A Hysterical Account of The Development of Buchanan... Being a Super-Veracious Brochure On Some Misunderstood Facts...

The Rues came to Buchanan in 1493, passing through the traffic lights on New York bay the next boat after Christopher Columbus.

When the town of Buchanan was organized in 1834 or 1837 or along thereabouts, the Common Council (and speaking of the councils are still pretty common although they don't admit it anymore) saw as the motto of the city, "Saw Wood" and how those old boys used to saw wood around here!

Outside of lumber the main crops of the country in those days were huckleberries and the shakes. There were no clothing stores here at first and the First Families used to grow their own wool and flax and weave it themselves until 1827 when the Desenberg Bros. came here and started selling ready-made clothes...

They were very healthy here in the early days of Buchanan and there is a tradition that they had to shoot man to start a cemetery, and, however that may be, it was probably on account of the old still that used to be in the vacant lots south of the Hotel Rex where the boys have the beer garden staked out and the hops planted.

In the local paper of April 31, 1831, there was a notice: "The Buchanan Grays defeated the Niles Invincibles here Sunday afternoon, the score being 683 to 532 in favor of the locals. Herb Niles is showing up good at left field and he runs the bases so fast that in the third inning he didn't get off the plate fast enough after a bunt and was spiked by himself as he slid home. Attaboy, Herb, you'll make the South Bend Indians yet if you keep going like you are."

Well, a little later they took up the bicycling craze, and all the boys and girls were biking around the country and that is why, as they say, that all of the members of the Chicago-Buchanan Society are bowlegged, on account of having been bicycle cowboys in their young days.

The traffic conditions used to be terrible, and when Jake Weaver would hitch a load of hay in front (Continued on Page 3)

H. MERRILL IS CRITICAL ABOUT CENTENNIAL PLAN

Kalamazoo Gazette "Penny Wise" Takes Crack at Program; Announces His Attendance.

Far be it from me ordinarily to happen in with an 11th hour complaint on the manner in which the folks down that way are putting on the Centennial celebration but a serious mistake has been made and I think you should know it.

During the conference sometime the question of financing the expedition bobbed up and it was agreed that it should be self-supporting as far as possible.

I have just received the program of athletic events and find to my surprise that I am pretty much ruled off the track. I cannot help but suspect there has been a little fixing going on so that members of the general committee might be able to carry away all the boxes of cigars and other prizes but I hesitate about mentioning it.

When the town of Buchanan was organized in 1834 or 1837 or along thereabouts, the Common Council (and speaking of the councils are still pretty common although they don't admit it anymore) saw as the motto of the city, "Saw Wood" and how those old boys used to saw wood around here!

The greased pole exercises I see are open to kids of 15 or under. In any other place, I might get by with that but in Buchanan and I would stand a chance of being disqualified if I did win the event. I see there is a wheelbarrow race with force in it. I'm not sure just how loaded it is, but as I've forgotten the location of the loading up emporiums providing they are still in operation, I might break into the egg tossing contest providing fresh eggs are used when tossing 'em at one another.

Will Present Concert First Night of Centennial Program

There will be one feature at least on the program of the Buchanan Centennial program that will be more than worth all the trouble of preparation and that will be the concert to be given Thursday evening at 8:30 p. m. by the Galien River Valley Chorus of Three Oaks.

Those who attend the concert may as well be prepared for something beyond their experience in community singing, for this group of eighty or more voices trained for the past year by William Lester of Three Oaks, are already capable of producing music that puts the product of the glee club of a first class university to shame.

Although there is much good vocal talent in the chorus, its striking success is doubtless to be attributed to the genius of its director, William Lester, the organizer of the New First Congregational Church of Chicago and director of several amateur choruses of that city. Mr. Lester directs the

NEXT SUNDAY FAMILY DAY AT ATHLETIC PARK

Merchants Will Meet Fast Nappanee Nine; Defeated LaPorte R. P. C. U. 9 There Sunday.

