· HOMEMAKER'S CORNER

Particularly timely at this season are the instructions for canning corn which Miss Muriel Dun-

das, home economics extension nutrition specialist of Michigan State college, has given.

Only young and tender ears of corn should be selected, as it is very difficult to sterilize the old ears. After harvesting, remove the husk, silk, and any blemishes with a sharp knife. Then cut the kernels from the cob and cook for about five minutes, using one cup of water to one quart of corn. Pack, but not tightly, while boll-ing hot, pouring the liquid in which the corn has been cocked into the glass jar or tin can be
