

WILL PICK MISS BUCHANAN APRIL 23

I. O. O. F. to Stage Community Talent WLS Minstrel Apr. 25-26

WILL SELECT LOCAL ENTRY AT HOLLYWOOD TUES.

Now Here's the Proposition

The Lady of the Day Oh, hand me my home-brewed complexion, and lay out my most fetching dress...

LOCAL CAST OF 75 TO 100 WILL TAKE PART

Noted Director to Head Production; Costumes and Scenic Effects from WLS.

On Thursday and Friday, April 25 and 26, the fun lovers of Buchanan will have the opportunity of seeing how a real radio show is "put on the air"...

There will be a local cast of seventy-five to one hundred people, directed by Howard Tooley, well known theatrical producer from WLS, Chicago.

Director Tooley arrived in Buchanan Wednesday and the initial tryouts were held last evening. He is in high praise of the local talent and feels that there will be some real "radio finds" among the local cast.

A truck load of beautiful costumes and scenic effects will be sent from WLS Chicago, for the show.

Along with the minstrel, one of the "high lights" will be to see just how a "radio drama" with all the sound effects is put on the air.

The advance tickets are now on sale by members of the local lodge and also members of the cast. The reserve seat sale will open on next Monday, April 22nd, at Glenn Smith's.

Twenty-five per cent of the I. O. O. F. share of the proceeds will be donated to the Buchanan Parent-Teachers Association.

Priscilla Neff, Former Resident of Buchanan, Dies

Mrs. Priscilla Neff, 71, former resident of Buchanan, and a sister of W. B. Rynearson, died Saturday at her home in Elkhardt, after several years with asthma, complicated with heart trouble.

She was born Jan. 7, 1864, in Illinois, the daughter of Mr. and Mrs. William Rynearson, and came to Buchanan with her parents in girlhood. She was married here to Perry Neff, Oct. 22, 1885.

Surviving are her husband; the following children, Floyd E. Neff of San Jose, Calif., Glenn C. Neff and Kenneth E. Neff of Elkhardt; a sister, Mrs. Ida Dudman of Chicago; four brothers, Melvin Rynearson of Long Beach, Calif., William B. Rynearson of Buchanan, J. Barney Rynearson of Chicago, George Rynearson, Sprague, Wis.

The funeral was held Tuesday afternoon from the Trinity Methodist church of Elkhardt, and burial was made in that city.

Harry Banke is substituting this week in the English department of the Buchanan high school for Miss Helen Hamlin.

LOCAL CHURCHES ANNOUNCE EASTER SERVICES

Banquet April 24 To Award Medals Winter Cage Series

A banquet will be held at D's Cafe banquet room Wednesday evening, April 24 on the occasion of the award of the gold and bronze medals to the D's Cafe team and Rexall team winners...

Dialogue, What Easter Means to Me, Betty and Delores Baker. Recitation, Spring's Best Day, Jean McGowan.

Dialogue, Easter Choice, Birdella Pfingst's class. Playlet, The Growth of the Lilies, boys and girls from classes of Mr. Riffer, Mr. DeWitt and Mrs. Glenn Jesse, with Betty Miller at the piano.

Announcements and Offering. Piano and Organ Duet, Mrs. John Fowler, and Miss Marion VanEvery. Address, Pastor. Pantomime, O. Jesus, Thou Art (Continued on page 4)

Two Teams Want To Complete B. A. A. Softball Set-Up

Announcement has been made by George Wynn, president of the Buchanan Athletic Association that at present only six teams have been secured for the summer softball program.

STATE LANDSCAPE EXPERT DIRECTS REDBUD PLANTING

Work is Beginning on Program of Developing Trail; City Installing Signs.

A force of FERRA men working under the direction of Prof. O. I. Gregg, state landscape specialist of the extension department of Michigan State College, planted about 350 redbuds, dogwoods and forsythias along the winding Redbud trail above the St. Joseph river Monday as a part of the landscaping program sponsored by the Buchanan Lions Club.

The trees selected were small in order to secure a better percentage of survivals and will not develop to any size for several years. Other cleaning and improvement work is being done along the trail and elsewhere.

Chairman Phay Craffort of the parks committee of the city is sending for three signs to direct traffic on the trail at M-60, at Front and Portage streets and at the junction of Portage and River streets. The committee is considering the installation of hand-some button signs of the reflector type which will aid very materially in drawing traffic along the trail.