Buchanan baseball fans will have an opportunity to demonstrate their interest in the game next Sunday afternoon when the Merchants will cross bats with the fast Nappanee nine at the Athletic field diamond, in what is expected to be the hottest game of the season.

The reason Manager Bob Reamer expects the game to be hot is the fact that the Nappanee nine defeated the Merchants twice last year, each time by a margin of one run, and next Sunday the local boys are going to see what can be done about it.

On this occasion Manager Reamer has decided to try out the plan of charging all male fans over 14 years of age 25c admission, admitting all women and all children under that age free.

A. L. Stodder Contributes Relics to The Centennial

Among the interesting displays at the Centennial will be an exhibit of "wildcat" money issued by Michigan banks prior to the panic of 1837, which will be loaned to the management for the occasion by A. L. Stodder of Galien.

The exhibit includes two plates from the table service of the Great Eastern, the greatest ocean steamship of the middle of the 18th century. An uncle of Mr. Stodder was an official on the great boat, which was used in laying the transatlantic cable.

Frank DeArmond, Son of Pioneer, Died Suddenly

Tidings were received here yesterday of the death of Frank DeArmond, native and former resident of this city, who dropped dead Monday at Blue Island, Ill. He was the son of John DeArmond, a one-time prominent merchant of Buchanan, and his boy-mom, a one-time prominent mercantile corner of Main and Dewey avenue, now occupied by Tom Burks. He is survived by a widow, a son, John, and one grandson; also by a sister, Mrs. Kate Hunt of South Bend. He was 75 years of age. The funeral was held Wednesday and burial was made at Assumption Prairie, Ill.

Bunting Decks Store Fronts and Business Houses Assume Carnival Air in Anticipation of Event.

With gay festoons of bunting going into place over business houses on Main and Front streets, the city is beginning to assume a carnival air this week in anticipation of the greatest celebration in the history of the town on the occasion of the hundredth birthday.

As the three day celebration takes definite form it begins to appear certain that the entertainment will be of such character as to warrant expectations of the largest attendance at any celebration in the history of Buchanan.

The entire business section will be roped off during the three days and will assume the appearance of a Midway from the free act platform 20x30 feet in dimensions in front of the Michigan Gas office to the Indiana Village which will occupy the entire intersection of Days Avenue and Front for four days and three nights of the celebration with a continuous performance in session.

A half a dozen of the largest vacant store rooms of the city will be utilized for the three days with exhibits appropriate to the occasion. The room in the Kent building formerly occupied by the Arney Grocery will house Indian relics contributed by Dr. J. B. Dalbey (Chief Fast Cloud) and by Prof. Sherwood of Central High School, Kalamazoo, both of whom will lecture at that place from time to time on the significance of the exhibit.

One of the centers of interest for the farmers of the district will be the exhibit by Michigan State college which will be installed in the room in the Treat building formerly occupied by the Merson Market. This store room will be entirely occupied by an exhibit of soil tests and of farm pests, in connection with which county agent Harry Lurkins and state experts will present lectures.

The bride is assisting in the re-captivity of the First National Bank of the city, and is in charge daily in the absence of the receiver. She was formerly employed in the Commercial National bank of St. Joseph and the American National Bank of Benton Harbor. Mr. Lloyd is business manager of The Shopper, a twin city free distribution paper.

Sunday Dinner Suggestions No matter what the calendar or the thermometer says, July and August and specifically, the week end of the Fourth through Labor Day, are summer. And summer is vacation time, out-of-doors time with picnics for the whole family. This summer many of us are planning on visiting the Century of Progress in Chicago. Older folks who can remember the Fair of forty years ago will be interested in comparisons, younger folks will find it something to marvel at and remember for 40 years. The presence of icy cold watermelon on our tables also shows us that summer is here. Since watermelon is an outstanding value in the stores now, there is no reason why all of us should not enjoy this refreshing fruit. Following are three Sunday dinner menus at different cost levels: Low Cost Dinner

GREYHOUNDS WIN 2D CONTEST FROM S. MALLEABLES

Contest is One of Fastest Ever Played on Letcher's Diamond; Defeat Chevrolet Agents 9-0.

