Daytona, New Smyrna, Rock Ledge, Eau Galley, Palm Beach and Myama and it is my best judgment that here on the west coast, is so much higher, dryer and more healthy than it is on the east coast and that any one coming down here with throat difficulty, or catarrh, or rheumatism, cannot help but be benefited, and in many cases, would be cured entirely.

You know that the Michigan people are called wolverines; the Indiana folks are called hoosiers, but the Florida people are called crackers. 'Tis said that in an early day, when the people from the north came down here and if they had any trouble with these people, that the Florida folks would gather around them and crack them over the head and soon they began to take the name of crackers. But now they don't need any backers and they have a lot of very nice horses and some of them are regular crackers. But the men still use their tobaccos and when they have a bussing bee, the girls are regular smackers. And they are raising a good many oranges here, as the trees escaped that freeze about nine years ago, so they are now becoming regular packers. Now I am well pleased with the morals of St. Petersburg, for I have not heard an oath since I have been here and have not seen a man under the influence of liquor, and yet there are two saloons here. But most of the people are from the north and east, and they see that they are conducted very quietly.

Now we are getting along real nice, having rented two rooms, one to live in and the other a kitchen, both furnished completely and are surrounded by an orange grove, at \$5 per month. I do the cooking and Mr. Harding washes the dishes. He splits the kindling and I make the bed, so every thing moves along smoothly.

But this is enough for this time.
Yours Respectfully
L. P. Fox.

Sickening Shivering Fits of Ague and Malaria, can be relieved and cured with Electric Bitters. This is a pure, tonic medicine; of especial benefit in malaria, for it exerts a true curative influence on the disease, driving it entirely out of the system. It is much to be preferred to Quinine, having none of this drug's bad after-effects. E. S. Munday, of Henrietta, Tex., writes: "My brother was very low with malarial fever and jaundice, till he took Electric Bitters, which saved his life. At all Druggists, price 50c, guaranteed."

A Visit To a Near-by Kingdom

CHAPTER III.
As soon as we have begun to examine the soil in place, we have noted that the soil kernels are not naked but clothed with a smooth, shining, silver hued garment which clings to them with the greatest tenacity, accommodating itself to every irregularity of the surface. A closer examination of this membrane-like garment shows it to be a film of water coating the soil kernels over every part of their exposed surfaces and lining on side, top and bottom every part of the channels between. I do not know that all of us have gone far enough in our studies to understand the peculiar physical force that thus holds the water in the soil, if the soil be fertile and the water be not in excess, against the sides of the soil grains, sometimes in opposition to the attraction of gravitation and sometimes acting with it.

This force is sometimes called capillary attraction, sometimes something else, but no matter what it is called, it is true that these soil kernels do attract the water to themselves and hold it over their surfaces in a thin film. You have noted the something every day. You have noticed how different is the appearance of a stone when wet and when dry. You have seen how a cloth, dipped in water holds that water in its pores without falling out in answer to the attraction of the earth. Just so the soil holds the water not loosely in the soil channels, but drawn up against the sides of the soil kernels and held there with a force that defies the weight of the water to pull it away. I ask you to remember, then that the water in a fertile soil does not fill the spaces between the soil kernels, but exists as a film completely enveloping the soil kernels on all sides, top and bottom, as well as north, south, east and west. Between these water covered soil particles there are left vacant channels for the passage of air and roots. If the water in the soil be in excess and these passage-ways are filled, then there can none of our crops grow, because of the exclusion of the air. Drains must be put in such soils, and the surplus water drawn off, leaving just as much as the soil kernels can hold attached to their surface by this peculiar force to which we have referred. The amount of water a given soil can hold attached to the surface of its kernels, will of course depend, in one respect, on the amount of surface of soil kernels there is in a given bulk of the soil. In other words if the water films surrounding the soil kernels are of the same thickness in all cases, the amount of water which a given soil will hold is measured by the sum of the surfaces of the soil kernels in that soil. Another soil would hold more or less water than this one according to whether there was more or less surface in that soil to which the water could cling. It becomes necessary, therefore, to study the question of the total amount of surface exposed on all soil kernels in a cubic foot of the different kinds of soil.