The idea of developing the trail as a scenic asset to the city was originally conceived by Delbert Voorhees, who had seen the Magnolia Trail at Mobile, Ala.

The Redbud trees were donated by August Ernst, the dogwood trees by Clell Sult from the E. V. Clark farm, and the forsythias by the Lions Club.

Local Police Not Instructed to Hunt for Writer of Notes

While Chicago police are searching basements in the vicinity of the home of the missing Richard Perrot of Chicago, in accordance with instructions in two anonymous letters sent from Buchanan Sunday and Tuesday, local police and representatives of the sheriff's office state that they have received no instructions to work on the case at this end of the road.

The two letters stated that the body of the boy would be found buried in a basement near the home of his parents at 4110 North Maplewood avenue.

When last seen the 4-year old boy, mute since birth, was in company with a "tall, thin man" in a Chicago candy store on April 4.

Spirea Wanted to Plant on Mill Race Near Athletic Park

All who have spirea or other shrubbery to donate for the purpose of planting on the mill race along Athletic park are requested to call 40 not later than Monday.

If you have spirea or shrubbery you don't want, give it to the schools to plant along the mill race, Athletic Park. Call 40 not later than Monday.

SPAFFORD TALKS TO LIONS ON AIR CONDITIONING

L. B. Spafford, former engineering editor for a number of magazines published by Engineering Publications, Chicago, spoke before the Lions Club last night on the subject of "Air Conditioning". His address was as follows:

JOHN BATEMAN TALKS TO LIONS ON COUNTY ROADS

Says Berrien Road Department Now Emerging from Red for First Time in Three Years.

The current financial status of the Berrien county road department has been "in the black" in the past three weeks for the first time since the refinancing of the Covert Road bonds in 1932, according to J. H. Bateman, engineer manager of the county road commission in a talk before the Lions club last week.

Berrien county stepped into the million dollar class in road taxes in 1927, when the total of county and township road taxes was in excess of \$1,000,000 and continued to exceed that figure for five years, in a county whose total assessed valuation is \$90,000,000.

This was the condition when the county road commission undertook to refinance the Covert Road bonds in 1932. At that time the plan was disapproved by practically all bonding companies, which were unanimous in asserting that the refinancing would not prove successful. In 1933 the county bonds sold at low as 43. They are now selling at from 100 to 105.

In 1932 the state legislature passed the Horton act which gave the counties 100% of the state motor vehicle weight tax, instead of 50% as formerly. As a result the county road income has ranged from \$250,000 to \$260,000. The laws and the tax provisions under which the roads of Berrien county were built have been repealed and it would now be virtually impossible for the county to construct a new road except by the county road tax.

The county now receives \$320,000 from the combined gas and weight taxes, of which \$160,000 must be applied on bonds. Out of the remaining \$160,000 must come all maintenance, correction and rebuilding of county roads.

In 1931 the state legislature passed the McNitt act which provided that the counties should take over the township roads during a period of five years at the rate of 20% of the mileage each year. On the 705 miles of township road in Berrien county the county has now taken over 581, which, added to the county roads, represents a total mileage of 1207 miles for the road commission to look after.

In 1936 the county will also acquire control of all streets in platted subdivisions, outside of municipalities, which will greatly increase its maintenance and construction problems.

The county has 457 miles of water bound macadam roads, which should be surfaced every five to seven years. This would require a quota of 70 miles per year. As a matter of fact in 1932, 49 miles were resurfaced; in 1933 5.3 miles; in 1934, 8 miles.

Bateman stated that the road commission had selected four road projects as especially important in the event that funds are available from the \$4,800,000,000 recently enacted by Congress. The list comprises the Portage Prairie road from M-60 to the Indiana line; two miles on the old Territorial road east of Benton Harbor; 2 1/2 miles northwest of Sodus on the Pipestone road; the Three Oaks-Savoy road.

The selection of Miss Buchanan will be held at the Hollywood theatre Tuesday evening, with an accompanying program of vocal, instrumental and solo dancing entertainment, and an excellent film, "The Affairs of Cellini," starring Frederic March.