"You can't shut a Greyhound up in a Malleable cage?" was the bulletin wired to the sporting department of the Reco after the Greyhound-Malleable steel game at the Letcher diamond, that contest having resulted in a 2-1 victory for the Portage Prairie Pooches, their second win over the same team.

Sebasto, the Pooch pitcher, was in great form and the Prairie stone wall infield was working just like a well-oiled machine. Sebasto struck out nine men and allowed only four hits. P. Glon, pitcher for the Malleable Steel Range of South Bend, was almost as good, striking out eight men and allowing seven hits.

Kell for the Prairie and Salata for the Malleables started with the stick each getting one single and one three bagger apiece. In a second game, the Greyhounds proved themselves too fast for the Chevrolet of South Bend, laking the newly-organized Chevrolet Agents of that city to a 9-0 cleaning in six innings.

Manager Reamer stated that if all of the fans turned out well for the game next Sunday, there would be no need of charging for later games. The schedule is filled up to and including Sept. 3, after which date the Merchants are open to challenge from any team in Berrien county. All challenges must be in by August 1. The Merchants defeated the LaPorte P. R. C. U. at LaPorte last Sunday in a ten-inning game. The score card read:

A Hysterical Account of the Development of Buchanan

(Continued from Page 1) of Clyde Baker's store, and Hank Cauffman would hitch a load of logs on the other side in front of Tourjise's meat market, the ends would meet and they would have to re-route the traffic by Second street. And if you think these big Illinois trucks the blinkers on high, you should have seen George Black and Bill Thayer come down Front street hill trying out their fast horses back in them days.

There used to be more horse accidents twice over than there are now, each locality is indebted to other sections of the great variety of foods available and to the network of fast transportation systems which prolong the season of each fresh food.

The marketer should not forget her place in this chain of good food from field to table. Care of the picker, packer, shipper and retailer goes for nothing if food is not kept clean and cool and used promptly in the home.

Speaking of care, it is well to remember that berries and cherries should be spread out and left uncovered in the refrigerator and that a good refrigerator is too cool for bananas.

Fruit gelatines give rise to certain questions in the housekeeper's mind which are answered as follows:

Fruits tend to rise or sink in gelatins because they are either lighter or heavier than the liquid. If chilled, drained fruit is added to the gelatin mixture when it has partially set it will remain distributed.

Fresh pineapple must be cooked before it is added to gelatin because cooking kills a substance in pineapple which digests gelatin, thus preventing its setting or congealing.

Gelatin molds should be lightly greased with a vegetable oil which does not solidify in the refrigerator. Then the dessert or salad will quickly and easily uncoil without the use of hot water.

Lemons are almost a weather barometer. When the thermometer goes up so does the price of lemons and the returning coolness down goes the price of lemons. Since lemons keep rather well it is good practice to keep a fair supply in the house at all times. Use them for lemon pie or puddings, lemon sauce, with fish and in salad dressing as well as for iced tea and iced drinks.

There are plenty of cantaloupe available for breakfast, for the first course of luncheon or dinner or for dessert. Softened ends indicate ripeness and odor is usually an indicator of good flavor.

Most of the common vegetables are plentiful in both carrots and young, sweet and tender, and boiled or fried onions should not be neglected when the occasion is auspicious.

Garden leaf lettuce makes your salads really different at this season. It is almost necessary for the salad bowl holding shredded lettuce, dried tomatoes, sliced cucumber, French dressing and for distinction that slight touch of onion or garlic. Tomatoes and cucumbers are in market in quality and profusion and so are very reasonable in price.

Beef, lamb, veal and pork are in market and some cuts of each are especially suitable for slim pocketbooks. Smoked and corned meats and the various bolognas and sausages are especially good.

The poultry business many choose between fryers and broilers or the fowl turned into jellied soup, pressed chicken or chicken salad.

Fish are changeable creatures and "fisherman's luck still continues so it is almost necessary to go to market yourself and is difficult to prophesy from day to day which varieties will be plentiful.