If only all the soil particles were perfect spheres, and we knew how many of them there were in a cubic foot, we should have little difficulty in estimating how much the sum of their surface would be. We would simply have to calculate the surface of one such sphere and multiply by the number in the cubic foot and we would have it. Unfortunately for our calculations, the soil grains are not spheres, nor do they act separately but are joined together into kernels. We must study these kernels therefore as the units. They are of all sizes and shapes and the problem of determining the effective surfaces exposed, to which water could cling, seemed for a long time quite impossible of solution. Finally Professor Schlichter originated a method whereby it is possible "to determine the diameter of a grain, which, if substituted for the actual ones, would permit, under like conditions, the same amount of air or of water to flow through." This method does not give us anything like an exact statement of the actual surface exposed by all soil grains and kernels, but it does give us the nearest approximation to it that we have. Using this method it was found that the effective diameter of the soil kernel in the finest clay was approximately one five-thousandth of an inch; that the vacant space in a cubic foot of soil was a little more than half of the cubic foot, and that the surface of the soil grains and kernels in a cubic foot was 173,700 square feet. In a sandy soil, on the other hand, it was found that the soil kernels acted as if the

average diameter was ten times as great, or one five-hundredth of an inch, while, the vacant space was about a third of the entire space occupied by the soil, and the surface of the kernels was 11,080 square feet in a cubic foot. Prof. King comments on the results of the studies by Schlichter's method as follows: "The amount of surface in the true soils is indeed great, ranging from a little less than a quarter to more than a third of an acre in the sandy soils, through more than an acre in the loams to as much as four acres per cubic foot in the finest clay soils. The amount of soil surface in the upper four feet of every cultivated field ranges from not less than one acre to more than 16 acres per each square foot of surface cultivated." (King's Physics of the Soil, page 124). These statements mean that for every cubic foot, one foot square on the surface of the field, and one foot deep, there is possibly two or three acres of surface of soil kernels, and particles so exposed to the channels in the soil that water may cling to it. While this hardly seems possible at first thought, it is undoubtedly true. It means that could we add together the exposed surfaces of all the soil kernels in the cubic foot we should have an area as large as two acres, and if the soil kernels were fine enough as much as three or even four acres. It does not seem possible that a cubic foot of soil could contain enough of even the smallest sized particles to present so much surface for the attachment of water, but it is true.

SALMON IS EXTERMINATED.

Despite Closed Season Pacific Coast Fishermen Ply Trade Thus Preventing Propagation.

They say "unknown conditions" have interfered with the work of the salmon hatcheries, so that not one-fifth part of the eggs expected have been obtained, says the Portland Oregonian. The conditions are not unknown. Contrary to law, the fishing season was extended, or at least was not closed, as required by law. Again, there should be closed intervals, even in the fishing season, so the fish may have a chance. Artificial propagation will do wonders, if the fish are allowed to come in from the ocean. But when the massacre cuts off life in its source, what is to be expected? Most of the fish having been caught in the lower river, there are few to produce young for the hatcheries. The greed of to-day often cuts off the grain for to-morrow. A few years more and there will be no salmon in the Columbia—unless more vigorous enforcement of the law of the closed season can be had, and the law itself requires amendment that the closed season may be longer. Again there is need of an understanding between the states of Oregon, Washington and Idaho, and vigorous enforcement of the joint agreement, or of intervention of the United States with a uniform law for the states of the Columbia basin. Under present conditions the salmon are doomed and will disappear, and money expended on hatcheries is wasted.

Very Long Names.

A directory published in Honolulu contains what is believed to be the longest name appearing in any such publication. It is that of Miss Annie K. Keoohaakaa-lainueakaweloakanaka, which means substantially "Jack and the Bean-Stalk." Pauline Nabichodonozowiszowna, a resident of Milwaukee, is probably champion of America, though Salvatore Schlianditonariello, of Providence, R. I., and Bernhard G. Ahrenhoersterbaumer, of St. Louis, may be regarded as entitled to honorable mention.

Impartial.

Farmer Jones—Wal, that's one thing I like about these plaguey automobilists, anyway. Farmer Brown—What is that? "They don't mind getting killed themselves any more than they do killing other folks"—Brooklyn Life.

Big Guns in Church.

Bacon—I don't understand why the canons in a church are always found in the pulpit. Egbert—Why don't you? "Because the fighting is in the choir."—Yonkers Statesman.

The Cough Habit

is more dangerous to your life than the drink, cocaine or morphine habits, for it soon ends in Consumption, Pneumonia and Death. Save yourself from these awful results of Coughs and Colds, by taking

DR. KING'S NEW DISCOVERY

FOR CONSUMPTION, COUGHS AND COLDS

"Sitting by My Wife's Bed" writes F. G. Huntley, of Oakland, Ind., "I read about Dr. King's New Discovery. She had got a frightful chronic cough, which three doctors failed to relieve. After taking two bottles she was perfectly cured, and today she is well and strong."