Arrangements were completed yesterday by the committee, comprising Mrs. Kathryn DeNardo (chairman), Mrs. John Russell, Mrs. H. C. Stark, Miss Edna Nelson, Jeanne Roti, and Howard Monroe.

The doors of the Hollywood theatre will open at 6:30 p. m., with no reserve seats. The film will start at 7 p. m., followed by a program of entertainment after which the selection will be made by a competent board of out-of-town judges whose identity has not yet been announced. Ed Swain, well-known entertainer of Niles, will act as master of ceremonies. Tellers will be Lloyd Kolhoff, Wilson McLeod and Walter Hawes.

The following girls have been entered as contestants: Edna Holmes, Alma Schaffer, Anna Smick, Thelma Howard, Jean Russell, Estella Smith, and Grace Crothers. It is anticipated that at least three more girls will enter. The program of entertainment will be in part:

Dance numbers by pupils of the Teresa White School of the Dance saxophone trio, Victor Vignansky, Donald Flenar, Marguerite Babcock; girls' vocal trio, Phyllis DeNardo, Marian Miller, Una Kelley; boys' quartet, Bob Strayer, Vincent DeNardo, Bob Willard and George Remington.

After the selection the film will be run a second time. After the expenses of the show are paid, the Hollywood theatre will divide the proceeds with Miss Buchanan, to aid in outfitting her for the finals at Benton Harbor.

Following the selection a reception will be held for the contestants, the judges and other officials at the home of the chairman, Mrs. Kathryn DeNardo.

The finals will be held in the Liberty theatre, Benton Harbor, on the evening of May 1, when representatives of 22 Michigan cities and towns will compete for the honor of being Blossom Queen of the 1935 Blossom Festival.

Buchanan has won the honor twice in the ten selections made to date.

Harold Wisner is Valetorian of H. S. Class

Harold Wisner, son of Mr. and Mrs. E. H. Wisner, former residents of Buchanan, and a brother of G. M. Wisner, has been awarded valetorian honors of the 1935 graduating class of the Big Rapids high school according to an announcement recently carried in the press of that city. He was a member of the high school debating team which went to the semi-finals of the state interscholastic tournament, and has been a class officer each year. The salutatorian of the class is also a boy.

John Bateman Talks to Lions on County Roads

Unchank of Hills Corners Sez:

One way to allus get what you ask fer is to allus be keafurl not to ask fer anything you can't git.

The average politician is jist about smart enuff to lick himself. A good cure fer most mer's vanity is gittin' married.

It's much easier to love our neighbors if we feel sure they are not in the road of any of our personal rackets.

And another thing we find it hard to understand is that a business man, who would consider himself eternally disgraced if he happened to parade around town with his shirt tail out, will permit an eye sore to exist year after year in the heart of the business community and never bat an eye.

Humiliating Comparison We heard a good riddle the other day which we will pass on: Question—Why is a historical novel like a woman's bustle? Answer—Because it is a fictitious tale based on a stern reality.

Thumb Nail Sketch He was the prim staid sort of soul who could never see any woman other than his wife parading around in pajamas without being startled.

Our Weekly Fairy Tale There was once a man who made a million dollars by always giving a fair consideration to the other fellow's point of view, by always considering the other fellow's interests, and by treating his neighbor as he wished to have his neighbor treat him.

St. Anthony's to Present High Mass Easter Morn

St. Anthony's Roman Catholic church will hold a high mass at 8 a. m. Easter Sunday, at which time the choir will present Emerson's Mass in C. Guest soloists will be Bob Strayer, John Strayer and Harry Frew.

Revival Services Church Brethren

Special revival services are being held each evening during Easter Week, beginning at 7:30 p. m. at the Church of the Brethren, with Rev. Dewey Rowe in charge.

Harry Banke is substituting this week in the English department of the Buchanan high school for Miss Helen Hamlin.

# Berrien County Record

Published by THE RECORD PRINTING COMPANY A. B. McClure, Managing Editor Entered as second class matter November 20, 1919 Buchanan, Michigan, under the act of March 3, 1879

### A FAVORED SPOT

There may be a few who will mentally, at least, demur from the statement in a widely quoted editorial in the Chicago Tribune last week crediting Southwestern Michigan with "the world's best climate" but the statement will serve to emphasize the fact the climate of this section will actually average much better for general "liveability" than it is generally credited with doing.