It Was Company You Were In, Mr. Swaim

There's such a thing as being lucky and unlucky at the same time, according to Glenn Swaim, reports a fisher trip to Kaiser Lake the first of the week. With those redoubtable fishermen, Carl Remington and Eddie Rolan, Mr. Swaim lined up a fishing trip, but the first thing that happened was a flat tire on the fishing station when it happened and was soon righted and he went on. But the jinx followed him to the lake and he got nary a fish, while Messrs. Rolan and Remington were hauling them in with both hands. Then when he started home he had another flat, and not a tire tool in his car. So he started down the road and as luck would have it, the first farmer he came to had a car just like his and the tools to go with it. Mr. Swaim states that he thinks it was the company and he is going to change his fishing companions just for luck. We would, Mr. Swaim.

Inventor Twombly Former Resident, Back in the Brig

Irving Osgood Twombly, one-time resident of the Buchanan farm section, is back in jail again, as the result of the still unsettled battle between himself and his former wife, Ethel Long Twombly.

He purchased a farm six miles northwest of this place six years ago, fitting it up with an experimental laboratory for the pursuit of one invention which had made him one fortune, and also, as his wife alleges, for a "love nest."

When his fortune had been dissipated through the expense of flight from and legal battles with his wife, the farm reverted to the mortgagee, the First National Bank of this place and is still in the hands of the receivership.

A warrant, signed in circuit court, charging abandonment of his wife, Ethel Long Twombly, claiming that he is 11 months in arrears in alimony payments due her and their daughter, Gloria, 13, brought Twombly to the Wayne county jail yesterday from his home in Michigan.

The 52-year-old inventor, once wealthy and socially prominent in New York and Chicago, has faced numerous charges since he and his wife, a former school teacher, separated in 1925, while in New York.

When Twombly charged her husband had his face "lifted" and his hair dyed so he could "step out." Later she caused his arrest in Los Angeles on charges of adultery and desertion, but he evaded extradition as he did in 1927 in Chicago when he was arrested on similar charges.

Later he was arrested in California on a charge started by his wife, involving a young woman, and brought to St. Joseph, where he pleaded guilty to a charge of illegal cohabitation and was sentenced to serve six months to three years in the Michigan state prison at Jackson, and was paroled after a year. During his sentence, he worked in the prison on plans for a factory to produce his inventions and when paroled became vice president of a factory backed by Jackson business men.

Dr. J. J. Jackson, brought the inventor to the county jail and reported his attorneys are seeking to release him on a writ of habeas corpus.

Officials said Twombly's wife had established a residence in Detroit after she had been unable to have her husband extradited to her home in New York.

Royal Titles Accorded Stately Forest Trees

The oak is spoken of as "the monarch of the woods," but the ash tree is "queen of the woods." Ancient stories tell us the gods held their council beneath an ash tree, on the topmost branch of which sat an eagle, watching the way of the world whilst a squirrel ran up and down the trunk, carrying messages from the bird to the gods. The ash is one of the easiest trees to recognize, with its straight trunk, the bark a pale gray color, its lower branches growing straight out from the trunk, curving gracefully to the sky. The tips are quite different from all other tree-tips, each ending in a stout grey twig, slightly flattened at the tip, and beyond this flattened tip two black buds, with smaller buds at the sides. Even when other trees have put on their spring dress of green, the ash tree stands bare.

Texas Gets the Blues

Residents of the Texas Panhandle and South Plains area get "the blues" each time a blustery sandstorm strikes. Dust in the air causes a deflection of light, making metal objects reflect a bluish sheen, weather men have observed.

Airplane Noise

Anyone who has ever seen an airplane is impressed with the amount of noise made and the conclusion is generally accepted that it is due to the operation of the engine, but such is not the case. Most of it comes from the tip of the propeller, the vibrating bracing wires and the rush of air past the wings.

Food Market Advice

There is a pride of home to which almost everyone is subject in addition to the pride of state and of country. The pride of home applies at this season to the marketer who comes home from the store with her basket laden with native fruits and home grown vegetables.

