CHICAGO LADIES' ORCHESTRA. Popular Music at Its Best.

The Chicago Ladies' Orchestra is now filling its seventh successful season. Changes have been made from time to time in its personnel but the highest standard of work has always been maintained. A greater variety of music and entertainment is now offered in the program than in any previous season, including horn quartet, violin solos, readings, vocal solos, and other special numbers in addition to many selections by the full orchestra.

The program is chosen from modern and standard operas of the most popular type and other sources offering the best. Both the Bar association tendered the Niles critics and the general public agree with the verdict of the Lincoln, Neb., Assembly that "the Chicago Ladies' Orchestra is the best or--ganization of its kind to be obtained."

That people are apt to be careless in their statements everybody recognizes; how careless we seldom realize until we investigate. Recently a prominent citizen remarked that school taxes were high thirty years ago and they had been getting higher ever since. A little investigation reveals the fact that the citizen is wrong and that school taxes during the past twenty years (we have no records further back) have generally decreased, and that during the voted aye. past five years they have not only been much lower than during any other five of the twenty, but the average for the past five years is lower than the lowest year of the preceding fourteen.

One of the best companions any man can have is a good razor. It adds to his appearance, comfort, convenience, self-respect, time, money and good disposition.

Beginning January 1st. 1912, the barber shops have advanced the price of shaving 50 per cent which means an expense of \$23.60 annually to the man who shaves three times a week, and certainly this This also means a loss of at least as many hours as you get shaves

which would be 156 in the year, and at a price of 20c per hour amounts to \$31.20. 95 per cent of this expense can be eliminated by doing the work yourself at home—and it is O! so easy with Safties!

Come and look them over--\$1.00 up.

WIFE OF CANADA'S PREMIER

Charming and Gifted Helpmeet of the Dominion's Distinguished Prime Minister.

Ottawa, Can.-In Mrs. Robert Laird Guy Swem and family returned to Borden, wife of Canada's prime min-

the lives of men

who have made the world's history. But it is not to be presumed because Mrs. Borden's tastes lie along serious lines that she is in any way lacking in the grace of manner and interest in purely feminine matters which distinguish the true woman. On the contrary she takes the keenest delight in society affairs, having for winter festivities for which Ottawa is noted. She has gathered about her a coterie of distinguished and clever E. H. Prince and wife entertained friends and her entertainments are as the most informal given in the capital of the Dominion. Sympathetic, gracious and thoughtful for the comfort of her guests, no woman in Canada's public life is more deserving of appreciation than the wife of the prime minister.

Before her marriage, Mrs. Borden was Miss Laura Bond of Halifax. She was married in 1889, seven years before her husband first entered parliament. She takes a deep interest in women's work and for years was president of the Halifax Women's council. She has also been president of the Aberdeen association, vice-president of the Canadian Women's Work exchange and corresponding secretary of the Associated Charities of the United States.

KANSAS TAR PARTY

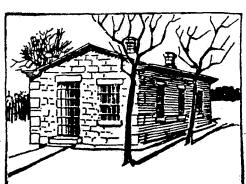

Where Several Members of the Crowd Who Mistreated Miss Chamberlain Now Reside.

Lincoln Center, Kan.-The jail on the court house common at Lincoln Center, Kan., had been without a single prisoner and the county authorities were about to convert it into an engineroom when the now famous "tar party" at Shady Bend occurred.

Ed Ricord, the decoy, who rode with Miss Mary Chamberlain to the rendezvous for the tarring, and several others of the party now occupy the building. The front widow seen in the picture lights the cell where Ricord now reads law.

The stone of which the jail and the court house of Lincoln county were built is native to the county. It was quarried for the two buildings from the hillsides near Lincoln Center.

Miss Chamberlain intended to bring suits for damages against all the participants in the tarring, but proceed-

ings were started for a compromise and it is said that \$25,000 is the least her attorneys would agree to accept in settlement.

The three men, E. C. Clark, Jay Fitzwater and Watson Scranton, who pleaded guilty, and John Schmidt, who was convicted, are worth in the aggregate more than \$100,000, Clark alone being rated in excess of \$50,-000. Their pleas of guilty and the conviction of Schmidt leave them exposed for damages, and, it is said, than to go into court where they might be stripped clean.

Business Outlook For 1912

Manufacturers throughout the country say that conditions are right and that 1912 will be a banner year for business. And not only are the conditions throughout the nation promising, but here at home prospects were never brighter. We enter upon the new year under most auspicious conditions from an industrial standpoint. Not only are the older factories running to their capacity, but a big, new plant is getting under way and the demand for houses will soon be felt.

The Business Men's association has under consideration a proposition for securing funds with which to attract other factories to Buchanan. It is a real estate scheme, which, if carried out, would prove profitable to investors and the community at large. It is proposed to buy a tract of land, which is already platted, grade the streets and dispose of a limited number of lots. Sites consisting of a few acres would be given factories locating here, and, of course, whenever a plant was secured, the value of the lots would be considerably enhanced.