And it might be further said that if one-half of one per cent of the area of the entire world were selected as suitable for living on the score of climate, opportunities for business and livelihood, opportunities for recreation and for cultural advantages, and all the other factors that go to make up a desirable place to live, it would be impossible to exclude Berrien county from that area. It would very likely qualify in a closer selection.

Perhaps the residents of this section not always appreciate how wonderfully they are situated, in a region of much natural beauty, within a half hour's drive of one of the greatest inland lakes of the world, with a city of 100,000 population within twenty minutes drive and the fourth city of the world from two to three hours away, depending on the weight of your foot on the gas pedal, with one of the best sections for general fruit growing in America surrounding you, with the greatest manufacturing industry of the world centered largely within the state's borders.

Striking an average on opportunities for work, recreation, general culture, health—one cannot be fairly accused of narrow local patriotism in asserting that Berrien county is one of the favored spots of the globe.

## GALIEN NEWS

### Galien Culture Club Shares in General Program

The Friday Culture Club met at the home of Mrs. Ed Shearer for the end of the club season program, which was in charge of Mrs. Richard Wentland, every member taking part. The subject was Little Essays. Mrs. Paul Harvey gave "The Impossible Task;" Mrs. Phillip Keen, "Birds and Animals;" Mrs. Clayton Smith, "Solomon was Wrong;" Mrs. Clyde Swank, "Essay on Noses;" Mrs. Gus Jannasch, "Knowing How;" Mrs. May Tooley, "What's the Difference?" Mrs. Ed Shearer, "Essay on Bars;" Mrs. Clarence Glover, "Essay on Prosperity;" Mrs. Richard Wentland, "Snobs and Chewing Gum;" Mrs. Ward James, "What Every Woman Knows;" Mrs. Albert Schaafsma, "Essay on the Guest Towel;" Mrs. John McKnight, "Essay on Worry;" Mrs. John McGawn, "Back to Barbarism."

Following the program a potluck lunch was served, completing a very enjoyable afternoon. The study program will resume in October.

### Union Service For Good Friday at L. D. S. Church

A Union Good Friday service will be held at the Latter Day Saints church Friday afternoon at 1 o'clock with Rev. Eastburg giving the main address, assisted by Rev. J. W. McKnight of the Latter Day Saints church, Rev. Snell of the Methodist church and Rev. Kling of the German church. The choirs of the churches will render anthems and other musical numbers. Residents of Galien and vicinity are invited to attend. A capacity crowd is expected.

### Kalamazo Unit To Hold Mission Rally at Methodist Church

# Church Services

Dayton M. E. Church  
J. C. Snell, Pastor  
1:30 p. m. Sunday School.  
2:30 p. m. Preaching service.

Seventh Day Adventist  
Sabbath School (Saturday) at 10 a. m.  
Preaching service at 11:15.

First Christian Church  
Paul C. Carpenter, Minister  
10 a. m. Sunday, Bible School.  
Wm. Bohl, Supt.  
11 a. m. Communion and preaching service.  
Junior church services at 11 a. m. Supt. Mrs. Nellie Boone.  
6 p. m. Senior Christian Endeavor.  
Intermediate Christian Endeavor at 8 p. m.  
7 p. m. Song Service and evening worship.  
7:30 p. m. Wednesday, Bible Training class.  
7:30 p. m. Thursday, mid-week prayer service.  
The pageant, "The Terrible Meek" will be given at the regular evening hour of service.

St. Anthony's Roman Catholic Church  
Pastor, Rev. Father John Ralph Day.  
Masses at 8 a. m. on each first, third and fifth Sunday of the month and at 10 a. m. on each second and fourth Sunday, and at 7 a. m. on the first Friday of each month.

First Presbyterian Church  
Rev. W. H. Brunelle, Pastor  
7 a. m. Sunrise service. Tuxis young people's group will meet with the young people's group of the Niles churches at the home of Mr. Friday on the Niles road. In case of rain the meeting will be in the Niles Presbyterian church.  
10 a. m. As an outgrowth of the Pre-Easter lesson the children of the church school will present a pageant: interpreting the Resurrection of Jesus and the Coming of Spring. This program will be entirely within the church school hour.  
11 a. m. The regular service of public worship will include special music, infant baptism, and the reception of new members, both by letter and on confession of faith in Jesus Christ. The sermon will be "This is the Light Eternal."  
On Good Friday evening at 7:30 p. m. the Vespers Singers will present Maunders cantata, "Olivet to Calvary." They cordially invite all of their friends in Buchanan to enjoy this music with them.