But even at this season when nearby produce is so plentiful and welcome, each locality is indebted to other sections of the great variety of foods available and to the network of fast transportation systems which prolong the season of each fresh food.

The marketer should not forget her place in this chain of good food from field to table. Care of the picker, packer, shipper and retailer goes for nothing if food is not kept clean and cool and used promptly in the home.

Attention Antique Owners

Local people who have antiques and relics of suitable age and significance which they are willing to display during the Buchanan Centennial and Home Coming are requested to telephone 311, 510 or 122 as soon as possible and not later than the end of the week. They will then be notified by the committee in charge of arrangements made for display and transportation. A committee of responsible women, all familiar with the value and the methods of caring for such displays, has been appointed and are in charge, assuring all who may care to co-operate that their articles will be cared for properly.

The committee in charge of this department is: Mrs. Charles Pears, Mrs. J. F. Viele, Mrs. Mae Whitman, Mrs. Lura French, Miss Lilly Abel, Miss Georgia Wilcox

Featherbone to Conform With the Textile Code In an announcement issued yesterday, President F. W. Chamberlain stated that the Warren Featherbone company would voluntarily adopt the rules of the textile code under the terms of the National Recovery Act. Beginning this week the entire plant and office will work on a 40 hour a week basis. The adoption of this code will not affect the present wage rate in the company, which has been up to and above the minimum of 2 1/2 cents an hour prescribed. Only two shifts are limited to the 40 hours a week under the code regulations. These two are the braiding and sewing departments. The change is expected to make some increase in employment to enable the plant to turn out as much work as formerly. The factory at present is running full time. The adoption of the new code was done in a spirit of co-operation with the national recovery program. President Chamberlain received a letter from the National Recovery administration department commending the Warren Featherbone company for its voluntary co-operation. Buchanan Centennial July 27-29

### Money in Presidential Battles

The deluge of money poured into Presidential campaigns did not start until the Civil war. In the last 65 years the dominant political parties have spent approximately \$65,000,000 in addition to the cost of party organization maintenance between elections.

### Stutterer Uses More Words

Persons who stutter use 50 per cent more words than persons who do not, an investigator of the psychological department of Washington university at St. Louis, has concluded after testing 500 school children, 100 of whom stuttered. He asked each of them three questions and then counted the words they used in reply.

### Squirrel Monkey

The marmoset monkey, a small monkey found in Central America, is sometimes called the squirrel monkey because its paws, tails and body somewhat resemble those of a squirrel. It also has the squirrel's habit of chattering and chattering when excited.

### OVER WORKED NERVES

**UP TO** your ears in work—every nerve at high tension. No wonder you snap at the wife and bark at the children. Watch out! Overworked nerves may lead to Sleeplessness, Nervous Headache, Nervous Indigestion and a host of other unpleasant disturbances. Why don't you try Dr. Miles' Effervescent Nerve Tablets? Just one in a half glass of water makes a pleasant, sparkling drink delightfully soothing to over-taxed nerves. Dr. Miles' Nerveine is now made in two forms—Liquid and Effervescent Tablet. Both have the same soothing effect. \$1.00 at your drug store.

### Chateau d'Artagnan Sold

The Chateau d'Artagnan, girlhood home of the mother of Dumas here, was sold recently for \$1,750. It is near Paris. D'Artagnan was not born there, but in the Chateau of Castelnore, on the estate of his father, the Steur de Baatz. He and his brother took their mother's name to avoid confusion with that of their father, and as d'Artagnan the musketeer went through life.

### Stainless Steel Secret

The story of the discovery of stainless steel, a secret for several years, is not to be told for another three decades. Harry Brearley, discoverer of the process, has given the "cutlers" company of Sheffield a sealed envelope, admitting the society not to open it until the cutlers' feast of 1960. The envelope contains his story of the discovery.