From time to time additional lots would be sold by the association as money was needed to bonus desirable factories, and thus the big co-operative plan would be carried out.

As lots would be sold on easy terms, it is very likely day one grain of calomel. Give them and you are welcome to continue that many men would buy and build with the aid of the plenty of grit and charcoal. Charbuilding and loan associations.

Brought on by Irregular and Improper Feeding of Fowls.

Generally speaking, liver troubles follow acute indigestion. This indigestion may be brought about by irregular feeding or being fed on one kind of grain too long, dirt and sour feed, with a poor supply of grain. To withhold the feed a long time and then allow it in over amount is one of the most fruitful sources of digestive disorders.

Drinking water which has been contaminated with filth, or which has stood in a warm place or in the sunshine until it has become putrid; exposure to draughts, cold rains, or damp roosting quarters, particularly during the molting season, are all conducive to indigestion.

If any one of these conditions surrounds your fow's, change them, putting them in light, dry houses and giving them wholesome, nutritious food. In very bad cases give daily the system of either fowl, animal or

pronounced the eggs in question Russions nearly five weeks old; another said they were second class Russians; third specified the south of Russia. On the other hand, experts for the defense were equally positive that nobody could tell the birthplace of an egg from external examination. One witness said that when eggs were bad their nationality was indeterminable. On the whole, one is bound to come to the conclusion that the average purchaser of eggs must take their nationality upon trust.

Daring Act of Steeplejack

The attention of thousands of persons in City Hall Park, New York, re cently was attracted by a steeple jack and a small boy, who were suspended from the top of the highest flagpole on the city hall tower. The boy is Edward Hughes, seven years old, son of Samuel H. Hughes, one of the bestknown steeplejacks in the country. With the help of his father the youngster climbed the staff, the top of which is 175 feet above the ground, where the two entertained the crowd with their acrobatic work for almost an hour. One of the feats that caused the crowd to gasp was performed when Hughes, suspended head down, grasped the boy by his hands and swung him free from

Coracle-Men of Carmarthen

An interesting episode in the festivities connected with the elsteddfold. Carmarthen, Wales, was the appearance of the coracle men on the river Towy, using a survival of the oldest form of water craft known. Coracles were in use in the time of the ancient Britons 2,000 years ago. The boats are made of sticks cut from the ash and beech trees, and have an average weight of 25 pounds. The framework is covered with a sheet of strong canvas saturated with tar and pitch.

Dr. Pierce's Golden Medical Discovery is made up of the most valuable medicinal principles known to medical science for the permanent cure of such abnormal conditions. It is a most efficient liver invigorator, stomach tonic, bowel regulator and nerve strengthener.

The "Golden Medical Discovery" is not a patent medicine or secret nostrum, a full list of its ingredients being printed on its bottle-wrapper and attested under oath. A glance at these will show that it contains no alcohol, or harmful habit-forming drugs. It is a fluid extract made with pure, triple-refined glycerine, of proper strength, from the roots of native American medical forest plants. ARE MICROBES

IN YOUR SCALP?

It Has Been Proved That Microbes Cause Baldness

Professor Unna of Hamburg, Ger many, and Dr. Sabournad, the lead ing French dermatologist, discovered that a microbe causes baldness. Their theory has time and again been amply verified through research experiments carried on under the observation of eminent scientists. This microbe lodges in the Sebum, which is the natural hair oil, and when permited to flourish it destroys the hair follicies and in time the pores entire Thursday from Galien, after spend-ly close, and the scalp gradually ing the week with his grandparents, takes on a shiny appearance. BIG BARGAIN SALE OF **JEWELRY**

Cut Glass; China, Leather Goods, Umbrellas, Brass Goods, Clocks, Chafing Dishes, Etc.

We are arranging to remodel our second floor and give over a liberal part thereof to a modern and strictly up-to-the-hour Optical Department. This makes necessary the rearranging of practically our entire stock and rather than move the goods or shift them about we have decided to make a great sacrifice in prices. We also take inventory the latter part of January, and to reduce the stocks and move the goods quickly will inaugurate a Combination Remodeling and Pre-Inventory Sale.

WING to the tremendous business of the year we find (in arranging our stock for inventory) that we have an endless number of stock samples, odd pieces of furniture, discontinued lines, and remnants of carpets and draperies that must be sold Regardless of First Cost and gotten out of the way for our new Spring goods.

REMEMBER

not one of these items of every department in our TWO BIG STORES consisting of furniture, carpets, rugs, lace curtains, curtain goods by the yard, draperies, drapery goods, linoleums, stoves, crockery and house furnishings can be entered on our inventory sheet, hence THE SWEEPING REDUCTION OF PRICES.

NEVER

before has our store enjoyed such an enormous business, never have we given better value for your money and we have never shown a better assortment or more complete lines than we have during this year, BUT, this last sensation "THE INVENTORY SALE' is the "CLIMAX" of all previous efforts, offering you staple merchandise at less than present wholesale market price.

Limited space permits us of listing only a very few items, but everything in our "TWO BIG STORES" is selling at equally as low prices.