The Reorganized Church of Jesus Christ of L. D. S.  
Elder V. L. Coonfare, Pastor  
5:15 a. m. Sunrise prayer service.  
10 a. m. Church School. Stephen Martin, Supt.  
10:45 a. m. Church School. Eastern program. Mrs. Myrel Anderson, director.  
6:30 p. m. Study hour. Junior and Senior classes.  
7:30 p. m. The Zion's Christian Legion presents "The Wife of Phileas," a four-act drama.  
7:30 p. m. Wednesday, mid-week prayer service.

Christian Science Society  
Sunday service at 11 a. m. Subject, "Doctrine of Atonement."  
Sunday school at 9:45 a. m.  
Wednesday evening meeting at 7:45.  
Reading room, located in the church at Dewey avenue and Oak street is open each Wednesday afternoon from 2 until 4 o'clock.

Christian Science Churches  
"Doctrine of Atonement" will be the subject of the Lesson-Sermon in all Christian Science churches throughout the world on Sunday, April 21.  
Among the Bible citations is this passage (Ezek. 18:27): "Again when the wicked man turneth away from his wickedness that he hath committed, and doeth that which is lawful and right, he shall save his soul alive."  
Correlative passages to be read from the Christian Science text book, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following (p. 23): "Wisdom and Love may require many sacrifices of self to save us from sin. One sacrifice, however great, is insufficient to pay the debt of sin. The atonement requires constant self-immolation on the sinner's part."

Evangelical Church  
Wm. F. Borttcher, Minister  
Easter Sunday, April 21st  
6:30 a. m. Sunrise service to which the entire congregation is invited.  
10 a. m. Easter program under the direction of Mrs. T. E. Van-Every. The pastor will bring a brief message in connection with this service.  
6 p. m. Joint E. L. C. E. service with Miss Mae Rose as leader. This will be an inspirational meeting and a fine introduction to the evening service.  
7 p. m. The choir will present the cantata "Our Living Lord"—Wilson; under the direction of Mrs. John Fowler. Complete program found elsewhere in this issue.  
7:30 p. m. Thursday—prayer

service in charge of Class leader, Mr. T. E. VanEvery.

Church of the Brethren  
Rev. Dewey Rowe, Pastor  
10 a. m. Sunday School.  
11 a. m. Preaching service.  
7 p. m. Junior League and Bible Hour.  
8 p. m. Preaching service.

Methodist Episcopal Church  
Thomas Rice, Minister  
There will be special Easter Sunday services all day Sunday beginning with an Easter breakfast by the young people sponsored by the Epworth League, at 6:30. Lyle Young, Ernest Bead, and Betty Heide are the committee.

Sunday school at 10 o'clock with Mrs. Glenn Hasler and Mr. Con Kelley superintending.  
Morning worship at 11 o'clock. The special music will consist of a number by the senior, intermediate and junior choirs accompanied by the orchestra with Mrs. Beulah Kelley directing the choir and Janet Kelley the orchestra. Mr. Walton Becker will give a vocal number "Open the Gates of the Temple." There will be baptisms and reception of members. Those desiring to unite with the church or who wish to be baptized consult with Mr. Rice. Sermon subject: "The Risen Lord." Miss Hope Kelley will play the organ.  
Senior League at 6 o'clock. Ernest Beadle will be the leader. The choir with Mrs. Beulah Kelley directing, will give a group of special Easter numbers at the evening service and by special request a brief communion service will be observed making a fitting close to the Easter Sunday services. All who desire to follow the risen Christ irrespective of Church membership are invited to the Lord's table.  
The speaker for the Holy week services this night will be Rev. Father Day. Following the usual custom an offering will be taken on the last day of the union services to defray expenses.  
The Good Friday service will be held in the Christian Church beginning at 1:30 and closing not later than 3 o'clock. Seven ministers will speak from 5-8 minutes on one of the seven sayings of Jesus from the cross.  
Service at Oronoko at 9 a. m. There was a splendid spirit and attendance at this service last Sunday morning.