To a Gold Digger, a Brass Coin A kiss is a peculiar proposition. Of no use to one, yet absolute bliss to two. The small boy gets it for nothing, the young man has to lie for it, and the old man has to buy it. The baby's right, the lover's privilege, and the hypocrite's mask. To a young girl, faith; to a married woman, hope; and to an old maid, charity.—Literary Digest.

Triumph of Invention in "Unsinkable" Vessel? One of the world's greatest inventions was the self-righting boat, the principle of which is used in all lifeboats. Cut out a piece of wood the shape of a slice of melon and you will find that no matter what you do with it in water, it rights itself in an instant.

Now another astonishing invention is announced—that of a ship which cannot be sunk. The inventor is M. Joseph Chartrain, a Frenchman. Tests were made with a model of an Atlantic liner twelve feet long and weighing half a ton.

The experts conducting the tests began by driving great holes in the model below the water line with crowbars. A full-sized ship pierced with holes on the same scale would have sunk in a minute or two. No efforts on the part of the experts could make the model do anything more than settle down an inch or two in the water. The damaged model was tilted right over on its beam ends by great weights, but the moment these were removed it righted itself again.—London Tit-Bits.

Michigan Weekly News Review

Michigan Cities List \$300,000,000 For Improvement Michigan cities, towns and villages have listed in excess of \$300,000,000 worth of public improvement projects which may be held eligible for government aid under the terms of the Industrial Recovery Act. Detroit alone has aggregating \$200,000,000 while various other communities of the state have an additional \$100,000,000, according to the Michigan Municipal League.

The projects being assembled for government consideration include paving, grade separations, public buildings, sewage treatment and garbage disposal plants, water works, road widening, public golf courses, swimming pools and the like, most of them being self-liquidating and intended to bring unemployment relief.

The Detroit Program Detroit's program, in which projects of upwards of \$200,000,000 have been considered as eligibility for federal aid, includes, among other things, a \$7,000,000 sewage disposal plant to serve 21 different municipalities in the Detroit metropolitan area; an \$87,000,000 Detroit city transportation subway; additional millions for the widening of main city thoroughfares; \$19,000,000 for 26 grade separation projects; \$9,000,000 for additions to Detroit's public schools; expansion programs for the water and lighting departments; \$3,000,000 for paving repairs; improvements to parks and boulevards; construction of swimming pools; reclamation of slum areas and a river front improvement and convention hall project.

Harold D. Smith of Ann Arbor, secretary of the Michigan Municipal League, representing municipalities outside Detroit, has listed 50 to 60 large public works projects for various communities involving expenditure of more than \$100,000,000 under the recovery act, he states. Secretary Smith has informed H. L. Ickles, Secretary of the Interior, that some 400 Michigan municipalities have been informed by the league of the provisions of the act in relation to public works projects and that most of these communities are anxious for completion of the government's set-up in Michigan for its administration so they can make applications. Meetings in districts all over the state were being conducted by the league this week for further explanation of the government's plan to put men back to work.

"Under this act the federal government will pay \$30 out of every \$100 that these cities and villages spend for labor and materials on worthwhile projects, and will loan the balance at a low rate of interest on terms which the municipality can handle." Mr. Smith said. "Never before has there been such an opportunity to se-

curved needed public improvements, and there probably never will be again. "Besides these important advantages in financing projects, construction costs are now very low compared with normal times and there is a great need for putting men back to work. Projects undertaken now will utilize all these opportunities and help in the national program for industrial recovery."

Michigan is considering development of a ground water supply. Muskegon is working on a filtration plant, sewage disposal plant, city hall, aggregating \$1,250,000. Lansing has a \$1,500,000 program for sewage and garbage disposal plants, grade separations, flood control and street improvements.

R. F. C. To Loan \$75,000,000 to Liquidate Closed Detroit Banks Clarification of the entire Michigan banking situation seemed imminent on Friday with announcement of Jesse H. Jones, chairman of the Reconstruction Finance Corporation at Washington, that directors of the government's financing organization are prepared to provide approximately \$75,000,000 for an additional liquidation of depositors' claims against the closed First National and Guardian National banks in Detroit.