Spafford Talks  
To Lions Club on  
Air Conditioning  
(Continued from page 4)  
ity, velocity and cleanliness of the air.  
And now we pass out of the domestic and industrial fields of air conditioning into what, for want of a better name I have always

## Spafford Talks To Lions Club on Air Conditioning

termed the pathological field, and the first item I see on the card in this field is ionization of the air. Ionizing machines have been used in the schools of St. Louis for a number of years and for years the schools of that city excelled all other cities in the United States in their health records. They claim that this was due to the ionizing machines. It may be true.

Air conditioning is finding its way into many hospitals. The heads of hospitals look for lack of progress in patients, for relapses and deaths during certain kinds of unfavorable weather conditions. With air conditioning they control the weather. The trouble has been that it costs too much and the man who invents a way to make air conditioning available to hospitals with little money, would probably make a fortune. Pathological air conditioning is said to comprise only five per cent of the air conditioning business. I think it is less than one per cent, but I predict that in years to come the volume of business done in pathological air conditioning will exceed that done in the domestic and industrial fields.

The next item on my card is pressure. Certain diseases are now treated by pressure. The patient is put into a steel tank like a large boiler and the pressure is turned on, one pressure for household's knee, I suppose, and another for corns and perhaps a higher pressure to squeeze a little more money out of the patient. But anyway the thing really works. When a deep sea diver comes up out of the water too suddenly he may be attacked by what is called the "bends." Proper application of air pressure not only cures the bends but prevents the attacks. This and many other ailments are treated successfully by air pressure.

Another use for air conditioning is to remove odors. But sometimes odors are put into the air for industrial or aesthetic reasons. At the stadium in Chicago, if there is a skating tournament with a background of northern pine trees, odors of the Northern pine may be put into the air by means of air conditioning equipment. It is a pageant with a spring scene, they may introduce the perfume of the spring flowers.

Sometimes for various industrial or pathological reasons gases may be removed from the air or added to it, such gases as neon, krypton, argon, oxygen, xenon, carbon dioxide, etc.

Open Windows  
One member asked me about that almost universal habit of opening windows of sleeping rooms all winter as well as in the summer. He had read an article I had in the South Bend Tribune. I shall not take the time to quote from the thousands of pages of records of laboratory experiments conducted in this and in several foreign countries, but so far as I can learn, there is no health reason for opening windows in sleeping rooms in

summer or winter except to let in cool air when you are too warm or to let in warm air if you are too cool. On the other hand there are many health reasons why windows should be closed at certain times both in summer and winter. I think more harm than good is done by keeping sleeping room windows open under all conditions. The old theory about lack of oxygen has been disproved. The old theory about persons giving off poisonous quantities of carbon dioxide has been disproved. As a matter of fact every house leaks air like a sieve. In the average house there are three to five complete changes of the total volume of air in the house every hour.

I have been asked if it is possible to attach an air conditioning system to a warm air furnace. Yes it is very easily done and the cost is quite low if you are not too exacting in your demands for accurate control of temperature, humidity, velocity and cleanliness of the air.  
You might be interested in this development in warm air furnaces. You know furnace manufacturers have tables printed showing the amount of air that goes through hot air pipes of various sizes. These tables have been used for fifty years and are still used. As an editor I proved them wrong. Many would not believe my figures so I persuaded an eminent consulting engineer to try them out. That was in 1923. He made his hot air pipes one inch smaller than was required by the tables of air capacity. The next year he cut them down another inch. He cut off an inch every year or so until now he is installing warm air furnaces with warm air conductor pipes only four inches in diameter, none larger. I predict that you will see warm air furnace installations with much smaller conductor pipes.  
Future of Electric Heating  
I have been asked about the fu-