Acceptance of this loan by the receivers of the two institutions, either for a direct pay-off to depositors or as a nucleus for the formation of two new national banks in Detroit, as now seems assured, would mean a release of 15 to 20 per cent of cash to creditors of the two closed banks, in which would be included the millions of reserve funds of most of the 200 out-state banks tied up in the Detroit institutions.

New Bank Asks Charter With the R. F. C. announcement that it is prepared to loan the Detroit banks \$75,000,000 it was revealed that plans are well ad-

vanced for the opening of two new banks to supplant the two closed institutions. One of these, backed by the Ford interests, already has applied for a charter. It will be known as the Manufacturers National Bank and will have a capital structure of \$5,250,000, all of which has been subscribed. The organizers include Edsel B. Ford, Wesson Seyburn, John Ballantyne, Fred M. Angler and Clifford B. Longley, who, with Emory W. Clark, Alvan Macaulay, E. D. Stair, William S. Knudsen, Fred Wardell, W. T. Barbour, Dr. F. T. Murphy, C. H. Booth, C. C. Wittingham have subscribed for the capital. Capital stock will be \$3,000,000, surplus \$1,500,000 and undivided profits \$750,000.

Point Long in Dispute Solved by Old Trees? Further proof that North America and Asia were once joined or were parts of the same continent has been found in northern Alberta, Canada. Remains of trees said to be from fifteen to twenty million years old, yet perfectly preserved, were found in sticky tar sand near Fort McMurray. Gnarled branches and trunks of trees that could be whittled with a jackknife, and even the leaves and the insects that fed upon the leaves, were in a good state of preservation, thanks to the air-tight embrace of the tar sand. Not only are these ancient trees far older than any previously discovered tree remains, but they are said to be the only known deposit of Jurassic period vegetation in its original state. The remains were discovered by the engineer of the Canadian federal department of mines, who is an authority on bitumen deposits.

Livingstone Souvenir There is an exhibition at the Livingstone memorial, Blantyre, a very dilapidated copy of a Seebanna Bible that has on it two of Doctor Livingstone's signatures. One of these is dated "Tete, 1856," that is just before he left on his first furlough. The book has been badly damaged by white ants. The chief interest, however, is not so much the book as a little slip of paper that it contains, on which, well printed in blue ink, is a picture of Hamilton palace (now demolished). It seems clear that it must have been long used as a book-marker.

Munkacsy's Ideas When Munkacsy, great Hungarian painter, was a lad, he was dissatisfied with representations of the Christ which he saw. They seemed "effeminate personifications of too much humility." He wished to paint "such a man as could be severe to the wrongdoer, even while he was forgiving and tender to the repentant." To counteract the effect of the paintings of which Munkacsy disapproved, he himself painted pictures which have Christ's life for theme.

Wesley Family The Wesleys afforded a pretty example of two qualities linked through several generations—music and religious fervor. Two of the Wesley grandfathers were expelled from their benefices as non-jurors. Charles and the great John showed both qualities in a high degree. Then comes Sebastian, a great composer of church music. His son, who died fairly recently, was a clergyman whose passion was music.

Culinary Genius A young teacher prided herself on stimulating the children to do original thinking. She encouraged them to tell any new ideas that came to them. Among the contributions which came after one week-end was one from a boy who said he was going to invent a new griddle cake flour, which would have popcorn in it to make the pancake self-turning as well as self-rising.

Hi-Powr Anti-Knock GASOLINE

Combined with the easy starting and noticeable speed acceleration features of Hi-Powr, the New Gasoline, is the new feature of anti-knock performance, heretofore obtainable only in fuels of high premium price.

Anti-knock performance is important to every owner of a car with a high compression motor. There has been an increase in high compression ratios for the last five years. The average compression for 1933 is distinctly higher than in models of 1932.

Higher compression calls for an anti-knock fuel of high octane value. That's Hi-Powr, the new triple value gasoline. It is High Test, High Octane, Overhead Lubrication. As modern as the most modern motor.