ture of electric heating. It is coming. It is on its way, but there probably will not be any extensive use of electric heating with the present types of electric heating equipment. In my opinion many of the right way to utilize electricity for the heating of homes. But electricity has shown a steady decline in prices for the last thirty-five years and if the prices of electricity continue to go down at the same rate, electricity will compete with gas heating in the matter of price by 1941. This prediction is based on Chicago prices. But I look for great improvements in electric heating devices and methods of application. I am of the opinion that it will be possible some day to heat-homes by electricity more cheaply than by coal or oil.  
Heating by Radio  
I have been asked about heating by radio. I do not think it ever will be done. However, I said the same thing about wireless telegraphy and telephone. I had a chance to buy Marconi stock but I said Marconi was crazy. I might say, however, that there is an engineer in Chicago who controls the heat in several office buildings under his charge by means of radio, but he does not transmit heat by radio.  
How to Keep Cool on Hot Nights  
One man wants to know how to keep cool on hot nights. There are many ways depending upon how much you want to pay. One way is to fill three or four big washtubs full of ice and turn on the electric fan. You can buy a fine enameled cabinet to hold the ice if you want to and the water will drain to the sewer out in the back yard or into a receptacle. But that is not very economical for the average man. If it is a 95 degree night you probably would have to use a ton of ice costing four or five dollars to keep cool. You can buy refrigerating equipment suitable for the purpose for say \$2,000. You can buy a dozen electric kitchen refrigerators used for storing food for it would probably take that many to keep your

bed room cool on a very hot night. But the best way, I think, for homes such as we have in Buchanan is first to have the house well insulated, then learn how to manipulate the window shades, windows and doors to keep the warm air out, then use a basement fan and an attic fan to draw the air up through the house at night and discharge it through the attic.  
It is wonderful the inventions we have these days. I set my radio for seven o'clock so that it will turn on those exercises, you know how they are, one, two, three, bend, one, two three, bend, etc. So I get my exercise every morning, by getting up and turning the darn thing off. And if I keep on throwing good air after bad, as the colored people say in Birmingham, I am sure your president will have to get up and turn me off.

Small Furnace Pipes  
I have been asked if it is possible to attach an air conditioning system to a warm air furnace. Yes it is very easily done and the cost is quite low if you are not too exacting in your demands for accurate control of temperature, humidity, velocity and cleanliness of the air.  
You might be interested in this development in warm air furnaces. You know furnace manufacturers have tables printed showing the amount of air that goes through hot air pipes of various sizes. These tables have been used for fifty years and are still used. As an editor I proved them wrong. Many would not believe my figures so I persuaded an eminent consulting engineer to try them out. That was in 1923. He made his hot air pipes one inch smaller than was required by the tables of air capacity. The next year he cut them down another inch. He cut off an inch every year or so until now he is installing warm air furnaces with warm air conductor pipes only four inches in diameter, none larger. I predict that you will see warm air furnace installations with much smaller conductor pipes.  
Future of Electric Heating  
I have been asked about the fu-

ture of electric heating. It is coming. It is on its way, but there probably will not be any extensive use of electric heating with the present types of electric heating equipment. In my opinion many of the right way to utilize electricity for the heating of homes. But electricity has shown a steady decline in prices for the last thirty-five years and if the prices of electricity continue to go down at the same rate, electricity will compete with gas heating in the matter of price by 1941. You might be interested in this development in warm air furnaces. You know furnace manufacturers have tables printed showing the amount of air that goes through hot air pipes of various sizes. These tables have been used for fifty years and are still used. As an editor I proved them wrong. Many would not believe my figures so I persuaded an eminent consulting engineer to try them out. That was in 1923. He made his hot air pipes one inch smaller than was required by the tables of air capacity. The next year he cut them down another inch. He cut off an inch every year or so until now he is installing warm air furnaces with warm air conductor pipes only four inches in diameter, none larger. I predict that you will see warm air furnace installations with much smaller conductor pipes.

The things that come out in the Spring-Tri-la!

Advertisement for ISO-VIS motor oil featuring a cartoon illustration of a car with speech bubbles saying "COPPER!", "ROAD GRIT!", "STEEL!!", and "WATER!". Includes text: "8 SHORT MINUTES TO DRAIN AND REFILL WITH ISO-VIS Anti-Sludge Motor Oil"

It's likely that junk has collected in the winter-worn oil in your crankcase—water, copper and steel chips, road grit, rust and dirt. If you haven't been using ISO-VIS "D", Sludge has probably formed, too. The money-saving remedy is simple. Take 8 short minutes to have your crankcase drained and flushed. Then have it refilled with the correct grade of fresh, clean, long-lasting ISO-VIS "D", Standard's famous Anti-Sludge Motor Oil. It won't sludge. It will stay cleaner. And it will give perfect lubrication all of the time!
